

36
----- Idaho Falls, Idaho.

Jan. 2, 1929.

Mr. John E. Pincock, President,
Water Users' Protector Association of the
North Fork of Snake River and Tributaries,
Sugar City, Idaho.

Dear Mr. Pincock:

Mr. Swendsen is anxious to make a decision in the immediate future as to whether or not the Teton Basin area shall be segregated into a separate water district and I am inclined from such information as is now available to recommend favorable action upon the request of the upper Teton water users, provided no objections are raised by the water users of the lower Teton. You will remember that on November 20 I wrote to you in regard to this matter and at the same time I sent a copy of this letter to Bishop Ricks. Thus far no replies have been received from either of these letters and as we cannot well defer action on this matter much longer, I propose to recommend the granting of the request for the creation of a separate district unless some objections are raised within the next few days.

Mr. Swendsen has also discussed with me the desire of the water users diverting from the North Fork and from the lower Teton to be segregated into a separate district in order that they may elect their own water master independent of the other territory embraced in District No. 36. In this case it appears to me that the creation of a separate district at this time would be unwise in so far as it would add to the financial burden of the water users in your section and at the same time make the distribution organization more cumbersome. However, if the water users of your section, realizing these facts, still desire a separate district, I cannot see that there should be any serious objection on the part of the water users of the balance of the district, provided it is distinctly understood that even in the event of the creation of a separate district in your territory, the water master there must of necessity be subject to my supervision as Deputy State Commissioner of Reclamation and would have to distribute the water in exactly the same manner as if the new district was still included in District No. 36. In other words, the whole area is a part of the Snake River drainage and as such, must abide by the priority of rights as defined in the Snake River decree.

When the Fall River storage is developed, it will probably be necessary to have a special deputy of the State Commissioner of Reclamation located at St. Anthony or some other convenient point for the purpose of supervising the distribution of this stored water but even then, since the status of the normal flow rights will not be affected, I hardly think that the creation of a new water district would be any more desirable. It, therefore, appears to me that this question resolves itself into the proposition as to whether the privilege of electing your own water master independent of the balance of the District No. 36 is sufficiently desirable to warrant you in paying the additional charges which are bound to result under the proposed system.

J.E.P.

-- 2 --

I shall be glad to hear from you in regard to this matter as well as with respect to the creation of a separate district in the Teton Basin. It should be understood, however, that the two propositions differ materially because the Teton Basin area naturally separates itself into a separate unit and has little effect upon the distribution throughout the balance of District No. 36 unless it may be upon the water users of the lower Teton.

Respectfully yours,

G. Clyde Baldwin

Special Deputy.

Mr. W. G. Swendsen,
Commissioner of Reclamation,
Boise, Idaho.

Dear Mr. Swendsen:

Mr. Pincock informs me that another meeting of the North Fork Water Users' Association is to be held on January 26 and at that time, the matter of creating a separate water district to include water users on the North Fork and lower Teton Rivers will be further considered. In the meantime he wishes a statement from me as to the probable effect such action would have on the cost of distribution in these areas.

I, therefore, suggest that you withhold any action leading to the creation of a new water district to include lands irrigated from the North Fork and Teton Rivers in Madison and Fremont Counties pending a further report concerning the action taken at this January 26 meeting.

Very truly yours,

Clyde Baldwin
Special Deputy.

Mr. W. G. Swendsen,
Commissioner of Reclamation,
Boise, Idaho.

Dear Mr. Swendsen:

In final reply to your letter of November 15, relative to the creation of a separate water district embracing the Teton Basin area in Teton County, Idaho:

I have just received a reply from Mr. John E. Pincock, president of the North Fork Water Users' Association, in which he states that on January 3 at a meeting of their water users' association, it was decided to offer no objection to the segregation of the Teton County area into a separate water district.

From the standpoint of the water users diverting from the North and South Forks as well as the main Snake River it would appear that there can be no possible objection to the creation of this separate district as it should mean a decrease in the expense to them on account of the operation on the proposed new basis and further, because on account of the early priorities of the decreed rights on the lower Teton, there is little prospect that the balance of the Snake River drainage will ever materially benefit from the Teton water during any period of shortage.

