SUMMARY

Unregulated, or "natural" flow is a computed flow that represents the amount of water that would have passed a given location on the river had it not been affected by upstream reservoirs and diversions. The Snake River watersheds in Wyoming, and the projected natural flow at Heise, are usually selected to be representative of Snake River water supplies. The total anticipated water supply for a given year includes the water carried over, in the nine main reservoirs. The carryover storage on October 31, 1995 was 2,750,000 acre-feet.

On April 1, 1996 the Lewis Lake snow course was at the sixth highest level in the past 35 years. The April through September runoff forecast for Heise was 5,020,000 acre-feet. The actual runoff during this period was 5,165,400 acre-feet. The projected runoff for the Henrys Fork for the same time period was forecast to be 800,000 acre-feet. The actual runoff exceeded the projection by 20,000 acre-feet. The runoff from the various upper Snake River watersheds ranged from a low of 112% of average on the Henrys Fork to 130% of normal on the Teton River.

The projected runoff for 1996 required the release of one million acre-feet of water from Palisades and an additional 169,000 acre-feet out of Jackson between February 1 and May 11 to make reservoir space available to control flooding.

The natural flow peak computed at Heise for the spring runoff period normally is determined to be between 30,000 cfs and 40,000 cfs. The natural flow peak was unusual in 1996 in that there were two separate peaks that occurred about a month apart both of which exceeded 65,000 cfs. The first occurred during the third week of May and the second peak occurred during the third week of June. The corresponding actual peak flow at Heise during this period was 23,900 cfs.

No irrigation water rights were cut in Water District 1 prior to July 13 Milner time (MT). The deepest cut in priorities occurred on September 10 (MT) when the May 1, 1892 priority right was partially cut for one day. Consequently, storage use was moderate with a total of 1,280,000 acre-feet of storage being diverted for uses above Milner. Over one-half of the total storage used was diverted by Twin Falls Canal Company, North Side Canal Company and Reservoir District #2.

Because storage space holders recognized that they would need less supplemental storage than usual, there was

more storage water assigned to the rental pool. Storage space assignments exceeded 640,000 acre-feet of space. However, because of the above average natural flow available only 20,000 acre-feet of storage was leased by irrigators. In 1995, the legislature appropriated \$940,000 to be used for purchasing storage to recharge the Snake Plain Aquifer. From the money appropriated the Idaho Water Resource Board paid \$871,171.88 to Water District 1 to purchase water to supply approved managed recharge projects. The money not spent to acquire water in 1995 was held to purchase storage in future years. In 1995, the rental pool paid suppliers for 71,093 acre-feet of storage diverted for recharging the aquifer. In 1996, 33,314 acre-feet of storage was purchased for recharge. In 1996, an additional 228,000 acre-feet of storage was leased by the Bureau of Reclamation for flow augmentation on the lower Snake River as part of the federal salmon recovery efforts.

Each day a return flow credit is computed for the Minidoka Canals in fulfilling the historic interpretation of the Foster Decree. The watermaster applies this credit to offset storage use any time there are gains in the Minidoka to Milner reach of the river and storage is being used on the Minidoka project. The credits Minidoka received in 1996 totaled 23,256 acre-feet.

WATER DISTRICT 1 ANNUAL MEETING

Title 42, Chapter 6 of the Idaho Code provides the legal mechanism by which the use of water can be regulated. The first step in this process is for the director of the Department of Water Resources to create a water district. Each year it is the responsibility of the water users within the district to meet, as provided by law, to elect a watermaster, set the budget for the ensuing year, and pass such resolutions as are necessary and helpful in assuring an orderly and equitable distribution system. The results of the actions taken by water users of Water District 1 at their annual meeting are summarized as follows:

The annual meeting of Water District 1 was held on March 5, 1996, in Idaho Falls, Idaho. Ronald D. Carlson was elected the watermaster for the ensuing year.

The following people were elected as members of the Committee of Nine:

Don Kramer, Chairman; Dell Raybould, Vice-Chairman; Claude Storer, Paul Berggren, DeWitt Moss, Dale Rockwood, James Siddoway, Don Hale, and Leonard Beck.

Alternates: Stan Clark and Wesley Goff.

Advisory members: Vince Alberti, Secretary; Richard Oneida, James Bright, Larry Moore, Jerrold Gregg (B.O.R.), Gordon W. Fassett (Wyoming State Engineer), John Rosholt, Roger Ling, and Ray Rigby.

The principle resolutions adopted at the annual meeting were as follows:

1. BE IT RESOLVED that the watermaster continue to apply the best available methods and technology to assure: accurate deliveries of natural flow and stored water, consistent regulation procedures, the availability of water supply and diversion records to the water users, and that all water users are assessed for water deliveries on a timely, accurate and equitable basis, and the preparation of the annual watermaster's report required by Idaho Code §42-606.

BE IT FURTHER RESOLVED that:

2. The watermaster will investigate ways to expand and maintain automation where it can effectively improve water management, reduce personnel costs, travel costs, or result in cost or water savings for Snake River water users, or assure better and more current data.

3. The water users of Water District 1 continue the cooperative program with the Idaho Department of Water Resources (IDWR) as outlined in the Memorandum of Understanding dated March 2, 1993, previously approved by the Committee of Nine and the IDWR, and signed by the chairman of the Committee of Nine and the director of the Department of Water Resources, a copy of which agreement is attached hereto as exhibit A and made a part hereof as if set out at length herein.
4. Ronald D. Carlson be re-elected watermaster for the ensuing year, and be authorized to hire a full-time staff of a deputy, two assistants, a secretary, a data specialist, and such other assistants as provided by the adopted budget. The watermaster may hire additional assistants as authorized in Idaho Code § 42-609 in an emergency.
5. Dell Raybould be elected Water District 1 Treasurer and his annual compensation set by the Committee of Nine, but not to exceed the \$2,000 provided in the 1996 water district budget.
6. The duties of the watermaster and treasurer shall begin on this date and continue for a period of one full year.
7. The budget for Water District 1 for the 1996 year beginning November 1, 1995 be as follows:

1996 WATER DISTRICT BUDGET

HYDROGRAPHERS

Teton Basin	1,000 hrs. (+ mi.)	\$ 8,000
Idaho Falls	800 hrs. (+ mi.)	4,500
Lower Valley	400 hrs. (+ mi.)	5,000
Henry's Fork	1,800 hrs. (inc. mil)	22,000
Teton River	520 hrs. (+ mi.)	<u>4,500</u>

\$ 44,000

RIVER RIDERS

Rigby & Heise Div.	1,200 hrs. (+ mi.)	\$ 6,500
Blackfoot Division	600 hrs. (+ mi.)	3,000
Swan Valley	480 hrs. (+ mi.)	5,500
Upper Falls River	250 hrs. (+ mi.)	1,000
Willow Creek	5 mth @ \$ 550 (inc. mi.)	3,200
Idaho Falls	6 mth @ \$ 150 (inc. mi.)	900
Milner	12 mth @ \$ 30 (inc. mi.)	<u>360</u>

\$ 20,460

PROGRAM BUDGETS

Automation Expansion	\$ 15,000
Hydromet Maintenance	35,000
Streamgaging	150,000
Studies	<u>4,000</u>

\$ 204,000

EQUIPMENT BUDGET

Office Equipment	\$ 1,000
Computers, Software, Etc.	7,700
Telephone	<u>600</u>

\$ 9,300

PERSONNEL BUDGET

Retirement	\$ 5,000
Social Security	5,000
Mileage	16,000
State Insurance Fund	3,500
Employment Insurance	500
Part-time Help	5,000
Hydrographer Expenses	1,000
Treasurer	<u>2,000</u>

\$ 38,000

MISCELLANEOUS BUDGET

IWUA	\$ 1,000
Water Safety	1,000
Supplies, Phone, Copying	2,000
Audit	5,000
Meetings	3,500
Legal Fees	15,000
Committee of Nine	10,000
Postage	<u>1,500</u>

\$ 39,000

TOTAL WATER DISTRICT BUDGET

\$ 992,760

UPPER VALLEY

Consultants & Atty. - Resolution 20	<u>\$100,000</u>

TOTAL BUDGET WITH UPPER VALLEY FEES

\$1,092,760

8. BE IT RESOLVED that the watermaster is hereby authorized to acquire, hold and dispose of such real and personal property, equipment and facilities in the name of the water district as necessary for the proper distribution of water and shall provide that all such real and personal property shall remain in the custody of the watermaster and the watermaster's successor.

9. WHEREAS, it is the watermaster's responsibility to assure the proper delivery of both natural flow and storage supplies to all water users, and

WHEREAS, the normal district cost of delivering water to many water users is greater than their normal assessments would be based upon their total season use of water;

NOW, THEREFORE, BE IT RESOLVED that the watermaster of Water District 1 is hereby authorized to assess a \$20.00 minimum charge for every diversion within his jurisdiction.

10. WHEREAS, the water users of Water District 1 meeting in regular annual session find it necessary to adopt certain "on-going" resolutions to direct the watermaster and the treasurer of the district in certain aspects of district operations;

NOW, THEREFORE, BE IT RESOLVED that the Water District 1 budget prepared pursuant to Idaho Code § 42-615, and adopted in resolution no. 7 at this Water District 1 annual meeting, shall become the basis for the official billing of the amount of said budget for the succeeding year to the respective water users, using the actual deliveries for the past irrigation season or seasons as the basis for said distribution of such billing to the individual water users, canal companies, and irrigation districts, and is hereby authorized to collect all of the amounts billed;

That the treasurer shall establish and maintain a general account and shall cause to be deposited all monies received pursuant to the billing and shall make all disbursements as necessary to conduct the business of administering and delivering the waters of the district;

That no ditch, canal company, or other water users shall have the right to demand and receive water, and the watermaster shall not deliver to such person until receipt of the amount due and payable from such user, and

That copies of the minutes of the annual meeting, the budget as approved, all resolutions approved, and the report

prepared in accordance with Idaho Code § 42-615, shall be filed with the director of the Department of Water Resources and with the county auditors of Bonneville, Madison, Teton, and Fremont Counties in accordance with Idaho Code § 42-617.

11. WHEREAS, it is in the best interest of the water users of Water District 1 to account for all diversion which might adversely affect any prior natural flow or storage diversions;

BE IT RESOLVED that the watermaster shall be on duty and shall collect records of water diversions during the entire year.

12. BE IT FURTHER RESOLVED that the Committee of Nine be designated the advisory committee under Idaho Code § 42-605 and be continued with nine regular members. The members representing the Burley and Minidoka Irrigation projects are to be alternated between the two districts as they arrange. In addition, advisory members representing the Bureau of Reclamation, Teton Basin, AFRD #2 Canal, A & B Irrigation, the Wyoming State Engineer and a member from the Burley or Minidoka district, whichever is not currently represented on the regular committee be included.

