Re: Water Level Probe Stuck in Well Located in NWNW Sec. 32, T9S, R40E

Dear Gentlemen,

This letter is to confirm and document that a water level probe used by the Water District 13-T watermaster was lost in your well at the above referenced location on July 21, 2003. You will recall that the watermaster and I advised you of this problem on August 4, 2003 when we visited with you at the well site.

The Department and water district has measured this well since 1996 without incident. The watermaster, Craig Shuler, reported that approximately 120 to 130 feet of the probe was lost down the well. The lost section of probe consists of unmarked orange electrical cable or wire. The probe was initially hung up or stuck in the well on about July 17, 2003. The watermaster left the probe in place and returned on July 21<sup>st</sup> to try to dislodge the wire. The wire broke off near the access port on this latter date in his attempt to remove it from the well. There has been no apparent damage to the well or pump resulting from this incident as evidenced by the continued use of the well since July 21<sup>st</sup> of this year. However, you are advised to contact the Department should this situation result in any damage to the pumping plant.

Please contact me directly at 208-327-7864 if you have any further concerns or questions regarding this matter.

Respectfully,

Tim Luke  
Water Distribution Section

Cc: Craig Shuler, Watermaster  
IDWR Eastern Region

**SENDER: COMPLETE THIS SECTION**

- Complete items 1, 2, and 3. Also complete item 4 if Restricted Delivery is desired.
- Print your name and address on the reverse so that we can return the card to you.
- Attach this card to the back of the mailpiece, or on the front if space permits.