The water users on the lower Teton might, of course, be affected by the plan which contemplates separate distribution within the Teton Basin because of the fact that rights in this latter area are largely of comparatively recent date. The showing made by the measurements obtained during August, however, supplemented by such other information as is at hand, seems to indicate that in all probability, it is really beneficial to the users on the lower Teton to have a large amount of water diverted for irrigation in the Teton Basin, particularly during the early part of the season.

I assume that in granting the request for the creation of this separate water district, you will make it plain that users in this section must abide by the Snake River Decree in the event that it should ever become evident that a strict enforcement of the distribution in accordance with this decree as it applies to the Teton Basin area would be beneficial to the holders of earlier water rights in the same drainage. With this proviso, I recommend that the request for the creation of a separate district in Teton County be granted.

I am returning herewith the correspondence and affidavits which were forwarded with your letter of November 15.

Respectfully yours,

Clyde Baldwin
Special Deputy

Re: District 360. ✓

Mr. E. S. Wilkie, Atty.,
Briggs, Idaho.

Dear Sir:

We are in receipt of report concerning the formation of an independent district by the water users in Teton County. While this report in a measure is favorable towards the wishes of the water users, a decision concerning the same will be withheld until a meeting, which we understand is to be called at Idaho Falls on January 26th, at which time this matter will be gone into thoroughly and an opinion rendered.

Mr. Svendsen who is now in the East on official business expects to be present at Idaho Falls on that date.

Very truly yours,

U. C. SWENDSEN,
Commissioner of Reclamation.

Mr. W. G. Swendsen,
State Commissioner of Reclamation,
Boise, Idaho.

Dear Mr. Swendsen:

Inclosed herewith please find copy of a letter just written to Mr. John Pincock relative to the proposal to create a separate water district to include the lower Teton, North Fork and Fall River areas. It would seem to me that the meeting to be held at St. Anthony on the afternoon of January 26 offers an excellent opportunity to thoroughly discuss this proposition and inasmuch as Mr. Pincock will undoubtedly extend an invitation for both you and I to attend, it would be highly desirable ^{to do so} if possible. An early reply as to whether your plans can be arranged to include a trip to St. Anthony on this date will be very much appreciated.

Very truly yours,

Inclosure.

36

----- Idaho Falls, Idaho,

Jan. 15, 1920.

Mr. John Pincock, President,
Water Users Association of the North Fork of
Snake River and Tributaries,
St. Anthony, Idaho.

Dear Mr. Pincock:

Mr. Howard and I have made some rough estimates as to the cost of water distribution and obtaining hydrometric data on Fall River, the North Fork and lower Teton drainage areas, provided a separate water district is created there, and these indicate that the cost under this plan to the water users of these sections would exceed by approximately \$2500 the cost of practically the same organization provided the work is handled as a part of District No. 36 as heretofore.

This will probably seem rather astounding to you and may require a considerable amount of explanation to make it plain just why this should be the case and on this account, if you so desire, I shall try to attend your meeting on January 26 to aid Mr. Howard in his explanation.

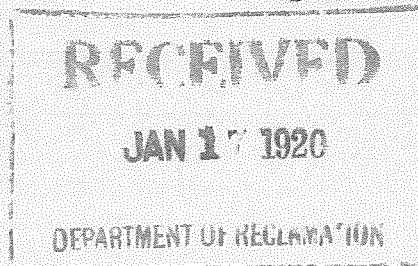

Furthermore, if Mr. Swendsen shall by that time have returned from Washington as now seems probable, I believe it might be possible to get him to attend this meeting also and in this event, the whole question of the establishment of a separate water district could be thoroughly discussed and probably definitely decided on.

If this plan meets with your approval, kindly notify me at once in order that I may communicate with Mr. Swendsen.

Very truly yours,

J. Clyde Baldwin
Special Deputy.

CC: W.G. Swendsen.

Re: District 36C. ✓

Mr. R. S. Wilkie,
Attorney-at-Law,
Driggs, Idaho.

Dear Sir:

Further reference is had to the petition of the water users of the Teton Basin asking that they be created a separate and distinct district from the remaining water users in District 36.

