

**WATER DISTRIBUTION OF BOISE RIVER
DISTRICT NO. 12-A
1940**

DEPARTMENT OF RECLAMATION

CHARTS

REPORT ON

CANAL DELIVERIES FROM

THE BOISE RIVER, showing usual diversions.

BOISE RIVER

1-8, 2-8, 2-0, 2-0, 1-8, 2-0, 2-0, 2-0, 2-1, 2-1, and
2-0, daily discharge of AND se River during 46-year period.

DIFFERENT FEATURES AFFECTING THESE DELIVERIES FOR THE IRRIGATION SEASON

OF 1940

Tables showing monthly and annual flow of Boise River in
cubic feet for the irrigation years beginning 1894-1895.

(DATA FOR THIS REPORT GATHERED BY THE
WRITER WHILE ACTING IN THE CAPACITY OF ALL
WATERMASTER OF THE BOISE RIVER AND OF 1940.
SPECIAL DEPUTY IN CHARGE OF THE DIS-
TRIBUTION OF STORAGE WATER FROM ARROW- total
ROCK RESERVOIR) Irrigation season of 1940.

(COOPERATIVE DATA ALSO FURNISHED BY THE or all
UNITED STATES BUREAU OF RECLAMATION AND
THE UNITED STATES GEOLOGICAL SURVEY)

Tables showing daily discharge of all principal tributary
rivers feeding water to Boise River below More's Creek
in irrigation season of 1940.

Tables showing Boise River at Diversion Dam, canal
diverted, tributary ~~BY~~, seepage gain and net gain
between intake fast and average daily flow in 24
hour second feet for W. F. WELSH season of 1940.

Tables for WATERMASTER, BOISE RIVER showing river
at Diversion Dam, canal deliveries, tributary gain,
seepage gain, and net gain between Diversion Dam and
Morrison intakes in acre feet and average daily flow in
24 hour second feet for irrigation season of 1940.

Tables for section 2 of Boise River showing river
at More's, canal deliveries, tributary gain, seepage gain
and net gain between Star and Morris by mouth in acre
feet and average daily flow in 24 hour second feet for
irrigation season of 1940.

Tables showing storage under all canals in the Boise

13. Tables for Boise Valley canals showing acre feet diverted, acre feet irrigated and acre feet per acre diverted for the season of 1940.
1. Map of Boise River, showing canal diversions.
2. 2-A, 2-B, 2-C, 2-D, 2-E, 2-F, 2-G, 2-H, 2-I, 2-J, and 2-K, daily discharge of Boise River during 46-year period.
3. Table showing mean daily flow of Boise River for a 42-year period.
4. Table showing monthly and annual flow of Boise River in acre feet for the irrigation years beginning 1894-1895.
5. 5-A, 5-B, 5-C, 5-D, and 5-E, daily discharge of all canals (Sections 1 and 2) for irrigation season of 1940.
6. Summary table in acre feet showing monthly and total canal diversions for the irrigation season of 1940.
7. Summary table showing total annual diversions for all Boise Valley Canals beginning 1916.
8. 8-A and 8-B, daily discharge of all principal tributary streams feeding water to Boise River below More's Creek for irrigation season of 1940.
9. Two tables showing Boise River at Diversion Dam, canal deliveries, tributary gain, seepage gain and net gain by months in acre feet and average daily flow in 24 hour second feet for the irrigation season of 1940.
10. Two tables for section 1 of Boise River showing river at Diversion Dam, canal deliveries, tributary gain, seepage gain, and net gain between Diversion Dam and Star by months in acre feet and average daily flow in 24 hour second feet for irrigation season of 1940.
11. Two tables for section 2 of Boise River showing river at Star, canal deliveries, tributary gain, seepage gain and net gain between Star and Notus by months in acre feet and average daily flow in 24 hour second feet for irrigation season of 1940.
12. Table showing acreage under all canals in the Boise Valley.

CHARTS
(Continued)

13. Table for Boise Valley canals showing acre feet diverted, acres irrigated and acre feet per acre diverted for the season of 1940.
14. Table showing acre feet per acre diverted by 18 canals from Boise River for each irrigation season beginning in 1916.
15. Summary table showing diversions from Boise River in acre feet, acre feet per acre, and the rate in miner's inches per acre for 18 Boise Valley canals for each month of the irrigation season during the years 1916 to 1940 inclusive; also, the per cent diverted during each month.
16. Chart showing average headgate duty of water for 18 Boise Valley Canals.
17. Table showing total canal diversions and total discharge of drainage canals in Drainage District No. 2 for the irrigation season of 1940.
18. Summary table of return flow to Boise River between More's Creek and Notus beginning 1914.
19. Two tables showing total discharge of all drainage canals in Drainage Districts Nos. 3 and 4, for the irrigation season of 1940.
20. 20-A, 20-B, revised area and capacity table for Arrowrock Reservoir.
21. Table showing additional decrees on Boise River (Intervenors in the Stewart Decree), giving priority number, date and amount decreed.
22. Table showing change in point of diversion of decreed rights on Boise River.
23. Table showing transfers of decreed rights on Boise River.
24. Condensed table of Stewart Decree showing dates of priority and amounts decreed.
25. Stewart Decree grouped under canal headings.
26. 26-A, 26-B, 26-C, tables showing decreed rights (Stewart Decree) and natural flow at Diversion Dam necessary to fill same. 26-D, table showing decreed rights (Bryan Decree) and natural flow in second feet necessary at Diversion to fill same.

Mention should also be made of the splendid assistance and cooperation rendered by the Commissioner of Reclamation in furnishing office room and equipment and the many courtesies extended during the year by the personnel of this office.

The Boise River organization includes an Advisory Committee of nine members, a watermaster, and one assistant watermaster during the irrigation season on the lower end of the Boise River, and one part-time secretary and stenographer.

The old water rights from the Boise River are included in the decree in the case of FARMERS COOPERATIVE DITCH COMPANY, a Corporation, vs. RIVERSIDE IRRIGATION DISTRICT LTD., a Corporation, et al., in March. This Advisory Committee represents various sections of the Boise Valley. In addition to preparing and recommending a budget for the annual meeting, it meets from time to time to consider various questions affecting the water-users and the water rights from the Boise River. It also considers and assists in determining questions of policy having to do with the operation of Water District 12-A. This committee for 1940 was as follows:

J. M. Lampert, Chairman
Ed Straus, Secretary
Ernest Anderson
J. C. Bell
T. M. DeCoursey
John Demond
W. T. Evans
H. V. Rice
I. A. Weaver

Cooperative assistance is rendered by the Board of Control in current meter work, compiling records, maintaining phone to Arrowrock, etc., for which proper remuneration is given.

