CONDITIONS OF APPROVAL

a. Modifications to or variance from this license must be made within the limits of Section 42-222, **Idaho Code**, or the applicable Idaho Law. This right may be forfeited by five years of non-use.

b. The right to the use of the water hereby confirmed is restricted and appurtenant to lands or place of use herein described, and is subject to all prior water rights, as provided by the laws of Idaho.

c. Any water right confirmed in this license for hydropower purposes shall be junior and subordinate to all rights to the use of water, other than hydropower, within the State of Idaho that are initiated later in time than the priority of this license and shall not give rise to any right or claim against any future rights to the use of water other than hydropower, within the State of Idaho initiated later in time than the priority of this license.

*This right when combined with Rts. 02-2442 & 02-2443 shall not exceed 14,725.0 acre feet per annum.

This right when combined with Right Nos. 02-2442, 02-2443, 02-7030 & 02-7221 shall not exceed 59.07 cfs.

This right when combined with all other rights shall provide no more than .02 cfs per acre nor more than 5.0 afa per acre for the lands above.

IN THE MATTER OF CHANGING THE MEASURING
DEVICE REQUIREMENT FOR PERMIT NO. 02-7068

ORDER

WHEREAS, the above numbered permit was approved with the condition that a measuring device of a type approved by the Department be permanently installed and maintained as part of the diverting works; and,

WHEREAS, on July 1, 1978, the Department adopted a new water measurement condition which states: "An access port or other device as specified by the Department shall be installed by the permit holder to provide for the installation of measuring equipment and the determination of the rate of diversion by the Department"; and,

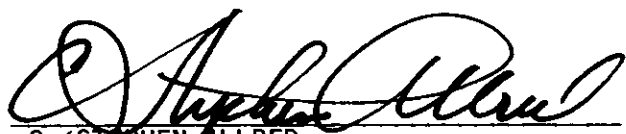

WHEREAS, the former condition required the permit holder to purchase and install a measuring device or hire a professional engineer to certify the rate of diversion; and,

WHEREAS, the measuring device condition effective July 1, 1978, requires less capital expenditure by the permit holder; and,

WHEREAS, to be equitable to holders of permits issued prior to July 1, 1978, the new condition should be retroactive;

NOW THEREFORE, it is hereby ordered that the condition of approval of this permit related to water measurement is hereby changed as follows: "The permit holder shall either install a measuring device or provide a certified measurement by a professional engineer or install an access port or other device as specified by the Department".

Robert A. Mather, Secretary/Treasurer

Little Valley Mutual Irrigation Co. of 119 E. Highland Street - Boise, Idaho 83706
(name) (address)

State of Idaho, being first duly sworn, upon his oath deposes and says:

That he is the holder, or the duly authorized agent of the holder *, of Permit to Appropriate the Public Waters of the State of Idaho No. 02-7068.

That under the terms and conditions of said permit, work thereunder was required to be completed on or before July 26, 19 74.

That he has heretofore performed the following work described under said permit:
Construction and installation of river pumping station, penstock, canals, booster pumps, ponds and steel mainline and lateral system to provide water to 3760 acres in the Little Valley Project under this permit and other permits held by Little Valley Mutual Irrigation Company. Costing \$ 902,250.00

That he is unable to complete the remainder of the work within the required time for the following reasons, to-wit: The primary reason for requesting an extension of the date of beneficial use is that four (4) desert entries have, as yet, not been finalized. This was the same reason for requesting the original extension. Because of this situation, a more orderly proof can be made when all lands are in a more finalized nature and proof can be given to all four permits at the same time.

Wherefore, he asks that the Department of Water Resources extend the time for the completion of obligations under said permit to September 1, 19 79.

Dear Permit Holder(s):

A representative of this Department made an examination of the works covered by your Permit No. 02-7068 and has found the following:

Amount of water that can be recognized as beneficially used
under Idaho law: 51.4 cfs Source: Snake River trib to
Columbia River

The maximum quantity diverted shall not exceed * acre feet per
year.

Point(s) of diversion: Gov. Lot 3 (NENW), Sec. 2, Twp 6S, Rge
4E

Beneficial Use: Irrigation of 2945 acres (see attached land
list)

Priority date established: August 14, 1970 (late proof)

Conditions (if any): *This right when combined with Rts.
92-2442 & 02-2443 shall not exceed 14,725.0 acre feet per annum.
This right when combined with Right Nos. 02-2442/2443/7030/7221
shall not exceed 59.07 cfs. This right when combined with all
other rights shall provide no more than .02 cfs per acre nor
more than 5.0 afa per acre for the lands above.

