If certainly appears that most of the evidence (other than overlapping place of use) & deed conveying Railroad lands to Austin's predecessor support Blackadar's allegations that water under 75-0009 has been lost.

Perhaps, a proper course to flush the ~~matter~~ out fully and give Austin the opportunity to respond is for the IDWR to issue an "Order to Show Cause" - Austin would need to come forward & present some evidence to justify his claim under 75-0009 ^{or his claim} or the W/master would cease to deliver in the future.
