

**WATER DISTRIBUTION OF BOISE RIVER
DISTRICT NO. 12-A
1944**

REPORT ON
CANAL DELIVERIES FROM THE
BOISE RIVER

AND
DIFFERENT FEATURES AFFECTING THESE
DELIVERIES FOR THE IRRIGATION SEASON OF

1944

(DATA FOR THIS REPORT GATHERED BY THE
WRITER WHILE ACTING IN THE CAPACITY
OF WATERMASTER OF THE BOISE RIVER AND
SPECIAL DEPUTY IN CHARGE OF THE DIS-
TRIBUTION OF STORAGE WATER FROM ARROW-
ROCK RESERVOIR)

(COOPERATIVE DATA ALSO FURNISHED BY THE
UNITED STATES BUREAU OF RECLAMATION AND
THE UNITED STATES GEOLOGICAL SURVEY)

BY

WM. E. NELSH

WATERMASTER, BOISE RIVER

CHARTS

1944

1. Map of Boise River, showing canal diversions.
2. 2-A, 2-B, 2-C, 2-D, 2-E, 2-F, 2-G, 2-H, 2-I, 2-J, and 2-K are tables showing natural flow of Boise River by days for the period from 1895 to 1940 inclusive. 2-L and 2-M show the same information for the years 1941-42-43-44.
3. Table showing mean daily flow of Boise River for a 41-year period.
4. Table showing monthly and annual flow of Boise River in acre feet for the irrigation years from 1894-95 to 1943-44.
5. 5-A, 5-B, 5-C, 5-D, and 5-E, daily discharge of all canals (Sections 1 and 2) for the irrigation season of 1944.
6. Summary table in acre feet showing monthly and total canal diversions for the irrigation season of 1944.
7. Summary table showing total annual diversions for all Boise Valley canals beginning 1916.
8. 8-A and 8-B, daily discharge of all principal tributary streams feeding water to Boise River below More's Creek for irrigation season of 1944.
9. Two tables showing Boise River at Diversion Dam, canal deliveries, tributary gain, seepage gain and net gain by months in acre feet and average daily flow in 24 hour second feet for the irrigation season of 1944.
10. Two tables for Section 1 of Boise River showing river at Diversion Dam, canal deliveries, tributary gain, seepage gain, and net gain between Diversion Dam and Star by months in acre feet and average daily flow in 24 hour second feet for irrigation season of 1944.
11. Two tables for section 2 of Boise River showing river at Star, canal deliveries, tributary gain, seepage gain, and net gain between Star and Notus by months in acre feet and average daily flow in 24 hours second feet for irrigation season of 1944.
12. Table showing acreage under all canals in the Boise Valley.

CHARTS

(continued)

13. Table for Boise Valley canals showing acre feet diverted, acres irrigated and acre feet per acre diverted for the season of 1944.
14. Table showing acre feet per acre diverted by 18 canals from Boise River for each irrigation season beginning in 1916.
15. Summary table showing diversions from Boise River in Acre Feet, acre feet per acre, and the rate in miner's inches per acre for 18 Boise Valley canals for each month of the irrigation season beginning 1916; also, the per cent diverted during each month.
16. Chart showing average headgate duty of water for 18 Boise Valley canals.
17. Table showing total canal diversions and total discharge of drainage canals in Drainage District No. 2 for the irrigation season of 1944.
18. Two tables showing total discharge of all drainage canals in Drainage Districts No.'s 3 and 4, for the irrigation season of 1944.
19. Summary table of return flow to Boise River between the Government Diversion Dam and Motus beginning 1914.
20. 20-A, 20-B, revised area and capacity table for Arrowrock Reservoir.
21. Table showing additional decrees on Boise River (Intervenors in the Stewart Decree), giving priority number, date and amount decreed.
22. Table showing change in point of diversion of decreed rights on Boise River.
23. Table showing transfer of decreed rights on Boise River.
24. Condensed table of Stewart Decree showing dates of priority and amounts decreed.
25. 25-A, 25-B, 25-C, and 25-D are tables of the Stewart Decree grouped under canal headings.
26. 26-A, 26-B, 26-C, tables in second feet showing decreed rights (Stewart Decree) and natural flows at Diversion Dam necessary to fill same. 26-D, table in second feet showing decreed rights (Bryan Decree) and natural flows in second feet necessary at Diversion to fill same.

