License of Water Right No. 32366/02-2371 Priority May 14, 1965 Amount 8.0 cfs

THIS IS TO CERTIFY, that The Travelers Insurance Co. & Farm Development Corp.
of Portland, Oregon / Boise, Idaho, has complied with the terms and conditions of Permit
No. 32366/02-2371 issued pursuant to Application for Permit dated May 14, 1965,
and has submitted proof to the Department of Water Resources on August 5, 1965,
that he has applied water to a beneficial use; an examination by the Department indicates that the works have a
capacity for the diversion of 71 cfs of water from the Snake River,
tributary to the Columbia River, and that the permit holder has applied to a beneficial use and
established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume
<u>Irrigation</u>	from <u>March 15</u> to <u>Nov. 15</u>	at <u>8.0</u> cfs and	<u>2,000 acre feet or</u> <u>5.0 af per acre</u>
	from _____ to _____	_____ cfs and	_____
	from _____ to _____	_____ cfs and	_____

(both dates inclusive)

Subject, however, to the condition that no more than * 8.0 cfs of water be diverted at any one time, and
that the amount of water so diverted and to which such right is entitled and confirmed is for the purpose
aforementioned and is limited to the amount which can actually be beneficially used and shall not exceed
2,000 acre feet per year, said waters to be diverted within the NW $\frac{1}{4}$ SW $\frac{1}{4}$ of Sec. 34,
Twp. 5 S, Rge. 9 E, B.M. in the County of Elmore

Dear Water Right Holder(s):

We are in receipt of the correspondence concerning ownership of the above referenced permit and water rights.

In Idaho, a licensed water right is considered real property; therefore, proof of owning the land is proof of owning the water right unless specifically excluded in the sale. We have placed your correspondence in the files for future reference and have modified our computer records to reflect your present ownership.

Two of the permits that you submitted for assignment, Nos. 63-09043 and 63-09044, are no longer valid.

Our records reflect that Permit No. 02-02262 was assigned by Travelers Insurance Co. to Dennis Smith and Grindstone Butte Mutual Canal Co. on March 8, 1988. We will be holding the assignment you submitted on that permit pending further clarification.

If you have any questions, please let us know.

Dear Mr. Miller:

The Department of Water Administration attempted to make an examination for licensing of water rights held by the Sailor Creek Water Company. We were not able to make a complete examination because the system you have installed does not have an adequate measuring device to enable us to make a determination of the amount of water being diverted.

The permits covered by this examination are as follows:

Permit Nos. 02-2186, 02-2204, 02-2205, 02-2206, 02-2211, 02-2212, 02-2213, 02-2214, 02-2215, 02-2216, 02-2217, 02-2218, 02-2371 and 02-2372.

To complete this examination, we will require that a permanent measuring device of a type approved by the department be installed so that the amount of water being diverted can be measured. It will not be necessary to install individual meters in the field unless that is your desire. The measurement can be made by the installation of meters near the pumps, which would measure the amount of water diverted for all permits.

The installation of a measuring device must be made prior to the beginning of the 1972 irrigation season. The department at that time will attempt to complete the examination, and if the measuring device is not installed, I will have to recommend that the above mentioned water rights be cancelled.

Mr. Benjamin G. Miller
Page 2

Please notify the department as to the type of measuring device you intend to install and when the installation has been completed.

If you have any questions, please contact me.

MEMO

To: Ken Dunn

From: Fred Eisenbarth

Subject: Sailor Creek Water Company

Date: March 8, 1971

On Wednesday, March 3, 1971, I examined the Sailor Creek Water Company's irrigation system. I determined the amount of land irrigated and the point of diversion. When examining the system, I found it impossible to make an accurate measurement of the quantity of water that they are diverting. Their system is enclosed entirely underground and runs directly into their sprinkler system. Due to the many thousand sprinkler heads, it is impractical if not impossible to obtain a correct measurement through pressure reading of the individual sprinkler heads. I therefore recommend a permanent measuring device be installed.

The permit could be licensed as soon as a measurement of the water is made.

Dear Mr. Miller:

We acknowledge receipt of the depositions of holder and two witnesses, also affidavit of publication in the MOUNTAIN HOME NEWS, all submitted in proof of completion of works and beneficial use on Permit No. 32366

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made, but our field engineer will try and contact you at the time he makes the examination so that arrangements may be made to show him over the grounds.

Very truly yours,
