Dear Mr. McDowell:

We have the report of the field examiner that 632 acres are presently being irrigated in Secs. 2, 3, 10 and 11, T. 6 S., R. 4 E., N.M. under the above noted permits.

The land in Secs. 4 and 9 is being leveled, with new location of ditches which will require further proofs of beneficial use of the water.

Permit No. 21789 claims 12.3 cubic feet per second, and Permit No. 22644 claims 1.7 cubic feet per second, sufficient to cover the 12.64 c.f.s. allowable.

The fees for the two water licenses total \$44.00 for 22 subdivisions inspected.

Our letter to Mr. L. E. Haight, Vice President of Grandview Realty, Inc., in regard to Permit No. 26757 is voided as the report of the examiner showed more land than can be irrigated.

Very truly yours,

Harley M. McDowell
P. O. Box 3161

Dear Mr. McDowell:

We believe that all of the above numbered permits have a common point of diversion through a pumping plant and pipe to ditches.

Permit No. 23014 was filed in connection with a desert land entry which our records show was not allowed and the case was closed. Possibly this permit should be relinquished or assigned with amendment to the land list.

The other permits claim a total of 21.82 c.f.s. all for irrigation of the same land.

The flow from the penstock was measured as 23 c.f.s. on April 3rd. The examination showed that 542 acres were irrigated, in Sections 3 and 10. Some land in Section 9 had been irrigated in the past, however all of the works and the land were being reworked and the area was not determined from the air photo. There was also some land in Section 11 and NE 1/4, Sec. 9, which is not on the land list.

It seems that the license could be issued under Permit 21789 for all of the present development and later proofs of beneficial use will be necessary under the other permits. Land under Permit No. 22644 were not inspected.

Kindly advise how this problem should be solved.

Re: Permit No. 21789, 22653
Grandview Realty Co.

Date: Feb. 1, 1963

Harley M. McDowell
Boise, Idaho

Dear Mr. McDowell:

The date for proof of application of water to beneficial use, as set out under the terms of Permit No. 21789, 22653 is due not later than April 21, 1963. If by this date you are not prepared to make this proof, you may make it at a later date, however, your priority will be advanced the same length of time for which the proof is late.

Before this proof can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county.

We enclose Form 10, in duplicate, which is to be filled in and returned to this department at least forty (40) days before the above mentioned date and/or before the time you intend to make proof. This form, in duplicate, is to include the time of day, the date, the name of the town, the address of the Notary Public before whom you will appear to make the depositions of proof (this may be at any place that is convenient for you and your two witnesses), the quantity of water, for what purpose it is used, the point or points of diversion and the location of use or lands which are irrigated - by legal land description. Descriptions should be taken from your Permit, including any amendments thereto, as recorded in this department. If changes have been made and no amendments are on record, we advise that you request a form for this purpose before your notice is published.

Also enclosed is Form 11, which is the authorization for us to have the notice published in the designated county newspaper, at your expense. This is to be returned with Forms 10.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set and at the place named, before the Notary Public, as advertised in the publication notice.

The amount of water allowed in a license cannot be more than is actually produced and measured and put to beneficial use, and cannot be more than the statutory amount allowable per acre of land actually found by field inspection to have been irrigated at the time of proof.

Permit No. 21789

Proof of Application of Water to Beneficial Use

Deposition of Holder

Ques. 1. State your name, residence, occupation and postoffice address.

Ans. L. E. Haight; residence - 1910 Montclair Cr., Boise, Ida.; occupation - attorney & vice president of Grandview Realty, Inc.; postoffice address - Box 2777, Boise, Idaho

Ques. 2. If acting in behalf of corporation, state its name, principal place of business (if a foreign corporation, give name of postoffice of statutory agent), your position with reference to same, and your authority for appearing in its behalf.

Ans. I am acting as vice president of Grandview Realty, Inc., Box 2777, Boise, Idaho

Ques. 3. State number and date of permit, and date of priority you propose to establish under the permit.

