

pipe diameters will be 10", 12", 15"

There will be 2 to 3 ORIFICES per pipe or well

If I MAKE Machine costs per orifice \$35 per orifice \$100 per well
ORIFICES COST \$15 each would be about

Orifice Sizes would range from

6", 7", 8", 9", 10", 11" + 12"

will will make the orifices so we can change them as the well drop or increase in volume.

This is the plan for installing measuring devices on the well that discharge into Timber Dome Canal.
