PROPOSED CLASSIFICATION DECISION

The following described lands have been examined and found suitable for agricultural development by desert land entry: It is hereby recommended to classify the following described lands as suitable for entry under the Desert Land Act of March 3, 1877 (19 Stat. 377: 43 U.S.C. 321-323) as amended: 43 CFR Subpart 2227:

T. 5 S., R. 8 E., B.M.

312.50 acres land

T. 5 S., R. 8 E., B.M.

Section 30: Lots 1, 2, 3, 4, E $\frac{1}{4}$ W $\frac{1}{4}$

305.12 acres

m r s
D m 2

These lands are located five miles west of Hammett, Idaho. Legal access is available from State Highway 20-26-30, which intersects the applications.

The topography is chiefly level to gently rolling, with some isolated steep areas. Elevations range from a low of 2,800 feet to a high of 2,910 feet. The drainage is generally south, with east and west exposures.

The soils are of the Garbutt series. They are of medium depth to deep silt loams overlying sand and gravel. There is no evidence of harmful amounts of soluble salts or alkali, and the soils are considered adequate for the production of agricultural crops common to this area.

Wild fires have occurred repeatedly on these lands, and have altered the vegetation. A portion of these lands has been seeded to crested wheatgrass. The remaining lands support a cover of primarily cheatgrass and annual weeds. This area is grazed spring and fall by cattle, and also utilized for sheep trailing. The carrying capacity of this land is rated at 6 acres per A M. Allowance and ultimate patent will result in a reduction in the grazing privileges of the users. The applicants will be required to reimburse the United States for the loss of the crested wheatgrass seeding.

Livestock movement through this area is vital to the industry. Therefore, a 100 foot strip south and west of State Highway 20-26-30 (Right-of-Way E 053630) will be reserved for stock movement.

The applicants propose to develop a pumping plant on the Snake River and lift the water approximately 400 feet to the above lands. From an engineering and economic standpoint this project appears feasible. Since the development of a pumping plant at this point on the Snake River may involve important environmental considerations, allowance will not be granted on these applications until the applicants have obtained an approved right-of-way.

Dear Mr. & Mrs. Bladdsoe:

We acknowledge receipt of the affidavit submitted as proof of beneficial use for the above referenced permit.

Before a license can be issued, a field examination must be made by a representative of this Department. We cannot tell during which part of the irrigation season this examination will be made, however, our examiner will try to contact you at the time he makes the exam so that you may show him the system.

If you have any questions concerning the field exam, please contact our District Office in Boise.

Sincerely,

D. Darlene Reich
Water Rights Supervisor

Dear Ladies and Mr. Bledsoe:

One of the conditions of approval of your water Permit No. 02-7075 (see last page of your approved permit) was that evidence of the extent of development be submitted ~~March 1, 1976~~ application of water to beneficial use to this office on or before March 1, 1976. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

DECISION

Leonard F. Bledsoe, I-1300 :
Emma L. Bledsoe, I-1299 : Desert Land Applications
Donna F. Bledsoe, I-1604 :

Bledsoe Project Held for Approval

Applications Held for Allowance

Water Permits Required

Right-of-Way Required

Reimbursement of Range Reseeding Costs Required

Execution of Common Agreement Required

On December 24, 1970, the Boise District Manager, BIM, issued an Initial Classification Decision classifying the lands of the above three applications as suitable for entry under the Desert Land Act.

The applicants propose to construct a common pumping plant site, penstock and mainline canal to bring the water from Snake River to their entry lands. The proposed irrigation facilities cross intervening public lands over which a right-of-way grant must be acquired through application to this Bureau. An information brochure explaining how an application for a right-of-way for irrigation facilities must be filed is enclosed. Both the letter of application and the maps must be signed by all the applicants. The exact location chosen for the common pumping site, penstock and mainline canal should be discussed with the Boise District Manager, prior to the right-of-way survey to avoid any necessity for later changes in location because of management or environmental factors. Also, the map attached as "Exhibit A" to the preliminary agreement indicates that the applicants plan to construct a water distribution system designed to serve the three entries as one large tract. The system should show capability to serve the three entries as independent units.

The record shows that the applicants have applied to the State Department of Water Administration for a water permit (application 02-7075). Arrangements should be made to have 4 copies of the approved permit sent to this office (1 copy for each desert land application and 1 copy for the right-of-way application yet to be filed).

2 7075

The Bledsoe Project is held for approval as a source of water for the above three desert land applications only, and the three applications are held for allowance pending the receipt in this office of the following:

1. A right-of-way application for their common irrigation facilities as discussed above.
2. Evidence of water right as discussed above.
3. Reimbursement to the United States prior to allowance of range improvement costs in the following amounts, checks made payable to the "Bureau of Land Management":

Leonard F. Bledsoe, I-1300	\$200.00
Emma L. Bledsoe, I-1299	360.00
Donna F. Bledsoe, I-1604	20.00

4. A certified copy of an executed, acknowledged and recorded final legal agreement similar to the "preliminary agreement" previously submitted.

Failure to meet these requirements within 60 days of receipt of this decision (except for the reimbursement of range reseeding costs) will result in the final rejection of the applications and the cases will be closed without further notice. If additional time is needed, a written request, received ahead of the expiration of the 60 days allowed, will receive immediate consideration.

The right of appeal to the Board of Land Appeals, Office of the Secretary, is allowed in accordance with the regulations in 43 CFR Part 1840. However, if an appeal is to be taken, the notice of appeal must be filed in this office (not the Board) within 30 days of receipt of this decision so that the case file can be transmitted to the Board. To avoid summary dismissal of the appeal, there must be strict compliance with the regulations.
