

General Provisions 1-6
as of February 13, 2001

The director recommends that the following general provisions be included in the decree determining rights to water from Basin 34.

1. The following definitions apply to these provisions:
 - a. The "Howell gage" is a stream gaging station on the Big Lost River located upstream from Mackay Reservoir in the SE $\frac{1}{4}$ NE $\frac{1}{4}$ NW $\frac{1}{4}$, Section 30, Township 8 North, Range 21 East, B.M.
 - b. The "2-B gage" is a stream gaging station on the Big Lost River located downstream from Mackay Dam in the SW $\frac{1}{4}$ SW $\frac{1}{4}$ NE $\frac{1}{4}$, Section 18, Township 7 North, Range 24 East, B.M.
 - c. Mackay Reservoir is "full" when the water surface elevation of the reservoir is at the spillway crest as it was configured on November 19, 1987.
 - d. The "Back Channel" separates from the main channel of the Big Lost River in the NE $\frac{1}{4}$ NE $\frac{1}{4}$, Section 5, Township 8 North, Range 22 East, B.M.
 - e. "Basin 34" refers to IDWR Administrative Basin 34 as it is described in the Amended Director's Report Part 1 for Reporting Area 1 (Basin 34) dated December 15, 1995.
 - f. As used in these provisions the term "water rights" refers to water rights as decreed in the case In Re SRBA, Fifth Judicial District Court Case No. 39576.
2. During the time period from November 1 of each year to the beginning of the next irrigation season (the "non-irrigation period"), all or a portion of the water of the Big Lost River flowing into Mackay Reservoir may be diverted, according to priority, for storage under water rights nos. 34-00012 and 34-10873 provided the natural flow at the 2-B gage is not less than fifty cubic feet per second. During the non-irrigation period, natural flow water rights downstream of Mackay Dam and senior in priority to water rights numbers 34-00012 and 34-10873 may be diverted for domestic and livestock uses under water rights authorized for these purposes.
3. Water rights from the Big Lost River diverted below Mackay Dam and Reservoir may be rotated into storage with the consent of the Big Lost River Irrigation District when such practice improves the efficiency of water use.

EXHIBIT

A

Such rotation is subject to the following conditions and review and approval by the Director of the Idaho Department of Water Resources.

- a. Water may only be rotated into storage if it will be beneficially used at the place of use under the water right during the year in which it is stored.
- b. Rotation into storage cannot occur prior to the reasonable need for irrigation water.
- c. Rotation into storage can only occur when the water is otherwise deliverable to the place of use under the water right.
- d. The diversion rate of water rights being rotated into storage shall be included in the calculation of total combined diversion rate limitations.
- e. If the reservoir fills after water has been rotated into storage, all water in the reservoir at the time it fills becomes storage water of the Big Lost River Irrigation District.

- f. Any water stored under such rotation that is not used in the same irrigation season in which it is stored shall become storage water of the Big Lost River Irrigation District at the end of the irrigation season.

- g. When the river is connected as specified in General Provision No. 6, while a right is rotated into storage, it is subordinate to all rights diverted above Mackay Reservoir with a priority date earlier than October 1, 1936.

4. The Back Channel is a natural channel of the river that has been historically regulated to a maximum of 200 cubic feet per second to provide irrigation water. This provision shall not be considered to enlarge the amount of water to which appropriators diverting from the Back Channel are entitled.
5. The following surface water rights from the following sources of water in Basin 34 shall be administered separately from all other surface water rights in Basin 34:

SEE ATTACHMENT A

6. The following surface water rights from the Big Lost River and its tributaries upstream of Mackay Reservoir shall be administered separately

from all other non-storage, surface water rights from the Big Lost River downstream of Mackay Reservoir during two periods of time as follows:

- a. From the beginning of the irrigation season until the time on the rising stage of the Big Lost River when the maximum flow at the Howell gage reaches at least 750 cubic feet per second at any time for three consecutive days; and
- b. After the time on the falling stage of the Big Lost River when the minimum flow recedes to no more than 450 cubic feet per second at any time for three consecutive days until the end of the irrigation season.
- c. For purposes of determining the amount of water being supplied to Mackay Reservoir from curtailment of diversions upstream from the reservoir, measurements will be made on the Big Lost River at the Pense Bridge located in the T 8 N, R 23 E, S 30, SW ¼ NE ¼, and on the Donahue Bridge on Parsons Creek located in the T 8 N, R 22 E, S 24, SW ¼ SE ¼. These measurements will be used by the Watermaster to make futile call determinations.

SEE ATTACHMENT B

5-21-01

PER discussion w/ Carter & Susan

#6 c - expectation was to just have rated station
or current meter periodically to check if any additional
water (how much) is needed during regulation. Also,
to determine futile call. No expectations for
continuous records or water etc.