ORGANIZATION

The Boise River Organization for 1944 was the same that it has been for several years past. It includes a Chairman and Secretary, a Watersmaster, one Assistant, for a few months during the summer, and a part time Secretary and Stenographer.

There was also an Advisory Committee, although not authorized by law, which includes the Chairman and Secretary. This Committee is elected at the annual meeting in March and is selected from various and representative sections of the Boise Valley. It meets on the fore-noon of the day of the annual meeting to prepare and consider a budget and such other items as seem necessary and advisable in order to cooperate with the Watersmaster on various problems concerning water distribution of the Boise River. Special meetings are also called when the occasion requires.

This Committee for 1944 was as follows:

Ed Straus	Chairman
I. A. Weaver	Secretary
Ernest Anderson	
J. C. Bell	
T. M. DeCoursey	
John Desmond	
E. T. Evans	
C. H. Lundy	
H. V. Rice	

Cooperative assistance is rendered by the Board of Control in current meter work, compiling records, maintaining phone to Arrowrock, etc. for which proper remuneration is given.

Cooperative assistance is rendered by the U. S. Geological Survey in current meter work and compiling records of Boise River at Dowling and Notus, South Fork near Smith's Prairie, Middle Fork at Twin Springs and More's Creek at Call Bridge.

The splendid assistance and cooperation rendered by the State Reclamation Engineer and the personnel of that office has been most helpful at all times and appreciation is hereby acknowledged.

DECREE

The old water rights from the Boise River are included in the decree in the case of FARMERS COOPERATIVE DITCH COMPANY, a corporation vs RIVERSIDE IRRIGATION DISTRICT LTD., a Corporation, et al, signed by District Judge George H. Stewart January 18, 1906, commonly referred to as the "Stewart Decree." This case was appealed to the Supreme Court and affirmed as to priorities and acreage, but remanded to the District Court for the sole and only purpose of determining the duty of water. In 1914 testimony was taken before the court as to the duty of water and was transcribed, which consists of approximately 2600 typewritten pages, but the final decree of the court as to the duty of water has never been entered. Judge Ed L. Bryan, Judge of the District Court of the SEVENTH JUDICIAL DISTRICT of the State of Idaho, issued a continuing order on May 31, 1919, which is still in effect, providing for the distribution of the waters of Boise River in the following manner, to-wit: "The various rights, as adjudicated in the so-called 'Stewart Decree' shall receive 100 per cent, until the natural flow of the waters of Boise River shall decrease, until all the rights in said decree cannot receive 100 per cent, at which time the various rights as adjudicated in the so-called 'Stewart Decree' shall first be cut to 75 per cent of the amount of water decreed by the Stewart Decree as the natural flow of the Boise River decreases, beginning with the latest rights and proceeding to the earliest rights in the order fixed in said 'Stewart Decree', and after all of the rights shall have been reduced to 75 per cent of the amount fixed in the Stewart Decree, should the natural flow of the waters in Boise River decrease below the amount necessary to supply said

75 per cent of the water rights as decreed in said "Stewart Decree", then the various rights beginning with the latest and proceeding to the earliest, as aforesaid, shall be reduced to 60 per cent of the amount specified in the Stewart Decree and 60 per cent of the amount decreed in the Stewart Decree is hereby fixed and determined as the highest duty of water for the year 1919."

