License of Water Right No. 02-7344 Priority May 6, 1981 Amount 2.86 cfs

THIS IS TO CERTIFY, that Reg &/or Holly Meaker
of Grandview, Idaho, has complied with the terms and conditions of Permit
No. 02-7344 issued pursuant to Application for Permit dated May 6, 1981,
and has submitted proof to the Department of Water Resources on July 16, 1981,
that he has applied water to a beneficial use; an examination by the Department indicates that the works have a
capacity for the diversion of 4.34 cfs of water from Snake River,
tributary to Columbia River, and that the permit holder has applied to a beneficial use and
established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume
Irrigation	from <u>March 15</u> to <u>November 15</u> at <u>2.86</u> cfs and *		
	from _____ at _____ cfs and _____		
	from _____ at _____ cfs and _____		

(both dates inclusive)

Subject, however, to the condition that no more than 2.86 cfs of water be diverted at any one time, and
that the amount of water so diverted and to which such right is entitled and confirmed for the purpose
aforementioned and is limited to the amount which can actually be beneficially used and shall not exceed
* _____ acre feet per year, said waters to be diverted within the Government Lot 9 (SE 1/4 SW 1/4),

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 02-7344, and said application is hereby approved.

1. Approval of said application is subject to the following limitations and conditions:

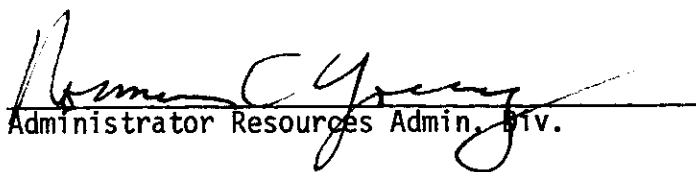

- a. SUBJECT TO ALL PRIOR WATER RIGHTS.
- b. Proof of construction of works and application of water to beneficial use shall be submitted on or before July 1, 19 86.
- c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.
- d. Other:

An access port or other device as specified by the Department shall be installed by the permit holder to provide for the installation of measuring equipment and the determination of the rate of diversion by the Department.

The issuance of this permit in no way grants any right-of-way or easement across the land of another.

Water shall not be diverted under this permit unless the flow of the Snake River at the U.S. Geological Survey stream gaging station at Murphy exceeds 3,300 c.f.s. and at Weiser exceeds 4,750 c.f.s.

Witness my hand this 16th day of July, 1981.

RE: Water Right No. A02-07344

Dear Water Right Holder(s):

On June 8, 1992, the department sent you a letter which directed you to immediately cease diverting water under the above referenced water right, since the minimum stream flow of the Snake River in the amount of 4,750 cubic feet per second (cfs) measured near Weiser was not being satisfied.

The flow of the Snake River at Weiser is now above 4,750 cfs. You are, therefore, authorized to again divert water under your water right. If the minimum stream flow is not met later this year, however, the department will again notify you to temporarily cease diversion.

Thank you for your cooperation in this matter. Please feel free to contact L. Glen Saxton (phone: 208-327-7955) or Gary Spackman (phone: 208-327-7946) of my staff if you have questions.

Sincerely,

RE: Water Right No. A02-07344

Dear Water Right Holder(s):

On May 19, 1992, the department sent you a letter advising that you might be required to temporarily cease diverting water from the Snake River or its tributaries if the established minimum stream flow of the Snake River in the amount of 4,750 cubic feet per second measured near Weiser is not satisfied or likely will not be satisfied.

The flow of the Snake River at Weiser is now less than 4,750 cfs. You are, therefore, directed to immediately cease diverting water under the above referenced water right and to not resume use until authorized by the department.

Past flow records show that the duration of seasonal low flow periods typically last several days to a week. Since your use of water is extremely important to you and since mail notification includes a delay associated with mail delivery time, feel free to call the toll-free telephone number 1-800-451-4129 to determine when you are again authorized to divert and use water under your water right. Please use this phone number only in connection with resumption of use.

You need to be aware that Section 42-351, Idaho Code, provides for penalties of up to \$100 per day for unauthorized diversion.

Thank you for your cooperation in this matter. Please feel free to contact L. Glen Saxton (phone: 208-327-7955) or Gary Spackman (phone: 208-327-7946) of my staff if you have questions.

RE: Water Right No. A02-07344

Dear Water Right Holder(s):

Department water right records show that you divert water from the Snake River or its tributaries under a water right that has a priority date later than December 29, 1976. This is the priority of the established minimum stream flow of the Snake River at the Weiser Gage (Weiser) in the amount of 4,750 cubic feet per second.

Because of the continuing drought conditions in the Snake River Basin, department hydrologists project that during 1992, there could be periods when the required minimum flow will not be satisfied due to low flows of the Snake River. The department urges you to not divert at a higher rate than authorized by your water right and to not use your right in any manner different than authorized. In addition, when the minimum flow will not be satisfied or is not being satisfied, you are required to cease diverting water under your water right, because your right is of later priority than the minimum stream flow at Weiser.