13. WHEREAS, the members of the Committee of Nine, as the water district's advisory committee, are elected to represent the general interest of the water users;

NOW, THEREFORE, BE IT RESOLVED that the Committee of Nine is hereby authorized to:

- (a) Advise and consult with the watermaster and director in matters related to water resources management and water distribution.
- (b) Serve as the standing resolutions committee for all meetings of the water district.
- (c) Take those actions necessary to represent and protect the interests of the water users of the district and to expend such funds as necessary.
- (d) Employ such legal, engineering, technical and clerical services as may be deemed necessary for the Committee of Nine to fulfill its responsibilities to the water users of the district.
- (e) Make and execute such contracts and agreements as may be deemed necessary or convenient.

- (f) Do such other things as the committee shall deem to be beneficial to the water users of the district.

BE IT FURTHER RESOLVED that the Committee of Nine is hereby ratified as the local committee for the rental of stored water under Idaho Code § 42-1765.

14. WHEREAS, the Committee of Nine has been selected by the water users of Water District 1 to represent their collective interests;

BE IT RESOLVED that the Committee of Nine be authorized to expend funds held by the district for the following purposes:

- (1) Expenses of the district.
- (2) Improvements to the district's facilities, including a reasonable reserve for future improvements.
- (3) Educational projects designed to increase public awareness in the area of water distribution, water rights and water conservation.
- (4) Other public projects designed to assist in the adjudication, conservation or more efficient distribution of water.
- (5) Involvement in legislative, legal and agency deliberations on issues involving water quantity and quality which could affect water users of the water district, including naming Water District 1 as a petitioner in legal actions involving the ESA and the negotiation of federal claims and tribal claims filed in the SRBA, and further, to expend funds as are necessary that may exceed the budgeted amounts for such expenditures as then approved by the Committee of Nine.
- (6) To reimburse advisory committee members in accordance with the policy attached hereto as exhibit B.
- (7) Items authorized in resolution no. 13.

15. BE IT HEREBY RESOLVED that in accordance with the provisions of the March 2, 1993, Memorandum of Understanding with IDWR, the watermaster is hereby designated manager of the Rental Pool for the Committee of Nine.

16. WHEREAS, the watermaster from time to time finds that storage has been used in excess of entitlements, and

WHEREAS, these "excess uses" require an allocation of rental pool storage, and

WHEREAS, the collection of payment for these excess storage uses can be time-consuming and can result in delays in making lease payments to the rental pool lessors;

NOW, THEREFORE, BE IT RESOLVED that the watermaster is authorized to maintain \$100,000 of the funds generated through the administrative charge on water rentals for the purpose of paying lessors for excess uses prior to these amounts being collected.

BE IT FURTHER RESOLVED that all monies collected for administrative rental charges, plus all appropriate interest and penalties shall be first used to replace monies spent from this account.

17. WHEREAS, the water district's credentials committee has historically specified that "no person be elected to membership and service on the Committee of Nine and credentials committee unless he be a land owner and a water user...;"

IT IS THEREFORE RESOLVED that water user and land owner shall be defined as follows:

1. One who owns an irrigated farm that is comprised of more than twenty (20) irrigated acres that has valid surface water rights deliverable by the Water District 1 Watermaster.
 2. One who has received over 50 percent of his annual income during one or more of the past ten years from farming activities.
18. WHEREAS, it is in the interest of all water users to have the water rights within Water District 1 delivered according to the priority system, and

WHEREAS, the accounting system now used by Water District 1 requires that each diversion have assigned to it a specific list of decreed, licensed, and storage entitlements, and

WHEREAS, those diversions which have no record of water rights on file with the Department of Water Resources or the

water district office will necessarily be taking storage water any time a diversion takes place;

NOW, THEREFORE, BE IT RESOLVED that no diversion shall be allowed to divert water unless the proper list of rights for that diversion are found in the watermaster's records or proper arrangements have been made to procure an adequate water supply prior to the start of the irrigation season.

19. BE IT RESOLVED that the annual Water District 1 meeting shall hereafter be held on the first Tuesday of March of each year unless the director and Committee of Nine should find it necessary to change the meeting date, and

BE IT FURTHER RESOLVED that the water users of Water District 1 waive mailed notice of the annual meeting and direct publication of the meeting notice for two (2) consecutive weeks in an appropriate number of newspapers located throughout the district.

20. WHEREAS, the water users located above Blackfoot, excluding Aberdeen Springfield Canal Company (upper valley), have chosen to collectively retain legal counsel, and

WHEREAS, it is their desire to have the watermaster assess the upper valley water users for these legal services in proportion to their water use;

NOW, THEREFORE, BE IT RESOLVED this fifth day of March, 1996, that the watermaster hereby be authorized to assess canals located above Blackfoot (excluding Aberdeen Springfield Canal Company) for legal fees and other appropriate expenses associated with representing the collective interest of the upper valley.

BE IT FURTHER RESOLVED that such charges may not exceed the amount budgeted during the current year.

BE IT FURTHER RESOLVED that the district treasurer shall maintain said amounts in a separate account and that payment therefrom shall ONLY be made when authorized by the upper valley Committee of Nine representatives.

21. BE IT RESOLVED that the amendment to 8.2 of Water District 1 Rental Pool Rules and Regulations be approved as hereafter set out and transmitted to the Idaho Water Resource Board for approval.

8.2. A. The rental price for 1996 shall be \$2.95 per acre-foot rented for beneficial uses delivered above

Milner Dam. This price shall include the district's administrative charge of \$0.75 per acre-foot and the water board surcharge of \$0.20 per acre-foot.

- B. The Committee of Nine, being the designated rental pool committee of Water District 1, is charged with the responsibility of establishing the rental price, administrative charges, if any, to the district and the water board, and an accepted lease arrangement with any interested entity that may rent water for delivery below Milner Dam. Also the Committee of Nine shall determine the uses of any administrative charges that may accrue to the district on the above rentals.

22. INTERIM BUDGET

WHEREAS, Water District 1 changed its fiscal year to begin November 1 and end October 31 of each year, and

WHEREAS, the annual meeting of Water District 1 at which the annual budget is adopted is the first Tuesday in March, leaving the water district to operate for four months without a budget;

NOW, THEREFORE, BE IT RESOLVED by Water District 1 meeting in regular annual session, that the Committee of Nine be authorized to adopt a continuing budget for the district to operate under between November and the annual meeting.

BE IT FURTHER RESOLVED that the continuing budget approved by the Committee of Nine shall reasonably represent the budget resolution the Committee of Nine will propose to the water users at the next annual meeting.

23. WATER DISTRICT 1 POLICY POSITION

WHEREAS, there are currently many issues that potentially can change water distribution patterns and water supplies in Idaho, and

WHEREAS, water users are now being asked to fund experts and attorneys in preparation for negotiations and/or litigation, and

WHEREAS, the water users of Water District 1 and their representatives, the Committee of Nine, wish to have a clear representation of the position of Snake River irrigators,

and establish the following as the guiding principles in any and all negotiations and litigation:

1. Administration of water rights in SRBA must recognize traditional distribution and water management.
2. The zero flow at Milner standard, as established in the state water plan be recognized as the state's position, and that there can be no call for deliveries below Milner by downstream interests.
3. Releases past Milner must be consistent with state law and limited to annual arrangements approved by the Committee of Nine.
4. Any changes in upstream water rights that would allow water to be moved below Milner through provisions of state or federal law will be vigorously opposed by Snake River water users and the Committee of Nine.

NOW, THEREFORE, BE IT RESOLVED by the water users of Water District 1, that the Committee of Nine is authorized to allocate sufficient funds to protect and defend these principles in negotiations with the federal government and Indian tribes and in challenging and defending claims in the Snake River Basin Adjudication or other necessary litigation.

24. SUPPORT FOR IDAHO LEGISLATURES'S SALMON POLICY

WHEREAS, the Bonneville Power Administration contracted for and received a water management opportunities report for the Snake River Basin as prepared by Bookman-Edmonston Engineering, Inc. in July of 1994, and

WHEREAS, said report identifies alternatives to make water available for the benefit of Snake River endangered salmon which are in some instances based upon false assumptions, and

WHEREAS, it may be necessary for Snake River Basin water users in Idaho to confront the conclusions of said study in their effort to resist flush and drawdown proposals included in the 1995 Biological Opinion and Recovery Plan for endangered salmon;

NOW, THEREFORE, BE IT RESOLVED by the water users of Water District 1, meeting in annual session this fifth day of March, 1996, that the Committee of Nine continue to support

a legislative study overviewing the Bookman-Edmonston Report conclusions, and

BE IT FURTHER RESOLVED that the Committee of Nine support House Concurrent Resolution 37 to the end that state policy as to salmon recovery does not include either drawdown or flush, and

BE IT FURTHER RESOLVED that copies of this resolution be sent to Governor Phil Batt, members of the Idaho Congressional Delegation, the Pacific Northwest Power Planning Council, and the Resource and Conservation Committees of the Idaho Legislature.

25. WHEREAS, the recovery plan to restore endangered Snake River salmon and the current Biological Opinion require that the U.S. Bureau of Reclamation (BOR) release 427,000 acre-feet of water from the upper Snake River Basin each year, to be acquired from willing sellers and lessees, and pursuant to state law, and

WHEREAS, to facilitate these releases, the BOR has applied to the director of the Idaho Department of Water Resources to add additional beneficial uses and places of use to the water rights it holds legal title to in Snake River reservoirs, and

WHEREAS, the BOR has agreed to hold its applications in abeyance and secure water from willing sellers and lessees to meet the 427,000 acre-foot requirement through 1999, and

WHEREAS, it is in the best interest of the storage space holders and water users within Water District 1 to make water available to the BOR to meet the requirements of the Biological Opinion for the next four years, so as to avoid the time, money and energy that would be required to oppose the BOR's applications, and

WHEREAS, the BOR may not release water to satisfy the requirements of the Biological Opinion without authority under state law, and

WHEREAS, Idaho Code Sec. 42-1763B is currently being proposed to provide interim authority until the year 2000 so that rented water could be released for the intended purpose of augmenting flows during the migration of endangered Snake River salmon, and

WHEREAS, this legislation was the product of good faith negotiations between the BOR, irrigators, and others, and

WHEREAS, this legislation would provide an opportunity for necessary scientific studies to be conducted before the year 2000 regarding the benefits, if any, of the flow augmentation, and

WHEREAS, Snake River irrigators believe this legislation is the best alternative available at the current time;

NOW, THEREFORE, BE IT RESOLVED by the water users of Water District 1, meeting in regular annual session this fifth day of March, 1996, that the Committee of Nine SUPPORTS the enactment of Idaho Code Sec. 42-1763B.

BE IT FURTHER RESOLVED that this resolution be forwarded to the Idaho State Legislature and that copies of this resolution be forwarded to the germane committees of the House and the Senate, and to the governor of the state of Idaho.

