(Name) (Address)

State of Idaho, deposes and says:

That he is the holder, or the duly authorized agent of the holder*, of Permit to Appropriate the Public Waters of the State of Idaho No. 02-7258.

That under the terms and conditions of said permit, work thereunder was required to be completed on or before January 1, 19 83.

That I have performed the following work toward developing said permit: Sagebrush cleared & land leveled for hay field and vineyard. New road cut down cliff to river. 1000' water line buried from river to top of cliff and from cliff top to diversion point next to Hiway Drip system delivered and ready for installation in vineyard, posts and support wires ordered. Floating dock constructed as carrier for pumps. Pumps purchased ready for installation. Cement base poured and cement dead man in place up river with cable attached to hold float in place.
(This information must be provided on all extension requests, if none, so state.)
\$ 2500.00 on land
Costing \$ 7500.00 water system

That I have been unable to complete the remainder of the work within the required time for the following reasons: Emergency surgery, followed by stroke causing temporary paralysis in Spring of 82. Delays finding men with equipment with time to do our job due to their Spring planting. Man who finally came to help worked two afternoons, then broke his leg and had to quit. Owner recovered enough to continue work slowly due to weakness. Early rains and run-off from spring above new road have made ground too muddy to use tractor to launch float into river, or to finish installing irrigation pipes into fields.

I ask the Department of Water Resources to extend the time for the completion of obligations under said permit to January 1, 19 85.

License of Water Right No. 02-7258 Priority October 27, 1977 Amount .15 cfs

THIS IS TO CERTIFY, that William P. &/or Mildred D. Reid
of Marsing, Idaho, has complied with the terms and conditions of Permit
No. 02-7258 issued pursuant to Application for Permit dated October 27, 1977,
and has submitted proof to the Department of Water Resources on November 8, 1984,
that he has applied water to a beneficial use; an examination by the Department indicates that the works have a
capacity for the diversion of 0.15 cfs of water from Snake River,
tributary to Columbia River, and that the permit holder has applied to a beneficial use and
established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume
Irrigation	from <u>March 15</u> to <u>November 15</u>	at <u>0.15</u> cfs and	<u>60.0</u> acre feet
	from _____ to _____	at _____ cfs and	
	from _____ to _____	at _____ cfs and	

(both dates inclusive)

Subject, however, to the condition that no more than 0.15 cfs of water be diverted at any one time, and
that the amount of water so diverted and to which such right is entitled and confirmed is for the purpose
aforementioned and is limited to the amount which can actually be beneficially used and shall not exceed
60.0 acre feet per year, said waters to be diverted within the Gov. Lot 4 (SW 1/4 SE 1/4)

CONDITIONS OF APPROVAL

- a. Modifications to or variance from this license must be made within the limits of Section 42-222, Idaho Code, or the applicable Idaho Law. This right may be forfeited by five years of non-use.
- b. The right to the use of the water hereby confirmed is restricted and appurtenant to lands or place of use herein described, and is subject to all prior water rights, as provided by the laws of Idaho.
- c. Any water right confirmed in this license for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this license and shall not give rise to any right or claim against any future rights to the use of water other than hydropower, within the State of Idaho initiated later in time than the priority of this license.

Water shall not be diverted under this right unless the flow of the Snake River exceeds established downstream minimum stream flows.

RE: Water Right No. 02-07258

Dear Water Right Holder(s):

On May 19, 1992, the department sent you a letter advising that you might be required to temporarily cease diverting water from the Snake River or its tributaries if the established minimum stream flow of the Snake River in the amount of 4,750 cubic feet per second measured near Weiser is not satisfied or likely will not be satisfied.

The flow of the Snake River at Weiser is now less than 4,750 cfs. You are, therefore, directed to immediately cease diverting water under the above referenced water right and to not resume use until authorized by the department.

Past flow records show that the duration of seasonal low flow periods typically last several days to a week. Since your use of water is extremely important to you and since mail notification includes a delay associated with mail delivery time, feel free to call the toll-free telephone number 1-800-451-4129 to determine when you are again authorized to divert and use water under your water right. Please use this phone number only in connection with resumption of use.

You need to be aware that Section 42-351, Idaho Code, provides for penalties of up to \$100 per day for unauthorized diversion.

Thank you for your cooperation in this matter. Please feel free to contact L. Glen Saxton (phone: 208-327-7955) or Gary Spackman (phone: 208-327-7946) of my staff if you have questions.

