REMARKS

This Draft was only a portion of the the total draft charge as the pumping to the desert on the INEL WAS charged to each individual user By a percent of what they had in water in the Lake at the time.

(See INEL. AquaFlow Book and draft charges)

losses were not charged to the system during high flows and times when we were pumping excess waters

The totals of these columns were derived by dividing the percent of water in the lake owned by each user by the total storage by the all the users as of the date of Report.											
The mean Flow charges was the actual amount of water pumped for the I.N.E.L. (Desert)											82
Pumping occurred at or near 950 G.A. on the M.D. Lake 4595. (G.A.G.)