26. ITCH STUDIES

WHEREAS, existing diversion moratoriums need to be continued until such time as ongoing studies are completed and the determination is made that additional water is available for appropriation, before the same is appropriated, and

WHEREAS, the state legislature is a vital partner in funding said studies;

NOW, THEREFORE, BE IT RESOLVED by the users of Water District 1, meeting in regular annual session this fifth day of March, 1996, in Idaho Falls, Idaho, that Water District 1 support continued funding.

BE IT FURTHER RESOLVED that copies of this resolution be sent to Governor Phil Batt, the chairman of the House and Senate Resources Committees of the Idaho State Legislature, the Idaho Water Users Association, the officials of the Idaho Department of Water Resources, the officers of organized groundwater organizations, and the directors of the Twin Falls and North Side Canal Companies.

27. NEZ PERCE AND FEDERAL SNAKE RIVER BASIN ADJUDICATION CLAIMS

WHEREAS, the users of Water District 1 have been represented by the Committee of Nine to work with certain Boise Valley water organizations in an attempt to settle the substantial claims filed by the Nez Perce Indian Tribes and United States agencies in the Snake River Basin Adjudication for

substantial and sometimes exorbitant amounts of water in the lower Snake River, and

WHEREAS, it is necessary that the representatives of Water District 1 and other irrigation entities proceed to develop studies and data to substantiate objections to said claims on behalf of said users, and

WHEREAS, the state of Idaho is also involved in said negotiations on behalf of its citizens;

NOW, THEREFORE, BE IT RESOLVED that the state attorney general and the Committee of Nine be encouraged to continue to participate in the negotiations for settlement of the Nez Perce and federal claims on the lower Snake River in Idaho;

AND BE IT FURTHER RESOLVED that the Committee of Nine be authorized to take such actions as necessary to protect water rights and historical uses of water in Water District 1 in the Snake River Basin Adjudication or the eventual litigation thereof, if said negotiation should fail.

BE IT FURTHER RESOLVED that copies of this resolution be sent to Governor Phil Batt, the Idaho State Attorney General, the Idaho Water Resource Board, the Boise Board of Control, the Idaho Water Users Association, and the Pacific Northwest Power Planning Council.

28. SHELLEY FEDERAL ENERGY REGULATORY COMMISSION PROJECT

WHEREAS, the city of Idaho Falls has filed an application with the Federal Energy Regulatory Commission to license the Shelley Hydroelectric Project near Shelley, Idaho, and

WHEREAS, Water District 1 has intervened in said proceeding through the Committee of Nine to resist the project proposal that would inundate the district's natural weir in Snake River near Shelley, Idaho, and

WHEREAS, to date the city of Idaho Falls has not seen fit to negotiate a replacement for said weir with Water District 1;

NOW, THEREFORE, BE IT RESOLVED by the users of Water District 1, meeting in regular annual session this fifth day of March, 1996, in Idaho Falls, Idaho, that the district continue to oppose the construction of the Shelley Hydroelectric Project until a substitute or replacement weir has been proposed and approved by Water District 1.

BE IT FURTHER RESOLVED that copies of this resolution be sent to Governor Phil Batt, members of the Idaho Congressional Delegation, the Pacific Northwest Power Planning Council, and the Resource and Appropriations Committees of the Idaho Legislature.

29. WATER MEASUREMENT

WHEREAS, the 1994 legislature adopted a water measurement law in Chapter 7 of Title 42, and

WHEREAS, Idaho Department of Water Resources has developed a test basin for implementation of the measurement law, and

WHEREAS, Idaho Department of Water Resources proposes the adoption of a water measurement district that would encompass those areas not now in a duly formed water district or other political subdivision of the state or a water delivery entity charged with the measurement of water diversions within its jurisdiction, and

WHEREAS, water diversion and supply data is needed to assess present uses and diversions from existing and average annual supplies;

NOW, THEREFORE, BE IT RESOLVED by the users of Water District 1, meeting in regular annual session this fifth day of March, 1996, in Idaho Falls, Idaho, that the Water District 1 encourage the full implementation of the water measurement law in the state of Idaho to obtain the data necessary to complete studies as to Idaho's dependable supplies of water.

BE IT FURTHER RESOLVED that copies of this resolution be sent to Governor Phil Batt, members of the Idaho Congressional Delegation, the Pacific Northwest Power Planning Council, and the Resource and Appropriations Committees of the Idaho Legislature.

30. PUBLIC TRUST LEGISLATION - HOUSE BILL 794

WHEREAS, certain pronouncements of the Idaho Supreme Court may have unintentionally expanded the public trust doctrine beyond its traditional application of protecting the beds of navigable waters held in trust by the state of Idaho, and

WHEREAS, the doctrine could have dire consequences for Idaho water users if expanded to water rights and supplies, possibly jeopardizing the finality of decrees entered on the Snake River Basin Adjudication;

NOW, THEREFORE, BE IT RESOLVED by the water users of Water District 1 meeting in regular annual session this fifth day of March, 1996, in Idaho Falls, Idaho, that House Bill 794 be supported to define and limit the public trust doctrine in Idaho.

BE IT FURTHER RESOLVED that copies of this resolution be sent to Governor Phil Batt, the legislative leadership, and the Resource and Conservation Committees of the Idaho Legislature.

EXHIBIT A

MEMORANDUM OF UNDERSTANDING

This memorandum of understanding is entered into by and between the Director of the Department of Water Resources, (hereinafter called the Director) and the water users of Water District No. 1, Upper Snake River, (hereinafter called Water District No. 1) acting through the Water District advisory committee known as the Committee of Nine.

WHEREAS, the statutes of the State of Idaho provide for the Director to have direction and control of the distribution of the waters of the state to those holding valid rights to the use thereto; and

WHEREAS, the Water District No. 1 authorized the Committee of Nine, as advisors to, and elected representatives of the water district, by resolution duly adopted at the March 2, 1993, annual meeting of the water users of the district to enter this memorandum of understanding continuing a cooperative program with the Director to provide watermaster services for Water District No. 1 and

WHEREAS, the Committee of Nine will, among other things, serve as advisors to the Director and the watermaster in matters relating to the distribution of the natural flow and stored water within the district:

NOW, THEREFORE, the Director agrees to provide the following services to Water District No. 1, effective upon the execution of this memorandum of understanding and to continue to provide the services from year-to-year as herein provided upon election of the regional manager of the Department as watermaster and the adoption of a budget by the water users at the annual water district meeting authorizing expenditures in accordance with the purposes of this memorandum of understanding:

- 1) To provide watermaster services to Water District No. 1 for the period from the effective date of this memorandum until the end of any subsequent water district year as agreed to by the water users of Water District No. 1 at their annual meeting and the director of the Department. Such watermaster services will be provided under the direction of the regional manager of the Department's Eastern Region consistent with the provisions of Title 42, Idaho Code.

- 2) To provide the equivalent of 2/3 of a person year of the Regional manager as watermaster throughout the Water District year and to provide any additional part time

or full time employees as necessary for the water distribution operations of Water District No. 1 in accordance with its adopted budget.

3) To provide office space as necessary for operation of Water District No. 1 and to provide Department vehicles for use by full-time employees of the Department, to conduct Water District business, and to share the use of other Department equipment and facilities as are necessary to equitably distribute the waters to the users within Water District No. 1.

WATER DISTRICT NO. 1 agrees as follows:

1) To pay the Department, on an advance basis, sufficient funds to cover the costs of operations incurred in providing watermaster services to Water District No. 1 provided, however, that reimbursement for the watermaster shall not exceed 2/3 of the personnel costs of the regional manager and provided further that all other costs incurred in conducting Water District No. 1 business will be paid in full. Indirect costs will be paid at the rate approved by the Department of the Interior Inspector General and current at the time of the water district annual meeting. The approved indirect rate shall be reduced in recognition of the Department's statutory responsibility to supervise water distribution by subtracting in the indirect calculation any personnel costs included for the Director and the Administrator of the Water Management Division.

Mileage and per diem costs will be based upon the rate provided by state law for state employees.

The Department will credit the District for a portion of the District's expenditures to the U.S. Geological Survey for the cooperative streamgaging program. The amount credited each year will be one-half (1/2) the amount the district pays for that year to the U.S. Geological Survey for operation of certain streamgages the Director determines are needed for data collection purposes needed by the Department other than and in addition to the District's water distribution data needs.

THE PARTIES mutually agree that:

1) The regional manager and any other persons directly employed by the Department as classified state employees, performing duties on behalf of Water District No. 1 under this memorandum will only perform duties necessary to:

a) Deliver and account for distribution of natural flow and stored water within the District,

b) Provide assistance to the Committee of Nine in operating the local rental pool. This assistance will include accepting applications to put water into the pool and to rent water from the pool, receipting and depositing funds associated with the bank, providing information on the water in the bank and rentals therefrom. The Committee of Nine, or its designated subcommittee will determine the water leases and rentals and approve all disbursements of rental pool money.

c) Prepare reports and proposed budgets as required by Title 42, Idaho Code.

d) Provide technical assistance and information to the Committee of Nine and the Department relative to the water distribution and water banking duties of the watermaster.

The Committee of Nine will make other arrangements for representation and management of any other interests of the water users within the Water District as directed at the annual meeting.

2) The director of the Department and the chairman of the Committee of Nine shall consult annually prior to the end of the water district's fiscal year concerning the continuation of this memorandum and any need for modification of it.

3) This memorandum of understanding will continue from year to year and can be amended or terminated at any time by agreement of the director of the Department and Water District No. 1, on the recommendation of the Committee of Nine.

4) This memorandum of understanding supersedes and replaces the memorandum of understanding dated March 3-4, 1979.

5) Nothing in this agreement will act to change, modify, or release either party of any obligation or responsibility otherwise provided by contract or by law.

R. KEITH HIGGINSON
Director
Department of Water Resources

EXHIBIT B

COMMITTEE OF NINE

MEETING REIMBURSEMENT RULES

1. All Committee of Nine expenses must be approved by chairman.
2. All requests for reimbursement must be on an approved form with copies of receipts attached.
3. Reimbursement is intended only for official Committee of Nine and sub-committee meetings called by chairman or vice-chairman, or other meetings approved in advance by Committee of Nine.
4. Reimbursement shall include per diem (\$50/day), mileage (\$0.28/mi.), meals, travel, and room (if necessary).

Because of extra duties outside scheduled meetings, the chairman shall receive an additional \$25/day for each meeting.

5. Reimbursement is intended for Committee of Nine members and appointed officers who contribute their time. If the Committee of Nine approves per diem and reimbursement for a member who is being paid for his time from a different source, reimbursement shall be made to the employer.
6. Advisors and/or alternates to regular Committee of Nine meetings shall not be authorized per diem and reimbursement for regular Committee of Nine meetings but shall be reimbursed if they serve on a special Committee of Nine sub-committee, or attend other meetings approved by the Committee of Nine.

WATER DISTRICT 1

RENTAL POOL PROCEDURES

RULE 1. AUTHORITY AND STATEMENT OF PURPOSE.