In the SEVENTH JUDICIAL DISTRICT of the State of Idaho, Judge Ed L. Bryan, signed a decree on February 14, 1929, in the case of PIONEER IRRIGATION DISTRICT VS. AMERICAN DITCH ASSOCIATION, Et Al, commonly referred to as the "FLOOD WATER SUIT", or "BRYAN DECREE." All rights decreed in this case are made subsequent to the Stewart Decree. This case was appealed to the Supreme Court where it was upheld as to some of the rights involved but remanded to the District Court for retrial on the question of the duty of water, also for the purpose of determining certain other rights.

On January 30, 1932, JUDGE A. O. SUTTON signed an order temporarily establishing the various rights in the Flood Water Suit and providing for a duty of water similar to the "sliding scale" in the Stewart Decree. On June 23, 1933, Judge Chas. E. Winstead of the Third Judicial District, sitting as Judge in the Seventh Judicial District for the state of Idaho, signed a continuing order making the order of Judge Sutton's for 1932 effective for 1933 and continuing. This order was remained in effect since that time.

Charts 26, 26-A, 26-B, 26-C, relate to the Stewart Decree and show the following information: Number of priority, name to whom decree was issued, amount of decree in second feet showing 100 per cent, 75 per cent, and 60 per cent, and section of River in which point of diversion is located. It also shows the amount of natural flow necessary at Diversion Dam to fill the various rights in the Stewart Decree, including intervenors, to 60 per

cent, 75 per cent and 100 per cent. In computing the amounts necessary to fill the various rights in this table it is assumed that the return flow will fill the first 32 rights to 60 per cent of the amount decreed. It is also assumed that the return flow to Section 2 and 3 of the River would fill the rights with points of diversion in those sections of the river to 75 per cent of the amount decreed.

Chart 26-D is a table showing the decreed rights contained in the Bryan Decree of Flood Water Decree. It shows the date of priority, name of water users to whom decree was issued, amount of decree in second feet showing 100 per cent, 75 per cent and 60 per cent. It also shows the amount of natural flow necessary at Diversion Dam to fill the various rights in the Flood Water Decree to 60 per cent, 75 per cent and 100 per cent.

BOISE RIVER RUNOFF AND AVAILABLE WATER SUPPLY

The total natural flow for the year ending September 30, 1944 was 1,258,158 acre feet. At the beginning of the irrigation season on April 1st, it seemed quite evident from all information available regarding precipitation over the Boise River water-shed that 1944 would be an extremely short water year. However, an unusually heavy precipitation during the months of April and June, together with cool nights during almost the entire growing season, changed the conditions entirely. Although the total runoff was approximately 140,000 acre feet less than the amount generally required to irrigate the valley, there was with the exception of one or two canals, principally the Phyllis and New York Canals, practically no shortage and under those two canals the shortage was not anything like as serious as expected in the beginning of the season. In spite of the warning by various and numerous officials as to a probably water shortage, a large acreage of row crops was planted. These crops, however, were practically all matured due to the precipitation and cool weather referred to above.

Charts 2 to 2-K inclusive show the daily natural flow of the Boise River from 1895 to 1940 inclusive. Charts 2-L and 2-M show the daily natural flow of the Boise River for the years, 1941, 1942, 1943 and 1944.

Chart 3 is a table showing the mean daily flow of the Boise River for a 41-year period.

Chart 4 is a table compiled from previous charts, showing the total monthly and annual flow of the Boise River in acre feet for the irrigation years beginning 1894-1895.

CANAL REGULATIONS

It was necessary to begin canal regulations about July 1st.

Charts 5 to 5-E inclusive show the canal diversions for the period from April 1 to September 30th.

Chart 6 shows the monthly and total diversions for the Boise River for the irrigation session of 1944.

Chart 7 is a table showing the return flow, canal diversions, Winter diversions and Winter waste for the entire Boise Valley for each season beginning 1916.

TRIBUTARY GAIN

Data were gathered and compiled on all principal tributary streams feeding water to Boise River below More's Creek.

