SUMMARY

The unregulated flow computed at Heise is frequently used to compare water years. This comparison is done for various time periods, but for purposes of comparing snow melt runoff, the period April - July is normally used. The water year is normally represented by the April - September time period. In comparing the unregulated flow computed at Heise for these periods for 1994, the period of April - July was the sixth lowest flow, and the period April - September was the fifth lowest of record. These volumes reflect a yield from the Snake River watershed above Heise of 60% of normal, which is about 2,012,000 acre-feet, (Apr-Jul) and 2,352,000 acre-feet (Apr-Sept), respectively. These numbers represents volumes that are 1,330,000 acre-feet and 1,590,000 acre-feet below the 83 year average.

On April 1 the snow course data collected and compiled by the U. S. Soil Conservation Service (SCS) indicated Snake River water supplies would most probably be 60% to 70% of average. This forecast predicted the watershed above Heise could expect to yield 2,430,000 acre-feet between April 1 and September 30. The most probable forecast for the Henrys Fork near Rexburg, with a 64% of normal snow pack, was 992,000 acre-feet between April 1 and September 30. The actual runoff computed for Rexburg was about 1,108,000 acre-feet. However, because this includes diversion data which may have been impacted by return flows and other factors, the accuracy of this comparison is poorer than the flow computed for Heise. Normal runoff, April - September, for the Rexburg gage has been computed to be about 1,550,000 acre-feet.

The total water supply from the Snake River and Henrys Fork at the confluence of the Henrys Fork and the Snake River was about 2 million acre-feet below normal. This reduced water supply resulted in more water rights being cut earlier in the year which, in turn, resulted in a corresponding increase in the demand for storage. By June 9, all rights later than October 1900 had been cut on the main river above Lorenzo. Because of reduced runoff, the reservoir system was about 100,000 acre feet short of filling. In 1994, 4,089,000 acre-feet of storage was allocated; 3,077,000 acre-feet of which was diverted above Milner. Diversions of storage below Milner and other adjustments resulted in a system carryover at the end of the year of 874,000 acre-feet or about 21% of capacity. Most of the storage diverted past Milner was obtained through the Water District Rental Pool. Of the 432,000 acre-feet of water assigned to the rental pool, 356,000 acre-feet was rented by the Bureau of Reclamation for flow augmentation. About 311,000 acre-feet of this water came from space assigned to the rental pool by the Bureau. About 200,000 acre-feet of the storage released past Milner came from the permanent power head in Minidoka and Palisades Reservoirs and was assigned to the rental pool by the Bureau specifically for this purpose.

The Foster Decree provides for a return flow credit to the Minidoka Canals. This credit is applied to offset Minidoka's demand for storage. When they are diverting no storage, no return flow credit is given. Consequently, the annual Minidoka return flow credit, in a general way, reflects the extent to which this project was dependent upon storage. The correlation between storage diverted and the return flow credit is poor because on the years with the shortest water supplies, the amount of water being returned to the river by the Minidoka project will also be lower. In 1994, water supplies were significantly below average and very little natural flow was available to the Minidoka canals, the return flow credit was only about 30% of the average credit for the past 17 years. The attached Minidoka Return Flow Summary Table showing the return flow credits computed each year since 1978, also shows how these years rank in comparison to the annual computed natural flow at Heise. The number "1" would represent the lowest runoff volume of record.

MINIDOKA RETURN FLOW CREDITS IN ACRE FEET

1978 - 1994

SUMMARY

Rank	Year	Return Flow Credit
74	1978	16,982
35	1979	53,624
44	1980	2,203
22	1981	11,772
83	1982	3,698
70	1983	32,791
71	1984	25,060
34	1985	69,620
85	1986	26,171
08	1987	74,691
16	1988	51,052
43	1989	21,639
17	1990	62,547
27	1991	35,028
04	1992	52,033
48	1993	60,617
06	1994	11,865

WATER DISTRICT 1 ANNUAL MEETING

Title 42, Chapter 6 of the Idaho Code provides the legal mechanism by which the use of water can be regulated. The first step in this process is for the Director of the Department of Water Resources to create a water district. In the case of Water District 1 this action was taken by the director in 1919. Each year it is the responsibility of the water users within the district to meet as provided by law and elect a watermaster, set the budget for the ensuing year, and pass such resolutions as are necessary and helpful in assuring an orderly and equitable distribution system. The results of the actions taken by water users of Water District 1 at their annual meeting are summarized as follows:

The annual meeting of Water District 1 was held on March 1, 1994, in Idaho Falls, Idaho. Ronald D. Carlson was elected watermaster for the ensuing year.

The following people were elected as members of the Committee of Nine:

Claude Storer, Chairman; Don Kramer, Vice-Chairman; Leonard Beck, Paul Berggren, Stan Clark, Claude Lilya, DeWitt Moss, Dale Rockwood, and James Siddoway.

Alternates: Dell Raybould and Van Greenwell.

Advisory members: Merle Kunz, Larry Moore, Richard Oneida, Terrel Sorenson, Jerrold Gregg (B.O.R.), John Rosholt, Roger Ling and Ray Rigby.

The principal resolutions adopted at the annual meeting were as follows:

1. BE IT RESOLVED, that the watermaster continue to apply the best available methods and technology to assure: accurate deliveries of natural flow and stored water, consistent regulation procedures, the availability of water supply and diversion records to the water users, and that all water users are assessed for water deliveries on a timely, accurate and equitable basis, and the preparation of the annual watermaster's report required by Idaho Code §42-606.

   BE IT FURTHER RESOLVED that:

2. The watermaster continue to expand and maintain automated data collection where it can effectively reduce personnel

costs, travel costs, or result in cost or water savings for Snake River water users or assure better and more current data.

3. The water users of Water District 01 continue the cooperative program with the Idaho Department of Water Resources as outlined in the Memorandum of Understanding dated March 2, 1993, previously approved by the Committee of Nine and IDWR, and signed by the Chairman of the Committee of Nine and the Director of the Department of Water Resources, a copy of which agreement is attached hereto as Exhibit A and made a part hereof as if set out at length herein.

4. Ronald D. Carlson be re-elected watermaster for the ensuing year, and be authorized to hire a full-time staff of a deputy, two assistants, a secretary, a data specialist, and such other assistants as provided by the adopted budget. The watermaster may hire additional assistants as authorized in Idaho Code § 42-609 in an emergency.

5. Dell Raybould be elected Water District Treasurer and his annual compensation set by the Committee of Nine but not to exceed the $7,500 provided in the 1994 Water District budget.

6. The duties of the watermaster and treasurer shall begin on this date and continue for a period of one full year.

7. The Budget for Water District 01 for the 1994 year beginning November 1, 1993 be as follows:

1994 WATER DISTRICT BUDGET

HYDROGRAPHERS			
Teton Basin	1,000 hrs. (+ mi.)	$ 8,000	
Idaho Falls	800 hrs. (+ mi.)	4,500	
Lower Valley	400 hrs. (+ mi.)	6,000	
Henrys Fork	1,800 hrs. (inc. mi.)	17,000	
Teton River	520 hrs. (+ mi.)	4,500	
			$ 40,000
RIVER RIDERS			
Rigby & Heise Div.	1,200 hrs. (+ mi.)	$ 6,500	
Blackfoot Division	600 hrs. (+ mi.)	3,000	
Swan Valley	480 hrs. (+ mi.)	5,500	
Upper Falls River	250 hrs. (+ mi.)	1,000	
Willow Creek	5 mth @ $ 550 (inc. mi.)	3,000	
Idaho Falls	6 mth @ $ 100 (inc. mi.)	1,000	
Milner	12 mth @ $ 30 (inc. mi.)	360	
			$ 20,360
PROGRAM EXPENSES			
Automation Expansion		$ 15,000	
Sutron		52,000	
Streamgaging		108,410	
U of I Studies		4,000	
			$179,410
EQUIPMENT EXPENSES			
Furniture		$ 1,000	
Computer		6,500	
PC's		3,000	
			$ 10,500
PERSONNEL EXPENSES			
Retirement		$ 5,000	
Social Security		5,000	
Mileage		21,000	
State Insurance Fund		3,500	
Employment Insurance		500	
Part-time Help		4,900	
Miscellaneous Hydrographer Expense		500	
Treasurer		7,500	
			$ 47,900
MISCELLANEOUS EXPENSES			
IWUA		$ 1,000	
Otto Otter		500	
Postage		2,500	
Supplies, phone, copying		2,000	
Audit		5,500	
Meetings		1,200	
Legal Fees		10,500	
Committee of Nine		10,000	
			$ 33,200
WATERMASTER			
IDWR Contract		$254,330	
Report		4,500	
Travel		3,500	
			$262,330
Total 1994 Distribution Budget			$593,700
UPPER VALLEY			
Consultants & Atty. - Resolution 20		$ 65,000	
W.D. Consultants & Attorneys - Resolution 14		200,000	
Excess Storage Use- Resolution 16		100,000	

8. BE IT RESOLVED that the watermaster is hereby authorized to acquire, hold and dispose of such real and personal property, equipment and facilities in the name of the water district as necessary for the proper distribution of water and shall provide that all such real and personal property shall remain in the custody of the watermaster and the watermaster's successor.

9. WHEREAS, it is the watermaster's responsibility to assure the proper delivery of both natural flow and storage supplies to all water users, and;

WHEREAS, the normal district cost of delivering water to many water users is greater than their normal assessments would be based upon their total season use of water;

NOW, THEREFORE, BE IT RESOLVED that the watermaster of Water District 01 is hereby authorized to assess a $20.00 minimum charge for every diversion within his jurisdiction.

10. WHEREAS, the water users of Water District 01 meeting in regular annual session find it necessary to adopt certain "on-going" resolutions to direct the watermaster and treasurer of the district in certain aspects of district operations;

NOW, THEREFORE, BE IT RESOLVED that the Water District 01 budget prepared pursuant to Idaho Code § 42-615, and adopted in Resolution No. 7 at this Water District 01 annual meeting, shall become the basis for the official billing of the amount of said budget for the succeeding year to the respective water users, using the actual deliveries for the past irrigation season or seasons, as the basis for said distribution of such billing to the individual water users, canal companies, and irrigation districts, and is hereby authorized to collect all of the amounts billed.

The treasurer shall establish and maintain a general account and shall cause to be deposited all monies received pursuant to the billing and shall make all disbursements as necessary to conduct the business of administering and delivering the waters of the district.

That no ditch, canal company, or other water users shall have the right to demand and receive water, and the watermaster shall not deliver to such person until receipt of the amount due and payable from such user.

That copies of the minutes of the annual meeting, the budget as approved, all resolutions approved, and the report

prepared in accordance with Idaho Code § 42-615, shall be filed with the Director of the Department of Water Resources and with the county auditors of Bonneville, Madison, Teton, and Fremont Counties in accordance with Idaho Code § 42-617.