Cooperative assistance is rendered by the U. S. Geological Survey in current meter work and compiling records of Boise River at Dowling and Notuc, South Fork near Smiths Prairie, Middle Fork at Twin Springs and More's Creek at Call Bridge.

flow of the waters in the Boise River decreases below the amount mentioned should also be made of the splendid assistance and necessary to supply said 75 per cent of the water rights as decreed cooperation rendered by the Commissioner of Reclamation in furnishing office room and equipment and the many courtesies extended during and proceeding to the earliest, as aforesaid, shall be recognized the year by the personnel of this office.

reduced to 50 per cent of the amount specified in said Stewart Decree

DECREE

reduced to 40 per cent of the amount specified in said Stewart Decree is the old water rights from the Boise River are included in the hereby fixed and determined as the highest duty of water for year decree in the case of FARMERS COOPERATIVE DITCH COMPANY, a Corpor-
1919.

ation, vs. RIVERSIDE IRRIGATION DISTRICT LTD., a Corporation, et al.,

Judge M. L. BRYAN signed a decree on February 1, 1919, in the case of FARMERS IRRIGATION DISTRICT vs. AND C. LTD., et al., commonly referred to as the "Stewart Decree". This case has been appealed to the Supreme Court and affirmed as to priority and acreage, but remanded to the District Court for additional evidence on the question of duty of water, where it has been pending for a number of years. A temporary order providing for the distribution of the waters of Boise River, was issued by that Court from Year to Year. In 1919 this order was made continuing. This same order was used for 1940. It provided for the distribution of the waters from Boise River in the following manner, to-wit: "The various rights, as adjudicated in the so-called "Stewart Decree" shall receive 100 per cent, until the natural flow of the waters of Boise River shall decrease or until all the rights in said decree cannot receive 100 per cent, at which time the various rights as adjudicated in the so-called "Stewart Decree" shall first be cut to 75 per cent of the amount of water decreed by the Stewart Decree as the natural flow of the Boise River decreases, beginning with the latest rights and proceeding to the earliest rights in the order fixed in said "Stewart Decree", and after all rights shall have been reduced to 75 per cent of the amount fixed in the Stewart Decree, should the natural

flow necessary at Diversion Dam to fill the various rights in the flow of the waters in the Boise River decrease below the amount Stewart Decree, including intervening, to 60 per cent, 75 per cent necessary to supply said 75 per cent of the water rights as decreed and 100 per cent. In computing the amounts necessary to fill the various rights in this table it is assumed that the return flow will fill latest and proceeding to the earliest, as aforesaid, shall be reduced to 60 per cent of the amount specified in said Stewart Decree assuming that the return flow to section 2 and 3 of the River would and 60 per cent of the amount specified in said Stewart Decree is hereby fixed and determined as the highest duty of water for the year River to 75 per cent of the amount decreed, 1919."

Chart 26-D is a table showing the decreed rights contained in Judge Ed. L. BRYAN signed a decree on February 14, 1929, in the case of PIONEER IRRIGATION DISTRICT vs. AMERICAN DITCH ASSOCIATION, et al., commonly referred to as the "FLOOD WATER SUIT", or "BRYAN DECREE". All rights decreed in this case are made subsequent to the Stewart Decree. This case was appealed to the Supreme Court where it was upheld as to some of the rights involved but remanded to the District Court for retrial on the duty of water, also for the purpose of determining certain other rights.

On January 30, 1932, Judge O. E. SUTTON signed an order temporarily establishing the various rights in the Flood Water Suit and providing for a duty of water similar to the "sliding scale" in the "Stewart Decree".

This order remained in effect during the season of 1940.

Chart 26, 26A, 26B, 26C, relate to the Stewart Decree and show the following information: number of priority, name to whom decree was issued, section of River in which point of diversion is located, amount of decree in second feet showing 100 per cent, 75 per cent, and 60 per cent. It also shows the amount of natural

flow necessary at Diversion Dam to fill the various rights in the Stewart Decree, including intervenors, to 60 per cent, 75 per cent and 100 per cent. In computing the amounts necessary to fill the various rights in this table it is assumed that the return flow will fill the first 32 rights to 60 per cent of the amount decreed. It is also assumed that the return flow to section 2 and 3 of the River would fill the rights with points of diversions in those sections of the River to 75 per cent of the amount decree.

Chart 26-D is a table showing the decreed rights contained in the Bryan Decree or Flood Water Decree. It shows the date of priority, name of water users to whom decree was issued, amount of decree in second feet showing 100 per cent, 75 per cent and 60 per cent. It also shows the amount of natural flow necessary at Diversion Dam to fill the various rights in the Flood Water Decree to 60 per cent, 75 per cent and 100 per cent. Charts 5 to 5-N, inclusive, show the canal diversions from the

BOISE RIVER RUNOFF

The total runoff of the Boise River for the irrigation year of 1939--40 was 1,612,348 acre feet. There was approximately 400,000 acre feet of water wasted during the winter and spring months. Due to an early run-off it was necessary to start using Arrowrock storage and also to commence river regulations on June 8th. This condition resulted in a severe shortage during the later summer and fall months, but it was released considerable, however, by the rains which occurred during the months of September and October.

The same method that was employed for the past several seasons of arriving at the daily natural flow of the Boise River was used during the season of 1940.

A study of the Charts 2, 2-K inclusive, will give a comparison

of the daily discharge of the Boise River for the full 12-month period, for each year from 1895 to 1940, inclusive.

Chart 3 is a table showing the mean daily flow of the Boise River for a 41-year period.

Chart 4 is a table compiled from previous charts, showing the total monthly and annual flow of the Boise River in acre feet for the irrigation years beginning 1894-1895.

Canal regulations were quite similar to previous years. As stated above, they commenced on June 8th and continued throughout the remainder of the season. One regular assistant was employed during this period on the lower end of the River and also a special assistant was employed to regulate the diversions on, and adjacent to, Eagle Island during the special runs made by the Phyllis canal.

