## **SUMMARY**

**WATER DISTRICT 110**  
**2012 WATERMASTER REPORT**

Measurements were conducted by Water District 110 staff in accordance with the Water District 110 Resolutions and IDWR guidelines. Specific measurement information for the diversions within the district can be found in IDWR's WMIS database. Water district staff also took periodic ground water level measurements at wells scattered throughout the district. This data is stored in IDWR's file and is available to the public. In addition to measurement activities, water district staff reviewed aerial photos and diversion records to identify any enforcement issues within the district and contacted water users as necessary to address the apparent violations. Financial reports, minutes, resolutions, and assessment records are summarized and attached in separate documents. – James Cefalo