11. WHEREAS, it is in the best interest of the water users of Water District 01 to account for all diversions which might adversely affect any prior natural flow or storage diversions;

BE IT RESOLVED that the watermaster shall collect records of water diversions during the entire year.

12. BE IT FURTHER RESOLVED that the Committee of Nine be designated the Advisory Committee under Idaho Code § 42-605 and be continued with nine regular members. The members representing the Burley and Minidoka Irrigation projects are to be alternated between the two districts as they arrange. In addition, advisory members representing the Bureau of Reclamation, Teton Basin, AFRD #2 Canal, A & B Irrigation, the Wyoming State Engineer and a member from the Burley or Minidoka District, whichever is not currently represented on the regular committee, be included.

13. WHEREAS, the members of the Committee of Nine, as the Water District's Advisory Committee, are elected to represent the general interest of the water users;

NOW, THEREFORE, BE IT RESOLVED that the Committee of Nine is hereby authorized to:

(a) Advise and consult with the watermaster and director in matters related to water resources management and water distribution.

(b) Serve as the standing Resolutions Committee for all meetings of the Water District.

(c) Take those actions necessary to represent and protect the interests of the water users of the district.

(d) Employ such legal, engineering, technical and clerical services as may be deemed necessary for the Committee of Nine to fulfill its responsibilities to the water users of the district.

(e) Make and execute such contracts and agreements as may be deemed necessary or convenient.

(f) To do such other things as the committee shall deem to

be beneficial to the water users of the district.

BE IT FURTHER RESOLVED that the Committee of Nine is hereby ratified as the local committee for the rental of stored water under Idaho Code § 42-1765.

14. WHEREAS, the Committee of Nine as been selected by the water users of Water District 1 to represent their collective interests;

BE IT RESOLVED that the Committee of Nine be authorized to expend funds held by the District for the following purposes:

(1) Expenses of the district.

(2) Improvements to the district's facilities, including a reasonable reserve for future improvements.

(3) Educational projects designed to increase public awareness in the area of water distribution, water rights and water conservation.

(4) Other public projects designed to assist in the adjudication, conservation or more efficient distribution of water.

(5) For involvement in legislative and agency deliberations on issues involving water quantity and quality which could effect water users of the water district including naming Water District 01 as a petitioner in legal actions involving the ESA and the negotiation of federal claims and tribal claims filed in the SRBA.

(6) To reimburse advisory committee members in accordance with the policy attached hereto as Exhibit B.

(7) Items authorized in Resolution No. 13.

15. BE IT HEREBY RESOLVED that in accordance with the provisions of the March 2, 1993 Memorandum of Understanding with IDWR, the watermaster is hereby designated manager of the Rental Pool for the Committee of Nine.

16. WHEREAS, the watermaster from time to time finds that storage has been used in excess of entitlements; and,

WHEREAS, these "excess uses" require an allocation of rental pool storage and,

WHEREAS, the collection of payment for these excess storage uses can be time-consuming and can result in delays in making lease payments to the rental pool lessees,
NOW THEREFORE BE IT RESOLVED, that the watermaster is authorized to maintain $100,000 of the funds generated through the administrative charge on water rentals for the purpose of paying lessees for excess uses prior to these amounts being collected.

BE IT FURTHER RESOLVED, that all monies collected for administrative rental charges, plus all appropriate interest and penalties shall be first used to replace monies spent from this account.

17. WHEREAS, the Water District's Credentials Committee has historically specified that "no person be elected to membership and service on the Committee of Nine and Credentials Committee unless he be a land owner and a water user...";

IT IS THEREFORE RESOLVED that water user and land owner shall be defined as follows:

1. One who owns an irrigated farm that is comprised of more than twenty (20) irrigated acres, that has valid surface water rights deliverable by the Water District 01 Watermaster.

2. One who has received over 50 percent of his annual income during one or more of the past ten years from farming activities.

18. WHEREAS, it is in the interest of all water users to have the water rights within Water District 01 delivered according to the priority system; and,

WHEREAS, the accounting system now used by Water District 01 requires that each diversion have assigned to it a specific list of decreed, licensed, and storage entitlement; and,

WHEREAS, those diversions which have no record of water rights on file with the Department of Water Resources or the Water District office will, necessarily be taking storage water any time a diversion takes place.

NOW, THEREFORE, BE IT RESOLVED that no diversion shall be allowed to divert water unless the proper list of rights for that diversion are found in the watermaster's records or proper arrangements have been made to procure an adequate water supply prior to the start of the irrigation season.

19. BE IT RESOLVED that the annual Water District 01 meeting shall hereafter be held on the first Tuesday of March of each year unless the director and Committee of Nine should find in necessary to change the meeting date; and

BE IT FURTHER RESOLVED that the water users of Water District 01 waive mailed notice of the annual meeting and direct publication of the meeting notice for two (2) consecutive weeks in an appropriate number of newspapers located throughout the district.

20. WHEREAS, the water users located above Blackfoot, excluding Aberdeen Springfield Canal Company, (Upper Valley) have chosen to collectively retain legal counsel; and,

WHEREAS, it is their desire to have the watermaster assess the Upper Valley water users for these legal services in proportion to their water use;

NOW, THEREFORE, BE IT RESOLVED this first day of March 1994, that the watermaster hereby be authorized to assess canals located above Blackfoot (excluding Aberdeen Springfield Canal Company) for legal fees and other appropriate expenses associated with representing the collective interests of the Upper Valley.

BE IT FURTHER RESOLVED that such charges may not exceed the amount budgeted during the current year.

BE IT FURTHER RESOLVED that the district treasurer shall maintain said amounts in a separate account and that payment therefrom shall ONLY be made when authorized by the Upper Valley Committee of Nine Representatives.

21. BE IT RESOLVED that the amendment to 8.2 of Water District 01 Rental Pool Rules and Regulations be approved as hereafter set out and transmitted to the Idaho Water Resource Board for approval.

WATER DISTRICT 01
RENTAL POOL PROCEDURES

8.2. A. The rental price for 1994 shall be $2.95 per acre foot, including the district administrative charge of $0.75 per acre foot and the water board surcharge of $0.20 per acre foot, for water diverted for uses above Milner Dam.

B. The 1994 rental price for water delivered below

Milner Dam shall be $6.25 per acre foot, which includes the district administrative charge of $0.75 per acre foot and the board surcharge of $0.50 per acre foot. An additional $2.20 shall be deposited by lessee, which shall be retained by the district for distribution the following year of $2.00 to lessor and $0.20 to the board per acre foot of space rented for uses below Milner the previous year that does not fill. The balance of the deposit, if any, shall be returned to the lessee. No interest will accrue to the lessor or lessee on the deposit held by the district prior to distribution.

C. Any storage space holder who puts water in the rental pool for lease and then subsequently removes all or part of the water from the rental pool shall be charged a $0.75 per acre foot administrative charge by the district for the water withdrawn.

22. WHEREAS, the State of Idaho has commenced the general adjudication of the Snake River Basin in Idaho in an effort to quantify all water rights, both state and federal, and

WHEREAS, the United States has not paid its share of the costs for this adjudication, and

WHEREAS, all other water users, including state and private interest, have paid the statutory filing fees associated with filing their claims in the SRBA, and

WHEREAS, the state has already spent millions of dollars in preparing recommendations for water rights in Basins 34, 36, and 57, and has other basins partially completed, and

WHEREAS, the completion of this adjudication and the resolution of all federal claims has to be a high priority for this state.

NOW, THEREFORE, BE IT RESOLVED by the water users meeting in regular annual session this 1st day of March, 1994, that the Idaho State Legislature be encouraged to commit sufficient state funds to complete the adjudication of all state and federal rights that exist in the Snake River Basin in Idaho.

23. WHEREAS, the Upper Snake River Basin along with most of the Northwest has experienced drought conditions for most of the past eight years, and

WHEREAS, reduced water supplies on the Upper Snake have resulted in heavier demands for stored water, declining ground water levels, and lower flows from the north side springs between Milner and King Hill, and
WHEREAS, the aquifer is being impacted because of actions irrigators have taken over many years to reduce their demand for water which has resulted in lower recharge to the aquifer from agricultural practices, and

WHEREAS, it is in the interest of Idaho to manage the Snake Plain Aquifer and establish a system that would allow water to be diverted to recharge the Snake Plain Aquifer.

NOW, THEREFORE, BE IT RESOLVED by Water District 01 meeting this 1st day of March, 1994, that the Legislature of the State of Idaho be encouraged to enact legislation that will provide the mechanism for the effective management of the Snake Plain Aquifer through artificial recharge.

24. WHEREAS, the Bureau of Reclamation has played a vital role in the economies of the West through the construction and operation of Federal Reclamation projects, and

WHEREAS, all of the Federal Reclamation projects that have been constructed in the West have been accomplished under the state water laws of the reclamation states, and

WHEREAS, state sovereignty over water is rooted in the constitutions of the various states, and

WHEREAS, Secretary of Interior, Bruce Babbitt and Commissioner of Reclamation are in the process of "re-inventing the Bureau of Reclamation," and

WHEREAS, "Resource Management" defined as "directing water and land resource uses and allocations (emphasis added) to meet present and future public needs," is at the top of the Bureau's organizational list of priorities, and

WHEREAS, water management and allocation has been effectively handled by the State of Idaho since the state constitution was adopted and approved by the U.S. Congress.

NOW, THEREFORE, BE IT RESOLVED by the water users of

Water District 01 meeting in regular annual session this 1st day of March, 1994, that the Secretary of Interior and Commissioner of Reclamation be asked to reconsider their decision to abandon the traditional role of the Bureau of Reclamation, a role that has provided enormous benefits to everyone living in the West, not just irrigators, for a role that would undoubtedly deprive the states of important resources while pitting the Bureau of Reclamation against those who have the constitutional charge of managing and allocating the water resources of the states.

EXHIBIT A

MEMORANDUM OF UNDERSTANDING

This memorandum of understanding is entered into by and between the Director of the Department of Water Resources, (hereinafter called the Director) and the water users of Water District No. 1, Upper Snake River, (hereinafter called Water District No. 1) acting through the Water District advisory committee known as the Committee of Nine.

