Permit No. 23014 - Walter T. Smith

Harley M. McDowell
P. O. Box 3161
Boise, Idaho

Dear Mr. McDowell:

We believe that all of the above numbered permits have a common point of diversion through a pumping plant and pipe to ditches.

Permit No. 23014 was filed in connection with a desert land entry which our records show was not allowed and the case was closed. Possibly this permit should be relinquished or assigned with amendment to the land list.

The other permits claim a total of 21.82 c.f.s. all for irrigation of the same land.

The flow from the penstock was measured as 23 c.f.s. on April 3rd. The examination showed that 542 acres were irrigated, in Sections 3 and 10. Some land in Section 9 had been irrigated in the past, however all of the works and the land were being reworked and the area was not determined from the air photo. There was also some land in Section 11 and NE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 9, which is not on the land list.

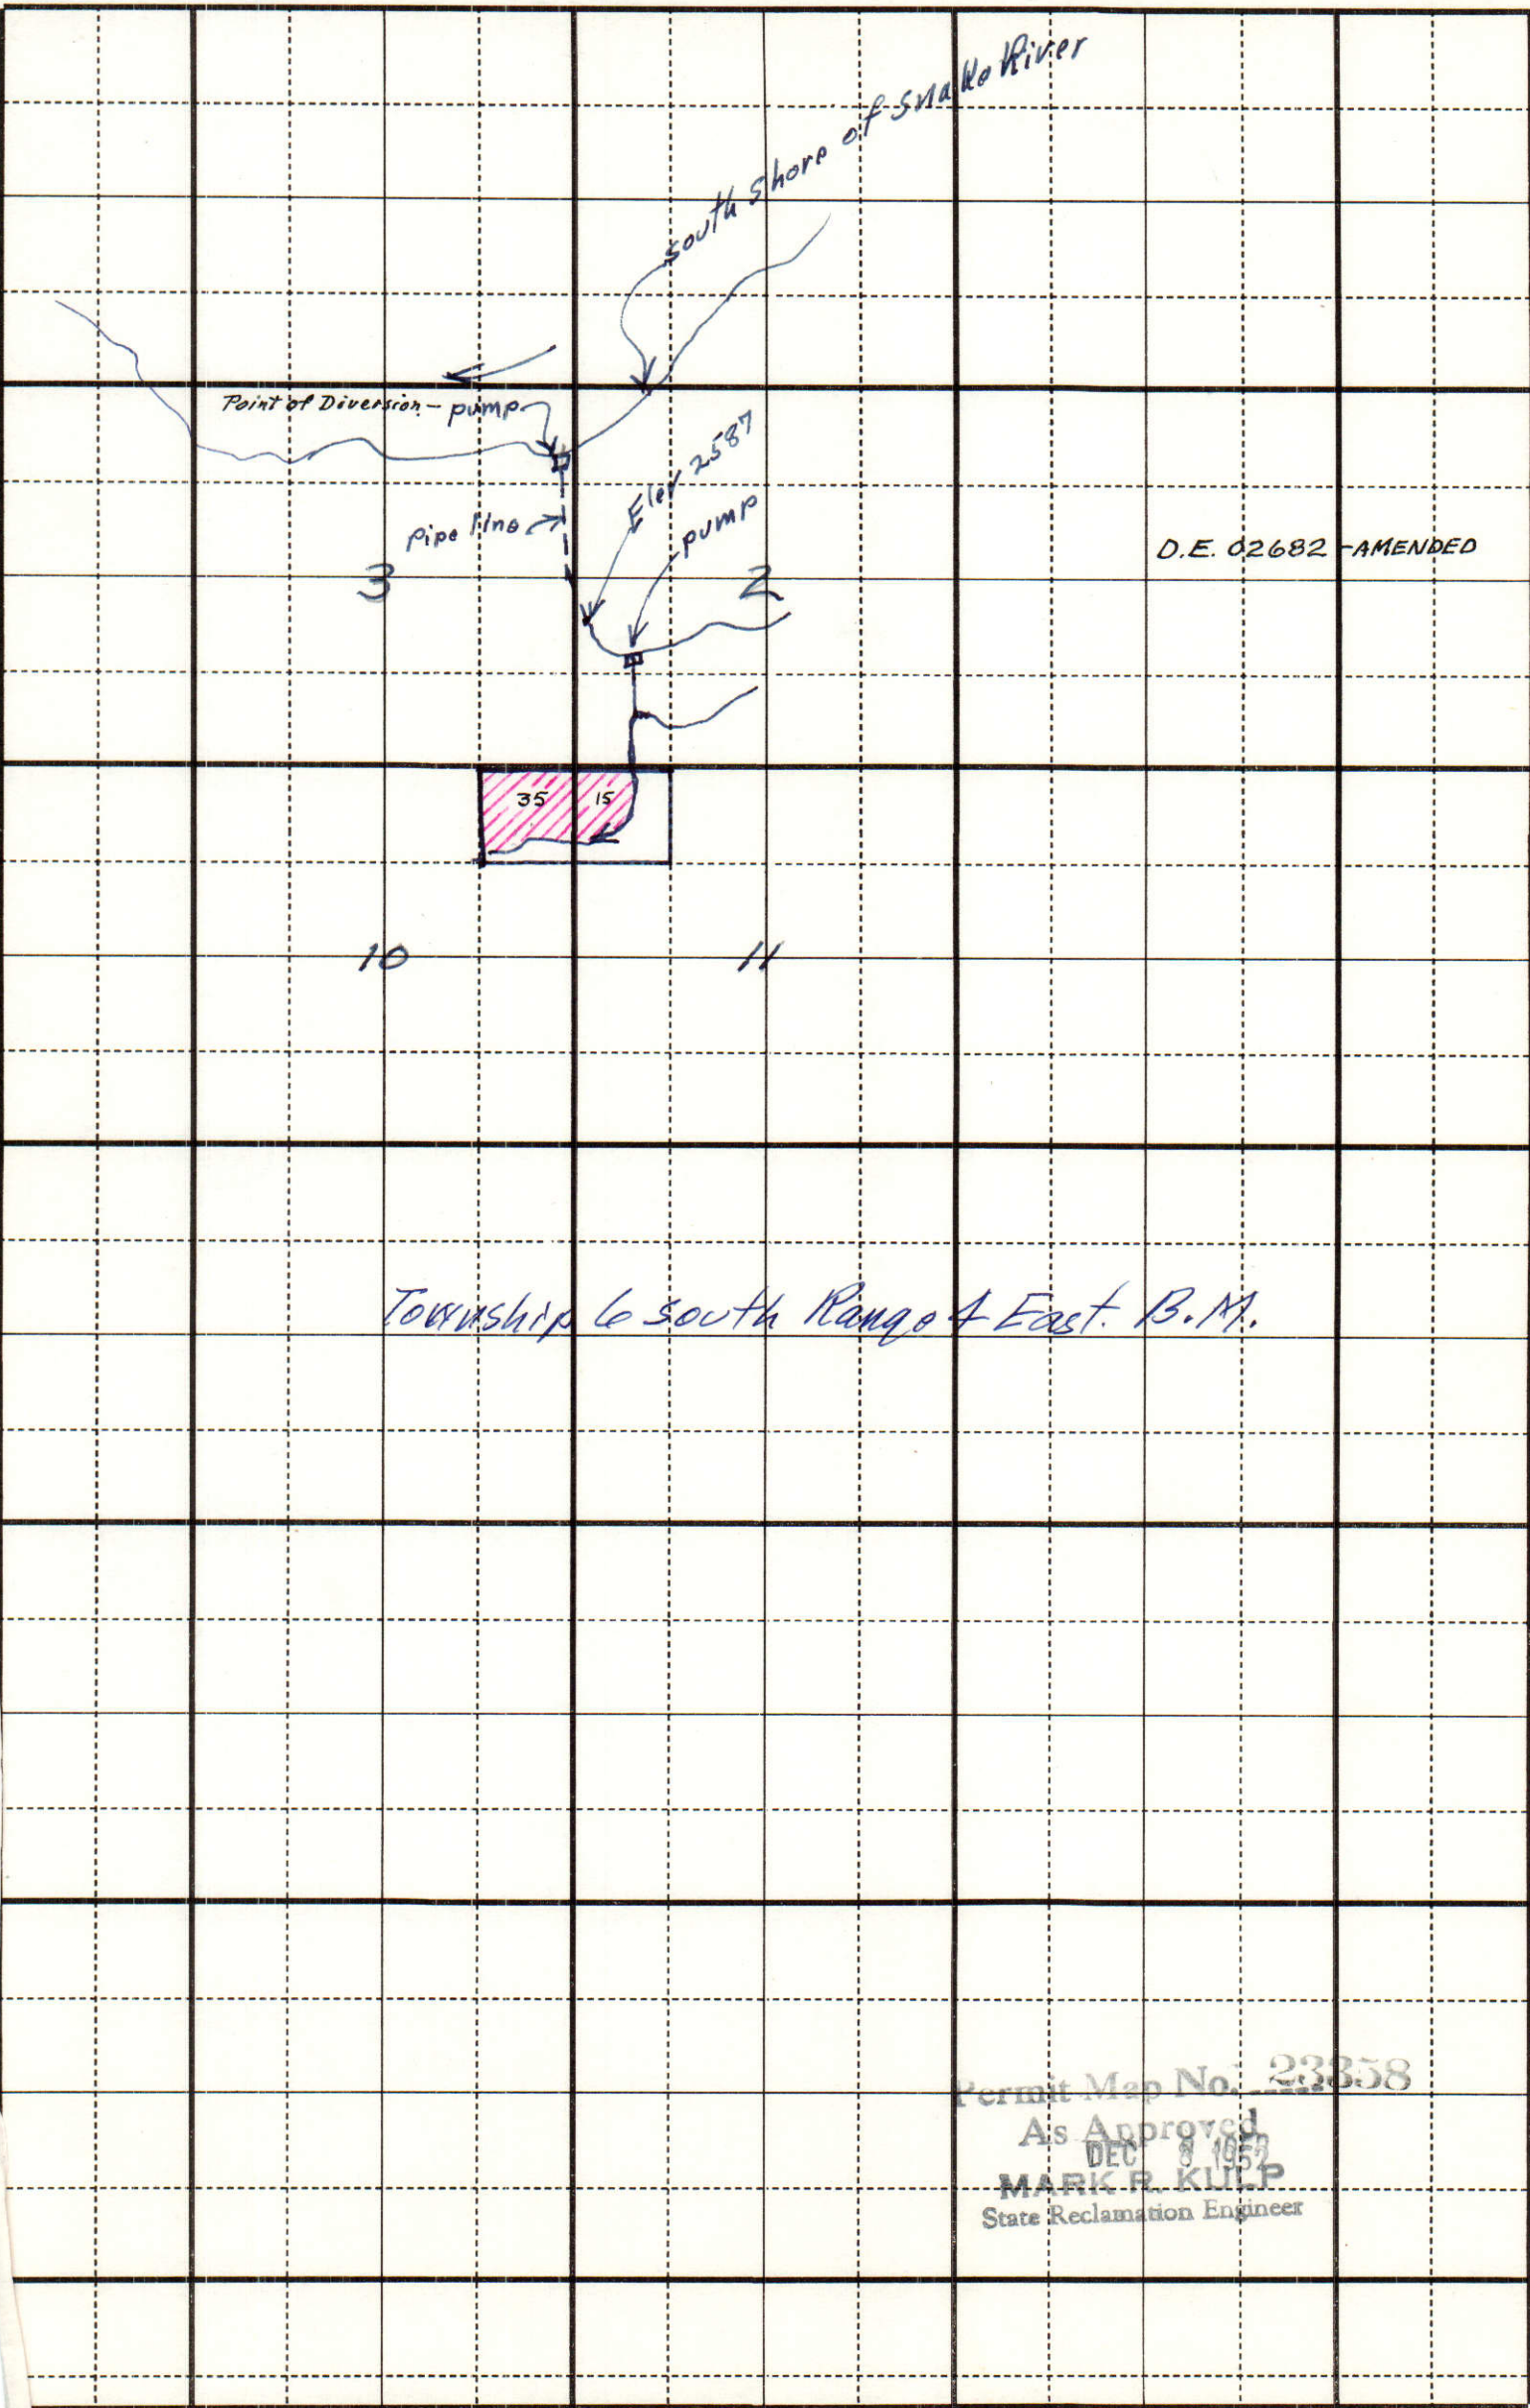

