RE: Permit No. 24623

ATTENTION: Mr. S. B. Whiting

Dear Mr. Whiting:

We have your letter of June 14 enclosing an Assignment of Permit No. 24623 from Howard Shepherd and wife to Jitsuo Imada, but you failed to enclose the fifty cents recording fee as mentioned in our letter of June 1st.

This Permit is for 1.6 cubic feet per second (or 80 inches) for 80 acres and the proof of completion of works for which Certificate was issued in December, 1954, showed only one pump and a capacity of 1.6 cubic feet per second.

To get five acre feet of water per acre on 209 acres would require in the neighborhood of 3.35 cubic feet per second of which Permit No. 24623 would supply 1.6 cubic feet per second leaving a balance of 1.75 cubic feet per second

We suggest that Mr. Imada make application for the difference between 209 Miner's inches or an inch to the acre on the 209 acres of irrigated land and the 80 inches covered by Permit No. 24623 should be 129 inches or 2.58 cubic feet per second with as many points of diversion as are considered necessary.

NOTE: One Miner's Inch per acre equals one Acre Foot per acre each 25 days.

We enclose a form of application for an additional permit together with a pamphlet giving regulations and instructions in regard to filing same.

RE: Permit No. - 24623

Dear Sir:

Enclosed please find assignment of the above permit originally issued to Howard Shepherd. Mr. Imada has requested that I contact you relative to this filing.

There are 3 pumps now located on this property, and there are 209 acres of irrigated ground. It is their intention to row crop most of this property, and they would like to have 5 feet of water per acre.

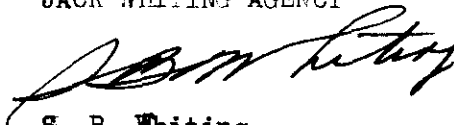

The original application of this permit shows the location of one pump and, therefore, we are wondering is there is any thing we can do so that they can have protection on the other 2 pumps.

We will appreciate your advice relative to this matter.

Dear Sir:-

Under the terms of your permit No. 24623 you are required to complete your diversion works on or before January 2, 1954. I enclose herewith blank affidavit to be filled out, sworn to by you before a Notary Public or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, together with a fee of \$5.00, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Mr. Mark Kulp
State Reclamation Engineer
Boise, Idaho

Dear Mr. Kulp:

About two weeks ago I sent you an application for a permit to appropriate water from the Snake River below the town of Weiser, Idaho, for irrigation purposes. To date I have not received a permit number from you and development of the farm is being held up pending receipt of it. Will you please look into this matter and give it your immediate attention.

Thanking you, I am,

Sincerely yours,

Howard Shepherd