WHEREAS, the statutes of the State of Idaho provide for the Director to have direction and control of the distribution of the waters of the state to those holding valid rights to the use thereto; and

WHEREAS, the Water District No. 1 authorized the Committee of Nine, as advisors to, and elected representatives of the water district, by resolution duly adopted at the March 2, 1993, annual meeting of the water users of the district to enter this memorandum of understanding continuing a cooperative program with the Director to provide watermaster services for Water District No. 1 and

WHEREAS, the Committee of Nine will, among other things, serve as advisors to the Director and the watermaster in matters relating to the distribution of the natural flow and stored water within the district:

NOW, THEREFORE, the Director agrees to provide the following services to Water District No. 1, effective upon the execution of this memorandum of understanding and to continue to provide the services from year-to-year as herein provided upon election of the regional manager of the Department as watermaster and the adoption of a budget by the water users at the annual water district meeting authorizing expenditures in accordance with the purposes of this memorandum of understanding:

1) To provide watermaster services to Water District No. 1 for the period from the effective date of this memorandum until the end of any subsequent water district year as agreed to by the water users of Water District No. 1 at their annual meeting and the director of the Department. Such watermaster services will be provided under the direction of the regional manager of the Department's Eastern Region consistent with the provisions of Title 42, Idaho Code.

2) To provide the equivalent of 2/3 of a person year of the Regional manager as watermaster throughout the Water District year and to provide any additional part time

or full time employees as necessary for the water distribution operations of Water District No. 1 in accordance with its adopted budget.

3) To provide office space as necessary for operation of Water District No. 1 and to provide Department vehicles for use by full-time employees of the Department, to conduct Water District business, and to share the use of other Department equipment and facilities as are necessary to equitably distribute the waters to the users within Water District No. 1.

WATER DISTRICT NO. 1 agrees as follows:

1) To pay the Department, on an advance basis, sufficient funds to cover the costs of operations incurred in providing watermaster services to Water District No. 1 provided, however, that reimbursement for the watermaster shall not exceed 2/3 of the personnel costs of the regional manager and provided further that all other costs incurred in conducting Water District No. 1 business will be paid in full. Indirect costs will be paid at the rate approved by the Department of the Interior Inspector General and current at the time of the water district annual meeting. The approved indirect rate shall be reduced in recognition of the Department's statutory responsibility to supervise water distribution by subtracting in the indirect calculation any personnel costs included for the Director and the Administrator of the Water Management Division.

Mileage and per diem costs will be based upon the rate provided by state law for state employees.

The Department will credit the District for a portion of the District's expenditures to the U.S. Geological Survey for the cooperative streamgaging program. The amount credited each year will be one-half (1/2) the amount the district pays for that year to the U.S. Geological Survey for operation of certain streamgages the Director determines are needed for data collection purposes needed by the Department other than and in addition to the District's water distribution data needs.

THE PARTIES mutually agree that:

1) The regional manager and any other persons directly employed by the Department as classified state employees, performing duties on behalf of Water District No. 1 under this memorandum will only perform duties necessary to:

a) Deliver and account for distribution of natural flow and stored water within the District,

b) Provide assistance to the Committee of Nine in operating the local rental pool. This assistance will include accepting applications to put water into the pool and to rent water from the pool, receipting and depositing funds associated with the bank, providing information on the water in the bank and rentals therefrom. The Committee of Nine, or its designated subcommittee will determine the water leases and rentals and approve all disbursals of rental pool money.

c) Prepare reports and proposed budgets as required by Title 42, Idaho Code.

d) Provide technical assistance and information to the Committee of Nine and the Department relative to the water distribution and water banking duties of the watermaster.

The Committee of Nine will make other arrangements for representation and management of any other interests of the water users within the Water District as directed at the annual meeting.

2) The director of the Department and the chairman of the Committee of Nine shall consult annually prior to the end of the water district's fiscal year concerning the continuation of this memorandum and any need for modification of it.

3) This memorandum of understanding will continue from year to year and can be amended or terminated at any time by agreement of the director of the Department and Water District No. 1, on the recommendation of the Committee of Nine.

4) This memorandum of understanding supersedes and replaces the memorandum of understanding dated March 3-4,1979.

5) Nothing in this agreement will act to change, modify, or release either party of any obligation or responsibility otherwise provided by contract or by law.

R. KEITH HIGGINSON
Director
Department of Water Resources

Date: 3/04/93

DEWITT MOSS
Chairman
Committee of Nine/Water District No. 1

Date: 3/10/93

EXHIBIT B

COMMITTEE OF NINE

MEETING REIMBURSEMENT RULES

1. All Committee of Nine expenses must be approved by Chairman.

2. All requests for reimbursement must be on an approved form with copies of receipts attached.

3. Reimbursement is intended only for official Committee of Nine and Subcommittee meetings called by Chairman or Vice-Chairman, or other meetings approved in advance by Committee of Nine.

4. Reimbursement shall include per diem ($30/day), mileage (0.28¢/mi.), meals, travel, and room (if necessary).

5. Reimbursement is intended for Committee of Nine members who are not on Government payroll or employed by an irrigation district or canal company. If the Committee of Nine approves per diem and reimbursement for a Government, irrigation district or canal company employee, reimbursement shall be made to the employer.

6. Advisors (except lawyers) and/or Alternates to regular Committee of Nine meetings shall not be authorized per diem and reimbursement for regular Committee of Nine meetings but shall be reimbursed if they serve on a special Committee of Nine Subcommittee, or attend other meetings approved by the Committee of Nine.

RENTAL POOL PROCEDURES

RULE 1. AUTHORITY AND STATEMENT OF PURPOSE.

1.1. These procedures have been adopted by the Committee of Nine pursuant to Section 42-1765, Idaho Code, to assure the orderly operation of the Water District 1 Rental Pool by the Committee of Nine of Water District 1. Under no circumstances shall these procedures be interpreted or construed to limit the authority of the Director of the Department of Water Resources, the Water Resource Board, the Committee of Nine, or the Snake River Watermaster in discharging their duties as set forth in the statutes of the State of Idaho and rules and the regulations promulgated thereto.

1.2. It is the purpose of these procedures to:

A. Provide the procedures by which the Committee of Nine, upon being appointed a local committee by the Water Resource Board, shall facilitate the rental of stored water made available to the Committee for that purpose.

B. Provide the process, consistent with the Idaho Code and rules of the Idaho Water Resource Board, by which stored water supplies may be made available, for a specified period of time for a particular beneficial use, to water users who need additional water.

C. Provide incentives for those owning reservoir space and having stored water which may be, from time to time, surplus to their needs, to make such space and water accruing thereto, available to the Rental Pool for other users and uses. In no case will water from the Rental Pool be used to maintain minimum flows greater than those established pursuant to state law.

D. Provide a recognized system through which stored water supplies may be located, identified, advertised, and subsequently leased and rented for specific times, purposes, and uses.

E. Provide payment to Water District 1 for services rendered in the operation of the Rental Pool; to use said revenue to make improvements in distribution facilities; to aid in improving efficiency in the distribution of water within Water District 1; comply with the local public interest; and is consistent with the conservation of water resources within the State of Idaho.

1.3. Available water supplies may be leased to the Rental Pool by the lessor and rented from the Rental Pool by the Committee for any beneficial purpose recognized by the laws of the State of Idaho, provided other water rights are not injured, or irrigators are not deprived of supplemental storage by renting water for uses other than irrigation.

RULE 2. DEFINITIONS.

2.1. **ACRE-FOOT** - a volume of water sufficient to cover one acre of land one foot deep and is equal to 43,560 cubic feet.

2.2. **ANNUAL** - refers to the period between annual meetings of Water District 1, and normally will be a period starting the first Tuesday in March and ending on the first Monday of March of the succeeding year.

2.3. **BANK** - means the Water Supply Bank of Water District 1, as operated by the Committee of Nine as a designated local committee.

2.4. **BOARD** - means the Idaho Water Resource Board.

2.5. **BUREAU** - means the Bureau of Reclamation, Department of the Interior, United States of America, sometimes known as the BOR.

2.6. **COMMITTEE** - means the Committee of Nine as appointed by the water users of Water District 1.

2.7. **DEPARTMENT** - means the Idaho Department of Water Resources or IDWR.

2.8. **DIRECTOR** - means the Director of the IDWR.

2.9. **DISTRICT** - means Snake River Water District 1 of the State of Idaho.

2.10. **LATE SEASON RENTAL** - means water rented from the Rental Pool for release for non-irrigation beneficial uses after October 31 of one calendar year and before June 15 of the following year.

2.11. **LEASE** - a written contract by which a storage water right accruing to a specified storage by a consenting contract holder, is made available to the Committee for rental from the Rental Pool.

2.12. **LESSEE** - means any person renting water or space from the Rental Pool.

2.13. **LESSOR** - is any person leasing space or water to the Rental Pool.

2.14. **MILNER** - means Milner Dam or the lowest diversion in Water District 1.

2.15. **PERSON** - means any individual, corporation, partnership, irrigation district, canal company, or other political subdivision or governmental agency.

2.16. **LONG-TERM LEASE** - means a contract with the Committee for an improved priority within a given priority category to rent water from space leased to the Rental Pool in future years.

2.17. **RENT or RENTAL** - means a written storage contract for the exclusive use of stored water leased to the Committee for a determinate period for a specified price.

2.18. **RENTER** - means the person renting water from the Committee or the lessee.

2.19. **RENTAL POOL** - refers to the water bank activities administered by a local committee appointed by the Water Resources Board.

2.20. **RENTAL POOL COMMITTEE** - A sub-committee appointed by the Committee of Nine composed of the Water District 1 Watermaster, Superintendent of the Minidoka Project of the Bureau, and three members of the Committee of Nine.

2.21. **SPACE** - means all or any portion of the active impoundment volume of a reservoir measured in acre-feet.

2.22. **STORAGE** - means the portion of the available space that is storing water.

2.23. **WATERMASTER** - means the Watermaster of Water District 1.

2.24. **PAID-OUT** - means the cost of construction under a space holder's contract with the Bureau has been paid in full, or for other reasons there are no remaining obligations to comply with the reporting requirements of the Reclamation Reform Act (RRA) of 1982.

RULE 3. GENERAL PROCEDURES.

3.1. It is the policy of the water users of Water District 1 and the Committee to operate the Rental Pool under the priorities here-in-after stated for the maximum beneficial use of available water supplies.

3.2. A primary purpose in the operation of the Rental Pool will be to benefit the agricultural water users within Water District 1. These procedures are designed to assure that stored water leased to the Rental Pool from federal and other private reservoirs within Water District 1 is rented, or otherwise allocated, in a manner that protects other water rights and assures that water is first made available to meet the irrigation requirements of irrigation water users within Water District 1 before other uses are considered.

3.3. The operation of the Rental Pool shall in no way recognize any obligation to maintain flows below Milner Dam or to assure the minimum stream flows established at the USGS gaging station on the Snake River near Murphy unless specific arrangements to do so are made under these procedures.

3.4. The operation of the Rental Pool shall be consistent with the statutes creating the Water Supply Bank, the rules and regulations of the Board, and the provisions of the space holder's contracts with the United States.