If the department determines the minimum flow will not be satisfied, the department will advise you and will provide as much lead time as possible in requiring that you temporarily cease your diversion of water. The greatest likelihood for this to occur is during a period from mid-June to late June.

While the department expects good cooperation from junior water right holders, water users should be aware that Section 42-352, Idaho Code, provides for penalties of up to \$100 per day for unauthorized diversions of water.

The department has contacted both the Idaho Power Company and the U.S. Bureau of Reclamation with respect to the timing of storage releases from upstream reservoirs for flow enhancement

purposes. This type of coordination could minimize the impact on existing water users and reduce the need to curtail diversions.

The department has scheduled public information meetings relative to this potential regulation as follows:

Mountain Home - June 4, 1992 - 10:00 a.m. - gymnasium at
North Elementary School, 290 E. 12th N.

Caldwell - June 4, 1992 - 7:00 p.m. - Ballroom in the
Student Union Building, Albertson College of Idaho,
2112 Cleveland

If you have questions concerning this letter or wish to provide the name of a different contact person or address to receive department correspondence, please contact the department.

Sincerely,

Dear Mr. and Mrs. Meaker:

A representative of this Department has made an examination of the works covered by your Permit No. 02-7344, and has found the following:

Amount of water that can be recognized as beneficially used under Idaho law: 2.86 cfs Source: Snake River

The maximum quantity diverted shall not exceed 1389.8 acre feet per year.

Point(s) of diversion: Government Lot 9(SE $\frac{1}{4}$ SW $\frac{1}{4}$), Sec. 34, Twp. 5S, Rge. 4E, Owyhee County

Beneficial use: Irrigation of 418 acres within the W $\frac{1}{2}$ SW $\frac{1}{4}$, SE $\frac{1}{4}$ SW $\frac{1}{4}$, Sec. 26; W $\frac{1}{2}$ NE $\frac{1}{4}$, W $\frac{1}{2}$, W $\frac{1}{2}$ SE $\frac{1}{4}$, Sec. 35; Twp. 5S, Rge. 3E

Priority date established: May 6, 1981

Conditions (if any): This right when combined with all other rights shall provide no more than 0.02 cfs per acre nor more than 5.0 afa per acre for the lands above.

If you do not concur with these findings please contact us within 10 days, otherwise a water license will be issued as set forth above.

SUBJECT: *Review*

The land for Meaker is covered by three water rights from the Snake River. One of the diversions is from the Idaho Power Canal; the other two from the reservoir itself. Other water rights for this land are apparently from Shoofly Creek or tributaries to it.

The irrigated acres for 02-0071, and 02-4027, were determined with the 1974 orthophoto quad of Grand View. The additional irrigated land under 02-7344 was identified in the 1981 field exam utilizing a 1979 ASCS aerial photograph. The period of use for 02-4027 from the Idaho Power Canal is limited in period of use by the Idaho Power Agreement.

Although the diversion rate from the Idaho Power Canal was measured in 1981 and the earlier measurement in 1968 showed a larger diversion, the 1968 measurement is more acceptable because it was a measurement in the canal as opposed to a measurement at the discharge. The latter technique was used in ^{the} 1981 inspection. The 100 horsepower Westinghouse motor with Johnson vertical pump that is used by Meaker is the same pump and motor identified in the Department's April 29, 1969 letter of the 1968 examination. In 1968 this pump and motor had a discharge of 10.1 cfs. Under the existing agreement Meaker is to receive one-half of the discharge from this pump and motor. As such, the amount of 5.0 cfs claimed for 02-4027 is acceptable.

Meaker apparently has an additional agreement still operating for the right of .5 cfs. This amount of water is apparently pumped by another water user in exchange for right of way through the land Meaker now owns. This amount is also acceptable.

MICROFILMED

To Meaker Files 02-0071, 02-4027, 02-7344

The additional duty from the Snake River for this land is picked up by 02-7344. Although the system used by Meaker has a diversion capacity of 4.34 cfs, the amount recommended and licensed for this right is 2.86 cfs. To date this would bring Meaker's water rights to 418 acres and 418 miners inches from the Snake River.

SUBJECT:

The claimant has apparently developed the water rights from the Snake River for this land in stages. The predecessor for this land was Owyhee Grazing Association which received a portion of permit 02-2176. An examination was done for this right but proof of beneficial use was never submitted. Consequently the permit was cancelled. The exam did, however, verify that water was used on this land May 1, 1972.

