Permit No. 23011 - Walter T. Smith

Harley M. McDowell
P. O. Box 3161

Dear Mr. McDowell:

We believe that all of the above numbered permits have a common point of diversion through a pumping plant and pipe to ditches.

Permit No. 23011 was filed in connection with a desert land entry which our records show was not allowed and the case was closed. Possibly this permit should be relinquished or assigned with amendment to the land list.

The other permits claim a total of 21.82 c.f.s. all for irrigation of the same land.

The flow from the penstock was measured as 23 c.f.s. on April 3rd. The examination showed that 542 acres were irrigated, in Sections 3 and 10. Some land in Section 9 had been irrigated in the past, however all of the works and the land were being reworked and the area was not determined from the air photo. There was also some land in Section 11 and NE₄SE₄, Sec. 9, which is not on the land list.

It seems that the license could be issued under Permit 21789 for all of the present development and later proofs of beneficial use will be necessary under the other permits. Land under Permit No. 22644 were not inspected.

Kindly advise how this problem should be solved.

Very truly yours,

RALPH W. THOMAS, Deputy

Re: Permit No. **21789, 22653**
Grandview Realty Co.

Date: **Feb. 1, 1963**

Harley M. McDowell
Boise, Idaho

Dear Mr. McDowell:

The date for proof of application of water to beneficial use, as set out under the terms of Permit No. 21789 is due not later than April 21, 1963. If by this date you are not prepared to make this proof, you may make it at a later date, however, your priority will be advanced the same length of time for which the proof is late.

Before this proof can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county.

We enclose Form 10, in duplicate, which is to be filled in and returned to this department at least forty (40) days before the above mentioned date and/or before the time you intend to make proof. This form, in duplicate, is to include the time of day, the date, the name of the town, the address of the Notary Public before whom you will appear to make the depositions of proof (this may be at any place that is convenient for you and your two witnesses), the quantity of water, for what purpose it is used, the point or points of diversion and the location of use or lands which are irrigated - by legal land description. Descriptions should be taken from your Permit, including any amendments thereto, as recorded in this department. If changes have been made and no amendments are on record, we advise that you request a form for this purpose before your notice is published.

Also enclosed is Form 11, which is the authorization for us to have the notice published in the designated county newspaper, at your expense. This is to be returned with Forms 10.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set and at the place named, before the Notary Public, as advertised in the publication notice.

The amount of water allowed in a license cannot be more than is actually produced and measured and put to beneficial use, and cannot be more than the statutory amount allowable per acre of land actually found by field inspection to have been irrigated at the time of proof.

Dear Mr. McDowell:

We have the report of the field examiner that 632 acres are presently being irrigated in Secs. 2, 3, 10 and 11, T. 6 S., R. 4 E., B.M. under the above noted permits.

The land in Secs. 4 and 9 is being leveled, with new location of ditches which will require further proofs of beneficial use of the water.

Permit No. 21789 claims 12.3 cubic feet per second, and Permit No. 22644 claims 1.7 cubic feet per second, sufficient to cover the 12.64 c.f.s. allowable.

The fees for the two water licenses total \$44.00 for 22 subdivisions inspected.

Our letter to Mr. L. E. Haight, Vice President of Grandview Realty, Inc., in regard to Permit No. 26757 is voided as the report of the examiner showed more land than can be irrigated.

We acknowledge receipt of the depositions of holder and two witnesses, also affidavit of publication in the Owyhee Nugget, all submitted in proof of completion of works and beneficial use on Permit No.

Before final action is taken in the matter, the law requires that a field examination be made by an engineer from this department.

We cannot tell just when this examination will be made, but our field engineer will try and contact you at the time he makes the examination so that arrangements may be made to show him over the grounds.

If a well, state depth of well, depth and size of casing and depth to water. If pump is used, state discharge of pump and tell how it was measured or determined. If sprinkler irrigation, give number and size of nozzles and operating pressure.

Ans. The works consist of 1 turbine type pump w/150 hp motor producing 3300 gpm; 1 turbine type pump w/60 hp motor producing 1200 gpm; 1 centrifugal pump w/275 hp motor producing 5800 gpm. These fall into a 30" pipeline capable of carrying 1500 miner's inches. Then it branches into several laterals & distribution ditches which will carry all the water produced. The drawdown, static water level would be from 150' to 143' which is a point where it is discharged from the pipeline into the ditch & then flows from gravity. I have not seen this measured but know it was measured by an engineer.

Ques. 6. State for what purpose water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have actually been irrigated with said water.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Ques. 7. If for other than irrigation purposes; state how applied, amount of horse power generated, etc.

Ans. The water is used for irrigation only.

Ques. 8. What is the minimum amount of water required for the purpose specified above?

Ans. We need at least 1"/ac. for this surface irrig. & in order to raise crops, we could use, and do, 2"/ac.

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. This was assigned from John Reid & Margaret E. Robinson, Mildred E. Swanson & Ralph E. Gale.

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. This water was put into use in 1957 and has been used every season since then.