3.5. Storage water is accepted by, or leased to, the Rental Pool on a contingency basis. Payments to the lessor will be made to the extent rental monies are received by Water District 1 in trust for the Committee pursuant to these rules.

3.6. The space of storage water leased to the Rental Pool that is rented for uses below Milner shall be the last space to fill in the ensuing year.

3.7. No storage water leased to the Rental Pool shall be rented for uses below Milner without the express written consent of the lessor.

3.8. It is the policy of the Committee of Nine, in operating the Rental Pool to facilitate annual leases and rentals, to base all transactions on water stored (storage) rather than reservoir space.

3.9. Any Lessor, Lessee, or Applicant aggrieved by a decision of the Rental Pool Committee on matters related to the operations of the Rental Pool may request a hearing before the Committee of Nine within fifteen (15) days after receiving notice in writing of the decision. After hearing the grievance and after review by the Committee of Nine, a decision will be made by the Committee of Nine in writing, setting forth the reasons for its decision, and said review decision must be signed by a majority of the Committee of Nine. The decision of the Committee of Nine may be appealed to the Board.

3.10. All leases of stored water within Water District 1, unless the associated change in point of diversion and place of use is being initiated through the statutory transfer process, (with the exception of other approved water rental pools within the District and, specifically, those exclusions applying to the Shoshone-Bannock Indian tribes) shall be transacted through the Water District 1 Rental Pool, unless the transaction is an internal rental within the distribution system of a contracting entity.

RULE 4. MANAGEMENT.

4.1. The Rental Pool shall be operated pursuant to Idaho Code, Section 42-1761 to 42-1766 with all policies being established through the approval of the Committee of Nine.

4.2. A sub-committee composed of the Watermaster, the Superintendent of the BOR's Minidoka Project, and three members of the Committee of Nine appointed by the chairman shall have the following general responsibilities:

A. To determine general polices regarding annual storage leases which may not be covered by the adopted procedures of the Committee of Nine.

B. To assist the Watermaster in the allocation of water from the Rental Pool when conflicts arise.

C. To advise the Committee of Nine on water banking activities.

D. To set policies for the disbursement of funds generated by the Rental Pool.

4.3. The Watermaster shall act as the manager of the Rental Pool. His authority shall include accepting water or space into the Rental Pool, executing rental agreements on behalf of the Committee of Nine, disbursing and investing funds generated through the rental of stored water, and distribution of water supplies from the Rental Pool. All funds invested shall be considered public funds for investment purposes pursuant to the Public Depository Law, Chapter 1, Title 57, Idaho Code.

RULE 5. LEASES.

5.1. Any person who owns or controls space or storage in a reservoir located in Water District 1 may seek to lease any portion of his space or accrued storage to the Rental Pool.

5.2. Leases of space and water accruing therein will be identified by reservoir. If no designation is made by a lessor holding space in more than one reservoir, it shall be understood that American Falls space will be designated before Jackson space and Jackson space will be designated before Palisades space.

5.3. Storage leases are subject to the approval of the Rental Pool Committee. Reservoir space submitted for lease to the Rental Pool may be rejected in whole, or in part, by the Rental Pool Committee or they may place special conditions on usage, allocation, and price, if, in the judgment of the Committee, accepting said water will not be in the best interest of the Rental Pool or the water users of Water District 1.

5.4. Leases of storage to the Committee shall be on a priority basis as set forth in Rule 6.

5.5. Leases of storage to the Committee shall be in writing on forms provided by the Watermaster and shall bear the date

they were received in the Watermaster's office in Idaho Falls.

5.6. Leases of reservoir space may be made for periods of up to twenty (20) years. Any space leased for periods in excess of two (2) years shall be subject to Rule 9 of these procedures.

5.7. All space leased to the Committee shall be under the control of the Watermaster and the Rental Pool Committee for the duration of the lease.

5.8. Any lease executed by the Committee at the direction of the Director or the Board, cannot be for a rental charge less than that charged by the local committee in any year of said lease.

5.9. The lessor (contract holder) is responsible for paying lessor's continuing obligations to the Bureau of Reclamation for construction or annual operation and maintenance.

5.10. Subject to the provisions of paragraph 7.5 and 7.6, any lease of space or storage leased to the Rental Pool, or any portion thereof, which has not been rented by the Committee prior to November 1, of that year, shall be terminated, the lease of the space to the Rental Pool shall be null and void, and the storage water not rented shall be returned to the credit of the lessor.

RULE 6. LESSOR PRIORITIES.

6.1. Any person holding space in a federal or private reservoir who leases storage to the Rental Pool for annual rental prior to June 1 of any year shall share proportionally with other lessors leasing storage to the Rental Pool prior to that date. Long-term leases shall be considered to be in this time frame.

6.2. Any person holding space in a federal or private reservoir who leases storage to the Rental Pool for annual rental after June 1 and before July 1 of any year shall share proportionally with other lessors leasing storage to the Rental Pool within this time frame.

6.3. Any person holding space in a federal or private reservoir who leases storage to the Rental Pool for annual rental after July 1 of any year shall receive his share of the proceeds for the rental of all or part of the water rented which was made available after July 1 of

that year on a "first come" basis, after water from space leased prior to July 1 has been rented.

6.4. All storage leased to the Rental Pool before June 1 of any year will be rented before any storage leased after June 1 is rented. All storage leased to the Rental Pool after June 1 and before July 1 will be rented before any storage leased after July 1 is rented.

6.5. Whenever a request to lease storage to the Rental Pool is made for an annual lease it will be assumed that it is the intention of the lessor to assign sufficient space to yield the designated amount of storage.

6.6. If a spaceholder should choose to lease all of his space to the Rental Pool, the "yield" of that space shall be determined by the watermaster after calculating the percentage of fill of that leased space in that particular reservoir, minus evaporation, and any fill restrictions associated with restrictions arising from Rule 3.6 of these procedures.

RULE 7. LESSEE PRIORITIES.

7.1. Any storage available through the Rental Pool prior to June 1 for annual use shall be rented prior to June 1 on a priority basis as hereinafter provided. Any storage available after June 1 and before July 1 for annual use shall be rented prior to July 1 on a priority basis as hereinafter provided. The priority within each priority group hereinafter provided within the above time frames and after July 1 shall be determined by the date of the lessees rental agreement and upon payment in the office of the Watermaster within the above time frames.

A. The first priority in renting water from the Committee shall be given to those lessees owning space in any of the Bureau's federal storage reservoirs in the District for storage prior to 1979, used for irrigation of lands in the district, for use on said lands, and lessees eligible for mitigation under the 1990 Fort Hall Indian Water Rights Agreement and who are stockholders in the Mitigation Corporation that has contracted with the BOR for mitigation water, and only to the extent mitigation water is unavailable through sources made available through the Mitigation Corporation.

B. The second priority in renting water from the Rental Pool shall be given to lessees for other irrigation uses above Milner, with preference going to lands for which storage was rented prior to 1992.

C. The third priority in acquiring stored water from the Rental Pool shall be given to other beneficial uses in the order in which their requests are received.

7.2. Priority among each priority class listed above shall be determined by the date on which the water user's contract and payment is received at the office of the Watermaster in Idaho Falls; the earlier in the year the executed lease is received by the Watermaster, the higher the priority in the priority group the entity will receive. Long-term leases shall be in the priorities outlined in Rule 7.1, as initiated in Rule 9.4. The first lessee who has entered into a long-term rental agreement and has rented storage water prior to 1992, shall have the earliest priority for Rental Pool supplies within his priority class. All subsequent long-term rental agreements shall have the same relative priorities in their appropriate priority group as their rental agreement does to other long-term rental agreements in the same priority group.

7.3. Any person having initiated an annual contract for stored water may request water in subsequent years by confirming, in writing, that all of the information on the original rental agreement is true and correct, and by identifying the amount of water he wishes to rent. The priority, in this case, will be the date on which payment is received by the Watermaster.

7.4. Space leased to the Rental Pool for more than one year from reservoirs with paid-out federal contracts shall be first reserved for allocation for irrigation purposes. Any person renting water from such space for irrigation shall be subject to all applicable water laws of the State of Idaho but shall not as a result be subject to the Federal Reclamation Reform Act of 1982 (RRA). If sufficient space is not available in paid-out reservoirs and stored water is rented from a reservoir with remaining federal repayment contracts, then anyone renting such water may be responsible for compliance with the limitations and reporting requirements of the RRA should the Bureau of Reclamation determine RRA compliance is required.

7.5. The Watermaster will use his best efforts to assure that unauthorized diversions of water do not occur. In the case unauthorized diversions do occur, any water diverted within Water District 1 will be charged by the Watermaster as storage used. Any such unauthorized use of water shall be replaced from available water bank supplies at a cost to the user equal to the established water bank price plus an additional seventy-five cents ($ .75) to cover increased administrative costs. The administrative costs may be waived by the Watermaster if, in his judgment, such unauthorized use resulted from measurement or accounting errors. If there is insufficient storage available in the Rental Pool during the current year, then the obligation of the renter to rent water to replace the stored water used without authorization shall continue to the following year.

7.6. Water rented and unused for irrigation purposes may be leased to the Rental Pool by September 1, for rental by the Rental Pool under the same conditions that said water was originally leased to the Rental Pool. Any proceeds from the re-rent of said water by the Rental Pool shall be refunded to the original renter of said water in the same proportion the rental proceeds are remitted to other lessors of water to the Rental Pool. Water rented from the Rental Pool and not rented by the end of the irrigation season, or by March 15 of the following year for non-agricultural uses, shall be returned to the lessor or lessors as carry over storage of lessors, and all rights to said water leased from the Rental Pool by the renter shall be deemed to be terminated, except that, renters who own reservoir space may carry over water rented from the Rental Pool in their space for use the following year, unless lost through the subsequent filling of that space.

7.7. No water may be rented after November 1 of each year without the lessor's approval.

RULE 8. LEASE PAYMENTS AND WATER COSTS.

8.1. The lease price of the storage rented from the Rental Pool shall be set by the Committee of Nine each year.

8.2. A. The rental price for 1994 shall be $2.95 per acre foot, including the District administrative charge of $0.75 per acre foot and the Water Board surcharge

of $0.20 per acre foot, for water diverted for uses above Milner Dam.

B. The 1994 rental price for water delivered below Milner Dam shall be $6.25 per acre foot, which includes the District administrative charge of $0.75 per acre foot and the Board surcharge of $0.50 per acre foot. An additional $2.20 shall be deposited by the lessee, which shall be retained by the District for distribution the following year of $2.00 to lessor and $0.20 to the Board per acre foot of space rented for uses below Milner the previous year that does not fill. The balance of the deposit, if any, shall be returned to the lessee. No interest will accrue to the lessor or lessee on the deposit held by the District prior to distribution.