We wrote you on January 12th, that while the report in a measure is favorable towards the wishes of the water users, that a decision would be withheld until the meeting called on January 26th.

We have been somewhat confused concerning this District, due to the fact that the water users of the Fall River, Lower Teton and North Fork areas have also requested that a separate district be created for them. The meeting to be held on January 26th will concern this petition alone, and this is to inform you and the water users that their request is granted. This concession is made with this provision: that the water users in your section shall abide by the Snake River decree in the event that it should ever become evident that a strict enforcement of the distribution in accordance with this decree as it applied to the Teton Basin area.

An election for watermaster will be held in your district on March 1st in conformity with Section 5609 of the Idaho Compiled Statutes. Notices of such election will be sent each water user as soon as information for which we have written has been received.

Very truly yours,

W. C. SWENDSEN,
Commissioner of Reclamation.

PETERSON & COFFIN

J. H. PETERSON
LAWYER
POCATELLO, IDAHO

January 21st, 1920.

Hon. W. G. Swendsen,
Commissioner of Reclamation,
Boise, Idaho,

Dear Sir,

A client of ours in the east who is making a number of farm mortgage loans in this section of the State is desirous, for the benefit of his eastern market, of giving to the Trustee of his Debenture bonds in Chicago, a definite statement regarding water conditions in the upper Snake River Valley. We have been requested to furnish such detailed information as we are able concerning a number of different projects and canals and particularly regarding the canals, irrigation companies and irrigation districts as shown on the attached table.

The purpose of the inquiry on our client's part is to be able to satisfy eastern investors in Idaho farm mortgages as to the availability and permanency of the water supply for the different lands, and also, insofar as is possible, the amount of bonded or other indebtedness against the same.

We would appreciate it very much therefore if you would have your office prepare an abstract for us covering the foregoing matters in respect to the accompanying table.

We understand of course that any expenses incurred or any fees in this matter we are to pay.

With kindest regards

Yours very truly

PETERSON & COFFIN

STATE OF IDAHO
DEPARTMENT OF RECLAMATION
W. G. SWENDSEN, COMMISSIONER

EAU OF WATER RESOURCES
WATER APPROPRIATIONS
CAREY ACT DEVELOPMENT

BOISE Idaho Falls, Idaho,

Jan. 27, 1920.

Mr. W. G. Swendsen,
State Commissioner of Reclamation,
Boise, Idaho.

Dear Mr. Swendsen:

With reference to the application of the water users on the North Fork and Lower Teton rivers for the creation of a separate water district, I attended the annual meeting of the North Fork Protectors' Association at St. Anthony yesterday and gave a short talk with reference to this matter in which I pointed out to them the fact that with a separate district, they could hope to gain little except the power of electing their own water master and also showed that this would be very expensive to them in the additional cost of the water distribution which must result from the separation from District No. 36.

Following my talk, after some discussion a motion was adopted referring the matter to their Board of Directors with power to act. The Board promised to notify me in the near future concerning their decision and I will, in turn, immediately inform you of same. Meanwhile, of course, I assume that you will take no definite action upon their request.

My impression is that while there is a considerable sentiment in favor of a separate district, the Board's decision will probably be to advise continuing the present status at least for another year, provided same can be done without prejudice to their request, should they later desire to renew it.

Very truly yours,

Clyde Baldwin
Special Deputy.

February 2, 1920.

Mr. G. Clyde Baldwin,
Special Deputy Commissioner of Reclamation,
Federal Building,
Idaho Falls, Idaho.

Dear Mr. Baldwin:

I am in receipt of your favor of the 27th ult.
regarding the matter of creating a separate
district covering the North Fork and lower Teton
rivers.

I note what you say concerning the matter, but to
date I have had no communication from the Board of
Directors having the matter in hand.

I presume that they will give the matter final
consideration soon so that the notices of election
might be forwarded. The statutory date limit has
already expired for sending out these notices, but
I presume if we finally conclude to create a sepa-
rate district, a mutual understanding might be had
concerning the election.

Very truly yours,

WGS:MB

Commissioner of Reclamation.

The old Cedar Point water right has been absorbed and is listed with the Snake River Valley Irrigation District.