- 1.1. These procedures have been adopted by the Committee of Nine pursuant to Section 42-1765, Idaho Code, to assure the orderly operation of the Water District 1 Rental Pool by the Committee of Nine of Water District 1. Under no circumstances shall these procedures be interpreted or construed to limit the authority of the director of the Department of Water Resources, the Water Resource Board, the Committee of Nine, or the Snake River Watermaster in discharging their duties as set forth in the statutes of the state of Idaho and the rules and the regulations promulgated thereto.
- 1.2. It is the purpose of these procedures to:
 - A. Provide the procedures by which the Committee of Nine, upon being appointed a local committee by the Water Resource Board, shall facilitate the rental of stored water made available to the committee for that purpose.
 - B. Provide the process, consistent with the Idaho Code and the rules of the Idaho Water Resource Board, by which stored water supplies may be made available for a specified period of time and for a particular beneficial use to water users who need additional water.
 - C. Provide incentives for those owning reservoir space and having stored water which may be, from time to time, surplus to their needs, to make such space and water accruing thereto, available to the rental pool for other users and uses. In no case will water from the rental pool be used to maintain minimum flows greater than those established pursuant to state law.
 - D. Provide a recognized system through which stored water supplies may be located, identified, advertised, and subsequently leased and rented for specific times, purposes, and uses.

- E. Provide payment to Water District 1 for services rendered in the operation of the rental pool; to use said revenue to make improvements in distribution facilities; to aid in improving efficiency in the distribution of water within Water District 1; comply with the local public interest; and is consistent with the conservation of water resources within the state of Idaho.
- 1.3. Available water supplies may be leased to the rental pool by the lessor and rented from the rental pool by the committee for any beneficial purpose recognized by the laws of the state of Idaho, provided other water rights are not injured, or irrigators are not deprived of supplemental storage by renting water for uses other than irrigation.

RULE 2. DEFINITIONS.

- 2.1. **ACRE-FOOT** - a volume of water sufficient to cover one acre of land one foot deep and is equal to 43,560 cubic feet.
- 2.2. **ANNUAL** - refers to the period between annual meetings of Water District 1, and normally will be a period starting the first Tuesday in March and ending on the first Monday of March of the succeeding year.
- 2.3. **BANK** - means the Water Supply Bank created pursuant to Idaho Code, Section 42-1761.
- 2.4. **BOARD** - means the Idaho Water Resource Board.
- 2.5. **BUREAU** - means the Bureau of Reclamation, Department of the Interior, United States of America, sometimes known as the BOR.
- 2.6. **COMMITTEE** - means the Committee of Nine as appointed by the water users of Water District 1.
- 2.7. **DEPARTMENT** - means the Idaho Department of Water Resources or IDWR.
- 2.8. **DIRECTOR** - means the director of the IDWR.
- 2.9. **DISTRICT** - means Snake River Water District 1 of the state of Idaho.

- 2.10. **LATE SEASON RENTAL** - means water rented from the rental pool for release for non-irrigation beneficial uses after October 31 of one calendar year and before June 15 of the following year.
- 2.11. **LEASE** - a written contract by which a storage water right accruing to a specified storage by a consenting contract holder is made available to the committee for rental from the rental pool.
- 2.12. **LESSEE** - means any person renting water or space from the rental pool.
- 2.13. **LESSOR** - is any person leasing space or water to the rental pool.
- 2.14. **MILNER** - means Milner Dam or the lowest diversion in Water District 1.
- 2.15. **PERSON** - means any individual, corporation, partnership, irrigation district, canal company, or other political subdivision or governmental agency.
- 2.16. **LONG-TERM LEASE** - means a contract with the committee for an improved priority within a given priority category to rent water from space leased to the rental pool in future years.
- 2.17. **RENT or RENTAL** - means a written storage contract for the exclusive use of stored water leased to the committee for a determinate period for a specified price.
- 2.18. **RENTER** - means the person renting water from the committee or the lessee.
- 2.19. **RENTAL POOL** - refers to the water bank activities administered by a local committee appointed by the Water Resources Board.
- 2.20. **RENTAL POOL COMMITTEE** - A sub-committee appointed by the Committee of Nine composed of the Water District 1 watermaster, superintendent of the Minidoka Project of the bureau, and three members of the Committee of Nine.
- 2.21. **SPACE** - means all or any portion of the active impoundment volume of a reservoir measured in acre-feet.
- 2.22. **STORAGE** - means the portion of the available space that is storing water.

- 2.23. **WATERMASTER** - means the watermaster of Water District 1.
- 2.24. **PAID-OUT** - means the cost of construction under a space holder's contract with the bureau, has been paid in full, or for other reasons, there are no remaining obligations to comply with the reporting requirements of the Reclamation Reform Act (RRA) of 1982.

RULE 3. GENERAL PROCEDURES.

- 3.1. It is the policy of the water users of Water District 1 and the committee to operate the rental pool under the priorities hereinafter stated for the maximum beneficial use of available water supplies.
- 3.2. A primary purpose in the operation of the rental pool will be to benefit the agricultural water users within Water District 1. These procedures are designed to assure that stored water leased to the rental pool from federal and other private reservoirs within Water District 1 is rented, or otherwise allocated, in a manner that protects other water rights and assures that water is first made available to meet the irrigation requirements of irrigation water users within Water District 1, before other uses are considered.
- 3.3. The operation of the rental pool shall in no way recognize any obligation to maintain flows below Milner Dam or to assure the minimum stream flows established at the USGS gaging station on the Snake River near Murphy, unless specific arrangements to do so are made under these procedures.
- 3.4. The operation of the rental pool shall be consistent with the statutes creating the Water Supply Bank, the rules and regulations of the board, and the provisions of the space holder's contracts with the United States.
- 3.5. Storage water is accepted by, or leased to, the rental pool on a contingency basis. Payments to the lessor will be made to the extent rental monies are received by Water District 1 in trust for the committee pursuant to these rules.
- 3.6. The space of storage water leased to the rental pool that is rented for uses below Milner shall be the last space to fill in the ensuing year.

- 3.7. No storage water leased to the rental pool shall be rented for uses below Milner without the expressed written consent of the lessor.
- 3.8. It is the policy of the Committee of Nine, in operating the rental pool to facilitate annual leases and rentals, to base all transactions on water stored (storage) rather than reservoir space.
- 3.9. Any lessor, lessee, or applicant aggrieved by a decision of the rental pool committee on matters related to the operations of the rental pool may request a hearing before the Committee of Nine within fifteen (15) days after receiving notice in writing of the decision. After hearing the grievance and after review by the Committee of Nine, a decision will be made by the Committee of Nine in writing, setting forth the reasons for its decision, and said review decision must be signed by a majority of the Committee of Nine. The decision of the Committee of Nine may be appealed to the board.
- 3.10. All leases of stored water within Water District 1, unless the associated change in point of diversion and place of use is being initiated through the statutory transfer process, (with the exception of other approved water rental pools within the district and, specifically, those exclusions applying to the Shoshone-Bannock Indian tribes) shall be transacted through the Water District 1 Rental Pool, unless the transaction is an internal rental within the distribution system of a contracting entity.

RULE 4. MANAGEMENT.

- 4.1. The rental pool shall be operated pursuant to Idaho Code, Section 42-1761 to 42-1766, with all policies being established through the approval of the Committee of Nine.
- 4.2. A sub-committee, composed of the watermaster, the superintendent of the BOR's Minidoka Project, and three members of the Committee of Nine appointed by the chairman, shall have the following general responsibilities:
 - A. To determine general policies regarding annual storage leases which may not be covered by the adopted procedures of the Committee of Nine.

- B. To assist the watermaster in the allocation of water from the rental pool when conflicts arise.
 - C. To advise the Committee of Nine on water banking activities.
 - D. To set policies for the disbursement of funds generated by the rental pool.
- 4.3. The watermaster shall act as the manager of the rental pool. His authority shall include accepting water or space into the rental pool, executing rental agreements on behalf of the Committee of Nine, disbursing and investing funds generated through the rental of stored water, and distribution of water supplies from the rental pool. All funds invested shall be considered public funds for investment purposes pursuant to the Public Depository Law, Chapter 1, Title 57, Idaho Code.

RULE 5. LEASES.

- 5.1. Any person who owns or controls space or storage in a reservoir located in Water District 1 may seek to lease any portion of his space or accrued storage to the rental pool.
- 5.2. Leases of space and water accruing therein will be identified by reservoir. If no designation is made by a lessor holding space in more than one reservoir, it shall be understood that American Falls space will be designated before Jackson space and Jackson space will be designated before Palisades space.
- 5.3. Storage leases are subject to the approval of the rental pool committee. Reservoir space submitted for lease to the rental pool may be rejected in whole or in part by the rental pool committee, or they may place special conditions on usage, allocation, and price, if, in the judgment of the committee, accepting said water will not be in the best interest of the rental pool or the water users of Water District 1.
- 5.4. Leases of storage to the committee shall be on a priority basis as set forth in rule 6.
- 5.5. Leases of storage to the committee shall be in writing on forms provided by the watermaster and shall bear the date they were received in the watermaster's office in Idaho Falls.

- 5.6. Leases of reservoir space may be made for periods of up to twenty (20) years. Any space leased for periods in excess of two (2) years shall be subject to rule 9 of these procedures.
- 5.7. All space leased to the committee shall be under the control of the watermaster and the rental pool committee for the duration of the lease.
- 5.8. Any lease executed by the committee at the direction of the director or the board, cannot be for a rental charge less than that charged by the local committee in any year of said lease.
- 5.9. The lessor (contract holder) is responsible for paying lessor's continuing obligations to the Bureau of Reclamation for construction or annual operation and maintenance.
- 5.10. Subject to the provisions of paragraph 7.5 and 7.6, any lease of space or storage leased to the rental pool, or any portion thereof, which has not been rented by the committee prior to November 1 of that year shall be terminated, the lease of the space to the rental pool shall be null and void, and the storage water not rented shall be returned to the credit of the lessor.

RULE 6. LESSOR PRIORITIES.

- 6.1. Any person holding space in a federal or private reservoir who leases storage to the rental pool for annual rental prior to June 1 of any year shall share proportionally with other lessors leasing storage to the rental pool prior to that date. Long-term leases shall be considered to be in this time frame.
- 6.2. Any person holding space in a federal or private reservoir who leases storage to the rental pool for annual rental after June 1 and before July 1 of any year shall share proportionally with other lessors leasing storage to the rental pool within this time frame.
- 6.3. Any person holding space in a federal or private reservoir who leases storage to the rental pool for annual rental after July 1 of any year shall receive his share of the proceeds for the rental of all or part of the water rented which was made available after July 1 of that year on a "first come" basis, after water from space leased prior to July 1 has been rented.

