Subject: RE: Crane Creek Reservoir

Jacque:

Attached is the list of dams requested. Prior, the Little dam had a priority of 1890's but it looks like it is now 1918 under the SRBA decree making it junior. This is again my best shot on the reservoirs. If there are other reservoirs that jump out let me know.

If the Board decides to make a water call on the junior storage rights, the call would have to be submitted to the Department Director for consideration.

Keep in touch,

John W.

Subject: Crane Creek Reservoir

Good afternoon, John,

I hope you had a good Memorial weekend. We stayed home and just lounged around.

First of all, thank you for having all the information I requested last time we spoke forwarded via e-mail. It was really helpful and I appreciate your help. Thus, I'm asking for your help again. Could you provide me with a list of the names and addresses of the people who have dams ahead of the reservoir on Hog Creek, North Crane, South Crane, Milk Creek, and any of the others streams that flow into the reservoir?

We are planning a meeting in Midvale with all the users who take their water directly from the creeks or pump directly from the reservoir as well as those who have put in the dams. We plan to have Brandy Horton there as well. We merely want to explain to the users what our water rights are and what their rights are and in what order. We want to explain that we have no intention of changing their water rights, but merely make sure water is used in the proper order and ordered when necessary.

Those who pump water directly from the reservoir who do not already have an agreement with the Board, will be requested to enter into one allowing them to take their storage water out before it flows into the reservoir.

As far as those with dams whose rights are far inferior to the Boards, I'm hopeful that we can come to some agreement with them that they don't start diverting the water until the reservoir reaches a certain level. When the reservoir reaches a point where we are certain that we will have enough for the current irrigation season, even though the reservoir has not filled, we would have no objection to them diverting the water into their dams, but we do have an obligation to protect the water owned by the users.

As you requested when I asked you to write those letter after we got our decree, we want to be reasonable and work with the other users. I think perhaps it would be much easier for them to not divert the water in the first place than to have to release the water once it is stored. We're already worried about next year inasmuch as the reservoir didn't fill this year. So far we've lucked out in that we haven't had to start using the storage water down here in the Weiser area as yet, but the river is dropping rapidly and I know we'll be starting the first part of June.

I finally have three users who use directly from the reservoir or streams actually ordering water, but in talking to them, they just don't understand the priority of things. One said well, I have a 1967 right so I can use all the water I want. Think it's education time and that's why we want to have a meeting.

When I have a date, place and time, if you would like to come, we'd love to have you there, but know how busy you are.

Thank you in advance for your help.

Jacque Wray, Secretary
Crane Creek Reservoir Administration Board

Water Right Report 67-11763

Comments:

1. csaxton 8/8/2006 Source (1)

Comment: Source was defined as un-named stream. It is actually called Cabin Creek. Source did not actually change so no C03.

2. csaxton 8/8/2006 Source (2)

Comment: Source claimed as Crane Creek, North Fork - trib to Weiser. USGS defines source as North Crane Creek trib to Crane Creek. Recommend per USGS. Source did not actually change.

3. csaxton 8/8/2006 Copied From Claim (1)

Comment: PUMP NEAR HOUSE WAS PLACED IN A DIVERSION DAM 35 YEARS AGO, FIRST WITH PTO ON THE TRACTOR AND NOW WITH ELECTRICITY WITH ITS AVAILABILITY.

THIS RIGHT IS COMBINED FROM 67-02382 AND 67-02383 BOTH OF WHICH HAD THE SAME DATE OF PRIORITY, ONE FOR FLOW RIGHT, ONE FOR THE STORAGE WATER.

CABIN CREEK WAS ADDED TO THIS CLAIM VIA THE AMENDMENT IN LIGHT OF THE PROOF OF BENEFICIAL USE THAT WAS SUBMITTED. THE SUBSEQUENT LICENSE FOR 67-02382 DID NOT INCLUDE THIS SOURCE FOR THE REASON THAT PERMIT DID NOT HAVE IT AS A SOURCE. NO LICENSE WAS EVER ISSUED FOR 67-02383 THAT DID HAVE CABIN CREEK AS A SOURCE, BUT A MEMORANDUM IN 1968 DIRECTED THE STORAGE COMPONENT WAS CONSIDERED COVERED BY THE PROOF FOR 67-02382, "THE SAME AS IF PROOFS HAD BEEN SUBMITTED AND CERTIFICATE AND LICENSE ISSUED." THE REPORT OF THE ENGINEER CONFIRMS THE DIVERSION OF CABIN CREEK WATER TO THE RESERVOIR.

4. csaxton 8/8/2006 Copied From Claim (2)

Comment: Amended claim received 3/16/2004. DB

5. csaxton 8/8/2006 Copied From Claim (3)

Comment: Amended POU acres. 30 acres in the W 1/2 of S-35 should be in S-36, per ownership change review. Appears to have been data entered incorrectly. DB 3/1/2004

6. csaxton 8/8/2006 Storage capacity

Comment: Storage acre foot volume recommended As claimed. WR record on data base shows 280 af of storage. Dam safety report shows 140 af without the flashboards, but with the flashboards then up to 200 af. Despite this difference recommend 224 as claimed because it is still less than licensed.

TO: Water Storage Water Right Holders

RE: Calls for Water Storage by Senior Water Storage Rights on Crane Creek

Dear Water Storage Owner:

This letter is to provide you general information on calls for water by senior storage water right holders on Crane Creek. Although the possibility of a call for water is remote, I want you to be informed of the process.

With the exception of a few water rights, the majority of water rights in the Weiser Basin have now been decreed in the Snake River Basin Adjudication process. Your reservoir is located within the Weiser River Water District #67 which regulates the basin surface water. The District operations are also under the supervision of our state agency.

Distribution of water in Idaho is managed by the water right priority date. The Watermaster delivers available water to users by priority date order with the most senior (oldest) first. In a drought/water short situation a senior water right holder may make a water call to satisfy their water short situation. The water district watermaster would in turn curtail junior rights to fulfill the senior water right. For more details on water district operations and distribution of water in Idaho, please review Idaho Code, Title 42, Chapter 6, (available on our website www.idwr.idaho.gov).

Recently, I had conversations with stakeholders downstream that hold early 1890's priority storage water rights. During a water short/drought year, they could make a water call for storage water held by junior rights specifically when their reservoir is not going to fill. Keep in mind, a water call is complex and requires our Director's review/approval. If approved, the District Watermaster may instruct you to curtail diversion and open your reservoir outlet gate to release storage downstream.

Enclosed is a proof of your water right that lists priority date and key parameters for your reference.

If you have questions or concerns, I would be glad to discuss them with you, please contact me at the Western Regional Office, phone 334-2190.

Sincerely,

John Westra, Manager