It seems that the license could be issued under Permit 21789 for all of the present development and later proofs of beneficial use will be necessary under the other permits. Land under Permit No. 22644 were not inspected.

Kindly advise how this problem should be solved.

Very truly yours,

RALPH W. THOMAS, Deputy
State Reclamation Engineer

Dear Mr. McDowell:

We have the report of the field examiner that 632 acres are presently being irrigated in Secs. 2, 3, 10 and 11, T. 6 S., R. 4 E., B.M. under the above noted permits.

The land in Secs. 4 and 9 is being leveled, with new location of ditches which will require further proofs of beneficial use of the water.

Permit No. 21789 claims 12.3 cubic feet per second, and Permit No. 22644 claims 1.7 cubic feet per second, sufficient to cover the 12.4 c.f.s. allowable.

The fees for the two water licenses total \$44.00 for 22 subdivisions inspected.

Our letter to Mr. L. E. Haight, Vice President of Grandview Realty, Inc., in regard to Permit No. 26757 is voided as the report of the examiner showed more land than can be irrigated.

Permit No. 23014 - Walter T. Smith

Harley M. McDowell
P. O. Box 3161

Dear Mr. McDowell:

We believe that all of the above numbered permits have a common point of diversion through a pumping plant and pipe to ditches.

Permit No. 23014 was filed in connection with a desert land entry which our records show was not allowed and the case was closed. Possibly this permit should be relinquished or assigned with amendment to the land list.

The other permits claim a total of 21.82 c.f.s. all for irrigation of the same land.

The flow from the penstock was measured as 23 c.f.s. on April 3rd. The examination showed that 542 acres were irrigated, in Sections 3 and 10. Some land in Section 9 had been irrigated in the past, however all of the works and the land were being reworked and the area was not determined from the air photo. There was also some land in Section 11 and NE 1/4 Sec. 9, which is not on the land list.

It seems that the license could be issued under Permit 21789 for all of the present development and later proofs of beneficial use will be necessary under the other permits. Land under Permit No. 22644 were not inspected.

Kindly advise how this problem should be solved.
