State of Idaho, being first duly sworn, upon his oath deposes and says:

That he is the holder, or the duly authorized agent of the holder *, of Permit to Appropriate the Public Waters of the State of Idaho No. 51-2179.

That under the terms and conditions of said permit, work thereunder was required to be completed on or before July 26, 19 74.

That he has heretofore performed the following work described under said permit:
Construction and installation of river pumping station, penstock, canals, booster pumps, ponds, and steel mainline and lateral system to provide water to 3760 acres in the Little Valley Project under this permit and other permits held by Little Valley Mutual Irrigation Company Costing \$ 902,250.00

That he is unable to complete the remainder of the work within the required time for the following reasons, to-wit: The primary reason for requesting an extension of the date of beneficial use is that four (4) desert entries have, as yet, not been finalized. This was the same reason for requesting the original extension. Because of this situation, a more orderly proof can be made when all lands are in a more finalized nature and proof can be given to all four permits at the same time.

Wherefore, he asks that the Department of Water Resources extend the time for the completion of obligations under said permit to September 1, 19 79.

That he is unable to complete the remainder of the work within the required time for the following reasons, to-wit: A few extensions must still be installed to provide water to the entire project. Approximately 160 acres have not yet been provided with water. One additional desert land entry has not yet been approved by the Bureau of Land Management. Proof of beneficial use for entire project under separate permits would be impossible and more orderly proof could be given on all four permits at the same time.

Wherefore, he asks that the Department of Water Administration extend the time for the completion of obligations under said permit to September 1, 19 75.

Dear Jim:

Officers of the Little Valley Mutual Irrigation Company have recently contacted me with regard to your letters to them dated October 30, 1984. These letters are with reference to licensing of permits 02-7221, 02-7030, 02-2442 and 02-2443. I have not received copies of the letters as of yet but it appears there may be some errors in the proposed licensing of those water rights. We would, therefore, ask that you hold licensing in abeyance and allow us time to review those water rights and the measurements made for them.

I will be out-of-town until the 19th and therefore would ask that you hold them in abeyance until at least November 30 and I should be able to get back to you easily before that.

If you have any questions, please don't hesitate to contact me.

Sincerely yours,

Dear Don:

Regarding my certified water measurement to you dated April 9, 1984 in behalf of Little Valley Mutual Irrigation Company, I find that in addition to State water right permits 02-7030, 02-7068, 02-7221 and 02-2443 there is one other water right which was originally filed on the Bruneau River which should be included as now being diverted from the pumping plant owned and operated by Little Valley Mutual Irrigation Company for lands within the boundaries of the project. This water right (02-2442) should also be included under the measurements made April 9, 1984. The original water permit number was 51-2179 and was filed originally in the name of Merle Hoagland.

If there are any questions, please don't hesitate to call.

Dear Dave:

Regarding my certified water measurement to you dated April 9, 1984 in behalf of Little Valley Mutual Irrigation Company, I find through the Swan Falls litigation that one additional water right permit should be included as being measured on September 27, 1983. Apparently because of a number of changes this permit was overlooked but application for permit #02-2443 should be included in the certified water measurement for proof of beneficial use for Little Valley Mutual Irrigation Company. Therefore, the measurement of 59.06 cfs covers state water right permits 02-7030, 02-7068, 02-7221 and 02-2443.

If there are any questions, please don't hesitate to call.

TO: Idaho Department of Water Resources
FROM: Sherl L. Chapman, Consultant
DATE: April 9, 1984
SUBJECT: Certified Water Measurement
Little Valley Mutual Irrigation Company

I personally measured the flow produced by the Little Valley Mutual Irrigation Company river pumping station on September 27, 1983. The river station is situated in the back waters of C. J. Strike Reservoir and is composed of five, 600 horsepower units, pumping into a single 32 inch diameter penstock. Approximately 75 to 100 feet from the pumping station an additional 16 inch diameter penstock is connected to the 32 inch penstock and runs to the canal heading.

The flow was measured in the 32 inch penstock upstream from the 16 inch connection using a Collins air/water manometer under standard operating conditions after the pumps had been operating for several hours. The pumps at the river station are as follows:

1. 600 horsepower, I. D. #53-1638-50, U. S. hollow shaft.
2. 600 horsepower, I. D. #C608183887, U. S. hollow shaft.
3. 600 horsepower, Serial #J1427455, U. S. hollow shaft.
4. 600 horsepower, Serial #J1427346, U. S. hollow shaft.
5. 600 horsepower, Serial number missing, U. S. hollow shaft.

Operating pressure during the test was 105 psi at the measuring point. The total flow produced for the measurement was $26,509 \approx 59.066 \approx 59.07$ gallons per minute or 59.06 cfs. Little Valley Mutual Irrigation Company operates under state water right applications 02-7030, 02-7068, and 02-7221. This measurement is provided to the Department of Water Resources as a certified water measurement for proof of beneficial use for irrigation of the lands within the project.

If any questions arising regarding this measurement, please contact Sherl L. Chapman, 410 S. Orchard, Suite 144, Boise, Idaho 83705.

As of this date we have not yet received the affidavit of publication to be submitted in connection with the above referenced permit. Proof of beneficial use is not required until July 26, 1972; however, many newspapers do not keep copies of these advertisements in their files. This insures that when you are ready to submit proof of beneficial use there will be no unnecessary delay or added expense.

Gentlemen:

We acknowledge receipt of the assignment in connection with the above referenced permit. The assignment has been recorded and the original copy placed in our files. We are enclosing a copy of the permit and the assignment for your records.

Enclosed you will also find a copy of the APPROVED application for amendment for permit 31295/51-2179.

During the 1967 session of the Idaho Legislature, certain amendments were made in the law pertaining to the procedures for making proof of beneficial use of water. In order for the Department to comply with these changes, Rules of Practice and Procedure were adopted on August 1, 1968. Generally, these procedures and the amended law make it simpler for a person to make proof and relieve the permit holder from making separate proofs of completion of works and beneficial use of water.

The enclosed order modifies your permit to comply with these rules and regulations. As a part of the new procedure, you will be required to publish a notice at your expense for two consecutive weeks in a paper as prescribed by the Department; previously, a permit holder had to publish a notice for four weeks when he submitted proof under his permit.

you are hereby notified that under the provisions of Section 42-311, Idaho Code, as amended, said permit is hereby held for cancellation, and you are required to show cause before the State Reclamation Engineer on or before October 7, 1968 why said permit should not be cancelled.

Permit 31295 claims the use of 6.4 cubic feet per second of water. The point of diversion was to be located NE1/4 Sec. 7, T. 6 S., R. 5 E., B. M., Owyhee County

Dear Mr. Hoagland:

Under the terms of your Permit No. 31295 you are required to complete your diversion works on or before July 26, 1968. I enclose blank affidavit to be filled out, sworn to by you before a Notary Public, or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the said permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.
