SYSTEM DESCRIPTION & OTHER RIGHTS

Existing system is 4 years old; mostly fed by runoff and springs just west of pond. Water is pumped from river a few days a year to maintain pond freshness. Pond is long and narrow and covers ~2 acres, with an average depth of 5'. Existing outlet allows return flow to river via Gem Irrigation District draw ditch. Buried 4" line runs from river pump to the pond. This pump is the same diversion used for irrigation rights A02-00055A and A02-02113E for applicant. It is difficult to tell if the pump is in NENW or SENW, so listed one point in both tracts. Springs flow into pond as does runoff (mostly provided from irrigation use of Gem Irrigation District water), so all 3 sources listed in one application for an integrated system. Springs are different than applicant's permit 57-07520, which is for spring water (near river) for irrigation, heating, and cooling. Application 02-07468 is a duplicate of this application.

PROOF ACKNOWLEDGMENT LETTER

RE: PERMIT NO. 02-07468

Dear Permit Holder:

The department acknowledges receipt of the proof of beneficial use form submitted for the above referenced permit. The next step in the process of developing a water right is for the department to conduct a field examination to determine and confirm the use being made of the water.

If you have questions concerning this matter, please feel free to contact the WESTERN Regional Office in Boise at (208)334-2190.

Sincerely,

JULIE L. YARBROUGH

PROOF DUE NOTICE

RE: PERMIT NO. 02-07468

Dear Permit Holder:

One of the conditions of approval of the above referenced water permit was that proof of the extent of your beneficial use must be submitted to this office on or before February 1, 1997.

(See last page of your approved permit or your last approved extension request.) Enclosed is a form which when accompanied by the license examination fee or a complete field examination report prepared by a certified water right examiner may be used to submit the required proof.

If you have not fully completed your project, and you or a previous owner of this permit have not received a prior extension of time, you may request an extension of time if the delay is for reasonable cause as provided in Section 42-204, Idaho Code. If you have been prevented from proceeding by a governmental agency or by litigation which might bring title to the water in question, more than one extension of time can be granted. An extension of time request form is enclosed for your convenience.

Either an acceptable proof of beneficial use submittal or an acceptable request for an extension of time must be received by this department on or before the above described proof due date. If neither is received, the department will send you a lapse notice. Within sixty (60) days of the mailing of the lapse notice, the permit will no longer be of any force nor effect.

SINCERELY,

JULIE L. YARBROUGH
Senior Secretary

PERMIT APPROVAL NOTICE

RE: PERMIT NO. 02-07468

Dear Permit Holder:

Enclosed is a copy of your approved application for permit. Please be sure to thoroughly review the "CONDITIONS/REMARKS:" listing on the permit.

Enclosed is a form entitled "Instructions for Proof of Beneficial Use". Please read the instructions carefully since you must take further action to develop this permit into a licensed water right. Also enclosed is a form entitled "Proof of Beneficial Use". If your project is already completed, you should complete and submit this form immediately.

Note also that water shall not be diverted under this permit unless the flow of the Snake River exceeds established downstream minimum stream flows. In addition, there are many applications for permit for the use of Snake River water that are prior to your permit. If these rights are developed, and if established minimum stream flows are maintained, then no water would be available for this permit. You should carefully review this before making expenditures under this appropriation.

Sincerely,

Shelley W. Keen
Water Rights Supervisor
