**Mr. Stan Wyatt**  
**4317 Cassia St.**  
**Boise, Idaho 83705**

**Dear Mr. Wyatt:**

Prior to issuing a license for your permit, Idaho law requires that this office inspect the facilities and use of water being developed to determine compliance with the terms and conditions of the permit and the extent of beneficial use being made. An examination has been conducted in connection with the above referenced permit and indicates that a measuring device has not been installed.

As you are aware, one of the conditions of approval of your permit required that a measuring device be installed and maintained as part of the diverting works at the point(s) of diversion. We cannot issue a license as long as that condition of the permit has not been completed.

You are, therefore, hereby ordered to show cause before the Director of the Department of Water Administration, Statehouse - Annex 2, Boise, Idaho, on or before June 6, 1971, why Permit No. **02-7013** should not be cancelled, pursuant to Section 42-311, Idaho Code, as amended, and held null and void for failure to comply with the terms and conditions of its issuance.

You should be advised that, in the event the above referenced permit is cancelled due to your failure to show reasonable cause on or before the above mentioned date, continued diversion of water would be without legal right and subject to legal action. If you have any questions, please contact this office.

Very truly yours,

**C. STEPHEN ALLRED**  
Deputy Director

Dear Mr. Wyatt:

We acknowledge receipt of your affidavit submitted as proof of beneficial use  for permit 02-7013.

Before a license can be issued a field examination must be made by a representative from this department.

We cannot tell just when this examination will be made, but our examiner will try to contact you at the time he makes the examination so that you may show him the system. If someone other than you should be contacted by the examiner, please advise.

Att. Mrs. Higginson.

Dear Sir,

In the form you asked  
for a meter to be installed  
on my pump. As I only have  
a small Pumping Unit, a 3/8 in  
pump and we only use it  
to fill in with when the  
other water is down.

As we are on the Apalache  
Water Project, we have 10-  
Acres water right.

We find a meter for  
this is quite expensive. We  
would like to have one of  
the State Engineers check  
the pump, if this would be  
possible to determine the  
amount of water we are using.

02-7013

Thanking you  
Sincerely Stan Wyatt
