### General Summary

Data assembled from IDWR, Rocky Mountain Power, and watermaster records.

#### Comments

Once again I express my thanks to both IDWR and Rocky Mountain Power for their help and assistance throughout the entire season. Also I thank all the irrigation companies and individual irrigators for your help and calls informing me of your intentions & usage.

The installation of the real-time monitoring system to reduce wasted water, improve irrigation efficiency and record keeping on the Bear River is almost complete using the Water for America Grant through the Bureau of Reclamation. In the individual diversion report below I will attempt to explain how it affected your site, & where we are in the process and what we hope to do in the upcoming year.

**A**

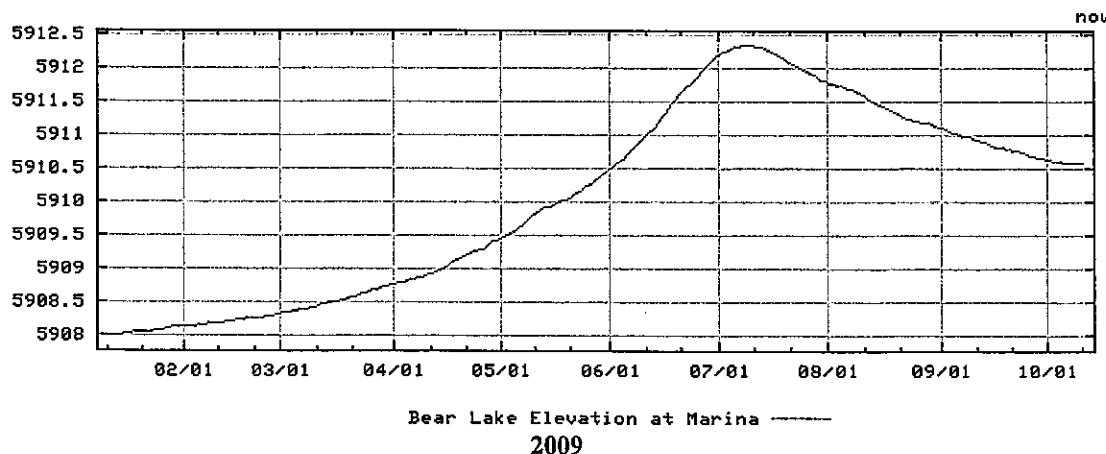

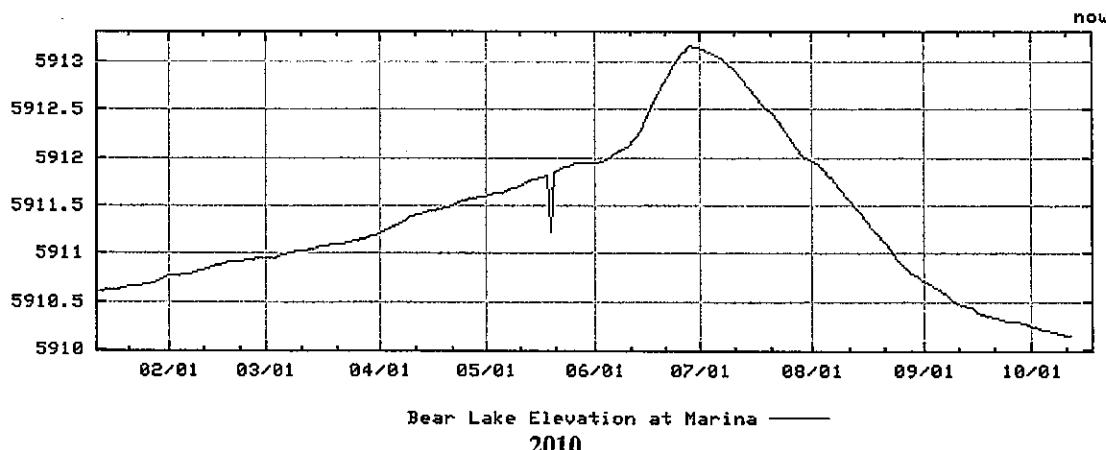

#### Bear Lake Water Supply

Annual Maximum Elevation on June 26 2010

5913.16 feet or 49% of full pool

Annual Minimum Elevation, Nov. 9, 2010

5909.96 feet or 36% of full pool

**B**

The irrigation allocation to all users on the Bear River below Bear Lake was 216,000 acre-feet, (94% of the full 230,000). Precipitation at the time of the allocation was 70% of normal.

Bear Lake storage release commenced July 2 with 1030 cfs. Last year it started July 2. The outlet from Bear Lake was closed Oct. 2.

There was only 117,000 acre-feet used (54% of the allocation) and 63,375 acre-feet of storage were saved for next year (or .90 ft. on Bear Lake) due to a good wet spring and conservation by irrigators compared to 164,000 acre-feet saved in 2009 & 105,000 acre-feet in 2008.

Bear Lake declined 2.89ft. compared to the 2009 decline of 1.84 ft.

**C****Bear Lake Levels & Scenarios – January 2011**

The winter has been very good to us so far. Based on the NRCS spring runoff forecast, the following scenarios are looking bright. The “middle of the road” forecast puts us at 5916 for a spring high. We haven’t seen that level for a while! Connely

#### **10043120 Nuffer Canal**

Jim Jensen, Keith Rigby, Demar Romrell and Bill Robison have shares. State recommended an Acoustic Doppler Flow Meter as the one to be the best to measure the flow rates. An Acoustic Doppler Flow Meter (ADFM) equipment was installed on the 5' squashed corrugated pipe just down stream from the head gates. The flow info. can now be viewed on the Bear River Basin web site "bearriverbasin.org" central division.

#### **10043140 Sorenson Ditch**

Owner Glen Transtrum. Has a dilapidated measuring device. Depending on how well the Lloyd ditch flume experiment works out it may be possible to use this type of meas. device. The State recommends an Acoustic Doppler Flow Meter (ADFM) as the best meas. device for installation on this site.

#### **10043150 Ure North Hills Diversions**

The State has recommended that an Acoustic Doppler Flow Meter (ADFM) be installed and a canal gate attached to the existing culvert located 90 feet downstream, from the diversion. Dave has a new 48" broad crested weir and depending on the Loyd ditch experiment, It might be determined to be applied here.

#### **10043180 Lloyd Ditch**

Owners Jim Smith, Ola Transtrum & George Sparks. Dustin Smith, operator. It has a new 48" broad crested weir. I have talked with Jim Smith and agreed to try it for another year if he cleans the ditch so water can flow freely. At the end of 2010 season it was determined by Intermountain Environmental to be worth another try if the flume was set properly. The State recommends an Acoustic Doppler Flow Meter (ADFM) as the best meas. device to be installed. Cost for this device and components would be approximately \$6800 and would be the alternative. Jim said he would pay for the device if the ramped flume does not work.
