FROM: TIM LUKE

DATE: April 30, 1992

RE: FLOYD JENSEN RIGHTS, WATER USE & ASSESMENTS

=====

I have checked recent water district records and find that Mr. Jensen has been assessed by District 11. The watermaster's annual report also shows that Jensen did divert water in both 1991 and 1990. There were no diversions reported for Jensen in 1989. Attached to this memo are the diversion records for 1990 and 1991. The diversion records were extracted from the annual reports.

Also attached are proof reports of Jensen's water rights. The source of water under both rights is an unnamed drain, tributary to Bear River. The Department issued an order last year requiring measuring devices for a number of instream pump diversions. Jensen was one of the users required to install a measuring device. The Department issued the order based on a request of the watermaster, Pete Peterson. A copy of the order is also attached. I would need to check with Pete to verify whether or not Jensen installed a device.