Charts 5 to 5-E, inclusive, show the canal diversions from the period from April 1, to September 30.

Chart 6 shows the monthly and total diversions for the Boise River for the irrigation season of 1940.

Chart 7 is a table showing the return flow, canal diversions, winter diversions and winter waste for the entire Boise Valley for each season beginning 1916.

Data was gathered and compiled on all principal tributary streams feeding water to Boise River below More's Creek.

Charts 8, 8-A, and 8-B, show the daily discharge of the tributary streams.

for the period July 1 to September 30, inclusive. The average

gain to this section during this period was 216 second feet.

Chart 9 shows the total flow of the Boise River passing More's

SECTION II
Creek, canal deliveries, and gain to the river by months in acre feet, and also average daily flow for each month during the season of 1940.

There are 8 canals diverting water from this section, with an aggregate decree right of 540 second feet. Usually it is necessary

River Fluctuations were more severe during the season of 1940 than for many years past. The cause of this has not been definitely determined but as suggested in previous reports, a gage in the River below Barber pond with a recorder placed in the power plant at Barber where the power plant operator could operate and regulate the flow passing the Barber Dam would probably be of considerable assistance.

Fluctuations caused by so many factors beyond the control of the Watermaster always have been and always will be a menacing problem from the standpoint of maintaining a steady flow of water at the lower end of the Boise River.

CLASSIFICATION OF RIVER

The Boise River naturally divides itself into three separate and distinct parts. Section I includes the part of the River which lies between the Government Diversion Dam and the Caldwell High Line Canal about a mile below the town of Star. Section II includes that section which lies between the Caldwell High Line Canal and the Notus Bridge. Section III includes that part of the River between the Notus Bridge and Snake River.

SECTION I

Chart 10 shows the condition that existed in this section during the period July 1 to September 30, inclusive. The average gain to this section during the period was 216 second feet.

over the valley are changing. SECTION II

Chart 11 is a table showing the condition that existed in this section during the period July 1 to September 30, inclusive.

There are 8 canals diverting water from this section, with an aggregate decreed right of 540 second feet. Usually it is necessary to run "live water", or natural flow past the headgate of the Caldwell High Line Canal and into this section of the river during the spring months and until the rights in the Stewart Decree are cut to 75 per cent. After that time the river is dried completely at the headgate of the Caldwell High Line Canal and these 8 canals diverting from Section II of the river are supplied entirely from return flow.

The average return flow to this section during the period was 413 second feet.

SECTION III

The return flow of Section III was sufficient to take care of all rights in this section during the entire season and, therefore, no regulations were required in this section.

DUTY OF WATER

The following statement, a repetition from previous reports, is again included in this report.

"The determination of the duty of water in both the 'Stewart Decree' and the 'Bryan Decree' is still pending in the District Court at Caldwell, Idaho.

"In the opinion of the writer it is doubtful if a fixed and established duty of water will ever prove satisfactory for the Boise Valley. A duty of water that would take care of crop requirements for one season would be inadequate for another. Seasonal conditions are continually changing. Likewise, conditions

over the valley are changing. Our knowledge and methods of irrigation are constantly improving with each year of experience.

"An arbitrary duty should not be established without taking into consideration the inherent rights of all those persons who are dependent upon this great natural resource for their subsistence.

"An arbitrary duty, if established, should be subject to change from time to time. What that duty should be, I am not prepared to say."

The temporary court order, providing for the "sliding scale cuts", under which the Boise River has been operated for more than twenty years, has proved very satisfactory when the entire valley is taken into consideration. The temporary court order is given in full on page 2 of this report.

Chart 6 shows the amount in acre feet diverted each month, and the total amount diverted each season for the canals of the Boise Valley.

Chart 13 is a table showing the total amount diverted, the acres irrigated and the acre feet per acre diverted from the river by the various canals of the Boise Valley. The amount shown under column "Acre Feet per Acre" cannot be construed as a duty of water for the lands of the Boise Valley, due to the large and varying quantities of return flow water picked up by many of these canals.

Chart 14 is a summary table for the years 1916 and 1940, inclusive, for the diversions of 18 Boise Valley Canals, showing the acre feet per acre diverted.

Chart 15 is a table for 18 Boise Valley canals for the period from 1916 and 1940, inclusive, showing the total acre feet.

A comparison of charts 17 and 19 discloses the following with reference to drainage discharges:

diverted, acre feet per acre, rate in miner's inches per acre, and per cent per month.

Chart 16 shows the average headgate duty of water for 18 Boise Valley canals.

DRAINAGE

Chart 17 shows the total canal diversions and the total drainage discharge for Drainage District No. 2 for the season of 1940.

Drainage District No. 3, frequently referred to as the South Boise Drainage District, situated in South Boise. This district has four drains or outlets emptying into Boise River, and comprises an area of approximately 4200 acres.

Drainage District No. 4, frequently referred to as the Thurman Drain, comprising an area of approximately 2500 acres, is situated south of the Boise River, and opposite the town of Eagle. This district has only one outlet to the river.

Chart 19 is a table showing the discharge of all drains in Drainage Districts Nos. 3 and 4.

Chart 18 is a table showing the average return flow to the Boise River for the period from 1914 to 1940, inclusive.

CHANGES IN POINTS OF DIVERSSIONS

Chart No. 22 is a table showing the changes in the points of diversion of the diverted rights on Boise River, as recorded in the office of the Commission -9- in December.

A comparison of charts 17 and 19 discloses the following with reference to drainage discharges:

Year	Drainage Districts		
	No. 2	No. 3	No. 4
1922	2.90		
1923	2.99		
1924	2.59		
1925	2.42	1.43	2.66
1926	1.97	1.03	2.07
1927	2.62	1.29	2.70
1928	2.78	1.15	2.55
1929	2.27	1.16	2.02
1930	2.61	.96	2.45
1931	1.99	.86	1.82
1932	2.36	1.25	2.03
1933	2.36	1.18	2.26
1934	2.18	.89	2.34
1935	2.27	1.04	2.10
1936	2.55	1.43	2.12
1937	2.37	.83	2.36
1938	2.84	.83	2.25
1939	2.32	1.00	3.60
1940	2.51	1.01	2.36

ARROWROCK CAPACITY

Chart No. 20, 20-A, and 20-B show the W. G. Steward capacity table for Arrowrock Reservoir, as revised by W. H. Tuller, Project Manager, Boise Project.