The City of Idaho Falls, being for power and municipal purposes, has been omitted.

The rights of the Farmers Progress Canal Co. have been merged into the Progressive Irrigation District. Transmission or canal capacity rights through the canals of the New Sweden Irrigation District have been granted to the Martin Canal Company which owns a permit right of 877 inches and a Jackson Lake storage right of 1,599 acre feet and also to J. W. Hays who has acquired a decreed right for 750 inches as of the date, June 1, 1883. These two rights, although carried through the canals of the New Sweden Irrigation District, should be considered as entirely separate from the rights of the District.

The Riley Canal Company has been merged into the Poplar Irrigation District.

The Taylor and Goshen Canal Company is not listed as the rights have probably ~~lapsed~~ elapsed through non-use.

The season of 1919 was the shortest water year on record, at least in so far as the quantity of natural flow available for the filling of decreed rights was concerned. During that season, decreed rights having a priority date subsequent to 1900 were cut on or before June 13; those subsequent to 1895, on or before June 19; those subsequent to 1893, on or before June 25; those subsequent to 1890, on or before June 27; those subsequent to May 10, 1889, on or before July 3. Decreed rights antedating those with a priority date of May 10, 1889 were cut off for varying lengths of time during the latter part of the season, the cuts at ~~the~~ time extending back as far as June 15, 1888 but in general, no 1888 rights were cut off for a sufficient length of time to prevent the raising of agricultural crops.

Prior to the season of 1919, I think that no canals having decreed rights of a date of 1890 or earlier were very seriously handicapped by water shortage due to deficiency in the natural flow of the river.

As a result of the unprecedented shortage during the season of 1919, as you doubtless know, several plans have been evolved for the creation of additional storage to supplement the decreed rights for canals in the upper Snake River Valley and it now seems probable that the American Falls Reservoir may be constructed at least to a sufficient capacity to provide a supplemental storage right for those of the canals in need of same which desire to avail themselves of this opportunity to complete their water right. For canals diverting from the river above the American Falls Reservoir, an exchange for Jackson Lake storage is contemplated.

I have no authentic information at hand concerning the amount of indebtedness of the different companies and districts and except in a few instances, have no summaries of the total acreage under each canal or system which can be considered as reliable. These facts have, therefore, been omitted in my tabulation.

The extra work involved in the preparation and checking of this summary probably represents a money value of about \$12.00 which if forwarded, by you, will be deposited to the credit of our normal flow fund and used in the payment of salaries as an offset for this work.

Very truly yours,

G. L. deBaldin

Special Deputy.

PLACE OF BUSINESS
ST. ANTHONY, IDAHO
Feb. 7 1920.

Mr. W. H. Swendsen.
Commissioner of Reclamation.
Boise, Idaho.

Dear Sir:-

At a meeting of the Water Users Association of The North Fork of Snake River and Tributaries held in the city of St. Anthony, Idaho. Jan. 26th. 1920. It was moved, seconded and unanimously carried. "That the question of an Independent Water District be left to the board of directors of this association, and that this association ratify any action taken by the board on said question."

It was apparent at this meeting that the sentiment was unanimous. That the water users of the North Fork of Snake River and Tributaries preferred an Independent district. Their reason for desiring this Independent district are first the fact that they expect to impound water to be used in this proposed new district and they feel that it will be necessary as well as beneficial to have an independent district covering the territory embraced in the proposed reservoir when they are running storage water with the natural flow.

At the meeting of the board of directors of the Water Users Association held pursuant the annual meeting held Jan. 26th. 1920. It was unanimously agreed that the secretary of this association request you to create an Independent district including the territory North of South Fork of Snake River and including all the tributaries of the North Fork. I wish to state at this time the question of a district water master was discussed at some length and it was the desire of The Water Users of The North Fork of Snake River and Tributaries should they be put in a district by themselves that they have E. Clyde Howard for their river water master season of 1920. In the event you do not deem it advisable to create a new district at this time we would very much appreciate the appointment of E. Clyde Howard as deputy water master in our section.

Thanking you in advance for your attention in this matter, I am

Yours truly,

John T. Wilcox (Rec.)

