Re: Permit No. G - 30358

Tautou Ben Imada

Weiser, Idaho

Dear Mr. Imada:

The date for proofs of Completion of Works and Application of water to beneficial use, as set out under terms of Permit No. G-330358 are due not later than Jan 19, 1967

Before these proofs can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper within the county in which the land is located. In completing the Notice of proof for publication, the information should be taken from your Permit, including any amendments made in connection with a change of point of diversion or land list, which has been recorded in this department. If changes have been made and no amendments are on record, we advise you request a form for this purpose before your Notice is published.

We enclose Form 36, in duplicate, which is to be filled out and returned to this department at least FORTY (40) DAYS BEFORE THE MENTIONED DATE, (allowing for four weeks publication). Please give the name of the town, the address of the place where the depositions will be executed, and, the name of the notary public before whom you will appear to make the depositions of proof (this may be at any place convenient for you and your two witnesses), the quantity of water filed; for what purpose it is used; the point, or points, of diversion; and the location of use or the lands which are irrigated - - all by legal land description.

Enclosed also is Form 11, which is the authorization for us to have the notice published in the designated county newspaper at your expense. This is to be returned with two Forms 36.

At the time we send the notice to the newspaper we will send to you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, at the place named, and before the notary public, as advertised in the publication notice.

Re: Application for Permit

Tsutomu Ben Imada
Route #3
Weiser, Idaho

Dear Mr. Imada:

Returned herewith is your application for permit to appropriate water from Snake River with your check for \$5.00.

The maximum amount which can be allowed is one miners inch or 1/50th of a cubic foot per second per acre of irrigable land without full justification for additional water. As you claim 21 acres, as irrigable, the amount claimed should be 0.42 cubic feet per second.

Under 12 you request 5 years for completion of works. An additional six years requested for beneficial use of the water does not seem reasonable and no extra time is allowed.

Under 14 you show land in SE $\frac{1}{4}$ NE $\frac{1}{4}$ and NW $\frac{1}{4}$ SE $\frac{1}{4}$, whereas your map indicates that all the land is in the SW $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 31.

The fee for the application is \$5.00 for any amount up to 1.0 cubic foot per second, plus \$0.25 for each additional cubic foot per second, or fraction thereof.

Kindly complete or correct your application and return with the proper filing fee.

Very truly yours,