ADDITIONAL DECREES

Chart No. 21 is a table showing the additional decrees obtained by intervenors in the case of the Farmers Cooperative Ditch Company plaintiff, vs. Riverside Irrigation District, Ltd., et al, defendants which is commonly referred to as the "Stewart Decree".

CHANGE IN POINT OF DIVERSIONS

Chart No. 22 is a table showing the changes in the points of diversions of the decreed rights on Boise River, as recorded in the office of the Commissioner of Reclamation.

TRANSFERS

Chart No. 23 is a table showing the transfers of decreed rights on Boise River as recorded in the office of the Commissioner of Reclamation.

STEWART DECREE

Chart No. 24 is a condensed table of the Stewart Decree. A small circle at the left of the date of priority shows that the right is supplied by "return flow".

Charts Nos. 26, 26-A, 26-B, and 26-C are tables showing decreed rights as contained in Stewart Decree, and the natural flow at Diversion Dam necessary to fill the same.

STEWART AND BRYAN DECREES GROUPED BY CANAL HEADINGS

This table, chart No. 25, has been compiled for the benefit of those canal companies who have more than one date of priority. This table shows the date and amount of each priority and the total amount decreed.

BRYAN DECREE

Chart No. 26-D is a table showing decreed rights contained in Bryan Decree and the natural flow necessary at Diversion Dam to fill the same.

TRANSFERS

Chart No. 23 is a table showing the transfers of decreed rights on Boise River as recorded in the office of the Commissioner of Reclamation.

STEWART DECREE

Chart No. 24 is a condensed table of the Stewart Decree. A small circle at the left of the date of priority shows that the right is supplied by "return flow".

Charts Nos. 26, 26-A, 26-B, and 26-C are tables showing decreed rights as contained in Stewart Decree, and the natural flow at Diversion Dam necessary to fill the same.

STEWART AND BRYAN DECREES GROUPED BY CANAL HEADINGS

This table, chart No. 25, has been compiled for the benefit of those canal companies who have more than one date of priority. This table shows the date and amount of each priority and the total amount decreed.

BRYAN DECREE

Chart No. 26-D is a table showing decreed rights contained in Bryan Decree and the natural flow necessary at Diversion Dam to fill the same.

COST REPORT - 1940

Watermaster Salary	\$ 5250.00
Assistant Watermaster Salary	476.05

CONCLUSION

1. That an Advisory Committee with authority to represent the water users and to advise with the watermaster is very beneficial and helpful, and should be continued.
2. That the records and data as compiled in the watermaster's reports for more than twenty-five years should be continued.
3. That the river naturally divided itself into three sections during the low-water period.
4. That the river can be completely dried up at the lower end of Section I without injury to the rights in Section II during the low-water period of each irrigation year.
5. That the return flow is a vital factor and must be considered in the operation of the river.
6. That all tributary streams should be considered as a part of the available water supply of the Boise River.
7. That the transfer of water rights from Section II to Section I is injurious to the rights already existing in Section I.
8. That the construction of drainage systems in the Boise Valley has changed the irrigation requirements within these districts.
9. That by reason of the construction of these drainage canals, certain waters which were formerly lost through seepage, evaporation and deep percolation, or reached the river during the winter months, are probably now reaching the river during the

irrigation season and made available for irrigation purposes.

10. That the question of watershed protection is of vital importance to the water users of the Boise Valley.

11. That a reasonable program of research work should be continued by U. S. Forest Service on the Boise River watershed for the purpose of determining the best manner that will not be injurious to the inherent rights of the water users who are dependent upon this resource for a livelihood.