- 6.4. All storage leased to the rental pool before June 1 of any year will be rented before any storage leased after June 1 is rented. All storage leased to the rental pool after June 1 and before July 1 will be rented before any storage leased after July 1 is rented.
- 6.5. Whenever a request to lease storage to the rental pool is made for an annual lease, it will be assumed that it is the intention of the lessor to assign sufficient space to yield the designated amount of storage.
- 6.6. If a spaceholder should choose to lease all of his space to the rental pool, the "yield" of that space shall be determined by the watermaster after calculating the percentage of fill of that leased space in that particular reservoir, minus evaporation, and any fill restrictions associated with restrictions arising from rule 3.6 of these procedures.

RULE 7. LESSEE PRIORITIES.

- 7.1. Any storage available through the rental pool prior to June 1 for annual use shall be rented prior to June 1 on a priority basis as hereinafter provided. Any storage available after June 1 and before July 1 for annual use shall be rented prior to July 1 on a priority basis as hereinafter provided. The priority within each priority group hereinafter provided within the above time frames and after July 1 shall be determined by the date of the lessee's rental agreement and upon payment in the office of the watermaster within the above time frames.
 - A. The first priority in renting water from the committee shall be given to those lessees owning space in any of the bureau's federal storage reservoirs in the district for storage prior to 1979, and used for irrigation of lands in the district for use on said lands; or, lessees eligible for mitigation under the 1990 Fort Hall Indian Water Rights Agreement and who are stockholders in the Mitigation Corporation that have contracted with the BOR for mitigation water, and only to the extent mitigation water is unavailable through sources made available through the Mitigation Corporation.
 - B. The second priority in renting water from the rental pool shall be given to lessees for other irrigation

uses above Milner, with preference going to lands for which storage was rented prior to 1992.

- C. The third priority in acquiring stored water from the rental pool shall be given to other beneficial uses in the order in which their requests are received.

- 7.2. Priority among each priority class listed above shall be determined by the date on which the water user's contract and payment is received at the office of the watermaster in Idaho Falls; the earlier in the year the executed lease is received by the watermaster, the higher the priority in the priority group the entity will receive. Long-term leases shall be in the priorities outlined in rule 7.1, as initiated in rule 9.4. The first lessee who has entered into a long-term rental agreement and has rented storage water prior to 1992 shall have the earliest priority for rental pool supplies within his priority class. All subsequent long-term rental agreements shall have the same relative priorities in their appropriate priority group as their rental agreement does to other long-term rental agreements in the same priority group.
- 7.3. Any person having initiated an annual contract for stored water may request water in subsequent years by confirming, in writing, that all of the information on the original rental agreement is true and correct, and by identifying the amount of water he wishes to rent. The priority, in this case, will be the date on which payment is received by the watermaster.
- 7.4. Space leased to the rental pool for more than one year from reservoirs with paid-out federal contracts shall be first reserved for allocation for irrigation purposes. Any person renting water from such space for irrigation shall be subject to all applicable water laws of the state of Idaho but shall not as a result be subject to the Federal Reclamation Reform Act of 1982 (RRA). If sufficient space is not available in paid-out reservoirs and stored water is rented from a reservoir with remaining federal repayment contracts, then anyone renting such water may be responsible for compliance with the limitations and reporting requirements of the RRA, should the Bureau of Reclamation determine RRA compliance is required.
- 7.5. The watermaster will use his best efforts to assure that unauthorized diversions of water do not occur. In the

case unauthorized diversions do occur, any water diverted within Water District 1 will be charged by the watermaster as storage used. Any such unauthorized use of water shall be replaced from available water bank supplies at a cost to the user equal to the established water bank price, plus an additional seventy-five cents (\$0.75) to cover increased administrative costs. The administrative costs may be waived by the watermaster if, in his judgment, such unauthorized use resulted from measurement or accounting errors. If there is insufficient storage available in the rental pool during the current year, then the obligation of the renter to rent water to replace the stored water used without authorization shall continue to the following year.

- 7.6. Water rented and unused for irrigation purposes may be leased to the rental pool by September 1, for rental by the rental pool under the same conditions that said water was originally leased to the rental pool. Any proceeds from the re-rent of said water by the rental pool shall be refunded to the original renter of said water in the same proportion the rental proceeds are remitted to other lessors of water to the rental pool. Water rented from the rental pool and not rented by the end of the irrigation season, or by March 15 of the following year for non-agricultural uses, shall be returned to the lessor or lessors as carry-over storage of lessors, and all rights to said water leased from the rental pool by the renter shall be deemed to be terminated, except that renters who own reservoir space may carry over water rented from the rental pool in their space for use the following year, unless lost through the subsequent filling of that space.
- 7.7. No water may be rented after November 1 of each year without the lessor's approval.

RULE 8. LEASE PAYMENTS AND WATER COSTS.

- 8.1. The lease price of the storage rented from the rental pool shall be set by the Committee of Nine each year.
- 8.2. A. The rental price for 1996 shall be \$2.95 per acre-foot rented for beneficial uses delivered above Milner Dam. This price shall include the district's administrative charge of \$0.75 per acre-foot and the water board surcharge of \$0.20 per acre-foot.

- B. The price for water delivered below Milner Dam shall be \$10.50 per acre-foot, and is established for a four year period, 1996-1999, in an effort to accommodate the Bureau of Reclamation (BOR), to the extent possible, in acquiring water to aid in the collection of data related to the migration and survival of Snake River salmon species. During the term of the biological opinion any water available for use below Milner shall first be made available to the BOR. Of the \$10.50 rental price, \$7.00 per acre-foot shall go to those supplying the water released past Milner. The remainder of the rental price shall be allocated as follows: \$0.75 per acre-foot administrative charge retained by Water District 1, \$0.70 per acre-foot surcharge assessed by the Idaho Water Resource Board, and the remaining \$2.05 per acre-foot shall be held by the district for the primary purpose of securing up to 250,000 acre-feet of water in 1997, 1998 or 1999, if a higher price is required to secure water to meet the BOR requirements in one or more of these years. Should any portion of the funds held by the district not be needed to secure water to meet the BOR request(s), such funds shall be available for the general improvements of the district, specifically: streamgaging, automation and hydrologic investigations in Water District 1.
- 8.3. Lease payments to the lessors shall be made in accordance with the priorities of rule 6 and shall be based upon the annual report of the Snake River watermaster. Payments to the lessors shall be considered due and payable once the watermaster has calculated the actual water used within Water District 1 for the annual watermaster's report and the rental payments have been received.
- 8.4. The rental pool committee may authorize the watermaster to make timely partial payments to the lessors based upon provisional data when, in the judgment of the rental pool committee, such partial payments can be made with reasonable certainty.
- 8.5. All rental monies not paid to lessor's under rule 8.4 above shall be maintained in a separate interest-bearing account with accrued interest being distributed on a pro-rata basis at the time that final payments are made. The water district shall be entitled to use all rental funds on an as needed basis provided the accrual of interest due suppliers is not affected. Payments for water rented from the rental pool and distributed after

October 31 shall be computed on a pro-rata basis for all unrestricted water supplied pursuant to the priorities in rule 6.

RULE 9. LONG-TERM RENTAL AGREEMENTS.

- 9.1. The Committee of Nine may arrange rentals of storage space for periods not to exceed twenty (20) years. Such long-term rentals will be negotiated on a case-by-case basis and may be supplied from anticipated future annual space/water leases to the rental pool or from specific long-term space assignments, or a combination of the two.
- 9.2. Contracts for long-term rentals shall be subject to the provisions of rule 6 and 7, unless different provisions are specified in the rental agreement. Long-term rental agreements in excess of five (5) years shall only become effective upon final approval of the lease agreement by the board.
- 9.3. Any contract for a long-term rental agreement shall contain the following information:
 - A. The name and address of the renter.
 - B. The amount of storage space obligated.
 - C. The rental price.
 - D. The legal description of the point of diversion and the place of use.
 - E. The duration of the rental agreement.
 - F. The understanding of responsibilities and exposure if reservoir space does not fill at some time during the term of the rental agreement.
 - G. The beneficial use to be achieved through the delivery of water from the rented space.
- 9.4. A long-term rental agreement will be initiated by submitting an application on forms provided by the watermaster to the watermaster's office in Idaho Falls. Upon approval of the request by the Committee of Nine, the watermaster shall initiate the rental upon receipt of the first year's rental payment. Each successive year the scheduled payment shall be due on the date specified in the rental agreement. Failure of the renter to meet any payment shall void the rental agreement and any

subsequent rental by that renter shall be under the last priority provided by rule 7.

- 9.5. For the purposes of rule 7, the date of the agreement shall be the date the application is received by the watermaster.

PERSONNEL

The process of accurately distributing water and regulating the use of water according to the various water rights requires the daily collection and compilation of a large amount of data. In 1996, the accounting process required the processing of nearly 800 separate items of data each day. The process of collecting these data is the primary responsibility of the "river riders". Each day the river riders travel a specific circuit and collect stage data from the various stream and canal gages. These gage readings are later compared with the charts produced by the stage recorders which produce a continuous record of stage vs. time.

The accuracy of the diversion data computed from stage data collected by the river riders is dependent on the work of the "hydrographers". It is the job of the hydrographer to measure the flow in each canal often enough to assure that an accurate relationship between stage and discharge is known. Because some canals "shift" more than others during the season, the frequency with which measurements are made varies from canal to canal. Generally, it is found that one measurement per month is adequate to maintain a reasonably accurate rating on most canals.

By statute the responsibility for controlling and regulating the diversion of water rests with the watermaster. Because of the desire of most canal companies and irrigation districts, provisions have been made to deputize their managers for the purpose of regulating specific diversions. In addition, several other deputies are needed to fulfill the watermaster's regulatory functions. Because the personnel needs of Water District 1 are greatest during the irrigation season, most of the people employed by the watermaster are part-time employees. At the present time, the watermaster's staff includes five full-time employees. The water district personnel employed during the 1996 irrigation year are listed as follows:

PERSONNEL

Ronald D. Carlson	Watermaster
Lyle R. Swank	Assistant Watermaster
Tony Olenichak	Deputy Watermaster
Helga King	Data Programmer
Wendy Murphy	Administrative Secretary
Darin Wetzel	Deputy Watermaster & Hydrographer, Idaho Falls
J. Dee O'Brien	Deputy Watermaster & Hydrographer, Teton Basin
Gordon Mills	Deputy Watermaster & Hydrographer, Lower Valley
Val Richards	Deputy Watermaster & Hydrographer, Henrys Fork
Alan Skaar	Deputy Watermaster, Willow Creek
Gail Blanchard	Hydrographer, Teton River
Klair Hall	River Rider, Rigby Diversions
Nick Olsen	River Rider, Heise Diversions
Lyle Lindsay	River Rider, Blackfoot Diversions
Dennis Bitton	River Rider, Swan Valley
Wilford Martin	River Rider, Swan Valley
Viola Lenz	River Rider, Upper Falls River
E. Frank Ohme	Gage Reader, Idaho Falls
Joe Yost	Gage Reader, Milner

FISCAL REPORT

Each year on the first Tuesday of March, the water users elect a watermaster and set his budget for the ensuing year. The watermaster then collects the necessary operating funds by billing each water user based upon diversion records for the previous year. Because funds are available through the renting of stored water, the watermaster is able to bill water users at the end of the year after all of the water uses are known. Billing after-the-fact allows the water district to avoid billing water users based upon their estimated use. This saves time, money, and avoids confusion. However, the after-the-fact process is exactly the same as the estimated process used by most water districts. The Idaho statutes establish a process where the distribution costs of a water district are distributed to water users in proportion to their percentage of the total water diverted that year. For example, a canal company whose total diversions averaged 10% of the total water used in the district will be assessed approximately 10% of the total expenses of the district. In some instances, the percentage of the expenses a user pays may differ from his percentage of the total water diverted that year, because each diversion is subject to a \$20.00 minimum charge. If the computed percentage for a water user is less than \$20.00, his water delivery bill will be \$20.00. In addition, upper valley companies are assessed separately for the expenses of their representatives on the Committee of Nine. Since the expenses of those elected to the Committee of Nine, as representatives of companies located below Blackfoot are paid directly by their respective companies, these companies are not assessed for these costs by the watermaster.