C. Any storage space holder who puts water in the rental pool for lease and then subsequently removes all or part of the water from the rental pool shall be charged a $0.75 per acre foot administrative charge by the District for the water withdrawn.

8.3. Lease payments to the lessors shall be made in accordance with the priorities of Rule 6 and shall be based upon the annual report of the Snake River Watermaster. Payments to the lessors shall be considered due and payable once the Watermaster has calculated the actual water used within Water District 1 for the annual Watermaster's report and the rental payments have been received.

8.4. The Rental Pool Committee may authorize the Watermaster to make timely partial payments to the lessors based upon provisional data when, in the judgment of the Rental Pool Committee, such partial payments can be made with reasonable certainty.

8.5. All rental monies not paid to lessor's under Rule 8.4 above shall be maintained in a separate interest-bearing account with accrued interest being distributed on a pro-rata basis at the time that final payments are made. The Water District shall be entitled to use all rental funds on an as needed basis provided the accrual of interest due suppliers is not affected. Payments for water rented from the Rental Pool and distributed after October 31 shall be computed on a pro-rata basis for all unrestricted water supplied pursuant to the priorities in Rule 6.

RULE 9. LONG-TERM RENTAL AGREEMENTS.

9.1. The Committee of Nine may arrange rentals of storage space for periods not to exceed twenty (20) years. Such long-term rentals will be negotiated on a case-by-case basis and may be supplied from anticipated future annual space/water leases to the Rental Pool or from specific long-term space assignments, or a combination of the two.

9.2. Contracts for long-term rentals shall be subject to the provisions of the Rule 6 and 7, unless different provisions are specified in the rental agreement. Long-term rental agreements in excess of five (5) years shall only become effective upon final approval of the lease agreement by the Board.

9.3. Any contract for a Long-term Rental Agreement shall contain the following information:

A. Name and address of renter.

B. Amount of storage space obligated.

C. Rental price.

D. Legal description of the point of diversion and place of use.

E. Duration of the rental agreement.

F. The understanding of responsibilities and exposure if reservoir space does not fill at some time during the term of the rental agreement.

G. The beneficial use to be achieved through the delivery of water from the rented space.

9.4. A long-term rental agreement will be initiated by submitting an application on forms provided by the Watermaster to the Watermaster's office in Idaho Falls. Upon approval of the request by the Committee of Nine, the Watermaster shall initiate the rental upon receipt of the first year's rental payment. Each successive year the scheduled payment shall be due on the date specified in the rental agreement. Failure of the renter to meet any payment shall void the rental agreement and any subsequent rental by that renter shall be under the last priority provided by Rule 7.

9.5. For the purposes of Rule 7, the date of the agreement shall be the date the application is received by the Watermaster.

PERSONNEL

The process of accurately distributing water and regulating the use of water according to the various water rights requires the daily collection and compilation of a large amount of data. In 1994, the accounting process required the processing of nearly 800 separate items of data each day. The process of collecting these data is the primary responsibility of the "river riders". Each day the river riders travel a specific circuit and collect stage data from the various stream and canal gages. These gage readings are later compared with the charts produced by the stage recorders which produce a continuous record of stage vs. time.

The accuracy of the diversion data computed from stage data collected by the river riders is dependent on the work of the "hydrographers". It is the job of the hydrographer to measure the flow in each canal often enough to assure that an accurate relationship between stage and discharge is known. Because some canals "shift" more than others during the season, the frequency with which measurements are made varies from canal to canal. Generally, it is found that one measurement per month is adequate to maintain a reasonably accurate rating on most canals.

By statute the responsibility for controlling and regulating the diversion of water rests with the watermaster. Because of the desire of most canal companies and irrigation districts, provisions have been made to deputize their managers for the purpose of regulating specific diversions. In addition, several other deputies are needed to fulfill the watermaster's regulatory functions. Because the personnel needs of Water District 1 are greatest during the irrigation season, most of the people employed by the watermaster are part-time employees. At the present time, the watermaster's staff includes five full-time employees. The water district personnel employed during the 1994 irrigation year are listed as follows:

PERSONNEL

Ronald D. Carlson	Watermaster
Lyle R. Swank	Assistant Watermster
Tony Olenichak	Deputy Watermaster
Helga King	Data Programmer
Wendy Murphy	Administrative Secretary
Darin Wetzel	Deputy Watermaster, Idaho Falls
J. Dee O'Brien	Deputy Watermaster & Hydrographer, Teton Basin
Gordon Mills	Deputy Watermaster & Hydrographer, Lower Valley
Val Richards	Deputy Watermaster & Hydrographer, Henrys Fork
Alan Skarr	Deputy Watermaster, Willow Creek
Gail Blanchard	Hydrographer, Teton River
Wilbur Brown	River Rider, Heise and Rigby Diversions
Lyle Lindsay	River Rider, Blackfoot Diversions
Dennis Bitton	River Rider, Swan Valley
Wilford Martin	River Rider, Swan Valley
Viola Lenz	River Rider, Upper Falls River
E. Frank Ohme	Gage Reader, Idaho Falls
Joe Yost	Gage Reader, Milner

FISCAL REPORT

On the first Tuesday of March of each year, the water users elect a watermaster and set his budget for the ensuing year. The watermaster then collects the necessary operating funds by billing each water user based upon diversion records for the previous year. Because funds are available through the renting of stored water, the watermaster is able to bill water users at the end of the year after all of the water uses are known. Billing after-the-fact allows the Water District to avoid billing water users based upon their estimated use. This saves time, money and avoids confusion. However the after-the-fact process is exactly the same as the estimated process used by most water districts. The Idaho statutes establish a process where the distribution costs of a water district are distributed to water users in proportion to their percentage of the total water diverted that year. For example, a canal company whose total diversions averaged 10% of the total water used in the district will be assessed approximately 10% of the total amount budgeted. In some instances, the percentage a user pays of the total budget may differ from his percentage of the total water diverted that year because each diversion is subject to a $20.00 minimum charge. If the computed percentage for a water user is less than $20.00 his water delivery bill will be $20.00. In addition, upper valley companies are assessed separately for the expenses of their representatives on the Committee of Nine. Since the expenses of those elected to the Committee of Nine as representatives of companies located below Blackfoot are paid directly by their respective companies, these companies are not assessed for these costs by the watermaster.

The billing for 1994 actual cost was based on the amount spent of $546,988 spent for water delivery during 1994, less adjustments for prior year uncollectables, corrections, and $8388 billed to Teton pumpers for Sutron sites. This resulted in a total cost of $538,600 for the delivery of 3,963,980 twenty-four hour second-feet (7,862,435 acre-feet). The 1994 billing included budgeting of upper valley interests of the Committee of Nine. This amount was assessed only to the canals above American Falls Reservoir, which made the average assessment to the lower canals about 6.0 cents per acre-foot and the upper valley diversions about 7.0 cents per acre-foot. The following table shows a comparison of the amounts budgeted and spent for various items in 1994.

An audit of Water District 1 financial statements as of October 31, 1994 is presented in the Appendix.

WATER DISTRICT 1 ADOPTED BUDGET AND ACTUAL EXPENDITURES-1994

	1994 Budgeted	1994 Actual
HYDROGRAPHERS		
Teton Basin	$ 8,000	$ 6,426
Idaho Falls	4,500	2,258
Lower Valley	7,000	1,939
Henrys Fork	16,000	15,498
Teton River	4,500	4,407
	$ 40,000	$ 30,528
RIVER RIDERS		
Rigby & Heise Div.	$ 6,500	$ 6,580
Blackfoot Division	3,000	2,300
Swan Valley	5,500	5,400
Upper Falls River	1,000	989
Idaho Falls	1,000	531
Willow Creek	3,000	3,085
Milner	360	360
	$ 20,360	$ 19,245
PROGRAM EXPENSES		
Automation	$ 15,000	$ 3,500
Sutron	52,000	42,555
Streamgaging	108,410	138,737
U of I Studies	4,000	0
	$179,410	$184,792
EQUIPMENT EXPENSE		
Office Equipment	$ 1,000	$ 370
Computer	6,500	8,407
PC's	3,000	0
	$ 10,500	$ 8,777
PERSONNEL EXPENSES		
Retirement	$ 5,000	$ 3,999
Social Security	5,000	4,168
Mileage	21,000	21,215
State Insurance Fund	3,500	3,503
Employment Insurance	500	274
Part-time help (F-Mad)	4,900	4,800

WATER SUPPLY

The water supply available in any year is comprised of stored water carried over from the previous year, groundwater discharged (base flow), snow melt runoff and summer precipitation.

Melting snow on the Snake River Watershed generally Provides the largest component of surface flows in Water District 1. The maximum snow accumulation at higher elevations is normally reached by the end of March. Runoff normally starts in late April and stream flows normally peak in early June. However, because snow pack varies significantly from year to year, average conditions are rarely actually observed. Figure 1 indicates the variation on April 1 snow pack for two snow courses, one on the Henrys Fork and the other on the Snake River. This figure indicates a below normal snow pack this year for both the Henrys Fork and the Snake River. Snow survey records for 21 Upper Snake snow courses for 1985-94 are included in the Appendix.

The Soil Conservation Service of the U.S. Department of Agriculture, in cooperation with the Idaho Department of Water Resources, forecasts stream flows based upon current snow conditions and past streamflow and precipitation records. The April 1, 1994 forecasts predicted that runoff in the majority of the Upper Snake River basin would be below the historical average. Table 1 shows the average, forecasted, and actual unregulated runoff at selected stations in the basin. Forecasts ranged from a high of 71 percent of normal for the Henrys Fork near Aston to 60 percent for the Snake River near Heise. Actual unregulated runoff ranged from 75 percent of normal near Ashton to 49 percent of normal near Squirrel.

Natural flow is that increment of streamflow that would be available at a specified stream location if the effects of reservoirs and diversions were removed. The Watermaster must divide the natural flow among all decreed, licensed, and permitted water rights. For the purpose of computing and distributing available water supplies, the Upper Snake has been divided into 37 "reaches" as indicated by Figure 2. The water gained by each reach is computed as the sum of reach outflow, reach diversions, reservoir evaporation, and change in reservoir storage minus reach inflow.

Before reach gains can be computed, adjustments must be made to account for travel time. Table 2 lists the average travel time in days from each reach and from points of diversion within each reach to Milner Dam. The daily sum of the gains in all reaches (adjusted for travel times) above a specified gage location represents the natural flow supply at that location. When accumulated to Milner, they represent the total system natural flow.

Figure 3 compares total daily natural flow with total system diversions. The difference between the natural flow supply and the total system diversions represents storage that had to be released to meet the irrigation demand. Figure 3 indicates that demand exceeded natural flow for the first time on April 17, 1994 (MT). Storage was then used continually From early June through October 6 when diversions were curtailed to the point that they were less than the natural flow. No natural flow was run past Milner Dam in 1994.

