Beneficial use: Irrigation of 200 acres and stockwater

Priority date established: November 26, 1962

If Permit Nos. 03-2048 and 03-2051 are issued as set forth above the land that you are currently irrigating will be licensed for one miner's inch per acre, the statutory limit, and the earliest possible priority dates. Thus, we propose to issue the two licenses as set forth above and cancel Permit No. 03-7015.

In order for the Department to issue the above licenses, it will be necessary for you to amend the permit to correspond with the findings of the field examiner. We are enclosing partially completed amendment forms for your use in this matter.

Please sign the amendment applications and return them to this office along with a \$20.00 filing fee within 30 days in order that we might issue your licenses as set forth above. If you do not concur with these findings or have any questions, please contact us within the 30-day period.

Sincerely,

BILL MACALLISTER

Gentlemen:

We acknowledge receipt of the affidavit submitted as proof of beneficial use for the above referenced permit. Enclosed also is a copy of the approved amendment.

Before a license can be issued, a field examination must be made by a representative of this Department. We cannot tell during which part of the irrigation season this examination will be made, but our examiner will try to contact you at the time he makes the exam so that you may show him the system.

If you have any questions regarding the field examination, please contact our Regional Office in Boise.

Dear Mr. Carlson:

One of the conditions of approval of your water Permit No. 30825/02-2179 (see last page of your approved permit) was that evidence of the extent of development be submitted as proof of application of water to beneficial use to this office on or before November 30, 1973. Enclosed is an affidavit form which must be used to submit the required proof of beneficial use.

If you have not fully completed your project, and you have not previously received an extension of time, you may request an extension of time provided the delay is for reasonable cause as indicated in Section 42-204, Idaho Code, amended. If you have been prevented from proceeding by a governmental agency or by litigation, more than one extension of time can be granted.

Either the beneficial use affidavit or a request for an extension of time must be received by this Department on or before the above mentioned date, otherwise the permit will lapse and be of no further force or effect.

Re: Permit No. 30825/02-2179

J. A. Terteling & Sons, Inc.
Box 2730
Boise, Idaho

Gentlemen:

During the 1967 session of the Idaho Legislature, certain amendments were made in the law pertaining to the procedures for making proof of beneficial use of water. In order for the Department to comply with these changes, Rules of Practice and Procedure were adopted on August 1, 1968. Generally, these procedures and the amended law make it simpler for a permit holder to make proof of beneficial use of water.

The enclosed Order modifies the above referenced permit to comply with these rules and regulations. As a part of the new procedure, you will be required to publish a notice at your expense for two consecutive weeks in a newspaper as prescribed by the Department.

If you will complete and return the enclosed advertising authorization, we will cause the notice to be published. If you have any questions regarding this matter, please let us know.

Sincerely,

BOBBY D. FLEENOR
Assistant Director

Re: Permit No. 30825

J. A. Terteling & Sons, Inc.
Box 1428
Boise, Idaho

Gentlemen:

Under the terms of your Permit No. 30825 you are required to complete your diversion works on or before Nov. 30, 1967. I enclose blank affidavit to be filled out, sworn to by you before a Notary Public, or a Justice of the Peace, and returned to this office on or before the above date, or within ten days thereafter, for the purpose of making proof of completion under the said permit. Upon receipt of this affidavit in this office, provided the same satisfactorily shows the completion of the works substantially in accordance with the terms of the permit, a Certificate of Completion will be issued to you.

The certificate to be issued under this proof will not give a perpetual right to the use of water for which application was made, as it only confirms the completion of works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Very truly yours,

State Reclamation Engineer
