Dear Mr. McDowell:

We believe that all of the above numbered permits have a common point of diversion through a pumping plant and pipe to ditches.

Permit No. 23014 was filed in connection with a desert land entry which our records show was not allowed and the case was closed. Possibly this permit should be relinquished or assigned with amendment to the land list.

The other permits claim a total of 21.82 c.f.s. all for irrigation of the same land.

The flow from the penstock was measured as 23 c.f.s. on April 3rd. The examination showed that 542 acres were irrigated, in Sections 3 and 10. Some land in Section 9 had been irrigated in the past, however all of the works and the land were being reworked and the area was not determined from the air photo. There was also some land in Section 11 and NE 1/4 Sec. 9, which is not on the land list.

It seems that the license could be issued under Permit 21789 for all of the present development and later proofs of beneficial use will be necessary under the other permits. Land under Permit No. 22644 were not inspected.

Kindly advise how this problem should be solved.

Dear Mr. McBowell:

We believe that all of the above numbered permits have a common point of diversion through a pumping plant and pipe to ditches.

Permit No. 23011 was filed in connection with a desert land entry which our records show was not allowed and the case was closed. Possibly this permit should be relinquished or assigned with amendment to the land list.

The other permits claim a total of 21.82 c.f.s. all for irrigation of the same land.

The flow from the penstock was measured as 23 c.f.s. on April 3rd. The examination showed that 542 acres were irrigated, in Sections 3 and 10. Some land in Section 9 had been irrigated in the past, however all of the works and the land were being reworked and the area was not determined from the air photo. There was also some land in Section 11 and NE 1/4, Sec. 9, which is not on the land list.

It seems that the license could be issued under permit 21789 for all of the present development and later proofs of beneficial use will be necessary under the other permits. Land under permit No. 22644 were not inspected.

Kindly advise how this problem should be solved.

occupation - design engineer; postoffice address - same as residence.

Ques. 2. Are you acquainted with L. E. Haight, the holder of Permit No. 26518? How long have you known him and where does he reside?

Ans. I have known him 5 years and know that he lives at 1910 Montclair Dr., Boise, Idaho.

Ques. 3. Have you read or heard read said Permit No. 26518, and are you familiar with its provisions and conditions?

Ans. Yes

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans. Water comes from the Snake River and the works consist of 1-150 hp turbine type pump which produces 3300 gpm; 1-60 hp turbine type pump which produces 1200 gpm; 1-275 hp centrifugal pump which produces 5800 gpm. There is a 30" pipeline and 1/4 mile of private ditch.

Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. 22 cfs. I designed this system & have watched the outfall here and I know that it produces at least that amount.

Ques. 6. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Water is used for irrigation in: NE $\frac{1}{4}$ SW $\frac{1}{4}$ (30), SW $\frac{1}{4}$ SW $\frac{1}{4}$ (30), SE $\frac{1}{4}$ SW $\frac{1}{4}$ (40), SW $\frac{1}{4}$ SE $\frac{1}{4}$ (20), SE $\frac{1}{4}$ SE $\frac{1}{4}$ (30), Sec. 3; NW $\frac{1}{4}$ NE $\frac{1}{4}$ (25), NE $\frac{1}{4}$ NW $\frac{1}{4}$ (5), SE $\frac{1}{4}$ NW $\frac{1}{4}$ (10), SW $\frac{1}{4}$ NE $\frac{1}{4}$ (8), SE $\frac{1}{4}$ NE $\frac{1}{4}$ (35), Sec. 9; NE $\frac{1}{4}$ NE $\frac{1}{4}$ (12), NW $\frac{1}{4}$ NE $\frac{1}{4}$ (35), NE $\frac{1}{4}$ NW $\frac{1}{4}$ (40), NW $\frac{1}{4}$ NW $\frac{1}{4}$ (20), SW $\frac{1}{4}$ NW $\frac{1}{4}$ (40), SE $\frac{1}{4}$ NW $\frac{1}{4}$ (40), SW $\frac{1}{4}$ NE $\frac{1}{4}$ (35), SE $\frac{1}{4}$ NE $\frac{1}{4}$ (15), NE $\frac{1}{4}$ SE $\frac{1}{4}$ (30), NW $\frac{1}{4}$ SE $\frac{1}{4}$ (35), NE $\frac{1}{4}$ SW $\frac{1}{4}$ (30), NW $\frac{1}{4}$ SW $\frac{1}{4}$ (15), Sec. 10, T6S - R4E. 26518

Ques. 7. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. Irrigation only.

Ques. 8. If for irrigation, state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. This is a basaltic soil & is very sandy. In my opinion, for profitable irrigation & cultivation of the crops grown, he would need 2"/ac. This soil has a great deal of porosity.

Ans. _____ No. _____

Ques. 10. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

These fall into a 30" pipeline capable of carrying 1500 miner's inches. Then it branches into several laterals and distribution ditches which will carry all the water produced. RE: Permit Nos. 21789, 22653, 26518, 26757

L. E. Haight, Vice President
Grandview Realty Inc.
Box 2297
Boise, Idaho

Dear Mr. Haight:

Enclosed is the report of examination of works under Permit No. G-26757,
Also enclosed are four forms to amend the land list.

The other permits listed above, all of different priority, conflict to some extent with No. 26757 which is the latest priority. All permits were for one miner's inch per acre of land except 21789 and 22653 which together make a total of one inch per acre for the same land. A rough check shows one 40-acre subdivision with over 40 inches and most with less.

The examination report shows more acres irrigated than shown on the permits together in some subdivisions, though some particular subdivisions are less.

This office cannot allow over one miner's inch per acre of irrigable land under all water rights from the same source. Trouble will arrive with the three other permits, two of which cover the same subdivisions plus additional land, and one covering part of this land, but not all the land, in arriving at an equitable distribution of water.

I suggest that all permits be amended to show all of the project land without restriction to acres in each subdivision such as NE $\frac{1}{4}$ SW $\frac{1}{4}$, S $\frac{1}{4}$ SW $\frac{1}{4}$, SE $\frac{1}{4}$, Sec. 3; S $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 4; N $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 8 etc. with any extra land you are irrigating which is not shown on the permits at present. That will give all the land an equal water right with equal priorities. It would also require another inspection of the property under Permit No. 26757.

26518

H. E. Haight - continued - page 2

The statutory fees would be \$5.00 for each Certificate of Completion of Works plus \$2.00 for each 40-acre subdivision for the first Water License with no fees for the other three Water Licenses.

Dear Mr. McDowell:

We have the report of the field examiner that 632 acres are presently being irrigated in Secs. 2, 3, 10 and 11, T. 6 S., R. 4 E., B.M. under the above noted permits.

The land in Secs. 1 and 9 is being leveled, with new location of ditches which will require further proofs of beneficial use of the water.

Permit No. 21789 claims 12.3 cubic feet per second, and Permit No. 22644 claims 1.7 cubic feet per second, sufficient to cover the 12.04 c.f.s. allowable.

The fees for the two water licenses total \$44.00 for 22 subdivisions inspected.

Our letter to Mr. L. E. Haight, Vice President of Grandview Realty, Inc., in regard to Permit No. 26757 is voided as the report of the examiner showed more land than can be irrigated.

Very truly yours,

RALPH W. THOMAS
