Gentlemen:

One of the conditions of approval of your water Permit No. 82-7019 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before December 1, 1978. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise, the permit will lapse and be of no further force or effect.

MEMO

TO: File

FROM: Fred Eisenbarth

DATE: November 15, 1973

SUBJECT: Application No. 82-7019 (Orogrande Water Association)

On November 6, 1973, a conference was held to determine if Application No. 82-7019 should be approved or denied. As a result of this conference, the protestants withdrew their protest with the condition that the permit be subject to all prior water rights and that the applicant's permit will be junior to those rights held by the protestants which have been established by prior diversion and beneficial use.

The main issue discussed during the conference was that any further appropriation from the spring may injure those rights of prior use.

The application was changed to cover 23 families rather than the original 6, and a new and larger system would be installed. An Association would be formed with adopted rules in which to regulate the waters under the system. The protestants were informed of their protection under the "first in time, first in right" doctrine, and they then agreed to withdraw their protest.

Dear Mr. & Mrs. Russell:

This is to acknowledge receipt of your protest to issuance of a permit pursuant to the above referenced application. The following are the principle items we can consider at a conference and/or hearing in either approving or denying an application for permit (Section 42-203, Idaho Code):

1. Will the proposed use reduce the quantity of water under existing water rights?
2. Is the proposed water supply insufficient for the purposes intended?
3. Is the application made in good faith or for delay or speculative purposes?
4. Has the applicant sufficient financial resources with which to complete the project?

The Department may reject an application and refuse issuance of a permit, partially approve the permit, approve the permit for a quantity of water less than applied for, or approve the permit subject to special conditions.

A permit issued by this office is subject to all prior water rights and does not in any way convey or establish a right-of-way over private or governmental lands. Any right-of-way or easement must be obtained by the individuals concerned through action outside of the water right proceedings.
