Dear John,

I have been visiting today by telephone, with Mr. Don McEldowney, head of the Department of Water Administration of the State of Idaho. There seems that there is some records regarding your water right that need to be straightened up. He has asked that I write to you and see if you have the certificate of completion of work for a water right and the license that was issued. This would be on May 8, 1968. The old permit # is 30882, and the new permit number is 0-2185.

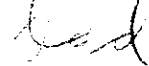

This is of course in connection with the water right for your farm on Section 18.

I know you have just returned from an extensive trip, but it would be very much appreciated by Mr. McEldowney if you could forward these permits, if you have them, at once. Mr. Schiller says he does not have anything in his file.

Your Mother joins me in sending our love to you and your family. Hope you had a nice trip.

You may send this information to me and I will contact Mr. McEldowney.

Most sincerely,

Dear Mr. Alsip:

It appearing to the State Reclamation Engineer that the terms and conditions of Permit 30882 to appropriate the public waters of the State of Idaho, have not been complied with as to failure to submit licensing fees of \$37.00

you are hereby notified that under the provisions of Section 42-311, Idaho Code, as amended, said permit is hereby held for cancellation, and you are required to show cause before the State Reclamation Engineer on or before May 6, 1968, why said permit should not be cancelled.

Permit 30882 claims the use of 6.4 c.f.s. of water. The point of diversion was to be located NEXEM, Sec. 36, T. 1 N, R. 3 W, B.M., Canyon County,

and the permit was approved January 8, 1963.

Mr. R. Keith Higginson
State Reclamation Engineer
State Department of Reclamation
Statehouse
Boise, Idaho

Dear Sir:

I am writing to you in connection with Permit No. 30882. I have before me the letter of Mr. McEldowney, to my client Mr. John F. Alsip. It appears upon cursory examination by this office, that the amount of water, in the amount of 6.4 cfps for 620 acres could be erroneous. This is all part of the water system that is pumped out of Snake River on what is commonly called the Hat Butte project. Other persons have been granted one miner's inch per acre by way of water rights. If the system is not capable of delivering one miner's inch of water per acre in the project, then the last to prove up are going to be materially damaged, and there isn't going to be sufficient water rights for all parties.

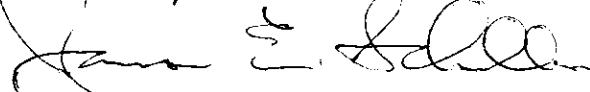

All of the land involved in the project should share equally in the actual amount of water diverted and applied to beneficial use.

Therefore, I suggest a review of this entire project and the permits and licenses thereupon. This offices represents nearly all of the farmers in the project. We know that there is no attempt on the part of one farmer to have a greater right than the other. Perhaps you could call me on this matter, and we have a Meridian phone by which you can dial toll-free, which number is 888-2113. In the meantime, Mr. Alsip is holding up payment of the \$37.00 fee.

Actually, the land being farmed under this permit is a full 640 acres, and not 620 acres.

Sincerely yours,

SCHILLER, YOUNG & WILLIAMS
