Subject: Measuring-Device Requirement, Water District 47-C

Tim - While at the 47-C meeting today I was approached by one of the water users there. Apparently you met with them last fall, at which time you found a letter on this subject from 1995 that had never been sent out. Their district is in an extreme drought this year, and they are very concerned that measuring devices be installed to allow for accurate delivery of the available flow. The user again requested that you send out this letter ordering measuring devices for all users, and I told him that I would contact you on this matter. Please respond at your earliest convenience.