The transfer of the permit 02-2176 carried with it a privilege to operate one of the three pumps in the Idaho Power Canal in Section 33, Twp. 5S, Rge. 4E in the amount of 5.0 cfs. This amount was to have been a 50% share in that pump. A field examination for 02-2176 showed that more than 10.0 was diverted. Therefore, 5.0 cfs is recommended for 02-4027.

The number of acres for 02-4027 was determined by using a field exam for 57-2327. The aerial photo used for that examination showed 323 acres were irrigated at the time of the aerial photo. As a result that number of acres is recommended for 02-4027.

Apparently through another contractual agreement the claimant is the successor to a privilege to have .5 cfs from the Snake River in the same canal. The time of this agreement would be such that the same 323 acres would have been irrigated.

MICROFILMED

4/02/82

Finally, the third right, 02-7344, brings the present allotment of water to the acreage now irrigated. The earlier rights totalled less than 1 inch per acre. As a result this third right includes water on 95 acres that was not heretofore irrigated and about .1486 inches per acre for the previous 323 acres. A work sheet in file 02-4027 illustrates the recently irrigated 95 acres. The amount of water for 02-7344 will therefore be 2.86 cfs.

The total diversions from the Snake River then for these rights would be 418 inches for 418 acres.

ACTION OF THE DIRECTOR, DEPARTMENT OF WATER RESOURCES

This is to certify that I have examined Application for Permit to appropriate the public waters of the State of Idaho No. 02-7355, and said application is hereby APPROVED.

1. Approval of said application is subject to the following limitations and conditions:

a. SUBJECT TO ALL PRIOR WATER RIGHTS.

b. Proof of construction of works and application of water to beneficial use shall be submitted on or before September 1, 19 86.

c. The rate of diversion, if water is to be used for irrigation under this permit, when combined with all other water rights for the same land shall not exceed 0.02 cubic feet per second for each acre of land.

d. Other: An access port or other device as specified by the Department shall be installed by the permit holder to provide for the installation of measuring equipment and the determination of the rate of diversion by the Department.

The issuance of this permit in no way grants any right-of-way or easement across the land of another.

Water shall not be diverted under this permit unless the flow of the Snake River at the U.S. Geological Survey stream gaging station at Murphy exceeds 3,300 cfs and at Weiser exceeds 4,750 cfs.

Witness my hand this 15th day of September, 19 81.

THIS IS TO CERTIFY, that CLINTON W. GINGRICH
 of Nampa, Idaho, made application for a permit to appropriate the public waters of
 the State of Idaho, dated November 18, 1963; that Permit 31535 was issued pursuant
 to said application; that the proposed works were completed on or about April 1967
 with a storage/or carrying capacity of 7.34 c.f.s., said works consisting of pump,
motor and earth canal; and that on November 6, 1967
 proof was made to the satisfaction of the State Reclamation Engineer, of the beneficial use of 1595
 acre feet per season, with a maximum rate of diversion of 6.38 cubic feet per second of the waters
 of Snake River, tributary of Columbia River,
 for the purpose of irrigation from April 1 to October 31;
 and for _____ from _____ to _____; and for
 _____ from _____ to _____; and that the use
 of said waters has been made in accordance with the laws of Idaho, and is hereby confirmed by the State Recla-
 mation Engineer and entered in the records of the Idaho Department of Reclamation: the point of diversion is
 located in Lot 9 xx xx Sec. 34, T. 5 S, R. 4 E, B.M., and
 other additional points _____, in the County of
Owyhee; and that the amount of water to which such right is
 entitled and which is hereby confirmed, for the purposes aforesaid, is limited to an amount actually beneficially
 used for said purposes and shall not exceed 1595 acre feet per year.

WATER RIGHT LICENSE

License of Water Right No. 02-7357 Priority July 15, 1981 Amount 6.8 cfs

THIS IS TO CERTIFY, that Howard J. Field
of Grand View, ID, has complied with the terms and conditions of Permit
No. 02-7357 issued pursuant to Application for Permit dated July 15, 1981,
and has submitted proof to the Department of Water Resources on August 27, 1981,
that he has applied water to a beneficial use; an examination by the Department indicates that the works have a
capacity for the diversion of 7.61 cfs of water from the Snake River,
tributary to the Columbia River, and that the permit holder has applied to a beneficial use and
established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume
Irrigation	from <u>March 15</u> to <u>Nov 15</u>	at <u>6.8</u> cfs and	<u>1700.0</u> acre feet
	from _____ to _____	at _____ cfs and	
	from _____ to _____	at _____ cfs and	

(both dates inclusive)

Subject, however, to the condition that no more than 6.8 cfs of water be diverted at any one time, and
that the amount of water so diverted and to which such right is entitled and confirmed is for the purpose
aforementioned and is limited to the amount which can actually be beneficially used and shall not exceed
1700.0 acre feet per year, said waters to be diverted within the (GL 10) NSW Section 34,
Twp 5S, Rge 4E in the County of Owyhee

Description and location of place of use:

Twp.	Range	Sec.	NE¼				NW¼				SW¼				SE¼				Totals

		26	16	10	40	38	37	40	38	29	6	18	4	2					278

Total number of acres irrigated 340

Water shall not be diverted under this license unless the flow of the Snake River
at the U.S. Geological Survey stream gaging station at Murphy exceeds 3,300 cubic
feet per second and at Weiser exceeds 4,750 cubic feet per second.

