Re: Request for Information about Neighboring Irrigation Lands

Dear Mr. Wegryniak:

We are in receipt of your letter dated February 5, 1985, in which you requested information regarding the history of irrigation of lands east of Bruneau Dunes State Park. We have conducted a preliminary analysis and have enclosed some information for your review.

The attached copy of a portion of the 1:100,000 scale BLM map at Glens Ferry, ID describes the area in the vicinity of Bruneau Dunes State Park. Note that as shown on the photocopy, the lands in which you are interested are located within Twp 6S Rge 6E and Twp 6S Rge 7E. Based on your description, it appears that you are mostly interested in lands located within Secs. 1 and 12 of Twp 6S Rge 6E and Secs. 7 and 18 of Twp 6S Rge 7E.

We have enclosed copies of microfiche which depict information regarding water rights with use of irrigation and with place of use within the tracts of interest. Note that the information on the microfiche is organized by legal description, and the information shown includes water right number, priority date (date of filing), and source.

Based on a review of both the place of use information and a search of water rights in the name of Wilbur Wilson, we have identified three water rights which appear to be of interest to you. Copies of the three water rights, identified as Nos. 02-2054, 02-2047, and 02-7272 are enclosed for your information. Note that the first two water rights are licenses which have been examined and are fully approved. For these two water rights, copies of our field examiner reports are included. Because the third water right is still in the form of a permit, it has not been examined and our file does not currently contain information regarding the extent of development of the right.

Ed Wegryyniak
February 12, 1985
Page 2

To specifically respond to the questions in your letter, it may be interesting for you to review the proof of application of water to beneficial use. A copy of this form has been included for both licenses. Note that this form contains information regarding the original irrigation system. Regarding the date that sprinklers were installed to irrigate the property instead of flood irrigation, there is no information in our files.

Based on the information herein, you may find certain data that is useful in your analysis, and you may find a need for additional information. If so, please feel free to contact us and we will be happy to assist you further. The complete files for the Wilbur Wilson water rights are located in this office and are available for your review. In addition, you may want to contact the Soil Conservation Service office in Owyhee county, which is likely located in Murphy. The Soil Conservation Service is often involved in design and implementation of conversion from flood irrigation to sprinkler irrigation, and they may have records that would be of interest to you.

FEB 7 1985

Dear Sir;

Department of Water Resources

We have recently been updating our interpretive slide presentation here at the Bruneau Dunes State Park. In our program we've given a brief explanation of the forming of lakes here and in the past assumed their appearance was due to the building of C. J. Strike Dam and the flow of the Snake River. Since about 1980 we've seen a steady decline of the water level in our larger lakes and the disappearance of the smaller lakes in the marsh area. The combination of these ecosystems have provided a very unique experience for many visitors to the park.

We've talked to a number of people who visited the area frequently before, during and after the formation of the lakes and have heard from different people that there was development of additional agricultural projects, about the same time the completion of Strike Dam came about.

The area that we're concerned about is the adjacent land to the east of the park property which was cultivated and farmed by Willbur Wilson. Could your department tell us when this piece of land was irrigated and the amount of water used to flood irrigate it? Would your staff know where

it was that the method of irrigation changed from flood to sprinklers?

The explanation for the formation of the lakes has been a regular part of our program and the question seems to be fairly common now is, "Why are the lake levels dropping?" We hope with some addition information on the facts that surrounded the formation of the lakes, we can provide an answer to both question.

Where did the water come from and why are the lakes disappearing?

Any help from your agency would be greatly appreciated. Thank You.

Sincerely
Ed Hegygyriak

Asst. State Reclamation Engineer,
State House, Boise, Idaho

Dear Mr. Humphrey;

Pursuant to your recent request, I herein
submit for your information two current meter measurements
taken at the Wilber Wilson Eagle Cove pumping plant as follows:

July 6, 1953	-----	1006	miners	inches
August 30, 1953	--	956	"	"

Both of these measurements were taken in the main canal
a short distance from the outlet pipe from the pumps.

Respectfully submitted,

RE: Permit No. 19562

Mr. Eugene E. Anderson
Idaho Building
Boise, Idaho

Dear Mr. Anderson:

The relinquishment of Herbert C. Brown of his interest in Permit No. 19562 has been placed on file, but in checking the files we find that we have not yet received the affidavit of publication in connection with completion of works proof made on the Wilson's portion of the permit, November 14, 1949.