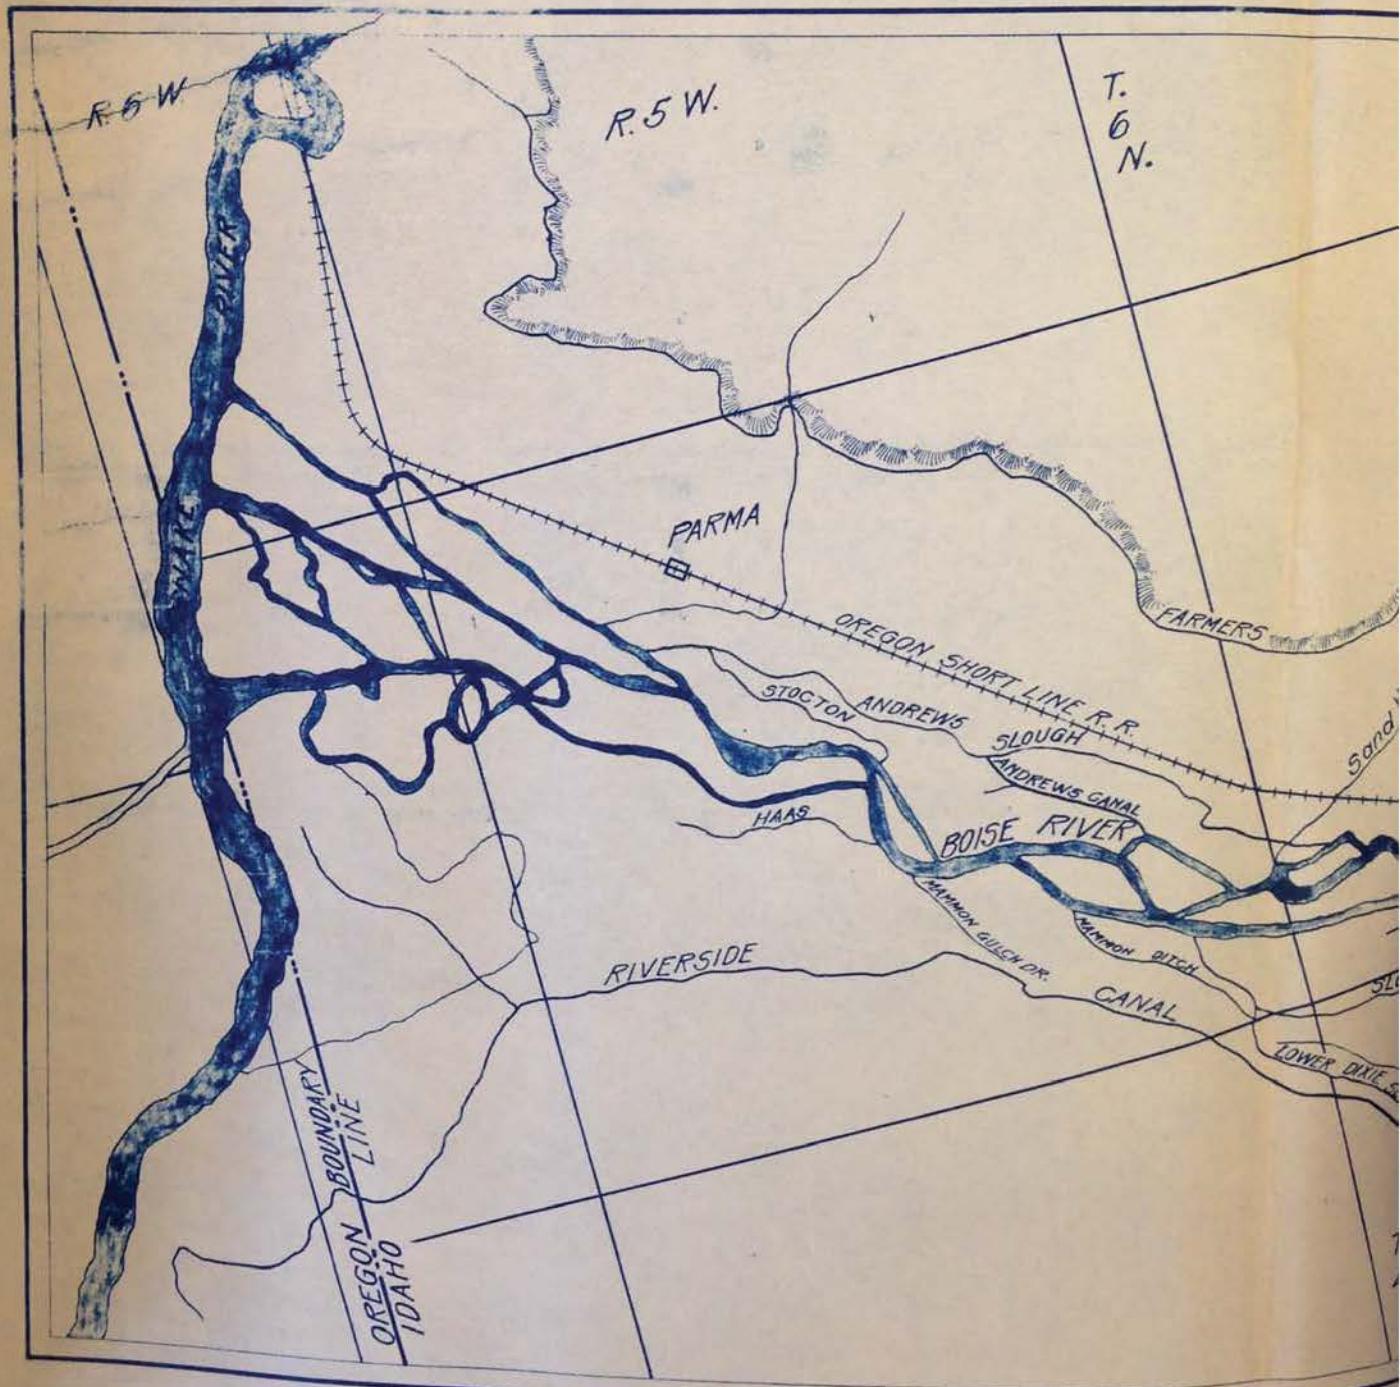

12. That the knowledge and data upon which a permanent duty of water must necessarily be based, are constantly being improved and increased.