This right when combined with right 02-0053 shall provide no more than a total
diversion of 6.8 cfs nor more than .02 cfs per acre for the lands above.

NOTE: Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho
Code, or the applicable Idaho Law. This right may be forfeited by five years of non-use.

The right to the use of the water hereby confirmed is restricted and appurtenant to the lands or place of use
herein described, as provided by the laws of Idaho.

STATE OF IDAHO
DEPARTMENT OF WATER RESOURCES
Section 42-225a, Idaho Code

CLAIM TO A WATER RIGHT

Under the provisions of Section 42-225a, Idaho Code, a person may file a claim to a right to use water which has been established by diversion and application to beneficial use. **The filing of this claim does not confirm the water right but will serve for information purposes only.** It may, however, become the basis for future adjudication of the water right by the Court.

Notice is hereby given that Reg Meaker (name of claimant)
of Rt. B, Box 328, Grandview, Idaho (mailing address), claims a right to the diversion and beneficial use of the public water of the State of Idaho

The extent and nature of said claim is as follows:

(1) Describe source of water: (name of stream, lake, spring, etc., or ground water) Snake River
tributary to, Columbia

(2) Describe the purpose for which the water has been used and the time during the year when you have used the right claimed:

Amount	<u>5.0 cfs</u>	Use	<u>Irrigation</u>	Period of Use: From	<u>March 15</u>	To	<u>November 15</u>
Amount		Use		Period of Use: From		To	
Amount		Use		Period of Use: From		To	
	(cfs, gpm or a/f)		(dom., irri., stock, etc.)				(both dates inclusive)

(3) Total quantity of water claimed: 5.0 cubic feet per second, or _____ acre feet per annum, and/or _____ gallons per minute.

(4) Priority claimed: (the date water was first applied to beneficial use) May 1, 1962

A claim is not acceptable on a ground-water source with a priority later than March 25, 1963 or on a surface-water source with a priority later than May 20, 1971. An exception to this rule is that a claim may be filed on domestic use from a ground-water source.

(5) A) Point of diversion: (give location of point where water is diverted from its source)

(Lot 5) NE 1/4 SE 1/4, Sec. 33 Twp. 5S Rge. 4E B. M. County of Owyhee
Additional points of diversion: _____

B) Describe means of diversion of water: (pump and pipeline, well, diversion dam, reservoir, length of ditch and field, etc.) Give sizes and capacities; be as specific as possible. 100 hp pump, 30 inch penstock 300 feet to ditch then to Bybee Canal to headgate and then irrigation by gravity flow.

(6) A) Describe location of use by listing number of irrigated acres within each 40-acre tract in appropriate box. If use is not for irrigation, place an "X" in appropriate box to show location.

Dear Mr. & Mrs. Meaker,

Re: Permit No. 02-7344

Enclosed is a copy of your approved Application for Permit. We direct your attention to the conditions of approval on the fourth page.

Be sure to note the special condition requiring you to install a measuring device, or an access port to provide for the installation of measuring equipment by the Department. Enclosed please find a list of measuring device options, and specifications for the installation of the access port.

The exercise of this permit may also be affected by the Supreme Court's review of the case of Idaho Power Company vs. State of Idaho, et al., Ada County Civil No. 62237, currently being appealed to the Supreme Court of Idaho. Since the use of water under your permit may affect the flows in the Snake River between Milner Dam and Hells Canyon the final decision in this case may determine to what extent the exercise of your permit is subject to water rights of Idaho Power. While the Supreme Court is reviewing this case, Idaho Power Company has not filed a specific protest to your permit. However, the Department of Water Resources has been advised that the Power Company is not waiving any of its rights to contest or limit the exercise of your permit or subsequent license.

Note also that water shall not be diverted under this permit unless a base flow of the Snake River at the U.S. Geological Survey stream gaging station at Murphy exceeds 3,300 c.f.s. and at Weiser exceeds 4,750 c.f.s. In addition, there are many applications for permit for the use of Snake River water that are prior to your permit. These applications have been filed for the irrigation of lands that the applicants are attempting to obtain under the Federal Land Laws such as Desert Entry and Carey Act. If these lands are developed, and if the base flow is maintained, then no water would be available for this permit. Therefore, you should carefully consider these facts before making any expenditures for the construction of your system.

Sincerely,

DAVID R. TUTHILL, JR., P.E.
