Notes From WATER MASTER CRAIG SHULTZ

RECEIVED
AUG 28 2003
Department of Water Resources

648-7836 Gordon Zyst - hasn't had any problems this year. pivots like last year. Didn't renough a shut end guys. This year was about like last year.

648-7704 Monte Zyst - had to lower well 40' - ^{on} Detroit Hwy. wells tapered down more than - shut down end guys. Ditch well did alright ^{with} ^{water} ^{holes} ^{was} ^{dit}. This year probably worse than past

648-7839 ⁷⁸⁶⁰ Pete Blosser - well by the house about 3/3 of normal. Only able to water a 1/3 of a normal year. Well this year was about the same a last year

648-7647 Stan Westren - 10 miles of canal had to go 20' deeper, sucked some air. well on church farm sucked air. Well this year is worse than last. cut back on number of lines run. Shotted back a valve

648-7834 Dale Westren - ^{Stevens place} volume was down to 1 line instead of 3. Shicks water down about 15 feet. Sucked air + had to go down 113' went down 20 more feet. Worst year in about 30 years

425-3663 Kim Welch - acceptable volume but down - hasn't had to ~~shut~~ down but pumped a little sand this year + didn't last about 50/acre. This year worse than last. Hadn't drilled deeper probably last ^{crop}

425-3172 Randall Stoddard - even after drilling well deeper could only run one pivot. Start 2nd pivot + 20 minutes later down to 40%. Did suck a little air last of July but as others shut off held up. Only irrigated once + went

425-5832 Eric Simonson - flows have been good - hasn't had to ~~shut~~ back This up about normal as any other

425-3255 Jerry Rindbecker - wells have been o-kay. wells haven't sucked air but has irrigated conservatively. Feels this year worst than last.

425-9129 Band Lloyd + hos. - volume was down - 200-300 gpm got by using canal water. No way well do it by self. Seem well does about same each year

well on Hepton road was surging, but went on total power program
where shut off on Monday + Wednesday 2pm - 8pm + surging stopped

425-3619
425-3585

Bart Christensen - ran pretty much the same as last year. Didn't
have to reorganize a throttle back. Felt this year was
about same as last

547-7113
648-7113

Chad Neilson

425-3875

Phil Zyt - well on Payne road had to be reorganized. The
pressures were worse than last. But managed to get by. Didn't
change crops due to drought. Grew about same crops + acres as last.

648-7828

Warren Sloyd - could only run one pivot at a time. When auxiliary
came on could run mini-pivot also. But as time went on only 1 pivot
would run. This year worse than last. Without new well felt couldn't run 1 pivot.

648-7872

Don Rigby - wells ran well and didn't have to cut volume.
Felt he used more water because of hot temperatures but wells
held out. Thought this year about like last except weather better.

648-7722

David Modestynski - didn't suck any air + irrigated normally. But
had neighbors on both side have to lower wells. Feels
if have another dry year may have problems. Felt lucky to have
good wells

425-3138

K.C. Jorgensen - Well well caved in blue clay had to be
cleaned out. Had to cut volume 20% but after cleaning came up
to par. Felt last 3 years water getting less. This year + last year about even

425-3588

Vaughan + Mark Holstein - haven't been able to water the lawn all
year. 1 1/2 gal hose tank fill up no water in house. Have to
wait 24 hrs to get enough to wash clothes or dishes. Mark
Holstein had about 40 cows + 2 horses in early June. By last
of June had to move pairs out + by early July couldn't get
enough water for remaining heifers. They had to be moved
leaving only 2 horses. This year has been the worst +

started in early June. Well has sucked sand + if didn't conserve
water would be non-existent