February 16, 1920.

Re: Water District 36. ✓

Mr. John T. Wilcox, Secretary,
Water Users Association North Fork,
St. Anthony, Idaho.

Dear Sir:

Referring to your communication of the 7th inst. and to our conversation regarding the creation of a separate district covering the North Fork of Snake River and tributaries, I may say that I have taken this matter up with the Attorney General and I am advised by him that under the provisions of Chapters 5608 and 5609, a separate district cannot be created and a watermaster legally elected for the same after the first of February, at which time the time for sending out the notices of election has expired.

The Attorney General even doubts the advisability of us creating a separate district on account of the provisions of the said Chapter 5608. Regarding this matter, however, I may say that I think on mutual agreement by and between the parties that any objection to the creation of this district, or any conflict in its creation with the statutes can be overcome.

I shall be glad to comply with your request to appoint Mr. E. C. Howard as Deputy Watermaster to serve on the North Fork unless prior to the date of such appointment I should receive from you some other recommendation for this place.

Very truly yours,

WGS:MB

Commissioner of Reclamation.

Gentlemen:

We are pleased to hear of your decision in
creating a water district embracing Teton County.

A great number of the water users of this District
has called upon us to explain why ~~a~~ water meeting
to be held on March 1st at Victor, Idaho could not
have been called for Driggs which would be a much
more central place as ~~at~~ least half of the water
users of the Country are located North of Driggs,
while Victor is located nine miles South of Driggs.

200 Would it be possible at this late a date to make
any change in the place of holding of such meeting?
Does District 36C embrace Teton County only as now
established?

Yours truly,
WILKIE & WILKIE,

By R. S. Wilkie

RSW/JM

L-T. Vavin - Jan 14 - Victor -

February 25, 1920.

Re District No. 36-C. ✓

R. S. Wilkie, Attorney,
Driggs, Idaho.

Dear Sir:

In reply to yours of February 20, will state that on January 14, in answer to a letter sent, we received a reply from Mr. L. T. Darian, Water Master in your district during the past season, stating that Victor, Idaho, would be the best place for holding the election of water master in said district; hence notices to this effect were mailed to the various water users in District No. 36-C. It would not be possible, at this late a date, to change the place of holding such meeting.

District 36-C does not comprise the entire county of Teton. I am enclosing you rough sketch showing the approximate location of this district, ^{and} you will note a strip four miles wide on the west of the county is not included in the district.

Yours very truly,

W. G. Swendsen,

Commissioner of
Reclamation,

By

Assistant.

STB/B.

June 3, 1920.

Re: District 36. ✓

Mr. G. Clyde Baldwin,
Federal Building,
Idaho Falls, Idaho.

Dear Sir:

We are enclosing herewith copies of transfers granted in District 36, since last January when we mailed you list of all former transfers. No transfers have been granted in District 34, Blackfoot River since that date.

Very truly yours,

W. G. SWENDSEN,
Commissioner of Reclamation.

CAREY ACT DEVELOPMENT

June 5, 1920.

Mr. W. G. Swendsen,
Commissioner of Reclamation,
Boise, Idaho.

Dear Mr. Swendsen:

I wish to acknowledge receipt of your letter of June 3 with the inclosed copies of recent transfers.

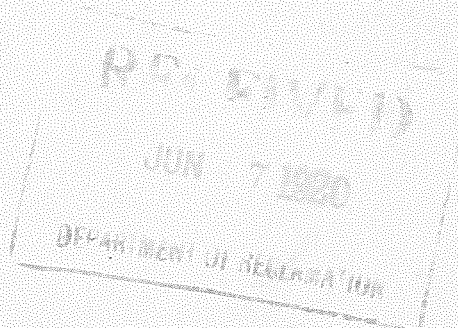

Mr. Arthur Holden, an attorney of Idaho Falls, is very anxious to know whether or not the Teton Basin area has been segregated into a separate district and if so, he desires to know further the name of the present water master for this area.

You will remember that during the past winter we had some correspondence in regard to this matter and after learning from water users on the lower Teton that they had no objection to the creation of a separate district to include the Teton Basin, I recommended that same be allowed. I am unable to find any notification from you, however, to the effect that this has been done; hence, would appreciate the immediate receipt of the information above requested.