Please be advised that the license of this right will not include the 14 acres that were found to be owned by the Bureau of Land Management. Through correspondence with Mr. Sherl Chapman, it was determined that BLM did not wish to have a water right on this acreage. The 14 acres that will not be included are in the NENW, Sec. 22, Twp 6S, Rge 4E.

If you do not concur with these findings, please contact us within 10 days; otherwise a water license will be issued as set forth above.

Sincerely,

Dear Steve:

Again we are faced with making a decision on the Little Valley Mutual water rights as they apply to the 14 acres that are being irrigated but not owned by land owners within the district. The Department has again contacted me with regard to licensing that water right and would like to move ahead with it. I've enclosed a copy of the letter from Jim Johnson to me relating to this subject. I believe we need to move ahead to see whether or not it is possible for the BLM to transfer that land to the private sector since its essentially an isolated tract. If we can transfer it, then we should maintain the water right that has been established through diversion. If we can't, we need to let the Department know so they can move ahead and complete their licensing activities.

If we can obtain the land, then it is important that we maintain the water right that has been established in light of the Swan Falls decision. It would be very difficult to get a water right for that land by filing a new permit since the diversion comes directly out of the Snake River. Please let me know what you would like to do as soon as possible since, as you can see from the enclosed letter, we don't have much time.

Sincerely yours,

410 S. Orchard, Suite 144
Boise, ID 83705

Dear Sherl:

The above referenced permit surfaced again for follow-up and since I have not heard from you, I am writing this letter requesting a report of your progress.

You may recall that our field examiner found 14 acres of land irrigated by the Little Valley Mutual system which are owned by BLM. On June 21, 1985 you informed me that the attorney for Little Valley Mutual Irrigation Cd. was attempting to reach an agreement with BLM that would allow a continuation of the irrigation. On August 6, 1985, per a telephone conversation, you advised me that no progress had been made.

Since we are anxious to complete the licensing of this right, we are requesting that you submit a summary of attempts made by Little Valley Mutual to obtain BLM approval and an explanation of present status.

If BLM is reluctant to allow said irrigation, we can see no benefit in issuing a license covering said land. If we do not hear from you within 30 days, a license will be issued omitting the BLM owned land.

If you have any questions, please let me know.

Sincerely,

JIM JOHNSON

Dear Jim:

I'm in receipt of your letter of April 10 regarding water right #02-7068 in the name of Little Valley Mutual Irrigation Company. I thought I had responded to you in writing and I have contacted the Little Valley Mutual Irrigation Company. Apparently there is a question regarding a portion of the land that is presently in BLM ownership that may have been irrigated by Little Valley Mutual Irrigation Company. They are supposed to be checking this out and contacting me in the near future. As soon as I get any information from them I will contact you.

On January 8, 1985 we sent a pre-license letter for Rt. No. 02-7068 in the name of Little Valley Mutual Irrigation Co. to Dick Reynolds. He apparently got in touch with you, whereas you called and asked us to delay issuance of the license until you could review the matter.

To date, our records show that we are still waiting for a response.

As we are trying to complete the licensing of permits so that they can be included in the Snake River Basin Adjudication Findings Report, we request that you let us know your reasons for non-issuance of a license on the said right on or before May 8, 1985.

If we can be of any assistance, please let us know.

Dear Mr. Reynolds:

A field examination of the extent of water developed under the above referenced permit was conducted and the Department is now preparing the right for licensing.

During the examination of irrigated land it was determined that out of the 2959 acres found to be irrigated under this right, 14 acres are owned by the Bureau of Land Management. The location of these lands is as follows:

Twp 6S, Rge 4E - Section 22 - NENW

Before the Department can issue a license that would allow irrigation of these lands, it must be shown that the land owner, Bureau of Land Management, has authorized said irrigation.

Please provide us with documents showing authorization on or before January 28, 1985. If you have any questions or need assistance on this matter, please let us know.

Dear Don:

Regarding my certified water measurement to you dated April 9, 1984 in behalf of Little Valley Mutual Irrigation Company, I find that in addition to State water right permits 02-7030, 02-7068, 02-7221 and 02-2443 there is one other water right which was originally filed on the Bruneau River which should be included as now being diverted from the pumping plant owned and operated by Little Valley Mutual Irrigation Company for lands within the boundaries of the project. This water right (02-2442) should also be included under the measurements made April 9, 1984. The original water permit number was 51-2179 and was filed originally in the name of Merle Hoagland.