Charts 2 to 2-K inclusive show the daily natural flow of the Boise River from 1895 to 1940 inclusive. Charts 2-L and 2-M show the daily natural flow of the Boise River for the years, 1941, 1942, 1943 and 1944.

Chart 3 is a table showing the mean daily flow of the Boise River for a 41-year period.

Chart 4 is a table compiled from previous charts, showing the total monthly and annual flow of the Boise River in acre feet for the irrigation years beginning 1894-1895.

CANAL REGULATIONS

It was necessary to begin canal regulations about July 1st.

Charts 5 to 5-E inclusive show the canal diversions for the period from April 1 to September 30th.

Chart 6 shows the monthly and total diversions for the Boise River for the irrigation season of 1944.

Chart 7 is a table showing the return flow, canal diversions, Winter diversions and Winter waste for the entire Boise Valley for each season beginning 1916.

TRIBUTARY GAIN

Data were gathered and compiled on all principal tributary streams feeding water to Boise River below More's Creek.

Charts 8, 8-A and 8-B show the daily discharge of the tributary streams.

NET GAIN

Chart 9 shows the total flow of the Boise River passing Diversion Dam, canal deliveries, and gain to the River by months in acre feet, and also average daily flow for each month during the season of 1944.

RIVER FLUCTUATION

Fluctuations caused by so many factors beyond the control of the Watermaster always have been and always will be a menacing problem from the standpoint of maintaining a steady flow of water at the lower end of the Boise River. 1944 was no exception to this rule.

CLASSIFICATION OF RIVER

The Boise River naturally divides itself into three separate and distinct parts. Section 1 includes the part of the River which lies between the Government Diversion Dam and the Caldwell High Line Canal about a mile below the town of Star. Section 2 includes that section which lies between the Caldwell High Line Canal and the Notus Bridge. Section 3 includes that part of the River between the Notus Bridge and the Snake River.

SECTION 1

Chart 10 shows the condition that existed in this section during the period July 1st to September 30th, inclusive. The average net gain in this section during this period was 178 second feet.

SECTION 2 (2)

Chart 11 (eleven) is a table showing the condition that existed in this section during the period from July 1st to September 30th, inclusive.

The average return flow to this section during this period was 454 second feet.

SECTION III

The return flow to Section III was sufficient to take care of all rights in this section during the entire season and therefore no regulations were required in this section. In fact, during all of the time in which records have been kept of the distribution of the waters of the Boise River beginning in 1914 there has been only one year, 1931, during which it was necessary to regulate diversions from this section of the river.

DUTY OF WATER

The following statement, a repetition from previous reports, is again included in this report.

"The determination of the duty of water both in the "Stewart Decree" and the "Bryan Decree" is still pending in the District Court at Caldwell, Idaho.

"In the opinion of the writer it is doubtful if a fixed and established duty of water will ever prove satisfactory for the Boise Valley. A duty of water that would take care of crop requirements for one season would be inadequate for another. Seasonal conditions are continually changing. Likewise, conditions over the valley are changing. Our knowledge and methods of irrigation are constantly improving with each year of experience.

"An arbitrary duty should not be established without taking into consideration the inherent rights of all those persons who are dependent upon this great natural resource for their subsistence.

"An arbitrary duty, if established, should be subject to change from time to time. What that duty should be, I am not prepared to say."

Following is a quotation from "REPORT on CONSUMPTIVE USE —NET DUTY OF WATER—As Related to the proper adjudication of Water Rights on the Boise River," by W. G. STEWARD. Mr. Steward was formerly employed by the United States Reclamation Service in charge of Hydrographic work on the Boise River and also for several years an Instructor at the University of Idaho on the same subject. He had made a very comprehensive study of the duty of water, especially on the Boise River and was well qualified on that subject. For these reasons, the following quotations are submitted with the endorsement of the writer:

1. "That a duty of water, if established, should be subject to change when conditions warrant. Conditions are continually changing. Our knowledge and methods of irrigation are improving. An arbitrary duty that would meet all requirements today might prove entirely inadequate fifty years from now. Posterity should not be handicapped by our present-day limitations.

