# EDWARD'S GREENHOUSE WELL DATA 1989-1994

from Ken Neely telephone calls + fax 8/25-26/94

| | June | | July | | August | | Sept | | Oct | |
|---|---|---|---|---|---|---|---|---|---|---|
| YEAR | MG (1) | GPM (2) | MG | GPM | MG | GPM | MG | GPM | MG | GPM |
| 1989 | ~~4.6~~ NO DATA | ~~162~~ | 4.7 | 105 | 3.8 | 85 | 4.8 | 111 | 6.0 | 134 |
| 1990 | 5.15 | 119 | 2.42 | 45 | .05 | 0 | 2.39 | 45 | 5.5 | 115 |
| 1991 | 3.86 | 89 | 0 | 0 | .04 | 0 | 0 | 0 | 4.75 | 106 |
| 1992 | NO DATA | | | | .8 | 18 | 3.7 | 86 | 5.1 | 114 |
| 1993 | 6.2 | 144 | 3.5 | 78 | 2.6 | 58 | 3.9 | 90 | 5.7 | 128 |
| 1994 (3) | 3.9 | 90 | 2.5 | 56 | .1 | 2 | — | — | — | — |

REASONABLE TO ASSUME: IF August use is MARGINAL (±0), THEN Edwards is not Adversely impacting FLORA @ problem time.

This suggests upon FLORA call for Hea: NO Regulation (no curtailment, that is) @ Edwards if flow is minimal (≤ 18 gpm ?). KEN N. CONCURS with this ASSUMPTION.

(1) Millions of gallons/month

(2) MEAN RATE/month in gallons/minute; assumes continuous flow 24 hrs/day.

(3) Through 8/20/94

8/31/94