If there are any questions, please don't hesitate to call.

Dear Dave:

Regarding my certified water measurement to you dated April 9, 1984 in behalf of Little Valley Mutual Irrigation Company, I find through the Swan Falls litigation that one additional water right permit should be included as being measured on September 27, 1983. Apparently because of a number of changes this permit was overlooked but application for permit #02-2443 should be included in the certified water measurement for proof of beneficial use for Little Valley Mutual Irrigation Company. Therefore, the measurement of 59.06 cfs covers state water right permits 02-7030, 02-7068, 02-7221 and 02-2443.

TO: Idaho Department of Water Resources
FROM: Sherl L. Chapman, Consultant
DATE: April 9, 1984
SUBJECT: Certified Water Measurement
Little Valley Mutual Irrigation Company

I personally measured the flow produced by the Little Valley Mutual Irrigation Company river pumping station on September 27, 1983. The river station is situated in the back waters of C. J. Strike Reservoir and is composed of five, 600 horsepower units, pumping into a single 32 inch diameter penstock. Approximately 75 to 100 feet from the pumping station an additional 16 inch diameter penstock is connected to the 32 inch penstock and runs to the canal heading.

The flow was measured in the 32 inch penstock upstream from the 16 inch connection using a Collins air/water manometer under standard operating conditions after the pumps had been operating for several hours. The pumps at the river station are as follows:

1. 600 horsepower, I. D. #53-1638-50, U. S. hollow shaft.
2. 600 horsepower, I. D. #C608183887, U. S. hollow shaft.
3. 600 horsepower, Serial #J1427455, U. S. hollow shaft.
4. 600 horsepower, Serial #J1427346, U. S. hollow shaft.
5. 600 horsepower, Serial number missing, U. S. hollow shaft.

Operating pressure during the test was 105 psi at the measuring point. The total flow produced for the measurement was 26,509 = 59.06625907 gallons per minute or 59.06 cfs. Little Valley Mutual Irrigation Company operates under state water right applications 02-7030, 02-7068, and 02-7221. This measurement is provided to the Department of Water Resources as a certified water measurement for proof of beneficial use for irrigation of the lands within the project.

If any questions arising regarding this measurement, please contact Sherl L. Chapman, 410 S. Orchard, Suite 144, Boise, Idaho 83705.

Dear Wateruser:

The enclosed Order changes the measuring device condition of approval on your water right permit.

The changed condition should be less restrictive and provide more flexibility to you in the development of your water right system. The specifications related to the size and location of the access port will be available upon request from the Department, as soon as the Department's measuring equipment is obtained.

If you have questions regarding this matter, please contact this office or our regional offices.

Sincerely,

L. GLEN SAXTON

Gentlemen:

One of the conditions of approval of your water Permit No. 02-7068
02-7030
was that evidence of the extent of development must be submitted to this
office on or before September 1, 1979. (See last page of your
approved permit). Enclosed is a post card which may be used to submit
the required proof of beneficial use.

If you have not fully completed your project, and you have not previously
received an extension of time, you may request an extension of time pro-
vided the delay is for reasonable cause as indicated in Section 42-204,
Idaho Code, amended. If you have been prevented from proceeding by a
governmental agency or by litigation, more than one extension of time can
be granted.

Either the beneficial use post card or a request for an extension of time
must be received by this Department on or before the above mentioned date,
otherwise, the permit will lapse and be of no further force or effect
within 60 days.

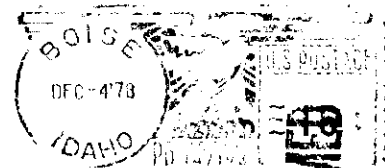

Sincerely,

RITA FLECK

O

Dear Mr. Berquist:

P

We find, in reviewing your Application for Permit for diversion of the waters of the Snake River, that permits previous to yours have been approved on a portion of the ground listed under your permit application. The permits are also from the Snake River and provide 1 inch of water per acre; therefore, we would only be able to allow a maximum of 67.80 c.f.s. of water under your permit application and not the 75.2 c.f.s. of water which you requested. If this would be satisfactory, please advise us by return mail.

Very truly yours,