The billing for 1996 actual cost was based on the amount spent of \$955,534 for water delivery during 1996. The adjustments for prior year uncollectables, corrections, use of rental pool reserve funds for legal and consultant fees, and collections for streamgaging charges were \$123,581. This resulted in a total cost to water users of \$831,953 for the delivery of 4,155,466 twenty-four hour second-feet (7,451,489 acre-feet). The 1996 billing included budgeting of upper valley interests of the Committee of Nine. This amount was assessed only to the canals above American Falls Reservoir, which made the average assessment to the lower canals about 8.9 cents per acre-foot and the upper valley diversions about 10.5 cents per acre-foot. The following table shows a comparison of the amounts budgeted and spent in 1996.

An audit of Water District 1 financial statements as of October 31, 1996 is presented in the Appendix.

WATER SUPPLY

The water supply available in any year is comprised of stored water carried over from the previous year, groundwater discharged (base flow), snowmelt runoff and summer precipitation.

Melting snow on the Snake River watershed generally provides the largest component of surface flows in Water District 1. The maximum snow accumulation at higher elevations is normally reached by the end of March. Runoff normally starts in late April and stream flows normally peak in early June. However, because snow pack varies significantly from year to year, average conditions are rarely actually observed. Figure 1 indicates the variation on April 1 snow pack for two snow courses, one on the Henrys Fork and the other on the Snake River. This figure indicates an above normal snow pack this year for both the Henrys Fork and the Snake River. Snow survey records for 21 upper Snake River snow courses for the period between 1987-96 are included in the appendix.

The Soil Conservation Service of the U.S. Department of Agriculture, in cooperation with the Idaho Department of Water Resources, forecasts streamflows based upon current snow conditions and past streamflow and precipitation records. The April 1, 1996 forecasts predicted that runoff in the majority of the upper Snake River Basin would be above the historical average. Table 1 shows the average, forecast, and actual unregulated runoff at selected stations in the basin. Forecasts ranged from a high of 124 percent of normal for the Snake River near Heise to 107 percent for the Falls River near Ashton. Actual unregulated runoff ranged from 130 percent of normal for the Teton River near St. Anthony to 112 percent of normal for the Henrys Fork near Ashton.

Natural flow is that increment of streamflow that would be available at a specified stream location if the effects of reservoirs and diversions were removed. The watermaster must divide the natural flow among all decreed, licensed, and permitted water rights. For the purpose of computing and distributing available water supplies, the upper Snake River has been divided into 37 "reaches" as indicated by figure 2. The water gained by each reach is computed as the sum of the reach outflow, the reach diversions, reservoir evaporation, and change in reservoir storage minus reach inflow.

Before reach gains can be computed, adjustments must be made to account for travel time. Table 2 lists the average travel time in days from each reach and from points of diversion within each reach to Milner Dam. The daily sum of the gains in all reaches (adjusted for travel times) above a specified gage location represents the natural flow supply at that location. When accumulated to Milner, they represent the total system natural flow.

Figure 3 compares total daily natural flow with total system diversions. The difference between the natural flow supply and the total system diversions represents storage that had to be released to meet the irrigation demand. Figure 3 indicates that demand exceeded natural flow for the first time on July 13, 1996 (MT). Storage was then used continually throughout the irrigation season until October 19 when diversions were curtailed to the point that they were less than the natural flow.

The total natural flow in the system peaked at 65,828 cfs on May 22 (MT). The flow through Milner on this day was 226 cfs. The flow through the Milner power plant was 4,539 cfs, for a total of 4,764 cfs of water past Milner. Canal diversions were 18,888 cfs. The remaining 42,175 cfs (83,653 acre-feet) was stored.

Water supply tables showing daily diversions, miscellaneous streamflows, daily streamflows and daily reservoir contents for the 1996 water year can be found in the appendix.

* The date of maximum available natural flow.

WATER RIGHTS REGULATION

The natural flow supply is computed as described in the previous section. When the natural flow is determined for each day, it is allocated to water users starting with the oldest rights. The allocation process continues until all of the available natural flow has been distributed. The allocation of natural flow is for specific beneficial uses which include irrigation, storage (for specific purposes), power generation, and municipal and industrial uses. Lists of the rights as recognized in 1996 can be found in appendix C of this report. These rights are listed in order of priority and also by individual diversion or user (canal, pump, power plant, reservoir, etc.).

Figure 3 illustrates the constantly changing water supply that must be distributed by the watermaster each day. It also presents a generalized picture of the total water supply and the demand for water in the whole water district. Because the relationship between the availability of natural flow and demand may change from reach to reach, the priorities of water rights being filled will normally not be the same for all reaches. Also, because of the travel time involved between reaches, priorities will change on different dates for different reaches.

Tables 4 and 5 show the 1996 daily water right regulation schedule. Using these tables, the last right which was filled for a particular diversion can be found by the reach in which the diversion of interest is located. For example, assume someone wishes to know the last right being filled for the Palisades Canal on August 29, 1996. By knowing that the Palisades Canal's point of diversion is located between Irwin and Heise, the August 29 date is found in the first column; then moving across the table horizontally, the priority of the last right being filled at most points on the river (primary priority) is found to be January 9, 1895. To the right of this "primary priority" are listed the exceptions to the primary priority. Because the Palisades Canal is not in one of the reaches where priority exceptions exist, it is subject to the primary priority. Thus, no right later in time than January 9, 1895, was filled for the reach Irwin to Heise. From a listing of water rights found in appendix C it is determined that the Palisades Canal would be entitled to divert 48.9 cfs of natural flow under priorities earlier than August 15, 1893. Its next right, which has a priority of June 1, 1898, was not delivered. Therefore, on August 29, 1996, the Palisades Canal was entitled to divert up to 48.9 cfs of natural flow.

Storage diversions on a particular day are found by subtracting the natural flow diversion from the total diversion. Using the above example, the storage diversion of the Palisades

Canal on August 29 is equal to its total diversion of 57 cfs (see appendix) minus the 48.9 cfs natural flow diverted. Therefore, the segregation of natural flow and stored water used by the Palisades Canal on August 29, 1996 was:

Natural Flow	48.9 cfs
Stored Flow	<u>8.1 cfs</u>
Total Diversion	57 cfs

The reaches in tables 4 and 5 were numbered for convenience in making these tables and having no intended relationship to the reaches used in the watermaster's accounting process shown in figure 2.

DIVERSIONS AND STORED WATER USE

This section lists the 1996 irrigation year (November 1, 1995 to October 31, 1996) water use by canal and summarizes the diversions by reaches of the river. The diversions have been separated into major and miscellaneous categories for convenience and to preserve the traditional groupings historically used in past watermaster reports. The seven river reach groups are: Snake River from Irwin to Lorenzo, Snake River from Lorenzo to Blackfoot, Snake River from Blackfoot to Milner, Henrys Fork, Falls River, lower Teton River, and Willow Creek.

Major diversions for the above listed reaches are given in tables 6 through 11, with the exception of Willow Creek, which has no diversions in this category. Acreages are shown for most of these diversions and annual per acre volumes are calculated. No attempt was made to confirm the acreages used. Miscellaneous diversions for the seven reach groupings are given in tables 12 through 18. These diversions are mainly pumps which irrigate small acreages near the river.

Table 19 is a summary of all regularly measured major and miscellaneous diversions. Major and miscellaneous diversions totaled about 8.1 million acre-feet, compared to 7.2 million acre-feet diverted in 1995.

In addition to the diversions summarized by table 19, there are many diversions which are administered separately and for which no daily record of amounts diverted normally is made. Periodic measurements of most of these diversions are made, however, and are listed in the appendix under "Miscellaneous Streamflow Records".

As described previously, all diversions that exceed natural flow entitlements will be charged storage for the difference between the sum of available natural flow rights and the total diverted each day. Most users own or have contracted for specific storage space entitlements in one or more reservoirs. Other users who do not have storage are frequently able to "purchase" unused stored water from the Water District 1 Rental Pool when natural flow is insufficient to meet their needs.

The storage accrued to each reservoir at the end of the spring runoff is indicated in table 20. Reservoir evaporation is deducted from the accrued storage. The allocable storage is the accrued storage minus evaporation. Table 20 shows the evaporation charged against each reservoir and the amount in each that was allocated for use during 1996. Initially evaporation is estimated for each reservoir, but because actual evaporation is not known until the end of the season, the final allocation can not be made until then. Of the 4,144,438 acre-feet initially stored, 4,085,014 acre-feet remained available for allocation after actual evaporation losses

were taken into account. Storage held in Milner is included but has not been allocated.

Tables 21 through 28 indicate storage water allocated and used, by canal, during 1996. Diversions listed in these tables are grouped by the same river reach sequence used in table 7 through 18. Table 29 is a summary of these storage accounts by reach.

Table 21 through 29 are divided into nine columns. Column one indicates the water allocated to each user after evaporation losses have been subtracted.

Column two reflects supplies furnished to or obtained from the Water District 1 Rental Pool. A negative sign (-) indicates water supplied for sale through the rental pool and unsigned numbers represent storage purchases. Storage supplies provided by the Fremont-Madison Irrigation District from Island Park and Grassy Lake Reservoirs are included under this heading, even though they were considered internal sales of stored water that were not necessarily transacted through the rental pool. The system sum of the numbers in column two must equal zero (see table 29).

Column three is the gross storage use as indicated by the watermaster's account computations.

Column four indicates water supplies that were purchased from the rental pool (or provided by the Fremont-Madison Irrigation District) and not used. These unused supplies were returned to the rental pool.

Column five shows the unused water from column four returned to the appropriate space holder at the end of the season. Columns four and five must be equal for the system (see table 29). This water becomes available to the space holder as part of his carryover.

Column six lists the unadjusted balance of storage transactions (column 1 + column 2 - column 3 - column 4 + column 5).