Ques. 11. State when, how, in what amount and to what extent waters other than those diverted under the above mentioned permit have been diverted and applied to beneficial use upon the lands herein described. Give full particulars regarding such other appropriations and rights claimed thereunder.

Ans. 21789, 26757, 26518. Waters from these permits have been diverted onto the land.

Proof of Application of Water to Beneficial Use

Deposition of Witness

The deposition of two witnesses, on this form, taken separately, required in each case.

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. Victor E. Hansen; age - 57; residence - 200 Homestead Dr., Boise, Idaho;
occupation - design engineer; postoffice address - same as residence.

Ques. 2. Are you acquainted with L. E. Haight, the holder of Permit No. 22653? How long have you known him and where does he reside?

Ans. I have known him 5 years and know that he lives at 1910 Montclair Dr., Boise, Idaho.

Ques. 3. Have you read or heard read said Permit No. 22653, and are you familiar with its provisions and conditions?

Ans. Yes.

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans. Water comes from the Snake River and the works consist of 1-150 hp turbine type pump which produces 3300 gpm; 1-60 hp turbine type pump which produces 1200 gpm; 1-275 hp pump (centrifugal), which produces 5800 gpm. There is a 30" pipeline and 1/4 mile of private ditch.

Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. 22 cfs. I designed this sytem & have watched the outfall and I know that it produces at least that amount.

Ques. 6. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. Water is used for irrigation in: NE $\frac{1}{4}$ SW $\frac{1}{4}$ (30), SW $\frac{1}{4}$ SW $\frac{1}{4}$ (30), SE $\frac{1}{4}$ SW $\frac{1}{4}$ (40), SW $\frac{1}{4}$ SE $\frac{1}{4}$ (20), SE $\frac{1}{4}$ SE $\frac{1}{4}$ (30), Sec. 3; NW $\frac{1}{4}$ NE $\frac{1}{4}$ (25), NE $\frac{1}{4}$ NW $\frac{1}{4}$ (5), SE $\frac{1}{4}$ NW $\frac{1}{4}$ (10), SW $\frac{1}{4}$ NE $\frac{1}{4}$ (8), SE $\frac{1}{4}$ NE $\frac{1}{4}$ (35), Sec. 9; NE $\frac{1}{4}$ NE $\frac{1}{4}$ (12), NW $\frac{1}{4}$ NE $\frac{1}{4}$ (35), NE $\frac{1}{4}$ NW $\frac{1}{4}$ (40), NW $\frac{1}{4}$ NW $\frac{1}{4}$ (20), SW $\frac{1}{4}$ NW $\frac{1}{4}$ (40), SE $\frac{1}{4}$ NW $\frac{1}{4}$ (40), SW $\frac{1}{4}$ NE $\frac{1}{4}$ (35), SE $\frac{1}{4}$ NE $\frac{1}{4}$ (15), NE $\frac{1}{4}$ SE $\frac{1}{4}$ (30), NW $\frac{1}{4}$ SE $\frac{1}{4}$ (35), NE $\frac{1}{4}$ SW $\frac{1}{4}$ (30), NW $\frac{1}{4}$ SW $\frac{1}{4}$ (15),

RE: Permit Nos. 21789, 22653, 26518, 26757

L. E. Haight, Vice President
Grandview Realty Inc.
Box 2297
Boise, Idaho

Dear Mr. Haight:

Enclosed is the report of examination of works under Permit No. G-26757, Also enclosed are four forms to amend the Land List.

The other permits listed above, all of different priority, conflict to some extent with No. 26757 which is the latest priority. All permits were for one miner's inch per acre of land except 21789 and 22653 which together make a total of one inch per acre for the same land. A rough check shows one 40-acre subdivision with over 40 inches and most with less.

The examination report shows more acres irrigated than shown on the permits together in some subdivisions, though some particular subdivisions are less.

This office cannot allow over one miner's inch per acre of irrigable land under all water rights from the same source. Trouble will arrive with the three other permits, two of which cover the same subdivisions plus additional land, and one covering part of this land, but not all the land, in arriving at an equitable distribution of water.

I suggest that all permits be amended to show all of the project land without restriction to acres in each subdivision such as NE $\frac{1}{4}$ SW $\frac{1}{4}$, S $\frac{1}{4}$ SW $\frac{1}{4}$, SE $\frac{1}{4}$, Sec. 3; S $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 4; N $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 8 etc. with any extra land you are irrigating which is not shown on the permits at present. That will give all the land an equal water right with equal priorities. It would also require another inspection of the property under Permit No. 26757.

22453

L. E. Haight - continued - page 2

The statutory fees would be \$5.00 for each Certificate of Completion of Works plus \$2.00 for each 40-acre subdivision for the first Water License with no fees for the other three Water Licenses.

INSTRUCTIONS

PROOF OF COMPLETION OF WORKS

Boise, Idaho **February 1, 1957**

Dear Sir:-

Under the terms of your permit No. 22653 you are required to complete your diversion works on or before April 21, 1957. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Yours truly,

MARK R. KULP
