RECEIVED

MAR 26 1982

Department of Water Resources  
Eastern District Office

Dear Anne:

This letter is to comment on the 1952 revision of the abstract for Common Lake, Water District 75 D, which is included herein.

The revision is acceptable and agrees with my interpretation of the 1902 decrees and exchange agreements. The exchange rights are probably most deserving of specific mention. The names listed with an asterisk are the ones which presently receive exchange water with one exception. Each named person/place receives 45 inches of water except Theodore Bottom and Edward C. Clark who each get 1/2 share or 22 1/2 miners' inches of water. All exchange water is considered 15.82 water as a matter of practicality.

The exception is the Peter McKinney right which is delivered to no one presently. Sometime shortly after 1902, Peter McKinney purchased the lands of William Smith and Robert Martin and apparently transferred his share to these lands. At least, the old water master's records show these lands receiving 3 shares until about 1957. No official record of this transaction has been found but old-timers testify to its use, if not truth. About 1957, the State Department of Reclamation told the water master to turn off the exchange rights to force the water users to come to an agreement as to where the Peter McKinney right was to be used. The water master just shut the Peter McKinney right off. That is the current status of this right.

Sincerely yours,  
Ross M. Feland  
Watermaster Dist. 75-D

Dear Tom:

I was pleased to receive your letter this day concerning your water claim you wish to submit for Carmen Creek waters.

You asked for advice concerning a number of questions:

1. Some of your neighbors have been claiming up to four inches of water per irrigated acre. Apparently, these individuals feel that this rate of diversion accurately depicts the amount of water used.
2. When filing a claim to a water right, one should always claim the amount of water that is actually being used.
3. Then filing for a new water right application (different from a claim), the statutory limitation is the amount of water that can be filed on per irrigated acre for one inch.

Now that you have had ample time to collect the evidence identifying your water right, you should accurately display that information on a form provided by this department and which I have enclosed.

I will be in the Salmon area sometime between May 26 and May 29, 1981. I will call you so that we can make arrangement to fill out the forms and claim your water right.

Sincerely,

WILLIAM R. RHOADS  
Sr. Resource Analyst

Bing,

Now you don't seem  
to be in the right  
state of mind to be  
in the right state of  
mind to be in the right  
state of mind to be in  
the right state of mind.

I'm - Hoping you can  
give me some advice on  
water rights. I haven't  
filed for mine yet. for a  
couple of reasons. One is  
that I've been waiting to  
see what my neighbors  
were going to do on theirs.

They also have the habit  
of too much water occa-  
sionally the one mine with  
this one fault that I  
was told to use. Last week  
I went down the road to the  
the day I mined about the  
the day I mined was for 4 in.  
can mine. I will give the  
the day I mined was prepared  
the greatest mine - and  
interior to a sample of

other claims on this side  
who have made the  
much. But when I told  
that I was not  
satisfied with the one  
out - this side application  
for - in fact, that I  
was not satisfied with  
the one I got - I  
told you I should go  
and make the one  
amount of water and  
up for the one  
to be made. I  
protesting all things.

I've been thinking about  
this water right thing for  
a long time and would like  
to get it straightened out.  
Now that W. L. is  
dead I suggest I should  
ask for one and  
of mine and  
now or never for  
the water right.  
I'm sorry I didn't

down to see you when you  
were in Salmon. I may have  
to go to Idaho Falls in the  
next month or so and maybe  
I could get over to see you  
then. I'm working so now  
and my free time is pretty  
limited.

I'd appreciate any advice  
you can give me.

Thanks,

Thomas R Conrad
