RE: ANNUAL VOLUME FOR FISH PROPAGATION

DATE: 7-SEP-1989

Per a memo dated 1-15-88, volume is calculated in this way:

1. calculate changes per hour:
total flow into facility x 3600/facility volume(cf)=changes

2. calculate annual volume:
facility volume(AF) x changes x 8760=AFA

3. calculate volume given by permitted flow:
flow rate(cfs) x 1.9835 x 365 days=AFA

4. recommend lower figure

1. 3.18 cfs x 3600/ 1206612.0 cf = 0.00949

2. 27.7 AF x 0.00949 x 8760 = 2302.2 AFA

Re: Permit No. 82-7048

Dear Mr. Johnson:

With regard to your letter dated March 15, 1984, dealing with our water permit at the Red River pond, we would request that you grant us the use of the full 4 cfs that we originally requested.

The pond was designed and constructed to support 500,000 spring chinook salmon smolts, and any decrease in water flows results in a drastic reduction in capacity to rear these fish. We were not using the full amount of water at the time of measurement because a shortage of eggs in 1982 had reduced the number of fish being reared. It is planned to run the pond at full loadings in the future.

Also, the measurement was taken in late August, the lowest flow point of the year and at the outlet of the pond. We have the capacity to divert a flow exceeding 4 cfs through our intake structure and to discharge a like amount. The pond is a non-consumptive use, and all water is returned to Red River from the pond.

We would appreciate a chance to have you re-examine this application and grant us the permit for the 4 cfs requested.

RE: Mr. Parrish called in reference to my 3/15/84 letter. He stated that the 3.03 cfs was less than what the facilities normally operated at. He explained that for a short period in 1983, fish and game management had reduced the flows into the ponds because they had removed the fish. The fish facility normally operated at designed capacity of 4.0 cfs and the measuring device they had installed confirmed this amount.

He requested that a re-measurement be made.

Dear Ken:

With reference to a letter from your Department dated April 30, 1981, regarding conditions of approval of Water Permit No. 82-7048, we have completed the project. We have not, however, installed a water measuring device at the diverting works. The water is diverted into a small fish holding pond and returned to the stream. No water is consumed.

Because no water is consumed during the diverting process, we request that the condition of a measuring device at the diverting works be waived. If this condition cannot be waived, we request that an acceptable device installed at the outlet structure be substituted for a device at the diverting works.

Sincerely,

Rolando Salter

Gentlemen:

Enclosed is a copy of your approved Application for Permit No. 82-7048. We direct your attention to the conditions of approval as listed on the fourth page.

Please be advised that the Idaho Supreme Court has ruled that a water right initiated and/or put to beneficial use by aid of trespass on private property is invalid.

Be sure to note that a special condition requiring you to install and maintain a measuring device at your point of diversion has been placed upon your permit. We are enclosing a letter describing different types of measuring devices accepted by this office.
