KEN has partial data from Ed S, now trying to electronically convert to Trust dbase.
Not sufficient info to really analyze/model.

Won't be able to provide summary to Lin & c 5/16 hearing.

c Hearing - KEN → Tech. advr. for questions that he sees as needed (prob. better than being witness)

Paul → wants attend some/all ; will note anything that has questions re.

Tutor → legal advisor

Att - can leave recd open c End of hrg to solicit more info as needed.

(pre) → To 4 users

Items letter & procedure of hrg. process (must be prelim. order that - gives no undue finality to it) so let know hrg = begin, not End, of process

e Letter to Karl:

Paul: lack of data not helpful

high quality data v. useful ?

H2O level flux

" precipitation "

Change → temp / pressure