2. A duty, if established now, should be construed to mean a headgate duty, or duty at the point of diversion.

3. The best information at hand to-day would indicate that a duty, if established, should conform very closely to the so-called "sliding scale" as provided in the order issued by Judge Ed L. Bryan on May 31, 1919. That if the present law does not permit the court to render a decision on the duty of water conforming closely with the above suggestions, that the waterusers of the valley should arrange, by stipulation, for the delivery of water along the above-suggested lines until such time as conditions have changed so as to warrant new distribution.

4. That an exception to the above "sliding scale" should be made in the case of porous-gravel, river-bottom lands, lying adjacent to and under the upper section of the river, as per the Stewart Decree,

to the extent that these lands should be allowed to divert such amount of water as their crops require and at such times as it is needed, said diversions not to exceed 1.10 miner's inches per acre. This, because no matter how much is diverted, all but a very small amount almost immediately returns to the river flow. To do this a system of rotation among themselves should be required.

5. That said lands entitled to above exceptions should be determined before a decree is entered or stipulation is signed."

The temporary court order providing for the "Sliding scale cuts", under which the Boise River has been operated for more than twenty five years, has proved very satisfactory when the entire valley is taken into consideration. The temporary court order is given in full on page 2 of this report.

Chart 6 shows the amount in acre feet diverted each month and the total amount diverted for the season by the canals of the Boise Valley.

Chart 13 is a table showing the total amount diverted, the acres irrigated and the acre feet per acre diverted from the River by the various canals of the Boise Valley. The amount shown under the column "Acre Feet Per Acre" cannot be construed as a duty of water for the lands of the Boise Valley, due to the large and varying quantities of return flow water picked up by many of these canals.

Chart 14 is a summary table for the years beginning 1916 for 18 Boise Valley Canals showing the acre feet per acre diverted.

Chart 15 is a table for 18 Boise Valley Canals beginning 1916 showing the total acre feet diverted, acre feet per acre, rate in miner's inches per acre, and per cent per month.

Chart 16 shows the average headgate duty of water for 18 Boise Valley Canals.

DRAINAGE

Chart 17 shows the total canal diversions and the total drainage discharge for Drainage District No. 2 for the season of 1944 and a summary for the same diversions since the completion of these drains in 1922. This Drainage District embraces an area of 29,000 acres situated on the north side of Boise River between the city of Boise and the canyon near Caldwell.

Chart 18 is a table showing the discharge of all drains in both Drainage Districts No's 3 and 4. Drainage District No. 3 frequently referred to as the South Boise Drainage District is situated in South Boise. This district has four drains all outlets emptying into the Boise River and comprising an area of approximately 4,200 acres. Drainage District No. 4, frequently referred to as the Thurman Drain, comprises an area of approximately 2,500 acres, and is situated south of the Boise River and opposite the town of Eagle. This district has only one outlet to the Boise River.

Chart 19 is a table showing the average return flow to the Boise River for the period beginning 1914.

ARROWROCK CAPACITY

Charts No. 20, 20-A and 20-B show the W. G. Stewart capacity table for Arrowrock Reservoir as revised by W. H. Tuller, Former Project Manager, Boise Project.

ADDITIONAL DECREES OR INTERVENORS

Chart No. 21 is a table showing the additional decrees obtained by intervenors in the case of Farmers Cooperative Ditch Company, plaintiff, vs. Riverside Irrigation District, Ltd., et al., defendants, which is commonly referred to as the "Stewart Decree."

CHANGE IN POINT OF DIVERSION

Chart No. 22 is a table showing the change in the point of diversion of the decreed rights on the Boise River as recorded in the office of the State Reclamation Engineer.

STEWART DECREE

Chart No. 24 is a condensed table of the Stewart Decree. A small circle at the left of the date of priority shows that the right is supplied by "return flow."

