Dear Miss Bury:

We are in receipt of your letter of December 26, 1967, on the above referenced permit. Our letter of September 29, 1966 was in error. The results of the field examination indicated that you are irrigating lands in excess of 100 acres covered by your permit. However, due to the limitations of the permit, the maximum amount of ground that may be licensed under your permit would be 100 acres.

Our letter was also in error as to the quantity of water that could be licensed. The maximum that we can allow for beneficial use under the existing statutes would be one miners inch per irrigated acre or 2.0 cubic feet per second for your 100 acres of land.

It is true that your permit was originally approved for 3.0 cubic feet per second to irrigate 100 acres of ground. As you indicated in the remarks section of your permit, your soil was quite sandy and required an inch and a half of water per irrigated acre. You should bear in mind that the burden of proof is on the applicant. If you can supply the department with adequate and qualified information to support your claim, the Department of Reclamation could issue a license in excess of 2.0 cubic feet per second. However, this information will have to be in the form of a soils report by a qualified agent.

In order to clarify the issues at hand so that we may issue your license for the correct amount, you are requested to supply the department with any additional information or notify us as to your intent in the matter within 20 days from the date of this letter. Please contact us if we may be of further assistance.

Very truly yours,

Donald W. McEldowney

Dear Miss Bury:

We acknowledge receipt of the depositions of holder and two witnesses, also affidavit of publication in the ~~Mountain Home News~~ all submitted in proof of completion of works and beneficial use on Permit No. 29576.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made, but our field engineer will try to contact you at the time he makes the examination so that arrangements may be made to show him over the grounds.

Dear Mr. Mc Eldowney:

I send enclosed a check
for \$11.00 for a Certificate of Completion
of works on our water system.

I believe if you look on your
records which are the same as
our permit you will find we have
a permit for 3 cubic feet per second
permit instead of 1 miner's inch.

Will you explain your statement
in your letter of "due to the limitations
of your permit". Thanking you. We remain.

RE: Permit No. 29576

Miss Hedwig Bury
Star Route, Box 24
Hammett, Idaho

Dear Miss Bury:

Our field examiner's report on his inspection of proof of completion of works and application of water to beneficial use under the terms of Permit No. 29576 shows the pump and pipeline are capable of conveying 12 miner's inches, or 2.4 c.f.s. However, due to the limitations of your permit, we can only allow the amount of water originally requested, the amount of water actually used beneficially, or 1 (one) miner's inch per irrigated acre.

Upon receipt of the statutory fees, totaling \$11.00, we will issue the Certificate of Completion of Works for 2.4 c.f.s. and the License and Certificate of Water Right for 2.4 c.f.s. confirming the right, with priority of April 23, 1961, to the use of surface water from the Snake River with the point of diversion in NE $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 3, T. 6 S, R. 8 E, for irrigation of 100 acres in S $\frac{1}{2}$ SW $\frac{1}{4}$, Sec. 34, T. 5 S, R. 8 E; NE $\frac{1}{4}$ NW $\frac{1}{4}$, Sec. 3, T. 6 S, R. 8 E, B.M.

Soils ---- Hedwig Bury Farm

Soil Conservation Service (^UNSDA) soil surveys of my land show the following:

Land use Capability	% of Land	
I	50%	This land has a medium-textured soil 36 to more than 60 inches deep on slopes under 2 percent. The water holding capacity is high. This is very good land with very slight or no limitations in use.
IIe1	20%	This land has a medium-textured soil 36 to more than 60 inches deep on slopes of 2 to 3 percent. The water holding capacity is high. This is good land, but it has some limitations because of gentle slopes.
IIIsl	20%	This land has a medium-textured soil 20 to 36 inches deep on slopes under 4 percent. Some areas ~~deep~~ may have a heavy or compact subsoil. The water holding capacity is moderate. This is moderately good land, but has limitations because of soil depth and slope.
IIIsl	10%	This land has a light-textured soil 20 to 36 inches deep on slopes under 2 percent. Some areas have a coarse lower subsoil and some areas have hardpan. The water holding capacity is low. This is moderately good land, with limitations because of light textured and some shallow depths.

This soil survey shows that all the land is adopted to crops production. Water is essential to grow crops and the above land use capability classification is on the bases that water will be available for irrigation.

Hammett, Idaho

Dear Mrs. Bury:

Under the terms of your Permit No. 29576 you are required to complete your diversion works on or before March 24, 1966. I enclose blank affidavit to be filled out, sworn to by you before a Notary Public, or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Very truly yours,

CARL E. TAPPAN

State Reclamation Engineer
