Dear Mr. Davis:

We are in receipt of your letter of March 11, 1969. The Deed which you have furnished the department is adequate to convey the assignment principal to a new holder for each of the above referenced water licenses and permit. We will record immediately the assignment for the permit.

You should be advised, however, that we can only insert a copy of the Warranty Deed in each of the water license folders listed above. We do not have a procedure to change the ownership of a water license once it is issued. As you can see, there would be a vast number of problems, the major one being that we do not have the original water license on file with the department, only a copy.

If we may be of further assistance, please contact us.

Very truly yours,

Dear Mr. Tippet:

This is in response to our telephone conversation of this morning.

Since the irrigation season is over for this year and the excessive costs of turning on the pumps for 30 minutes to get a measurement is really not feasible, we will inspect the above listed permits and a license will be issued for an amount equal to one inch per acre of ground actually irrigated or the amount the pumps produce if less than one inch per acre. This should be accomplished early next irrigation season.

Hope this is sufficient information to help decide what to do about the loan.

Dear Mr. Killworth:

This acknowledges the Notice of Proof of Completion of Works and Application of Water to Beneficial Use under Permit No. ~~22385~~, 30876, 30877, 30878. The proofs are to be made at ~~Mountain Home, Idaho~~ on the 2nd day of September, 1936, before Paul H. Greenberg ~~1104 Phelps Cir. Mt. Home~~ Notary Public.

As of this date, we have mailed the Notice to the County Engineer, with instructions to publish it once a week for four consecutive weeks prior to the date set for final proof then mail the Affidavit of Publication and statement of costs to you.

It is important that the enclosed depositions be executed by you and two disinterested witnesses who are familiar with the terms of the permit and the work done thereunder, at the place, on the date, and at the time and before the Notary, as advertised. It is very important and necessary that each question be answered in detail.

In returning the depositions to this office, be sure that all copies have been signed, the Notary's seal has been placed on each and that all depositions, (holder and two witnesses) are being returned. Also be sure to enclose the AFFIDAVIT OF PUBLICATION

DEPARTMENT OF RECLAMATION

Re: Permit No. 30876

RECEIVED
JUL 21 1966

Date: 3-29-1966

Department of Reclamation

Dear Mr. Ellsworth

The date for proof of application of water to beneficial use, as set out under the terms of Permit No. 30876 is due not later than 1-8-1974. If by this date you are not prepared to make this proof, you may make it at a later date, however, your priority will be advanced the same length of time for which the proof is late.

Before this proof can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county.

We enclose Form 10, in duplicate, which is to be filled in and returned to this department at least forty (40) days before the above mentioned date and/or before the time you intend to make proof. This form, in duplicate, is to include the time of day, the date, the name of the town, the address of the Notary Public before whom you will appear to make the depositions of proof (this may be at any place that is convenient for you and two witnesses), the quantity of water, for what purpose it is used, the point or points of diversion and the location of use, or lands which are irrigated -- by legal land description. Descriptions should be taken from your Permit, including any amendments thereto, as recorded in this department. If changes have been made and no amendments are on record, we advise that you request a form for this purpose before your notice is published, or you may have to readvertise and complete another set of proof forms.

Also enclosed is Form 11, which is authorization for us to have the notice published in the designated county newspaper, at your expense. This is to be returned with Forms 10.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, and at the place named, before the Notary Public, as advertised in the publication notice.

The amount of water allowed in a license cannot be more than is actually produced and measured and put to beneficial use, and cannot be more than the statutory amount allowable per acre of land actually found by field inspection to have been irrigated at the time of proof.

Dear Mrs. Tindle:

We enclose Permit No. 30876 in which we direct your attention to the limitations and conditions as given on the fourth page under approval of the State Reclamation Engineer.

By this same mail, we have sent to the Bureau of Land Management two copies of this permit, one of which has been certified, to be used in connection with the Desert Land Entry filed in that office. A copy of that letter is enclosed.

~~While in our office~~ Departmental Receipt No. 31381 which was issued covering payment in the amount of \$8.50, which includes \$6.50 for the filing fee and \$2.00 for the copies sent to the Bureau of Land Management, was given to you while in our office.

Well logs are an important part of your recorded water right and State Statutes require that well drillers supply logs on all wells, whether irrigation, domestic, drain or stock wells, to be filed in the Department of Reclamation. In view of the rapidly increasing demand for ground water, the lowering of the ground water level, and the creation of critical ground water areas, it is important that you, as owner, make sure a log on your well is filed in this office.