Ans. No. 21789; date of permit - 11/28/50; date of priority - 11/14/50

Ques. 4. State source of water supply and give exact location of point of diversion.

Ans. The source of water is the Snake River with the point of diversion in the NE $\frac{1}{4}$ NE $\frac{1}{4}$, Section 3, T6S - R4E., B.M.

Ques. 5. Describe your works of diversion, and state amount of water they are capable of conveying from point of diversion to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use. If a well, state depth of well, depth and size of casing and depth to water. If pump is used, state discharge of pump and tell how it was measured or determined. If sprinkler irrigation, give number and size of nozzles and operating pressure.

Ans. The works consist of 1 turbine type pump w/150 hp motor, which produces 3300 gpm; 1 turbine type pump w/60 hp motor, which produces 1200 gpm; 1 centrifugal pump w/275 hp motor which produces 5800 gpm. These fall into a 30" pipeline, capable of carrying 1500 miner's inches. This falls into a private ditch, approx. $\frac{1}{4}$ mi. long which is capable of carrying 1500 miner's in. This branches into several laterals & distribution ditches which will readily carry all the water produced. The drawdown, static water level would be from 150' to 143' which is a point where it is discharged from the pipeline into the ditch & then flows from gravity. I did not see this measured but know it was measured by an engineer

Ques. 6. State for what purpose water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have actually been irrigated with said water.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. This water is used to irrigate: NE $\frac{1}{4}$ SW $\frac{1}{4}$ (30), SW $\frac{1}{4}$ SW $\frac{1}{4}$ (30), SE $\frac{1}{4}$ SW $\frac{1}{4}$ (40), SW $\frac{1}{4}$ SE $\frac{1}{4}$ (26), SE $\frac{1}{4}$ SE $\frac{1}{4}$ (30), Sec. 3; NW $\frac{1}{4}$ NE $\frac{1}{4}$ (25), NE $\frac{1}{4}$ NW $\frac{1}{4}$ (50), SE $\frac{1}{4}$ NW $\frac{1}{4}$ (10), SW $\frac{1}{4}$ NE $\frac{1}{4}$ (8), SE $\frac{1}{4}$ NE $\frac{1}{4}$ (35), Sec. 9; NE $\frac{1}{4}$ NW $\frac{1}{4}$ (40), NW $\frac{1}{4}$ NW $\frac{1}{4}$ (20), SW $\frac{1}{4}$ NW $\frac{1}{4}$ (40), SE $\frac{1}{4}$ NW $\frac{1}{4}$ (40), NW $\frac{1}{4}$ NE $\frac{1}{4}$ (35), NE $\frac{1}{4}$ NE $\frac{1}{4}$ (12), SW $\frac{1}{4}$ NE $\frac{1}{4}$ (35), SE $\frac{1}{4}$ NE $\frac{1}{4}$ (15), NW $\frac{1}{4}$ SE $\frac{1}{4}$ (35), NE $\frac{1}{4}$ SE $\frac{1}{4}$ (30), NW $\frac{1}{4}$ SW $\frac{1}{4}$ (15), NE $\frac{1}{4}$ SW $\frac{1}{4}$ (30), Sec. 10, T6S - R4E. There is no natural meadow & all improvements were made as a direct result of this use.

Ques. 6-a If this is a ground water permit, give name and address of person that drilled the well.

Ans. _____

21789

Ques. 7. If for other than irrigation purposes; state how applied, amount of horse power generated, etc.

Ans. The water is used for irrigation only.

Ques. 8. What is the minimum amount of water required for the purpose specified above?

Ans. We need at least 1 miner's in./ac. for this surface irrig. & in order to raise crops, we could use, and do, 2"/ac. .

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. This was assigned from John Reid Robinson, Margaret E. Robinson, Mildred E. Swanson and Ralph E. Gale.

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. This water was put into use in 1957 and has been used every season since then.

Ques. 11. State when, how, in what amount and to what extent waters other than those diverted under the above mentioned permit have been diverted and applied to beneficial use upon the lands herein described. Give full particulars regarding such other appropriations and rights claimed thereunder.

