## **Water Year 2001 Report**

The water year started out to look as though we were going to have a normal or above water year. However by January we saw a much below average snow pack staying in the 65-70 percent of the 30 year average the second lowest in history. This condition continued throughout the spring, summer and fall.

This year we were unable to release any water from the reservoir prior to the irrigation season and lacked 700 Acre Feet from filling when water was called for irrigation. As a result we are seeing below average levels in the ground water in the valley.

The irrigation deliveries started the first of May and continued though the summer. This has been the driest water year since I took over the watermaster position in 1995. The rest of the summer continued to be extremely dry and the runoff was well below normal with the reservoir empty by the end of August. The rest of the year only natural flows were delivered for irrigation.

The total runoff for the Little Wood River Basin was 50,750 acre feet (this is the fifth driest in history) with 33,500 acre feet delivered to the farms and town lots. This is about 45% of the normal runoff (113,100 AF) and much below average water use.

2001 saw more ground converted to sprinkler irrigation again and the crop rotation adjusted for the dry conditions of the year. The district is now well over 85% sprinkler irrigated compared to less than 10% 20 years ago. Most of this is a result of the long drought that we saw in this area in the late 1980's and early 1990's. With the ever increasing cost of power for the pumps there is a real push to be able to put the whole district under a pressurized pipeline to both conserve water and energy. This is an ongoing project that could become reality within the next few years.

The district was informed the end of October that we have received Federal Funding to update the study for the pipeline project and complete an environmental impact study in the upcoming year. The District will be applying for continued funding to complete the engineering on the project in FY 2003 with possible construction in the following years.
