November 8, 2004

Mr. Karl Dreher
322 Front Street
P.O. Box 83720
Boise, Idaho 83720

RECEIVED

MAR 17 2005

Department of Water Resources
Eastern Region

Dear Mr. Dreher:

The following pages contain the annual report of the distribution of water for the Big Lost River, From November 1, 2003 to October 31, 2004

The Authority to distribute water using water rights in the Basin 34 Directors Report was provided by the Memorandum decision and order granting the Department of Water Resources' motion for interim Administration with Limitation, or decrees issued by the SRBA court.

Very truly yours,

Robert Duke
Watermaster
District #34-Big Lost River

WATER DISTRICT #34
P.O. BOX 53
MACKAY, IDAHO 83251

SUMMARY OF ANNUAL REPORT FOR 2004

Basin #34 experienced another year of inadequate water in 2004.

The Howell Gauging peaked at 1110 cfs. This occurred on June 7th, 2004. We began the season calling rights on May 1st, 2004, with the 4-22-1884 priorities. The highest priority call was 5-1-1886 on June 28th, 2004. A futile call was initiated on July 30th, 2004, below the reservoir. The river connected on June 7th, 2004 above the reservoir. An undetected faulty gauge reading at the Howell gauge resulted in a 9-day delay for a disconnected river above the Reservoir. Water rights were turned back on June 30th, 2004. Faulty gauge detection sooner would have indicated a June 21st, 2004 turn on date.

Ground water levels continued to suffer loss in the lower end of the basin as well's produce less and less water with some domestic and irrigation wells going dry.

The Mackay Reservoir again was drained to the lowest level possible with no available storage water.

Mitigation request were filed in Water District #34, in 2004. Not having an accepted mitigation plan caused great concern of how to handle this satisfaction, prevailed. Water rights 34-690B, 34-372A, 34-372B, Owned by Jay, Jack and Vaughn Jensen were requested for mitigation along with an 1887 water right for Norm Sowards.

Through Great difficulty a direct augmentation by a well in the immediate area of the Jensen property was employed. The Norm Sowards water right never came on during the year and was not mitigated. Cease And Decist orders were issued for July 22nd, 2004, by the IDWR for ground water users in the Basin #34. It was revised to July 28th, 2004, as the mitigation water rights were still being delivered on July 22nd, 2004. A Basin #34 water users meeting was called on August 2nd, 2004 to address the mitigation issue. Two mitigation plans were accepted for this year only. (Mickelsen Well Plan & Direct Payment Plan). Both were directed towards satisfaction of costs for running the Mickelsen Well for direct augmentation to satisfy the Jensen mitigation request. Through some difficulty, Ground water users were signed on one or the other mitigation plans so ground water could continue to be diverted.

Through the winter months on a monthly basis ground water users and the IDWR worked together to come up with an acceptable basin #34 mitigation plan. Much progress has been made and approval of one or two mitigation plans maybe close at hand.

Robert Duke
Watermaster
Water District #34

**Clarification of Flow Data
For
Gauging Stations**

Reported flows in the attached tables for gauging stations below the Moore Diversion and Arco Canal (or below the Munsey Diversion), were estimated by water district staff. These reported flows are the flows that were entered and used in the IDWR Big Lost River Flow Accounting Program. Flows were estimated by measuring the head of water over concrete diversion dams and application of a weir discharge formula respectively at the Moore-Eastside and Arco-Munsey diversion dams.

The USGS tables titled station number 13120500 Big Lost River At Howell Ranch and station number 13132500 Big Lost River Nr Arco are the final data prepared by the USGS for its gauging stations located north of the Mackay Reservoir and four miles southeast of Arco, respectively.

Flow reported for the gauging station at Leslie are based on actual 1998 current meter measurements on the Big Lost bridge near Leslie and the development of a stage-discharge rating table by IDWR and the Watermaster. Tables reporting flows for the Big Lost River below the Mackay Reservoir (or the 2B gage) include data as read and recorded daily by the Watermaster and as reported by the USGS.

Diversion totals are reported in CFS/Cubic Feet per Second

WATER DISTRICT 34
ANNUAL VOLUME ESTIMATES FOR GROUND WATER WELLS

Annual volume estimates are based on power use data provided by Lost River Electric Cooperative (LRE) and PCC measurement data provided by Water District 34.

PCC acre-foot qualifier codes:

Z = zero power consumption

N = no PCC measurement or estimate available

9 = PCC was estimated, not measured. Where PCC measurements were not provided by Water District 34, PCCs were estimated, usually by estimating the power demand from the motor horsepower reported by LRE and estimating the flow rate using water right flow rate limits. Where

Water District 34 provided a measured flow rate, it was used with an estimated power demand to estimate the PCC. For POD number 69, the PCC measured by the Water District at POD number 71 was used for the estimate.

Q = see WMIS for comments concerning the measured PCC

Note that several PODs have multiple reporters. The non-billing reporter should be deleted from this list to avoid duplication.

Under Idaho Code and Public Utility Commission Rules, IDWR and Water District staff are prohibited from releasing power data to the public. Power data contained in this spreadsheet is for internal use only. Please forward any requests for data to the IDWR Water Distribution Section.