Ans. 22653, 26518, 26757. Waters from these permits have been diverted onto the land.

Deposition of Witness

The deposition of two witnesses, on this form, taken separately, required in each case.

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. R. M. Winans; Age - 36; residence, 2634 Augusta St., Boise, Idaho; occupation - administrative assistant & agricultural supervisor; postoffice address - same as residence.

Ques. 2. Are you acquainted with L. E. Haight, the holder of Permit No. 21789? How long have you known him and where does he reside?

Ans. I have known him 3 years and know that he resides at 1910 Montclair Drive, Boise, Idaho

Ques. 3. Have you read or heard read said Permit No. 21789, and are you familiar with its provisions and conditions?

Ans. Yes

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans. Source of water is the Snake River; place of diversion in NE $\frac{1}{4}$ NE $\frac{1}{4}$, Sec. 3, T6S-R4E. The works consist of 2 turbine type pumps and 1 centrifugal pump which produce 10,300 gpm. This is pumped into a 30" pipeline and then into 1/4 mile of private ditch.

Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. 22 cfs

Ques. 6. State for what purpose water is used and at what place. (If for irrigation, give each subdivision in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. The water irrigates: NE $\frac{1}{4}$ SW $\frac{1}{4}$ (30), SW $\frac{1}{4}$ SW $\frac{1}{4}$ (30), SE $\frac{1}{4}$ SW $\frac{1}{4}$ (40), SW $\frac{1}{4}$ SE $\frac{1}{4}$ (20), SE $\frac{1}{4}$ SE $\frac{1}{4}$ (30), Sec. 3; NW $\frac{1}{4}$ NE $\frac{1}{4}$ (25), NE $\frac{1}{4}$ NW $\frac{1}{4}$ (5), SE $\frac{1}{4}$ NW $\frac{1}{4}$ (10), SW $\frac{1}{4}$ NE $\frac{1}{4}$ (8), SE $\frac{1}{4}$ NE $\frac{1}{4}$ (35), Sec. 9; NE $\frac{1}{4}$ NE $\frac{1}{4}$ (12), NW $\frac{1}{4}$ NE $\frac{1}{4}$ (35), NE $\frac{1}{4}$ NW $\frac{1}{4}$ (40), NW $\frac{1}{4}$ NW $\frac{1}{4}$ (20), SW $\frac{1}{4}$ NW $\frac{1}{4}$ (40), SE $\frac{1}{4}$ NW $\frac{1}{4}$ (40), SW $\frac{1}{4}$ NE $\frac{1}{4}$ (35), SE $\frac{1}{4}$ NE $\frac{1}{4}$ (15), NE $\frac{1}{4}$ SE $\frac{1}{4}$ (30), NW $\frac{1}{4}$ SE $\frac{1}{4}$ (35), NE $\frac{1}{4}$ SW $\frac{1}{4}$ (30), NW $\frac{1}{4}$ SW $\frac{1}{4}$ (15), Sec. 10, T6S-R4E. This is all cultivated land and all improvements were made as a direct result of the use.

21789

Ques. 7. If for power or other purposes than irrigation, state how water has been applied and to what extent.

Ans. None - irrigation only.

Ques. 8. If for irrigation, state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. Land is sandy and it will take as much as 2"/ac. for profitable cultivation.

Ques. 9. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. No.

Ques. 10. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. I have known this development very well the last 3 years. I have been there every year several times during the cropping season.

RE: Permit Nos. 21789, 22653, 22653, 26518, 26757

L. E. Haight, Vice President
Grandview Realty Inc.
Box 2297
Boise, Idaho

Dear Mr. Haight:

Enclosed is the report of examination of works under Permit No. G-26757, Also enclosed are four forms to amend the land list.

The other permits listed above, all of different priority, conflict to some extent with No. 26757 which is the latest priority. All permits were for one miner's inch per acre of land except 21789 and 22653 which together make a total of one inch per acre for the same land. A rough check shows one 40-acre subdivision with over 40 inches and most with less.