The total natural flow in the system peaked at 35,131 cfs on May 19 (MT). The flow through Milner on this day was 230 cfs. The flow through the Milner Power Plant was 1,306 cfs, for a total of 1536 cfs of water past Milner. Canal diversions were 25,375 cfs. The remaining 8,220 cfs (16,304 Acre Feet) was stored.

Water supply tables showing daily diversions, miscellaneous stream flows, daily stream flows, and daily reservoir contents for the 1994 water year can be found in Appendix A.

WATER RIGHTS REGULATION

The natural flow supply is computed as described in the previous section. When the natural flow is determined for each day, it is allocated to water users starting with the oldest rights. The allocation process continues until all of the available natural flow has been distributed. The allocation of natural flow is for specific beneficial uses which include irrigation, storage (for specific purposes), power generation, and municipal and industrial uses. Lists of the rights as recognized in 1994 can be found in Appendix A of this report. These rights are listed in order of priority and also by individual diversion or user (canal, pump, power plant, reservoir, etc.).

Figure 3 illustrates the constantly changing water supply that must be distributed by the watermaster each day. It also presents a generalized picture of the total water supply and the demand for water in the whole water district. Because the relationship between the availability of natural flow and demand may change from reach to reach, the priorities of water rights being filled will normally not be the same for all reaches. Also, because of the travel time involved between reaches, priorities will change on different dates for different reaches.

Tables 4 and 5 show the 1994 daily water right regulation schedule. Using these tables, the last right which was filled for a particular diversion can be found by the reach in which the diversion of interest is located. For example, assume someone wishes to know the last right being filled for the Harrison Canal on August 21, 1994. By knowing that the Harrison Canal's point of diversion is located between Irwin and Lorenzo, the August 21 date is found in the first column; then moving across the table horizontally, the priority of the last right being filled at most points on the river (primary priority) is found to be May 11, 1889. To the right of this "primary priority" are listed the exceptions to the primary priority. Because the Harrison Canal is in one of the reaches where priority exceptions exist, it is subject to the exceptions priority reaches with last rights being June 10, 1888. Thus, no right later in time than June 10, 1888, was filled for the reach Irwin to Lorenzo. From a listing of water rights found in Appendix A it is determined that the Harrison Canal would be entitled to divert 66 cfs of natural flow under priorities earlier than June 1, 1888. Its next right, which has a priority of June 1, 1889, was not delivered. Therefore, on June 21, 1994, the Harrison Canal was entitled to divert up to 66 cfs of natural flow.

Storage diversions on a particular day are found by subtracting the natural flow diversion from the total diversion. Using the above example, the storage diversion of the Harrison Canal on August 21 is equal to its total diversion of 220 cfs (see Appendix) minus the 66 cfs natural flow diverted. Therefore, the segregation of natural flow and stored water used by the Harrison Canal on August 21, 1994 was:

Natural Flow	5.8 cfs
Stored Flow	35.2 cfs
Total Diversion	41 cfs

The reaches in tables 4 and 5 were numbered for convenience in making these tables and have no intended relationship to the reaches used in the watermaster's accounting process shown in figure 2.

DIVERSIONS AND STORED WATER USE

This section lists the 1994 irrigation year (November 1, 1993 to October 31, 1994) water use by canal and summarizes the diversions by reaches of the river. The diversions have been separated into major and miscellaneous categories for convenience and to preserve the traditional groupings historically used in past watermaster reports. The seven river reach groups are: Snake River from Irwin to Lorenzo, Snake River from Lorenzo to Blackfoot, Snake River from Blackfoot to Milner, Henrys Fork, Falls River, Lower Teton River, and Willow Creek.

Major diversions for the above listed reaches are given in Tables 6 through 11, with the exception of Willow Creek, which has no diversions in this category. Acreages are shown for most of these diversions and annual per acre volumes are calculated. No attempt was made to confirm the acreages used. Miscellaneous diversions for the seven reach groupings are given in Tables 12 through 18. These diversions are mainly pumps which irrigate small acreages near the river.

Table 19 is a summary of all regularly measured major and miscellaneous diversions. Major and miscellaneous diversions total about 7.7 million acre-feet, compared to 7.1 million acre-feet diverted in 1993.

In addition to the diversions summarized by Table 19, there are many diversions which are administered separately and for which no daily record of amounts diverted normally is made. Periodic measurements of most of these diversions are made, however, and are listed in the Appendix under "Miscellaneous Streamflow Records".

As described previously, all diversions that exceed natural flow entitlements will be charged storage for the difference between the sum of available natural flow rights and the total diverted each day. Most users own or have contracted for specific storage space entitlements in one or more reservoirs. Other users who do not have storage are frequently able to "purchase" unused stored water from the Water District 01 Rental Pool when natural flow is insufficient to meet their needs. During the 1994 irrigation year rental requests were far greater than available supplies.

The storage accrued to each reservoir at the end of the spring runoff is indicated in Table 20. Reservoir evaporation is deducted from the accrued storage. The allocable storage is the accrued storage minus evaporation. Table 20 shows the evaporation charged against each reservoir and the amount in each that was allocated for use during 1994. Initially evaporation is estimated for each reservoir, but because actual evaporation is not known until the end of the season, the final allocation can not be made until then. Of the 4,089,239 acre-feet initially stored, 4,037,149 acre-feet

remained available for allocation after actual evaporation losses were taken into account. Storage held in Milner is included but has not been allocated.

Tables 21 through 28 indicate storage water allocated and used, by canal, during 1994. Diversions listed in these tables are grouped by the same river reach sequence used in Tables 7 through 18. Table 29 is a summary of these storage accounts by reach. Tables 21 through 29 are divided into nine columns.

Column one indicates the water allocated to each user (after evaporation losses have been subtracted).

Column two reflects supplies furnished to or obtained from the Water District 01 Rental Pool. A negative sign (-) indicates water supplied for sale through the rental pool and unsigned numbers represent storage purchases. Storage supplies provided by the Fremont-Madison Irrigation District from Island Park and Grassy Lake Reservoirs are included under this heading even though they were considered internal sales of stored water that were not necessarily transacted through the Water District 01 Rental Pool. The system sum of the numbers in column two must equal zero (see Table 29).

Column three is the gross storage use as indicated by the watermaster's account computations.

Column four indicates water supplies that were purchased from the rental pool (or provided by the Fremont-Madison Irrigation District) and not used. These unused supplies were returned to the rental pool.

Column five shows the unused water from column four returned to the appropriate space holder at the end of the season. Columns four and five must be equal for the system (see Table 29). This water becomes available to the space holder as part of his carryover.

Column six lists the unadjusted balance of storage transactions (column 1 + column 2 - column 3 - column 4 + column 5).

Column seven indicates adjustments that were made to column six. Ideally, on October 31 of each year the stored water used by each canal can be obtained directly from the current accounting computations. In actual practice, this is rarely the case because some adjustments must be made. Reasons for storage adjustments range from data errors and changes in water right distribution to alternate supplies of water. Values in column seven are footnoted to explain the specific reason for each adjustment. All column seven footnotes for Tables 21 through 28 are listed at the bottom of Table 28.

Column eight shows excess storage used that had not been offset by purchase from the Water District 01 Rental Pool or by other adjustments applied at the end of the year. The sum (see Table 29) of columns seven and eight represents groundwater exchange pumping, groundwater mitigation, Ririe Reservoir adjustment, excess used by Fremont-Madison, and a correction for gain averaging.

Column nine indicates the carryover credited to each canal on November 1, 1994, and is found by adding columns seven and eight to column six.

Excess use on the Teton River in some cases is offset by groundwater exchanges. Seasonal volumes of water pumped from groundwater to replace diverted surface water are identified as "exchange pumping" and are shown as adjustments in Table 26. For 1994, exchange pumping totaled 18,926 acre-feet of which 18,174 acre-feet was rediverted by the exchange pump users. Daily records of exchange pumping are shown in the Appendix.

Table 29 shows a total 4,037,148 acre-feet storage water allocated and 3,225,638 acre-feet storage water used in 1994, leaving a preliminary balance of 811,510 acre-feet. Miscellaneous storage use of 148,619 acre-feet included in the storage used total consisted of 43,782 acre-feet used by Idaho Power, 63,714 acre-feet from Palisades unallocated, and 20,306 acre-feet from Ririe. Adjustments to the preliminary balance totaled 53,368 acre-feet, while system excess use was 30,501 acre-feet, resulting in a net gain in storage of 83,870 acre-feet. Adding this net gain in storage to the preliminary balance yields a carryover at the end of the season of 895,380 acre-feet.

Table 30 summarizes the 1994 storage accounts for the system. Late season reservoir fill, which occurred as a result of declining diversion rates and increasing natural flow in the fall, was 250,819 acre-feet through October 31 for a total of 874,199 acre-feet in storage. Actual observed reservoir contents by reservoir are shown in Table 31.

TABLE 6. Major Diversions During 1994 Irrigation Year from Snake River between Irwin and Lorenzo

Island Park	49,000
Grassy Lake	11,099
Ririe	15,200
American Falls	226,800
Lake Walcott	37,000
Lake Milner	34,700
TOTAL	874,199

WATER DISTRICT 1 RENTAL POOL

There has been "rental pool" operating on the upper Snake River since the second decade of the 20th century. The earliest documented rental of stored water appears to have taken place in 1916 when 40,000 acre-feet of water was leased to the Twin Falls Canals from the Blackfoot Reservoir. Through the drought period of the 1930's, space holders in Jackson and American Falls Reservoirs made storage available to help other water users in Water District 36. (Water District 36 was re-designated as Water District 1 in 1971.) This early "rental pool" had no statutory basis, and potentially certain legal liabilities.

In 1979, provisions for the creation of a water supply bank was enacted by the Idaho State Legislature. The authority for water banking was vested in the Idaho Water Resource Board, who, through the provisions of Idaho Code Section 42-1765 was empowered to appoint a local operating committee for the purpose of "marketing stored water between consenting owners and consenting renters. . ." The water board appointed the Committee of Nine as the local operating committee for the Water District 1 Water Bank in 1979 and has re-appointed them every five years since that initial appointment.

Water District 1 initially referred to the rental process established after enactment of Chapter 17 of Title 42, Idaho Code and the appointment of the Committee of Nine, as the Water District 1 Water Bank. The water board retained authority to manage the "banking" of decreed and licensed water rights. In order to reduce the confusion between the boards rental activities and the water district's rental activities the district went back to referring to the district's system for the acquisition and lease of Snake River storage as the Rental Pool.