Column seven indicates adjustments that were made to column six. Ideally, on October 31 of each year, the stored water used by each canal can be obtained directly from the current accounting computations. In actual practice, this is rarely the case because some adjustments must be made. Reasons for storage adjustments range from data errors and changes in water right distribution to alternate supplies of water. Values in column seven are footnoted to explain the specific reason for each adjustment. All column seven footnotes for table 21 through 28 are listed at the bottom of table 28.

Column eight shows excess storage used that had not been offset by purchase from the Water District 1 Rental Pool or by other adjustments applied at the end of the year. The sum (see

table 29) of columns seven and eight represents groundwater exchange pumping, groundwater mitigation, Ririe Reservoir adjustment, excess used by Fremont-Madison, and a correction for gain averaging.

Column nine indicates the carryover credited to each canal on November 1, 1996, and is found by adding columns seven and eight to column six.

Excess use on the Teton River in some cases is offset by groundwater exchanges. Seasonal volumes of water pumped from groundwater to replace diverted surface water are identified as "exchange pumping" and are shown as adjustments in table 26. For 1996, exchange pumping totaled 448 acre-feet. Daily records of exchange pumping are shown in the appendix.

Table 29 shows a total 4,085,014 acre-feet storage water allocated and 1,573,414 acre-feet storage water used in 1996, leaving a preliminary balance of 2,511,601 acre-feet. Miscellaneous storage use of 293,968 acre-feet included in the storage used total consisted of 43,910 acre-feet used by Idaho Power, 250,000 acre-feet BOR rental and storage used for fish purposes, and 58 acre-feet used by miscellaneous irrigation diversions. Adjustments to the preliminary balance totaled 55,350 acre-feet, while system excess use was 13,040 acre-feet, resulting in a net gain in storage of 68,390 acre-feet. Adding this net gain in storage to the preliminary balance yields a carryover at the end of the season of 2,579,991 acre-feet.

Table 30 summarizes the 1996 storage accounts for the system. Late season reservoir fill, which occurred as a result of declining diversion rates and increasing natural flow in the fall, was 134,284 acre-feet through October 31 for a total of 2,714,275 acre-feet in storage. Actual observed reservoir contents by reservoir are shown in table 31.

WATER DISTRICT 1 RENTAL POOL

There has been "rental pool" operating on the upper Snake River since the second decade of the 20th century. The earliest documented rental of stored water appears to have taken place in 1916 when 40,000 acre-feet of water was leased to the Twin Falls Canals from the Blackfoot Reservoir. Through the drought period of the 1930's, space holders in Jackson and American Falls Reservoirs made storage available to help other water users in Water District 36. (Water District 36 was re-designated as Water District 1 in 1971.) This early "rental pool" had no statutory basis, and potentially certain legal liabilities.

In 1979, provisions for the creation of a water supply bank was enacted by the Idaho State Legislature. The authority for water banking was vested in the Idaho Water Resource Board, who, though the provisions of Idaho Code Section 42-1765 was empowered to appoint a local operating committee for the purpose of "marketing stored water between consenting owners and consenting renters..." The water board appointed the Committee of Nine as the local operating committee for the Water District 1 Water Bank in 1979 and has re-appointed them every five years since that initial appointment.

Water District 1 initially referred to the rental process established after enactment of Chapter 17 of Title 42, Idaho Code and the appointment of the Committee of Nine, as the Water District 1 Water Bank. The water board retained authority to manage the "banking" of decreed and licensed water rights. In order to reduce the confusion between the boards rental activities and the water district's rental activities the district went back to referring to the district's system for the acquisition and lease of Snake River storage as the Rental Pool.

Each year the chairman of the Committee of Nine appoints a rental pool committee consisting of the watermaster, who is the designated manager for the Rental Pool, the area manager for the Bureau of Reclamation (BOR), and up to five members of the Committee of Nine. In 1996 the rental pool committee was:

Ronald D. Carlson, Manager; Dale Rockwood, Chairman; Leonard Beck, Paul Berggren, and Jerrold Gregg, Area Manager for BOR.

The rental pool committee is charged with making recommendations to the Committee of Nine related to annual rental policies. This includes recommendations on the

annual rental price. Because of the increased exposure to space holders and the potential for additional depletion from the upper Snake River Basin if water is leased for use below Milner Dam, different rules have been established that distinguishes between storage rented for irrigation purposes within Water District 1 and storage used outside of the district. These different rules include a different price.

In 1996 the rental pool committee recommended the price for storage leased be \$2.95 per acre-foot at the river point of diversion for the renter. This amount represents a \$2.00 payment to the supplier, a \$0.75 administrative charge retained by Water District 1 and 10% of the payment amount going to the supplier paid to the Water Resource Board as a state administrative surcharge on rental pool receipts. The Committee of Nine accepted the recommendation of the rental pool committee that the cost of water leased for uses located below Milner Dam be \$10.50 per acre-foot. This included a \$2.05 deposit that would be held by the district for the primary purpose of securing up to 250,000 acre-feet of water in 1997, 1998 or 1999, if a higher price is required to secure water to meet the BOR requirements in one or more of these years. The rule that establishes the 1996 price for rental pool storage can be found in this report in the 1996 resolutions of Water District 1.

Fremont-Madison Irrigation District holds 14,121 acre-feet of space in Island Park Reservoir that has not been allocated. This district makes this space available to its users through a district rental process. In 1996 this space yielded 13,424 acre-feet of water. In addition, Fremont Madison controls the wells that were constructed as part of the Teton project and, when necessary, pump supplemental water from these wells. During 1996, no water was pumped from these wells for supplemental uses on the Henrys Fork. In addition, Fremont Madison leased no water from the Water District 1 Rental Pool for resale to the patrons of the district. The irrigation district rented a total of 11,018 acre-feet of storage to its patrons in 1996, which included the reallocation and release of about 12,009 acre-feet of unused storage in Island Park and Grassy Lake.

MANAGED RECHARGE

In 1934, Lynn Crandall estimated that 300,000 acre-feet of water was lost to groundwater as a result of winter diversions on the upper Snake River. In the 1980's, Luther Kjelstrom of the U.S. Geological Survey reported (USGS Report 87-4063) that, "between the early 1890's and the late 1950's, when most of the surface-water irrigated land was developed, the regional water table rose 60 to 70 feet, and groundwater discharge as spring flow to the Snake River from Blackfoot to Neeley nearly doubled." Similar increases in flows from the north-side springs near Hagerman were observed during that same time period. There is little doubt that over the years irrigated agriculture has contributed millions of acre-feet of additional water to the Snake Plain Aquifer. Later priority water rights have been developed that rely upon the continuation of these irrigation contributions to groundwater.

During the drought years that extended from 1987 through 1994, there was a significant reduction in the amount of water reaching the regional Snake River Plain Aquifer. As a result, groundwater levels and spring discharge declined throughout the Snake River Basin. The aquaculture industry that relies upon springs that discharge into the Snake River canyon between Twin Falls and Hagerman was particularly concerned about the observed decreases in spring flow and it was largely through their effort that the 1995 Idaho State Legislature appropriated \$945,000 to purchase storage water to be used for recharging the Snake River Plain Aquifer. This appropriation was made to the Idaho Water Resources Board (IWRB), who in turn purchased 295,312 AF of water from the Water District 1 Rental Pool at a cost of \$871,171.88. In addition, the IWRB agreed to pay canal companies and irrigation districts \$0.25 per acre-foot for carrying and recharging this water. In 1996, there were fifteen (15) entities that submitted acceptable recharge plans to the watermaster. The recharge credited to each of these entities follows this section.

At the end of the year suppliers were paid a total of \$66,628.60 for storage leased for recharge. Money not used to purchase storage was carried over for future years to purchase water for recharge. On October 31, 1996, the end of the Water District's fiscal year, \$625,799.90 remained. This included \$38,751.08 in accrued interest.

REPORT OF THE COMMITTEE OF NINE

As we look back at the 1996 water year, it will go down as one of the better water years for the water users.

Our projected supply of water for 1997 is represented to produce the highest runoff in history in the Snake River Basin.

In spite of the predictions of "plenty" for 1997 irrigation water supplies, new exposures to the water rights and district members arise frequently. The district operates on an even keel in performing its primary mission of delivering the surface water entitlements of the users from the Snake River and its tributaries above Milner Dam.

This orderly administration doesn't just happen by accident. Upper Snake River water users are very fortunate to have a person of Ron Carlson's knowledge, integrity, and competence as the watermaster of one of the most complicated water entities in the west. We don't tell Ron often enough that we appreciate his efforts. Ron's able assistant, Lyle Swank, is also not thanked often enough for his yeoman efforts on our behalf. Wendy, Tony, and the other staff members also deserve our sincere thanks.

It's hard to believe that 1997 is the 20th year that the Water District 1 office has been maintained on a cooperative basis with IDWR. This association has proved to be beneficial for the water users. (I note for the historical record that the agreement was signed by C. Stephen Allred on behalf of the Department of Water Resources and by long time revered Committee of Nine Chairman, Leonard Graham.) While the original agreement was updated five years ago, access to IDWR's computer for record keeping, both for water deliveries and for financial accounting purposes, has been a great improvement for the district.

The Committee of Nine's activities beyond normal water delivery matters are governed by resolution no. 14 adopted at last year's annual meeting. That resolution reads as follows:

WHEREAS, the Committee of Nine has been selected by the water users of Water District 1 to represent their collective interests;

BE IT RESOLVED that the Committee of Nine be authorized to expend funds held by the district for the following purposes:

- (1) Expenses of the district.
- (2) Improvements to the district's facilities, including a reasonable reserve for future improvements.
- (3) Educational projects designed to increase public awareness in the area of water distribution, water rights and water conservation.
- (4) Other public projects designed to assist in the adjudication, conservation or more efficient distribution of water.
- (5) For involvement in legislative, legal and agency deliberations on issues involving water quantity and quality which could affect water users of the water district including naming Water District 1 as a petitioner in legal actions involving the ESA and the negotiation of federal claims and tribal claims filed in the SRBA and further to expend funds as are necessary that may exceed the budgeted amounts for such expenditures and then approved by the Committee of Nine.
- (6) To reimburse advisory committee members in accordance with the policy attached hereto as exhibit B.
- (7) Items authorized in resolution 13.

Pursuant to this resolution, the Committe of Nine has:

- (1) Filed a 60 day notice with National Marine Fisheries Service so as to be able to participate in any litigation which seeks more water from the upper Snake River Basin reservoirs for augmentation of salmon flows in the lower Snake River.
- (2) Participated in the negotiation of Idaho Code 42-1763B to facilitate the Bureau of Reclamation's acquisition of 427,000 acre-feet from willing lessors each year through 1999 to evaluate NMFS' recovery plan.
- (3) Followed up on district members' protests of the water claims of the Nez Perce, USFS, USF&WS and other federal agencies seeking

reserved water rights in the SRBA to Idaho waters.

- (4) Cooperated with the IWRB in facilitating recharge efforts with excess Snake River flows.
- (5) Participated in the Idaho Water Users ESA Coalition.
- (6) Managed one of the most successful water banks in the western United States.