Our records further show that this notice was published in the Owyhee Nugget from October 27 to November 17, 1949, inclusive, but the affidavit of publication is necessary to complete the proof.

We understand that they are prepared to make final, or beneficial use proof under this permit and we are wondering if, at the same time, they wish to make beneficial use proof on Permit No. 19577.

Completion of works proof was made on Permit No. 19577 on December 3, 1949, for 6 $\frac{1}{2}$ second feet of water from Snake River for the irrigation of 325 acres in the NW $\frac{1}{4}$ SW $\frac{1}{4}$, S $\frac{1}{2}$ SW $\frac{1}{4}$, SE $\frac{1}{4}$ Section 12, and the N $\frac{1}{2}$ NE $\frac{1}{4}$ and N $\frac{1}{2}$ NW $\frac{1}{4}$ Section 13, Township 6 South, Range 7 East, B.M.; Lots 3 and 4 Section 7, Township 6 South, Range 8 East, B.M.

Dear Mr. Perk:

On September 27, 1949, while I was on vacation, you left in the Department, Notice of Completion of Works Proof under Permit No. 19562 in the name of Wilber F. Wilson, Mary A. Wilson and Herbert C. Brown, said proof to be made on November 19, 1949.

A note attached to the notice states that, at your request, we are to withhold publication for approximately two weeks, within which time you hoped to obtain a relinquishment of the Brown interest.

The note also states that you would come in to advise us about the matter. The time is now getting short, and if the proof is to be made on November 19, it will have to get to the newspaper within the next two or three days.

Please advise if Mr. Brown's relinquishment has been obtained, thus eliminating his name from the notice, or whether we shall proceed with the publication as is.

DEAR SIR:

I enclose herewith blank form upon which to give notice that you are prepared and desire to submit proof of completion of works under your permit No. 19562.

This form should be filled out and mailed to the Department of Reclamation, at least 60 days before the date upon which proof is to be submitted, which proof MUST be on or before November 20, 1949. Upon receipt of the blank properly filled out, notice for publication will be sent to the paper direct from this office, which notice must be published a period of four weeks prior to the date of proof.

The proof may be submitted at any place convenient to you and two witnesses, where there is a notary public or other officer authorized to administer oaths.

The certificate that shall be issued under this proof does not give you a perpetual right to the use of the water for which application is made, as it only confirms the completion of the works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Very truly yours,

~~MAILED~~
Commissioner of Reclamation.

Dear Mr. Hansen:

We enclose herewith, two certified copies of Permit No. 19562, in the name of Wilbur F. Wilson, Mary A. Wilson, and Herbert C. Brown, for the appropriation of 19.2 second feet of water from Snake River, for the irrigation of 960 acres in Sections 1 and 12, Township 6 South, Range 6 East, B.M. and Sections 7 and 18, Township 6 South, Range 7 East, B.M.

You will note that this does not include any land in Section 6, Township 6 South, Range 7 East, B.M.

A recheck of the Wilson filings shows Permit No. 19577 for $6\frac{1}{2}$ second feet of water from Snake River, diverted in Lot 4 of Section 6, Township 6 South, Range 8 East, B.M., for the irrigation of 325 acres in Section 7, Township 6 South, Range 8 East, B.M. and Sections 12 and 13, Township 6 South, Range 7 East, B.M.

Also Permit No. 19580, in the name of Edna Myrrl Heller (a daughter of Frank E. Wilson) for 0.6 of a second foot from Snake River, also diverted in Lot 4, Section 6, Township 6 South, Range 8 East, for the irrigation of 30 acres in Lots 3 and 4, Section 7, Township 6 South, Range 8 East.

We do not suppose you are interested in copies of these other two Permits, but shall be glad to furnish same, if you want them. The cost of the certified copies of Permit No. 19562 is \$2.50.

Very truly yours,

Attention: Mr. Mark Kulp.

Dear Mr. Kulp:

Pursuant to our discussion of water filing for Mr. Frank Wilson on the Eagle Cove development, I am sending herewith description of the areas for which the water will be used. It is given as follows:

Sec. 36, T. 5 S. R. 6 E., Secs. 1 and 12, T. 6 S. R. 6 E., and Secs. 6, 7, 18, T. 6 S. R. 7 E.

It is my understanding that two certified copies are required showing the present status of the filings.

I will appreciate your preparing the required papers on these filings.

Respectfully yours