Sincerely,

RE: Water Right No. 02-07258

Dear Water Right Holder(s):

On June 8, 1992, the department sent you a letter which directed you to immediately cease diverting water under the above referenced water right, since the minimum stream flow of the Snake River in the amount of 4,750 cubic feet per second (cfs) measured near Weiser was not being satisfied.

The flow of the Snake River at Weiser is now above 4,750 cfs. You are, therefore, authorized to again divert water under your water right. If the minimum stream flow is not met later this year, however, the department will again notify you to temporarily cease diversion.

Thank you for your cooperation in this matter. Please feel free to contact L. Glen Saxton (phone: 208-327-7955) or Gary Spackman (phone: 208-327-7946) of my staff if you have questions.

RE: Water Right No. 02-07258

Dear Water Right Holder(s):

Department water right records show that you divert water from the Snake River or its tributaries under a water right that has a priority date later than December 29, 1976. This is the priority of the established minimum stream flow of the Snake River at the Weiser Gage (Weiser) in the amount of 4,750 cubic feet per second.

Because of the continuing drought conditions in the Snake River Basin, department hydrologists project that during 1992, there could be periods when the required minimum flow will not be satisfied due to low flows of the Snake River. The department urges you to not divert at a higher rate than authorized by your water right and to not use your right in any manner different than authorized. In addition, when the minimum flow will not be satisfied or is not being satisfied, you are required to cease diverting water under your water right, because your right is of later priority than the minimum stream flow at Weiser.

If the department determines the minimum flow will not be satisfied, the department will advise you and will provide as much lead time as possible in requiring that you temporarily cease your diversion of water. The greatest likelihood for this to occur is during a period from mid-June to late June.

While the department expects good cooperation from junior water right holders, water users should be aware that Section 42-352, Idaho Code, provides for penalties of up to \$100 per day for unauthorized diversions of water.

The department has contacted both the Idaho Power Company and the U.S. Bureau of Reclamation with respect to the timing of storage releases from upstream reservoirs for flow enhancement

purposes. This type of coordination could minimize the impact on existing water users and reduce the need to curtail diversions.

The department has scheduled public information meetings relative to this potential regulation as follows:

Mountain Home - June 4, 1992 - 10:00 a.m. - gymnasium at
North Elementary School, 290 E. 12th N.

Caldwell - June 4, 1992 - 7:00 p.m. - Ballroom in the
Student Union Building, Albertson College of Idaho,
2112 Cleveland

If you have questions concerning this letter or wish to provide the name of a different contact person or address to receive department correspondence, please contact the department.

Dear Mr. and Mrs. Reid:

Re: Permit No. 02-7258

Enclosed is a copy of the approved request for extension of time. The time within which to submit the statement of beneficial use is extended to January 1, 1985.

Also enclosed is the statement of beneficial use postcard submitted July 23, 1981 since the department has granted an extension of time for completion of the project. The department will notify you when it is time to resubmit the statement.

In connection with the development of a water right under this permit, the department wishes to call to your attention an Idaho Supreme Court decision issued in November 1982 which likely could affect your future use of water.

The decision in the case of Idaho Power Company vs the State of Idaho et al stated in part that Idaho Power Company's use of water for power generation purposes at the Swan Falls dam on the Snake River is not subordinated to upstream depletion by later in time uses. The question of whether Idaho Power's 8,400 cfs water right at Swan Falls dam has been diminished by subsequent development, however, was remanded back to district court for determination. The findings of the district court could restrict water availability or require compensation to Idaho Power Company for uses developed later in time than Idaho Power Company's water right at Swan Falls dam.

Sincerely,

RITA I. FLECK
Sr. Secretary

Dear Mr. &/or Mrs. Reid:

Your approved copy of Application for permit No. 02-7258 is enclosed and we direct your attention to the conditions of approval on the fourth page.

You must also be aware that there are many applications for permit for the use of Snake River water that are prior to your permit. These applications have been filed for the irrigation of land that the applicants are attempting to obtain under the Federal Land Laws such as Desert Entry and Carey Act. If these lands are developed and if a base flow is maintained in the Snake River as is presently recommended in the State Water Plan then no water would be available for this permit. Therefore, you should consider carefully these facts before you make any expenditures for the construction of your system.

If you have any questions, please let us know.

Sincerely,

BOBBY D. FLEENOR