Each year the chairman of the Committee of Nine appoints a rental pool committee consisting of the watermaster, who is the designated manager for the Rental Pool, the area manager for the Bureau of Reclamation (BOR), and up to five members of the Committee of Nine. In 1994 the rental pool committee was:

Ronald D. Carlson, Manager; Dale Rockwood, Chairman; Claude Storer, Leonard Beck, James Siddoway, and Jerrold Gregg, Area Manager for BOR.

The rental pool committee is charged with making recommendations to the Committee of Nine related to annual rental policies. This includes recommendations on the annual rental price. Because of the increased exposure to space holders and the potential for additional depletion from the upper Snake River Basin if water is leased for use below Milner Dam, different rules have been established that distinguishes between storage rented for irrigation purposes within Water District 1 and storage used outside of the district. These different rules include a different price.

In 1994 the rental pool committee recommended the price for storage leased be $2.95 per acre-foot at the river point of diversion for the renter. This amount represents a $2.00 payment to the supplier, a $0.75 administrative charge retained by Water District 1 and 10% of the payment amount going to the supplier paid to the Water Resource Board as a state administrative surcharge on rental pool receipts. The Committee of Nine accepted the recommendation of the rental pool committee that the cost of water leased for uses located below Milner Dam be $6.25 per acre foot. This included a $2.00 deposit that would go to the suppliers if the reservoirs did not fill in 1995. The rule that establishes the 1994 price for rental pool storage can be found in this report in the 1994 resolutions of Water District 1.

In 1994 the demand for storage from the rental pool for irrigation exceeded the supply by at least 15,000 acre-feet. Consequently there was no water available to lease to the BOR to help meet the flow targets for salmon on the lower Snake River. The City of Pocatello did not assign their space in Palisades to the Rental Pool and the BOR negotiated an agreement with the city to secure 45,000 acre-feet of storage. More detail on this transaction was previously addressed in the Report of the Committee of Nine. Because all storage released past Milner Dam, other than that released for flood control, must go through the Rental Pool the BOR negotiated special arrangements with the state and Committee of Nine, and was allowed to assign 416,480 acre-feet of storage to the Rental Pool for their exclusive use. The space potentially available to the BOR was the 45,000 acre-feet of storage acquired from the City of Pocatello, 18,980 acre-feet in Palisades and 80,500 acre-feet in Ririe being contracted to Mitigation Inc., and 157,000 acre-feet of the permanent powerhead in Palisades and 115,000 acre-feet of powerhead in Walcott Reservoir. Since the powerhead was not represented by any water rights which would permit refill of dedicated powerhead space once it was emptied, the director of the Idaho Department of Water Resources authorized a one time release of the water from this space with the understanding that once depleted, future recognition of this space as anything other than delivery buffer for the space holders in these reservoirs would be unlikely. The yield from this space after evaporation, was 342,188 acre-feet. In addition, the BOR applied to lease an additional 260,243 acre-feet from the Rental Pool. None of this request was filled.

Fremont-Madison Irrigation District holds 14,121 acre-feet of space in Island Park Reservoir that has not been allocated. The district makes this space available to its users through a district rental process. In 1994 this space yielded 13,383 acre-feet of water. In addition, Fremont Madison controls the wells that were constructed as part of the Teton project and, when necessary, pump supplemental water from these wells. During 1994, 20,615 acre-feet of water was pumped from these wells for supplemental uses on the Henrys Fork. In addition, Fremont Madison leased 23,080 acre-feet of water from the Rental Pool for resale to the patrons of the district. The irrigation district rented a total of 66,249 acre-feet of storage to its patrons in 1994, which included the reallocation and release of about 4,175 acre-feet of unused storage in Island Park and Grassy Lake.

REPORT OF THE COMMITTEE OF NINE

I suspect that if a poll had been taken in 1994 to determine what water users wanted most, the answer would simply have been, "to be left alone." I believe that was a large part of the message this nation sent Congress and the Clinton administration last November. Since the federal government, environmental groups, and downstream interests will not leave us and Snake River water supplies alone, most of this report is related to the responses of the Committee of Nine to the threats, demands, and challenges that are impacting us as water users and residents of southern Idaho.

The battles of 1994, while clearly driven by the Endangered Species Act, were shaped by George Miller in Congress, Bruce Babbitt and Dan Beard in the Department of the Interior, and of course, the Clinton administration in general. The assault goes beyond protecting salmon. The use of the Endangered Species Act to achieve non-related agendas was summarized very succinctly by the attorney for the Sierra Club Legal Defense Fund when he spoke about the listing of the spotted owl. He said, "Had we not found the spotted owl, we would have had to genetically engineer it. The spotted owl is simply the surrogate for the old-growth forests." Similarly, salmon and snails are being used to wrench water away from irrigators. Last year over 330,000 acre-feet (AF) of stored water was run down stream to help salmon. This represented all of the powerhead in Palisades and Minidoka and/in addition to all of the Mitigation Inc. water in Ririe and Palisades. When asked about the benefits of the discharge (which in Idaho amounts to over six million acre-feet since the augmentation efforts started), the answer normally given by the supporting agencies was, "The improvement is between five and seven percent."

The facts are that neither five nor seven percent more juveniles survived, nor did five nor seven percent more adult salmon return to spawn - the actual number was exactly zero. What the five to seven percent really represented was a theoretical increase in velocity that could have been achieved by the amounts of water released to augment flows on the lower Snake. This can easily be put in to proper perspective by realizing that water measurement, at best, is accurate only to plus or minus five percent. The fact is that their test of success in augmentation was whether or not they were able to detect the water on the lower river. This simple analysis is representative of the reliability of the data in general that are being used to justify flow augmentation. The public has been lead to believe that salmon in general, and Snake River salmon in particular, are being threatened by human activity. However, according to the best experts, this is not the case. From the stand point of the total population of Pacific salmon, which includes those spawning in Canada and Alaska, the actual numbers of salmon are at an all time high. According to Dr. Don Chapman and Dr. Bill McNeil, there are factors in the ocean ranging from the "El Nino" effect to the continuing reduced low pressure conditions near the Aleutians that are affecting ocean feed production and consequently certain west coast runs.

In spite of the lack of data being used to justify approving storage releases for salmon, the Committee of Nine did approve the lease of water by the Bureau of

Reclamation in 1994 for the purpose of flushing salmon. There are many reasons for the Committee of Nine giving its approval, not the least of which is Sec. 42-1763A of the Idaho Code, which was enacted by the Idaho State Legislature to provide for a three-year test to determine if any benefits of flow augmentation could be determined. There were a number of factors that entered into the committee's decision to allow water to be released last year, but ultimately the decision reflected the response to legal counsel. It was the opinion of the lawyers that this might not be the best time to press the issue.

The rules adopted for the rental pool provide for a prioritized process which gives preference to renters based on the purposes for which the various reclamation projects were originally authorized by Congress and licensed by the state. Any requests for rental water that represent a change in the nature of use from the authorized purpose of irrigation can only be granted after all irrigation needs have been met. In 1994, 75,888 acre-feet of water was leased from the rental pool by irrigators. This was at least 15,000 acre-feet less than the amount of water needed to fill all of the Ag rental requests. At the same time, over 400,000 acre-feet of space was assigned by the Bureau of Reclamation, but restricted to uses downstream from Milner. The creativity in getting water from the rental pool for non-irrigation purposes below Milner has been nothing less than remarkable. Last year, for example, the BOR wanted to lease 45,000 AF of Palisades storage from the City of Pocatello for flow augmentation. Some of the fish farmers who depend on the flows from the north-side springs, which emerge in the Snake River canyon near Haggerman, wanted to acquire storage to recharge groundwater. The Bureau of Reclamation would not approve the use of storage for recharging the aquifer. However, they said that if the natural flow going to the Milner power plant was diverted to recharge and, later that the natural flow was replaced with storage and released past Milner under the direction of the Bureau of Reclamation, that would represent an arrangement agreeable to the United States. The Idaho legislature even appropriated money to fund this recharge effort. Between April 1 and April 22, 4,998 AF of water was recharged through the Twin Falls Northside Canal. However, the entire 45,000 AF of storage water was released below Milner by the BOR. In the convoluted logic of this arrangement, the recharge and the storage released had to be equal or someone would have to pay an additional $5.50 per acre-foot to the City of Pocatello to compensate for the "last to fill" requirement in the rental pool rules. In an even more bizarre turn of events, Water District 1 ended up with an obligation to cover up to $110,000 of the costs if the reservoirs do not fill in 1995 or the remaining 40,000 acre-feet of water is not recharged. Fortunately, this fall Northside was able to recharge over 19,000 acre-feet, leaving only 20,700 acre-feet to recharge. The money is to compensate the City of Pocatello for the last-to-fill consequences of their storage being released past Milner. If the fill impact of the remaining 20,700 acre-feet had to be absorbed by all space holders it would represent a reduction in allocation to each space holder of less than one-half of one percent or about 5 acre-feet per 1,000 acre-feet of space owned. The alternative, for which there is a resolution being proposed today, is to allocate $57,000 to pay the City of Pocatello, to fulfill the agreement with the Bureau of Reclamation, in case the last-to-fill space of the City of Pocatello does not fill this year.

However, there is a lesson in this. The rental pool rules were established to recognize the authorized purposes of the reclamation projects and to protect the contractors in those projects. In 1994 we discovered that when the rules get in the way of the current federal interests, the protections in the rules can be circumvented unless the Committee of Nine and the state speak with one voice.

Nearly 100,000 acre-feet of the water released for salmon in 1994 was from space obligated to Mitigation, Inc. under the Fort Hall agreement. The contract for this space has been signed and it appears that the last objections to the agreement will be resolved shortly. As soon as the agreement is signed by the adjudication court, a meeting of Mitigation, Inc. will be called and the details of using this water pursuant to the agreement will be determined by the stockholders.

While there are many things that can cause water users to be discouraged and depressed, there are some encouraging signs that positive changes might be happening. Environmental groups have not been getting everything they want; some of them, in fact, are beginning to struggle financially. There is a growing possibility that the U.S. Congress will pass some meaningful court reform and will likely modify the Endangered Species Act. There is also a very encouraging sentiment in Congress that power should be shifted back to the states. We hope that in the near future, water users will actually experience their desire to be left alone.

INDEPENDENT AUDITORS' REPORT

Department of Water Resources
Water District 1
Idaho Falls, Idaho

We have audited the accompanying general purpose financial statements of Water District 1, as of October 31, 1994, and for the year then ended, as listed in the table of contents. These financial statements are the responsibility of the District's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the general purpose financial statements referred to above present fairly, in all material respects, the financial position of Water District 1, as of October 31, 1994, and the results of its operations and cash flows for the year then ended, in conformity with generally accepted accounting principles.