This year has been very interesting for all water users, highlighted by the many SRBA issues and involvements. Your committee has served well and given freely of their time. I thank them all. I particularly thank Dell Raybould for his efforts on our financial matters. Stan Clark, DeWitt Moss, and Leonard Beck have given much of their time to the federal claims negotiations. I also thank them. But you have to be the judge of the stewardship of your committee. I hope history and the water users will treat us kindly.

INDEPENDENT AUDITORS' REPORT

Department of Water Resources
Water District 1
Idaho Falls, Idaho

We have audited the accompanying general purpose financial statements of Water District 1, as of October 31, 1996, and for the year then ended, as listed in the table of contents. These financial statements are the responsibility of the District's management. Our responsibility is to express an opinion on these financial statements based on our audit.

We conducted our audit in accordance with generally accepted auditing standards. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement. An audit includes examining, on a test basis, evidence supporting the amounts and disclosures in the financial statements. An audit also includes assessing the accounting principles used and significant estimates made by management, as well as evaluating the overall financial statement presentation. We believe that our audit provides a reasonable basis for our opinion.

In our opinion, the general purpose financial statements referred to above present fairly, in all material respects, the financial position of Water District 1, as of October 31, 1996, and the results of its operations and cash flows for the year then ended, in conformity with generally accepted accounting principles.

WATER DISTRICT 1
NOTES TO FINANCIAL STATEMENTS
OCTOBER 31, 1996

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES:

Water Districts were established in 1903 by the Legislature with the duty of directing and controlling the distributions of water within each District assigned to the State Reclamation Engineer (later changed to the Department of Water Resources). The Upper Snake River drainage was designated as District 1. The Idaho Code was amended in 1986 to clarify the status of the Districts in that each shall be "considered an instrumentality of the State of Idaho".

In 1919 a group of nine water users from District 1 met with the State Reclamation Engineer to request the creation of a permanent Watermaster system. This group became known as the Committee of Nine and represented the collective interests of the various members of the District. The primary purpose of the Committee was to assure that proper distributions of available water supplies were made.

Beginning in 1979, the Committee of Nine could assist in the marketing of stored water from water banks as authorized by the Water Resource Board. Water Banks are a system which allows owners of water a means of "renting" amounts surplus to their needs to others without violating various requirements of Idaho Code.

The District is governed by the Department of Water Resources which confirms the selection of a Watermaster by the members of the District. The District meets annually at which time the members select a Watermaster, adopt various resolutions governing the activities of the District and Water Supply Bank and elect the local advisory committee members known as the Committee of Nine. The Committee of Nine is responsible for assisting the Water Resource Board in the operations of the Water Supply Bank and to advise the Watermaster on the general operations of the District.

Water District 1 is responsible to the Department of Water Resources and water right holders of the District to make proper distribution of available water supplies within the District as appropriated.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Fund Accounting

The accounts of the Water District are organized on the basis of funds, each of which is considered a separate accounting entity. The operations of each fund are accounted for with a separate set of self-balancing accounts which comprise its assets, liabilities, fund equity, revenues and expenses. The funds are as follows:

Water District Operating Fund - This fund is used to account for the Water District's general activities.

Water Bank Fund - This fund is used to account for rental of Water Bank water supply and the related expenses to the Water Resources Board and the Water District.

Basis of Accounting

The accounts of the district are organized on a basis similar to that of a governmental enterprise fund, which is used to account for operations that are financed and operated in a manner similar to business enterprises (i.e. where the intent of the governing body is that the costs of providing goods and services to the general public on a continuing basis be financed or recovered primarily through user charges). The accrual basis of accounting is used. Revenues are recognized when they are earned and expenses are recognized when they are incurred.

Budgets

The Water District adopts a budget for operating expenses at the annual meeting for the District's operating fund. The budget is prepared on a basis generally consistent with generally accepted accounting principles, except that expenses for capital acquisitions are budgeted. The reported operating expense amounts exclude actual capital acquisitions since they are capitalized and included in equipment. Classification of operation's expenditures for budget purposes differs from classifications for GAAP purposes.

The following is a reconciliation of total operating expenditures:

	<u>Reported</u>	<u>for Capital</u>	<u>Adjustment</u>	<u>Adjustment</u>
	<u>Amounts</u>	<u>Acquisitions</u>	<u>for Palisades</u>	<u>Budgeted</u>
			<u>Water Users</u>	<u>Amount</u>
Total Operating Expenditures	\$1,030,717	\$ 5,455	\$ (868)	\$ 1,035,304

The District does not adopt a budget for the Water Bank Fund. Expenses are dependent on Water Bank rental income which varies from year to year based on water supply and cannot be predicted in advance. Therefore, a budget to actual comparison is not presented for the Water Bank.

1. SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES (Continued)

Cash and Cash Equivalents

Cash and cash equivalents are identified as cash and short-term, highly liquid investments. Cash and cash equivalents for the Water District 1, include cash in checking and savings accounts and investments in the Idaho State Treasurer's pooled investment account.

Inventory

Inventory is recorded at cost with a first-in, first-out basis of accounting.

Property and Equipment

Property and equipment is recorded at cost. Depreciation is provided using the straight-line method over estimated useful lives of the related assets of five years.

The District purchases various data collection platforms (DCP's) and other equipment which are placed into service and become part of the overall water system. The water system is composed of several storage facilities and delivery systems which are owned by various entities and organizations. The District has a policy of expensing items as they are placed in service as part of the water system.

Use of Estimates

The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statement and the reported amounts of revenues and expenses during the reporting period. Actual results could differ from those estimates.

Memorandum Only - Total Columns

Total columns of the general purpose financial statements are captioned "memorandum only" to indicate that they are presented only to facilitate financial analyses. Data in these columns do not present financial position, results of operation, or cash flows in conformity with generally accepted accounting principles. Neither is such data comparable to a consolidation. Interfund eliminations have not been made in the aggregation of this data.

2. CASH AND CASH EQUIVALENTS

At October 31, 1996, the carrying amount of the District's deposits (savings and checking accounts) was \$65,553, and the bank balance was \$112,163. The bank balance of \$112,163 was covered by Federal Depository Insurance.

2. CASH AND CASH EQUIVALENTS (Continued)

The District has invested \$2,226,849 with the Idaho State Treasurer's pooled investment account. The State Treasurer invests in time certificates of deposit, local government tax anticipation notes, federal loans, U.S. Treasury Notes and other U.S. Governmental securities. Information regarding insurance or collateralization of amounts invested in the pooled accounts is not available.

The District has invested \$1,048,906 in money market funds that invest only in U.S. Treasuries. On October 31, 1996 fair market value of the money market funds approximated cost. The money market funds are uncollateralized and uninsured.

3. RESTRICTED CASH AND CASH EQUIVALENTS

Restricted cash and cash equivalents in the Water District operating fund of \$300,000 include \$100,000 for rental pool payment disputes which are deemed the responsibility of the District and \$200,000 for specific purposes authorized by the Committee of Nine. These purposes include District expenses, educational projects, and legislative and agency deliberations, and advisory committee expenses.

Restricted cash and cash equivalents in the Water Bank Fund of \$1,974,358 include funds held for the payment of Water Bank suppliers and administrative costs.

4. ASSESSMENTS RECEIVABLE

Assessments are billed at the end of the water year in the spring. The District has not incurred significant bad debts in the past and does not recognize any allowance for uncollectible accounts due to the legally enforceable nature of these assessments. The District did incur \$75,289 in bad debt expense this year which was solely related to the write off of one account. This is not expected to be a on-going or recurring event, therefore the Districts policy of not recognizing an allowance for bad debt has been continued.

5. UPPER VALLEY ATTORNEY FEES TO BE ASSESSED

The Water District incurs legal services on behalf of certain upper Snake River valley users. The charges for these services are passed on to the users through additional assessments in the following year. The balance in this account represents attorney fees which have been incurred but have not yet been assessed to the respective users.

6. FUNDS HELD BY DEPARTMENT OF WATER RESOURCES

The Department of Water Resources provides the Water District with office space, administrative support and personnel. The District pays the Department monthly for these services in advance based on an estimate of the costs and balance of prior advance payments, as per the most recent memorandum dated March 2, 1993, between the Water District and the Department of Water Resources. The balance of funds held by the Department represents excess advance funds to be applied to future periods.

7. EXCESS STORAGE USERS RECEIVABLE AND SUPPLIERS PAYABLE

All water deliveries of the District are accounted for as being either a fulfillment of a water right or as a sale of stored water. Excess storage users receivable represents water delivered to users in excess of their water rights, which has not been paid for by users at year end. Excess storage suppliers payable represents the amount due to suppliers for stored water that has been sold during the year. A portion of the amount charged to excess storage users is paid to the Water District and the Water Resources Board for administrative costs.

8. ACCRUED COMPENSATED ABSENCES

Annual leave accrues at various rates according to the length of continuous employment. The amount earned is based on actual hours worked. The maximum annual leave which may be accumulated ranges from 24 to 42 days, depending on length of employment. Upon separation from state employment, employees will receive a lump-sum payment for earned but unused annual leave at the hourly rate of pay for the employee's grade and step.

9. INTERFUND RECEIVABLES AND PAYABLES

Interfund receivables and payables at October 31, 1996, were as follows:

	<u>Receivable</u>	<u>Payable</u>
Operating Fund	\$ 38,490	\$ --
Water Bank Fund	<u>--</u>	<u>38,490</u>
	<u>\$ 38,490</u>	<u>\$ 38,490</u>

10. PAYROLL AND RELATED EXPENSES

Included in payroll and related expenses are costs associated with the District contracting with several individuals to perform the various tasks of diverting and measuring water flows. Salary and reimbursement rates for travel are negotiated by the Watermaster and approved by the District at the annual meeting.

Payroll related expenses include payroll taxes and benefits.

11. PENSION PLAN

Public Employee Retirement System of Idaho - The Public Employee Retirement System of Idaho (PERSI), a cost sharing multiple-employer public retirement system, was created by the Idaho State Legislature. It is a defined benefit plan requiring that both the member and the employer contribute. Designed as a mandatory system for eligible state and school district employees, the legislation provided for political subdivisions to participate by contractual agreement with PERSI. Financial reports for the plan are available from PERSI upon request.

After five years of credited service, members become fully vested in retirement benefits earned to date. Members are eligible for retirement benefits upon attainment of the ages specified for their employment classification. For each year of credited service, the annual service retirement allowance is 1.917 percent or 2.225 percent (depending upon employee classification) of the average monthly salary for the highest consecutive 42 months.

For the year ended June 30, 1996 the required contribution rates, as determined by PERSI, are as follows:

	<u>Employee</u>	<u>Employer</u>
General Member	6.97%	11.61%

The Water District contributions required and paid were \$4,827, \$4,298, and \$4,714 for the three years ended October 31, 1996, 1995, and 1994 respectively.