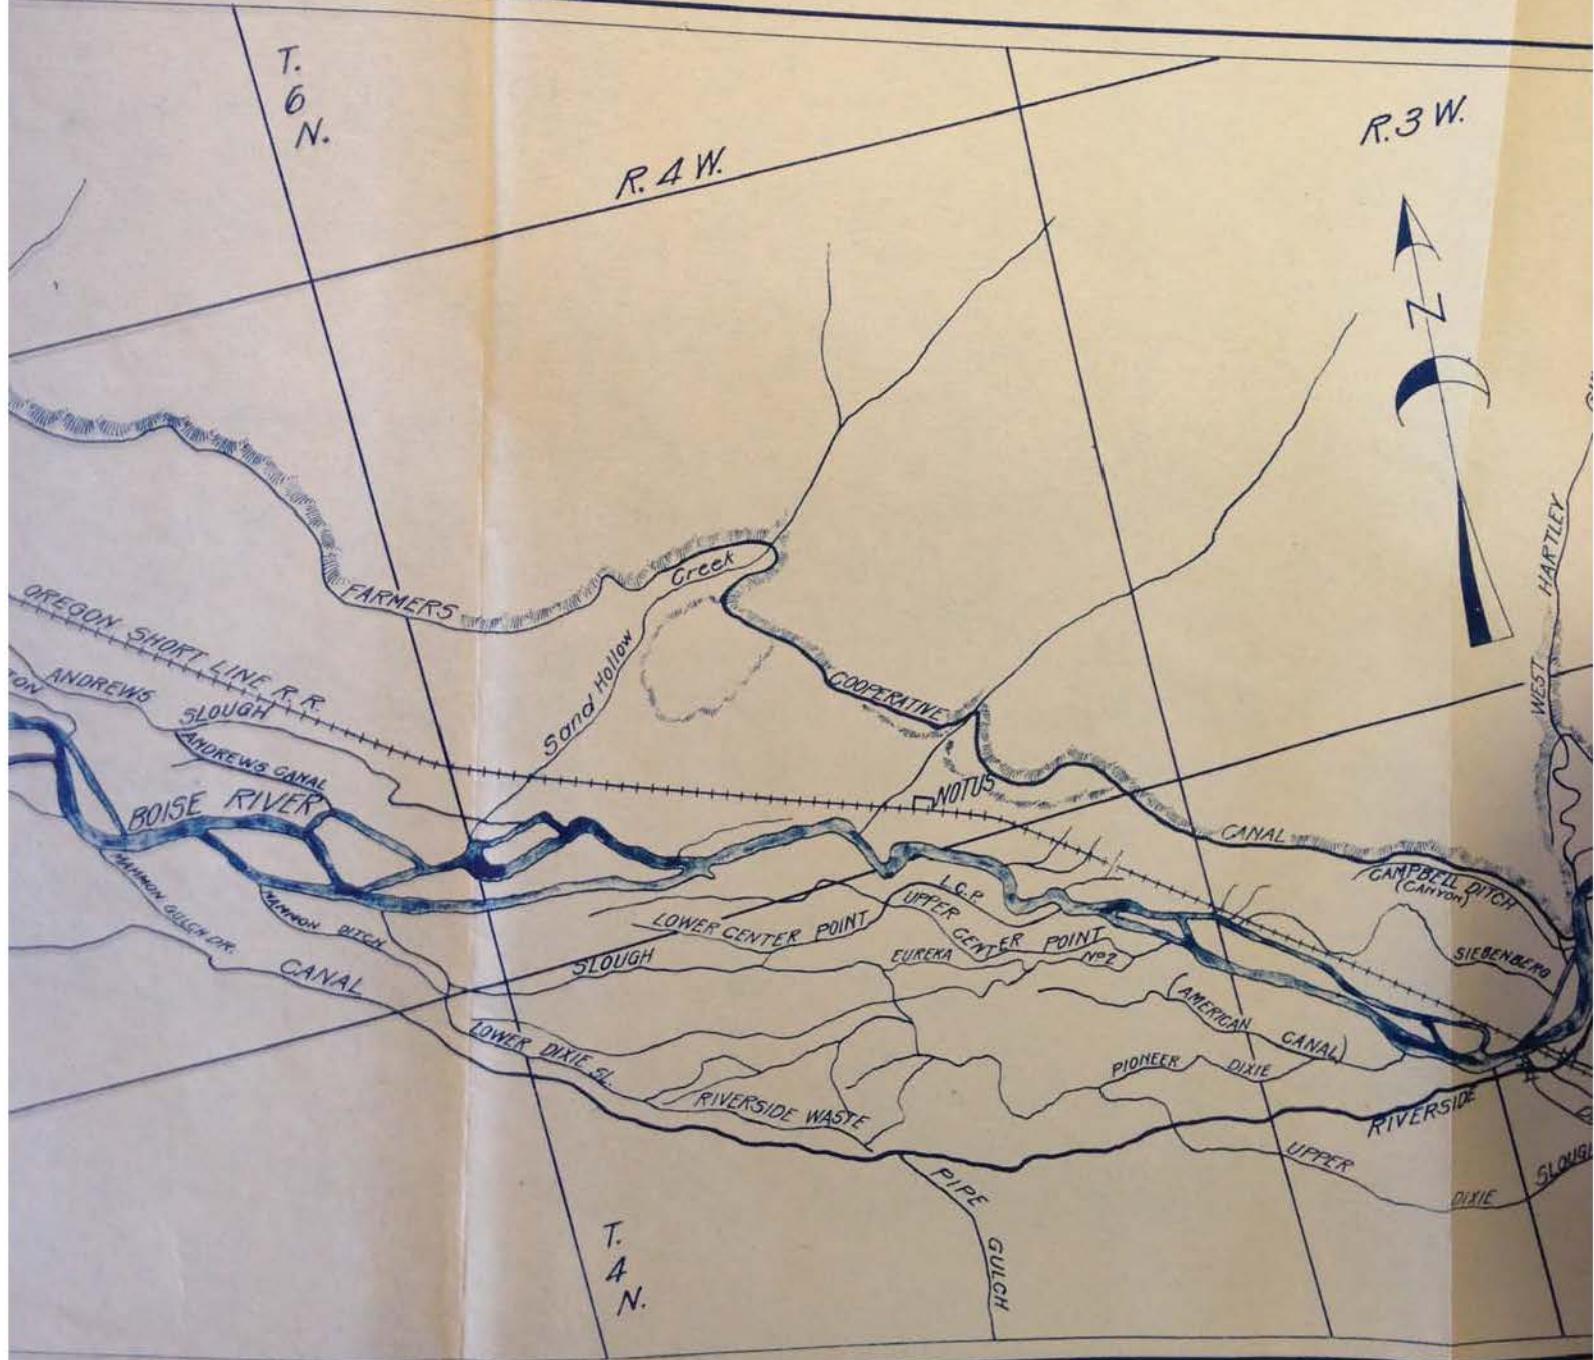

13. That an arbitrary duty of water, if established, should be subject to change from time to time.

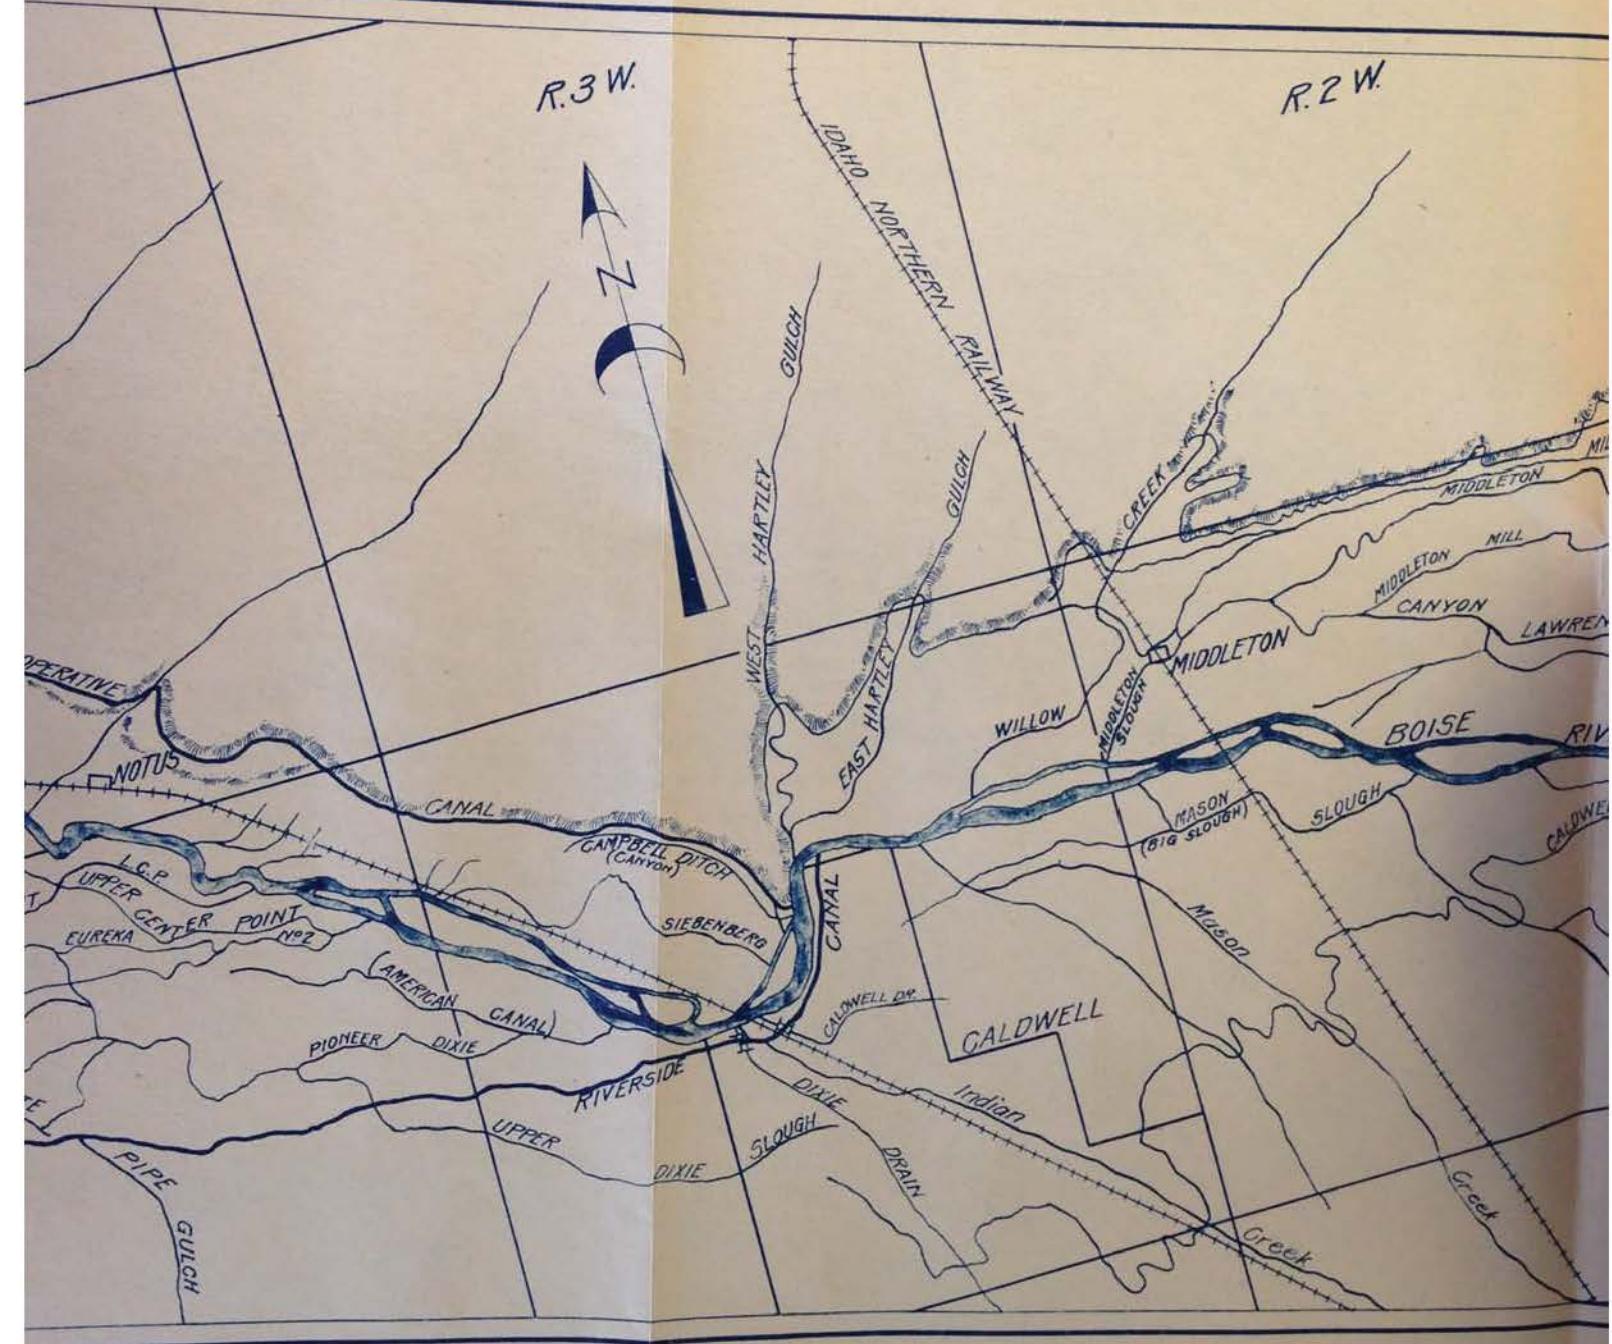

14. That the temporary "Court Orders", under which the Boise River has been operated for more than twenty years, have proven very satisfactory to the Boise Valley as a whole.