WATER DISTRICT 1
NOTES TO FINANCIAL STATEMENTS
OCTOBER 31, 1994

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

Water Districts were established in 1903 by the Legislature with the duty of directing and controlling the distributions of water within each District assigned to the State Reclamation Engineer (later changed to the Department of Water Resources). The Upper Snake River drainage was designated as District 1. The Idaho Code was amended in 1986 to clarify the status of the Districts in that each shall be "considered an instrumentality of the State of Idaho"

In 1919 a group of nine water users from District 1 met with the State Reclamation Engineer to request the creation of a permanent Watermaster system. This group became known as the Committee of Nine and represented the collective interests of the various members of the District. The primary purpose of the Committee was to assure that proper distributions of available water supplies were made.

Beginning in 1979, the Committee of Nine could assist in the marketing of stored water from water banks as authorized by the Water Resource Board. Water Banks are a system which allows owners of water a means of "renting" amounts surplus to their needs to others without violating various requirements of Idaho Code.

The District is governed by the Department of Water Resources which confirms the selection of a Watermaster by the members of the District. The District meets annually at which time the members select a Watermaster, adopt various resolutions governing the activities of the District and Water Supply Bank and elect the local advisory committee members known as the Committee of Nine. The Committee of Nine is responsible for assisting the Water Resource Board in the operations of the Water Supply Bank and to advise the Watermaster on the general operations of the District.

Water District 1 is responsible to the Department of Water Resources and water right holders of the District to make proper distribution of available water supplies within the District as appropriated.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Fund Accounting

The accounts of the Water District are organized on the basis of funds, each of which is considered a separate accounting entity. The operations of each fund are accounted for with a separate set of self-balancing accounts which comprise its assets, liabilities, fund equity, revenues and expenses. The funds are as follows:

Water District Operating Fund - This fund is used to account for the Water District's general activities.

Water Bank Fund - This fund is used to account for rental of Water Bank water supply and the related expenses to the Water Resources Board and the Water District.

Basis of Accounting

The accounts of the district are organized on a basis similar to that of a governmental enterprise fund, which is used to account for operations that are financed and operated in a manner similar to business enterprises (i.e. where the intent of the governing body is that the costs of providing goods and services to the general public on a continuing basis be financed or recovered primarily through user charges). The accrual basis of accounting is used. Revenues are recognized when they are earned and expenses are recognized when they are incurred.

Budgets

The Water District adopts a budget for operating expenses at the annual meeting for the District's operating fund. The budget is prepared on a basis generally consistent with generally accepted accounting principles, except that expenses for capital acquisitions are budgeted. The reported operating expense amounts exclude actual capital acquisitions since they are capitalized and included in equipment.

The following is the adjustment to operating expenditures:

	Reported Amounts	Adjustment for Legal Upper Valley	Adjustment for Capital Acquisitions	Budgeted Amount
Total Operating Expenses	$ 583,403	$ 38,396	$ 7,552	$ 629,351

The District does not adopt a budget for the Water Bank Fund. Expenses are dependent on Water Bank rental income which varies from year to year based on water supply and cannot be predicted in advance. Therefore, a budget to actual comparison is not presented for the Water Bank.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Cash and Cash Equivalents

Cash and cash equivalents are identified as cash and short-term, highly liquid investments. Cash and cash equivalents for the Water District 1, include cash in checking and savings accounts and investments in the Idaho State Treasurer's pooled investment account.

Investments

Idaho Code provides authorization for the District to invest in certain state and local governmental bonds and obligations, time deposit accounts, U.S. Government and Farm Credit System obligations and bonds, repurchase agreements, and savings and deposit accounts.

Inventory

Inventory is recorded at cost with a first-in, first-out basis of accounting.

Property and Equipment

Property and equipment is recorded at cost. Depreciation is provided using the straight-line method over estimated useful lives of the related assets of five years.

The District purchases various data collection platforms (DCP's) and other equipment which are placed into service and become part of the overall water system. The water system is composed of several storage facilities and delivery systems which are owned by various entities and organizations. The District has a policy of expensing items as they are placed in service as part of the water system.

Memorandum Only - Total Columns

Total columns of the general purpose financial statements are captioned "memorandum only" to indicate that they are presented only to facilitate financial analyses. Data in these columns do not present financial position, results of operation, or cash flows in conformity with generally accepted accounting principles. Neither is such data comparable to a consolidation. Interfund eliminations have not been made in the aggregation of this data.

2. CASH AND CASH EQUIVALENTS

At October 31, 1994, the carrying amount of the District's deposits (savings and checking accounts) was $104,860, and the bank balance was $113,474. The bank balance of $113,474 was covered by Federal Depository Insurance.

2. CASH AND CASH EQUIVALENTS (Continued)

The District has invested $2,841,250 with the Idaho State Treasurer's pooled investment account. The State Treasurer invests in time certificates of deposit, local government tax anticipation notes, federal loans, U.S. Treasury Notes and other U.S. Governmental securities. Information regarding insurance or collateralization of amounts invested in the pooled accounts is not available.

3. RESTRICTED CASH AND CASH EQUIVALENTS

Restricted cash and cash equivalents in the Water District operating fund of $300,000 include $100,000 for rental pool payment disputes which are deemed the responsibility of the District and $200,000 for specific purposes authorized by the Committee of Nine. These purposes include District expenses, educational projects, and legislative and agency deliberations, and advisory committee expenses.

Restricted cash and cash equivalents in the Water Bank Fund of $1,839,789 include funds held for the payment of Water Bank suppliers and administrative costs.

4. INVESTMENTS

The District has invested $318,952 at Merrill Lynch in U.S. treasury notes and bonds held in the District's name. These investments are allowed by state statute. These investments are considered Category 2 type investments which include uninsured and unregistered investments for which the securities are held by the agent in the District's name. The carrying value of these investments is $318,952 and market value is $297,857.

5. ASSESSMENTS RECEIVABLE

Assessments are billed at the end of the water year in the spring. The District has not incurred significant bad debts in the past and does not recognize any allowance for uncollectible accounts due to the legally enforceable nature of these assessments.

6. UPPER VALLEY ATTORNEY FEES TO BE ASSESSED

The Water District incurs legal services on behalf of certain upper Snake River valley users. The charges for these services are passed on to the users through additional assessments in the following year. The balance in this account represents attorney fees which have been incurred but have not yet been assessed to the respective users.

7. FUNDS HELD BY DEPARTMENT OF WATER RESOURCES

The Department of Water Resources provides the Water District with office space, administrative support and personnel. The District pays the Department monthly for these services in advance based on an estimate of the costs and balance of prior advance payments, as per the most recent memorandum dated March 2, 1993, between the Water District and the Department of Water Resources. The balance of funds held by the Department represents excess advance funds to be applied to future periods.

8. EXCESS STORAGE USERS RECEIVABLE AND SUPPLIERS PAYABLE

All water deliveries of the District are accounted for as being either a fulfillment of a water right or as a sale of stored water. Excess storage users receivable represents water delivered to users in excess of their water rights, which has not been paid for by users at year end. Excess storage suppliers payable represents the amount due to suppliers for stored water that has been sold during the year. A portion of the amount charged to excess storage users is paid to the Water District and the Water Resources Board for administrative costs.

9. ACCRUED COMPENSATED ABSENCES

Annual leave accrues at various rates according to the length of continuous employment. The amount earned is based on actual hours worked. The maximum annual leave which may be accumulated ranges from 24 to 42 days, depending on length of employment. Upon separation from state employment, employees will receive a lump-sum payment for earned but unused annual leave at the hourly rate of pay for the employee's grade and step.

10. INTERFUND RECEIVABLES AND PAYABLES

Interfund receivables and payables at October 31, 1994, were as follows:

	Receivable	Payable
Operating Fund	$ 13,218	$ --
Water Bank Fund	--	13,218
	$ 13,218	$ 13,218

11. PAYROLL AND RELATED EXPENSES

Included in payroll and related expenses are costs associated with the District contracting with several individuals to perform the various tasks of diverting and measuring water flows. Salary and reimbursement rates for travel are negotiated by the Watermaster and approved by the District at the annual meeting.

Payroll related expenses include payroll taxes and benefits.

12. STORAGE SPACE RENTAL

The District rents an enclosed storage area for various equipment, vehicles and supplies. A portion of the space is sublet to U.S. Geological Survey in exchange for stream gauging services performed by the U.S.G.S.

13. PENSION PLAN

Substantially all full-time employees and certain part-time employees of the Water District are members in the Public Employee Retirement System of Idaho (the System), a cost-sharing, multiple employer plan established by the Legislature of the State of Idaho. The Water District's total payroll for all employees for 1994 was $50,823 of which $39,315 was covered payroll for employee members in the System. The System is a defined benefit plan requiring both member and employer contributions.

After five years of credited service, members become fully vested in retirement benefits earned to date. Members are eligible for retirement benefits upon attainment of the ages specified for their employment classification. For each year of credited service, the annual service retirement allowance is 1.833 percent or 2.150 percent (depending upon employee classification) of the average monthly salary for the highest consecutive 48 months. Effective October 1, 1994, the annual service retirement allowance rates changed to 1.917 percent or 2.225 percent depending upon employee classification of the average monthly salary for the budget consecutive 42 months. The eligibility and amount of allowance differs for early retirement, service retirement, vested retirement and disability retirement.

13. PENSION PLAN (Continued)

The System's funding policy provides for periodic employer contributions at actuarially determined rates, expressed as percentages of annual covered payroll, to accumulate sufficient assets to pay benefits when due. The employer and employee contribution rates as a percentage of salary are as follows:

	Contribution Rates at June 30, 1994		Contribution Rates Effective October 1, 1994	
Employee Group	Employer	Employee	Employer	Employee
General	10.63%	6.38%	11.61%	6.97%

Total contributions to the System for 1994 amounted to $4,714 by the Water District and $2,585 by members representing 11.99 percent and 6.58 percent of covered payroll, respectively. The Water District's 1994 actuarially determined contributions comprised .004 percent of the System's fiscal 1994 employer contributions of $146,159,926.

The pension benefit obligation is a standardized disclosure measure of the present value of pension benefits, adjusted for the effects of projected salary increased and any step-rate benefits estimated to be payable in the future as a result of employee service to date. The measure is the actuarial present value of credited projected benefits and is intended to help users assess the System's funding status on a going-concern basis, assess progress made in accumulating sufficient assets to pay benefits when due, and make comparisons among public employee retirement systems. The System's pension benefit obligation was determined as part of an actuarial valuation at June 30, 1994. As of that date, the System's unfunded pension benefit obligation was as follows (in millions):

Total pension benefit obligation	$ 3,455.7
Net assets available for benefits, at cost	2,500.8
Unfunded pension benefit obligation	$ 954.9

Ten year historical trend data is presented as additional information in the financial statements of the System for the year ended June 30, 1994. This additional data provides information about progress made by the System in accumulating sufficient assets to pay benefits when due.