Sincerely yours,

H. Clyde Baldwin
Special Deputy.

Re: District 36C. ✓

Mr. G. Clyde Baldwin,
Federal Building,
Idaho Falls, Idaho.

Dear Sir:

In answering yours of June 5th concerning the above numbered district, will state that Mr. J. A. O'Beirn of Tetonla was elected watermaster for this district at the election held on March 1st. He has qualified by filing his bond and oath and certificate of appointment has been issued to him. He has also received instructions to assume his duties, dating from May 28th.

From the above you will note that this district was created separate from District 36 with the provision that the water users in District 36C shall abide by the Snake River decree in the event that it should ever become evident that a strict enforcement of the distribution is necessary in accordance with the decree as it applied to the Teton Basin Area.

Very truly yours,

W. G. SWENDSEN,
Commissioner of Reclamation.

Dear Mr. Swendsen:

Inclosed herewith please find revised statement of charges on account of the draft through the different Milner canals, same including all charges for the present season to the end of July. Copies of this statement have also been forwarded to other interested parties.

Very truly yours,

G. Clyde Baldwin
Special Deputy.

Inc.

Idaho Falls, Idaho,

August 10, 1920.

Mr. R. E. Shepherd, Gen. Mgr.,
Twin Falls North Side Land & Water Co.,
Jerome, Idaho.

Dear Mr. Shepherd:

Inclosed herewith please find statement summarizing storage deliveries to the lower canals for the first ten days of August.

It is possible that I may not have the Gooding deliveries charged in the same way as actual deliveries have been made to the individual contractors but this will make little difference so long as the proper total is entered.

I note that during the last two days the Minidoka canals have not been taking their full quota of storage although their order for reduction in draft would not become effective until Wednesday night or Thursday morning. I called Mr. Banks' attention to this by long distance telephone this morning and he informed me that they were unable to use the water at this time. Hence, if it is wasted past Milner Dam, under the recent agreement, we can properly charge them with the difference between their present actual draft and the amount which they are supposed to be taking. Since this would be the case if this water wasted past Milner Dam, I can see no very serious objection to charging them just the same in the event that your canal and the South Side find it necessary to take an excess quantity, over and above that which you have ordered delivered and if, upon receipt of tomorrow morning's report, it appears likely that this will be the case, I shall telegraph Mr. McConnell to this effect.

Sincerely yours,

G. Clyde Baldwin
Special Deputy.

DEPARTMENT OF REVENUE

Mr. F. A. Banks,
C/o Remington Hotel,
American Falls, Idaho.

Dear Mr. Banks:

Inclosed herewith I am forwarding blueprints showing storage draft in the upper valley to and including today's deliveries, also summary of storage draft in the lower valley for the month of August. Summary of July deliveries to all the Twin Falls canals was forwarded about a week ago.

In accordance with your request, hereafter statement of individual storage deliveries to the canals in the upper valley will be prepared and submitted daily although these statements may be a day later than the regular daily report.

Sincerely yours,

Georgie Baldwin
Special Deputy.

CC: W.G. Swendsen.

JACKSON LAKE STORAGE

During the week ended October 9, 1920 the precipitation at Moran, at the outlet of Jackson Lake, amounted to 0.30 of a foot, while during the preceding week the total precipitation amounted to ~~0.11~~ 0.11 of a foot. During the corresponding periods in ¹⁹¹⁹~~1920~~ the precipitation was as follows:

For week ended October 2;	1919-	-	-	-	-	-	1.41	of a foot
" " " "	9,	1919-	-	-	-	-	0.38	of a foot

On October the 9th, Jackson Lake reached an elevation of 6737.55 corresponding to a storage of 154,410 ~~acre-feet~~ acre-feet.

On the corresponding date in 1919 there was 3100 acre-feet of storage in the reservoir.

The snow which fell late in September has melted from the Teton pass and from Cascade and Lewis Lake divides.

Mr. Markham reports from Moran that he is engaged at present in placing large rock as riprap in the river/^{channel} on the north side below the gates where there has been a tendency to cut.