The examination report shows more acres irrigated than shown on the permits together in some subdivisions, though some particular subdivisions are less.

This office cannot allow over one miner's inch per acre of irrigable land under all water rights from the same source. Trouble will arrive with the three other permits, two of which cover the same subdivisions plus additional land, and one covering part of this land, but not all the land, in arriving at an equitable distribution of water.

I suggest that all permits be amended to show all of the project land without restriction to acres in each subdivision such as NE $\frac{1}{4}$ SW $\frac{1}{4}$, S $\frac{1}{2}$ SW $\frac{1}{4}$, SE $\frac{1}{4}$, Sec. 3; SE $\frac{1}{4}$ SE $\frac{1}{4}$, Sec. 4; N $\frac{1}{2}$ NE $\frac{1}{4}$, Sec. 8 etc. with any extra land you are irrigating which is not shown on the permits at present. That will give all the land an equal water right with equal priorities. It would also require another inspection of the property under Permit No. 26757.

The statutory fees would be \$5.00 for each Certificate of Completion of Works plus \$2.00 for each 40-acre subdivision for the first Water License with no fees for the other three Water Licenses.

Very truly yours,

Re: Permit No. 21789

Mr. Walter Smith
Bruneau, Idaho

Dear Mr. Smith:

It is necessary to measure the output of the pumps that furnish water to the farms of Swanson, Gale and Robinson.

I have talked to Mr. Gale and he referred me to you.

I intend to drive down and measure it on Tuesday, August 13th and would want you to be present at that time.

If for any reason this date is not possible, please advise this office immediately and give a range of dates on which it is possible to measure the pump's output.

INSTRUCTIONS
PROOF OF COMPLETION OF WORKS

Boise, Idaho,

Dear Sir:—

I enclose herewith blank form upon which to give notice that you are prepared and desire to submit proof of completion of works under your permit No. 21789.

This form should be filled out and mailed to the Department of Reclamation, at least 60 days before the date upon which proof is to be submitted, which proof MUST be on or before April 21, 1957. Upon receipt of the blank properly filled out, notice of publication will be sent to the paper direct from this office, which notice must be published a period of four weeks prior to the date of proof.

The proof may be submitted at any place convenient to you and two witnesses, where there is a notary public or other officer authorized to administer oaths.

The certificate that shall be issued under this proof does not give you a perpetual right to the use of the water for which application is made, as it only confirms the completion of the works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Very truly yours,

MARK R. KULP

RE: Permit #21789 and #22653.

Boise, Idaho, Sept. 24, 1955

Mr. Mark R. Kulp
State Reclamation Engineer

Your letter of September 20, 1955 advises me that the Idaho District Land office has notified you that the Desert Land Entries of R. E. Gale, Idaho-01023, Mildred Swanson - Idaho-01670, Margaret Robinson - Idaho-01671, and John R. Robinson - Idaho-01672 were all allowed April 21, 1952.

Owing to the long delay in allowing these entries during which time we were unable to proceed with the irrigation development we request an Extension of Time be allowed for completion of works under these Permits. We are asking that the time for completion be extended to April 21, 1957.

To date we have completed the following diversion works, consisting of concrete lined pump Sump 10' X 10' X 10' deep with steel trash racks; have installed 1 - 150 HP turbine pump, 1 - 60 HP turbine pump (capacity of the two pumps is 10 CFS) and 2600' of 30" #7 Ga. welded steel pipe line complete with concrete anchor blocks and concrete terminal structures, discharging into 2.6 miles of main canal along which 14 concrete head gates regulate water discharges into about 2 miles of secondary ditches and 3 miles of laterals. One half of a 22" concrete pipe syphon (600' long) has been installed. Total cost of these improvements is \$14,363.00.

After considering the above information we urge you to grant our request for an extension of time to complete the facilities to irrigate 732 acres of land as required under permits #21739 and #22653.
