License of Water Right No. 02-7088 Priority October 15, 1971 Amount 0.13 cfs

THIS IS TO CERTIFY, that Dibrell C. Stowell
of Colorado Springs, Colorado, has complied with the terms and conditions of Permit
No. 02-7088 issued pursuant to Application for Permit dated October 15, 1971,
and has submitted proof to the Department of Water Resources on October 16, 1981,
that he has applied water to a beneficial use; an examination by the Department indicates that the works have a
capacity for the diversion of 0.13 cfs of water from Snake River,
tributary to Columbia River, and that the permit holder has applied to a beneficial use and
established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume

Re: Permit No. 02-7088

Telecon your office 22 Nov 76

Dear Sir,

As the result of increasing fuel costs, the closing of Snake River to new applicants, and my recent thinking of alternatives to water the 12 dry acres on this farm, I sincerely request an extension of time to obtain final proof of water permit No. 02-7088.

A quick review of the requirement for this request is as follows. I purchased this farm in 1971. The previous owner watered by furrow and flood. Therefore about 12 acres along the river bank remained dry due to rolling terrain.

By agreement with my share crop farmer I installed a sprinkler system using the Sen irrigation water. Thus under selected

crop rotations we were able to irrigate most of the 12 acres. So the dry farmable acres have been reclaimed however due to the nature of the sandy Cencove soil series as described in the Soil Survey of Canyon Area, Idaho, USDA + SCS, July 1972, we do need ^{an} addition quantity of water ^{for now crops as potatoes.} to properly irrigate this property. I only recently obtained the above soils report. ~~and~~ It confirmed what we were beginning to suspect that the soil water holding capacity is low (3.75 to 5 inches available water). Optimum irrigation requires frequent irrigations to maintain available water.

As you know the last 2 or 3 springs have been extremely windy and due to the light texture of these soils we have experienced wind erosion during these storms. Having this water available, even in the small amount, prior to the "turn on" of the Gem Water, would be quite effective in control of blowing areas.

Last is the need to use a part of the additional water to irrigate the dry sandy river bank area and put this narrow strip to permanent pasture. This would control weeds and blowing.

After a hard review of the problem this fall I see these alternatives.

1. File a new permit for a well to be placed near the main pumps and distribution line. Power is available but finding a quantity of quality water has some risk.
2. File a new permit on springs that exist along river bank. Springs flow nearly all along the bank (greatly increase during summer) and there are places where a pump could be placed. Immediate problem is power.
3. Secure an extension of time for permit # 02-7088. additional time would permit a study of these alternatives hopefully leading to the selection of the most economical solution.

My last point before closing is that I would propose to farm the place somewhat differently than my tenant farmer. I am in the Air Force and do plan to retire in the next few years. I would use a small portable pump during the growing season as required.

4.
to pump the 0.24 cu ft/sec requested in this
water permit. My tenant farmer is not too
interested and therefore I have not permanently
invested in a portable pump as required
by item 7 on the proof of application form,

However in summary, I do need the water
to bring this farm up to full potential and
to control blowing sand in the early spring.
Since the Snake river may be closed to new
filing, I do request a time extension to
study the alternatives, keeping permit no.
02-7088 as a viable option.

Sincerely
Dibrell C. Stowell

Dear Mr. Stowell:

One of the conditions of approval of your water Permit No. 02-7088 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before December 1, 1976. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.