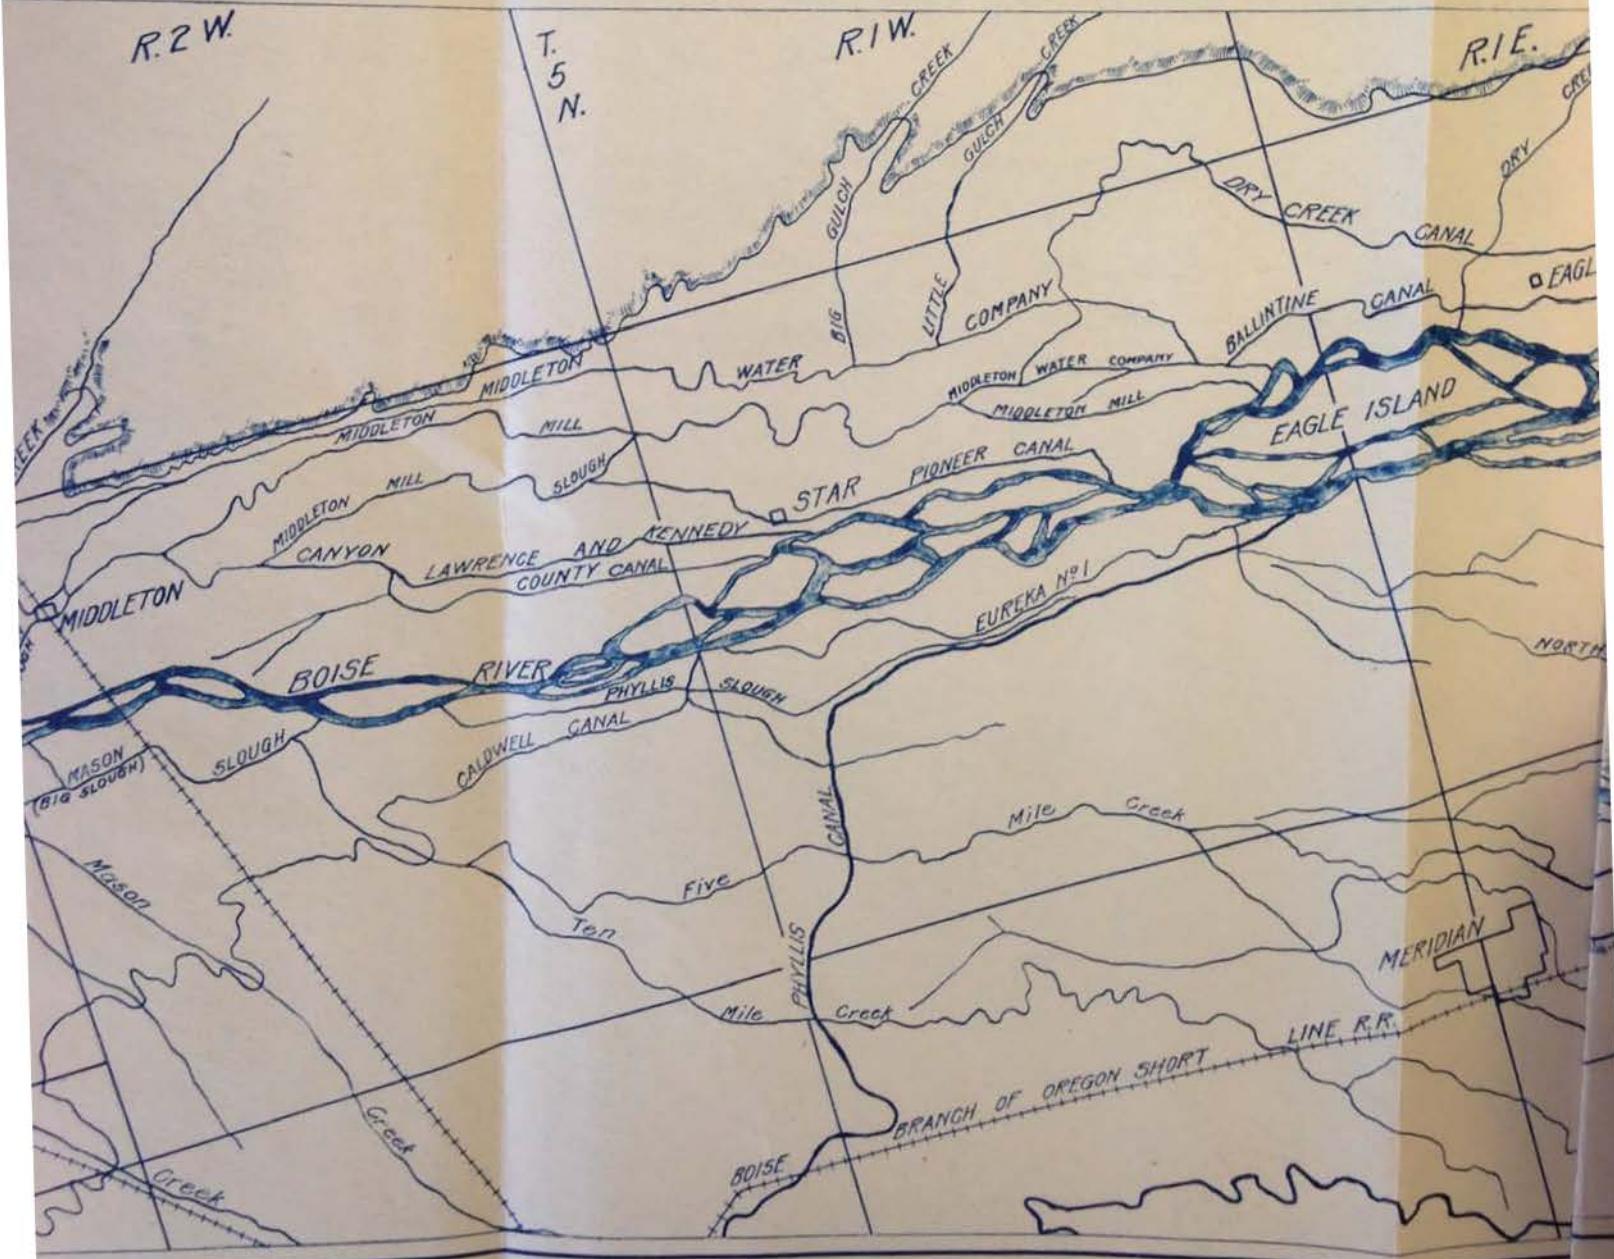

15. That approximately two-thirds of the entire Boise Valley is badly in need of supplemental water.

GRAND TOTAL

This acreage is based, in some instances, upon actual surveys and in other cases upon the acreage as determined at the time of the Stewart Decree and is the best information available at the present time. (February 14, 1941)

Ridenbaugh represents old lands within the Nampa and Meridian Irrigation District that are watered by the old Ridenbaugh water rights in the Stewart Decree. The balance of the Nampa and Meridian Irrigation District lands are included under the Board of Control.