Charts No. 26, 26-A, 26-B and 26-C are tables showing decreed rights as contained in the Stewart Decree and the natural flow at the Diversion Dam necessary to fill the same.

STEWART AND BRYAN DECREES GROUPED BY CANAL READINGS

These tables, Charts No. 25-A, 25-B, 25-C, and 25-D have been compiled for the benefit of those canal companies who have more than one date of priority. These tables show the date and amount of each priority and the total amount decreed.

BRYAN DECREE

Chart No. 26-D is a table showing decreed rights contained in the Bryan Decree and the natural flow necessary at the Diversion Dam to fill the same.

WATERSHED

Although the question of watershed protection has not been given a great deal of attention by the waterusers during the past several years, it should always remain a matter of serious concern to the Boise Valley. The waterusers should continue to cooperate and work closely with the various State and Federal Agencies having jurisdiction over the watershed and its uses.

SUPPLEMENTAL WATER

The Southwestern Idaho Water Conservation Project have done an excellent job in getting the necessary appropriations to keep the work at Anderson Ranch going, especially under war-time conditions. When completed, it is expected that this Reservoir will practically eliminate all water shortages in the Boise Valley.

COST REPORT - 1944

Watermaster Salary	\$ 3254.40
Assistant Watermaster Salary	245.40
Car Mileage	1154.95
Miscellaneous	326.92
Telephone	105.80
Gage Readings	42.00
Stenographic Services	639.29
Insurance	87.31
Withholding Tax..	<u>390.29</u>
Sub-Total	\$6246.36

SERVICES RENDERED BY THE U. S. BUREAU OF
RECLAMATION AND THE BOARD OF CONTROL,
BOISE RIVER

Gage Readers, Dowling.....	\$ 180.00
More's Creek	120.00
Telephone service to Upper River.....	270.00
Assistance in Current Meter Work	235.00
Office Work, compiling records of natural flow, etc	<u>225.00</u>
Total value of services as fixed by committee	1030.00

**TOTAL COSTS TO WATER DISTRICT 13-A
FOR THE IRRIGATION SEASON OF 1944** \$7276.36

CONCLUSIONS

1. That an Advisory Committee with authority to represent the water-users and to advise with the Watermaster is very beneficial and helpful and should be continued.
2. That the records and data as compiled in the Watermaster's reports for the past twenty-nine years should be continued.
3. That the River naturally divides itself into three sections during the low-water period.
4. That the River can be completely dried up at the lower end of Section 1 without injury to the rights in Section 11 during the low-water period of each irrigation year.
5. That the return flow is a vital factor and must be considered in the operation of the River.
6. That the transfer of water rights from Section 11 to Section 1 is injurious to the rights already existing in Section 1 and should not be permitted.
7. That the construction of drainage systems in the Boise Valley has changed the irrigation requirements within these districts.
8. That by reason of the construction of these drainage canals certain waters which were formerly lost through seepage, evaporation and deep percolation, or reached the River during the Winter months, are probably now reaching the River during the irrigation season and made available for irrigation purposes.
9. That the question of watershed protection is of vital importance to the waterusers of the Boise Valley.
10. That a reasonable program of research work should be continued by the U. S. Forest Service on the Boise River Watershed for the purpose of determining to what extent the resources of the watershed may be utilized without being injurious to the inherent rights of the waterusers who are dependent upon this resource for a livelihood.

11. That the knowledge and data upon which a permanent duty of water must necessarily be based are constantly being improved and increased.

12. That an arbitrary duty of water, if established, should be subject to change from time to time.

13. That the "Court Orders" under which the Boise River has been operated for more than 25 years have proven very satisfactory to the Boise Valley as a whole.

14. That if the so-called "sliding scale" should be fixed by the Court as a permanent duty of water for the Boise Valley, then an exception to said "sliding scale" should be made in the case of certain river bottom lands.

15. That approximately two-thirds of the entire Boise Valley is badly in need of supplemental water.

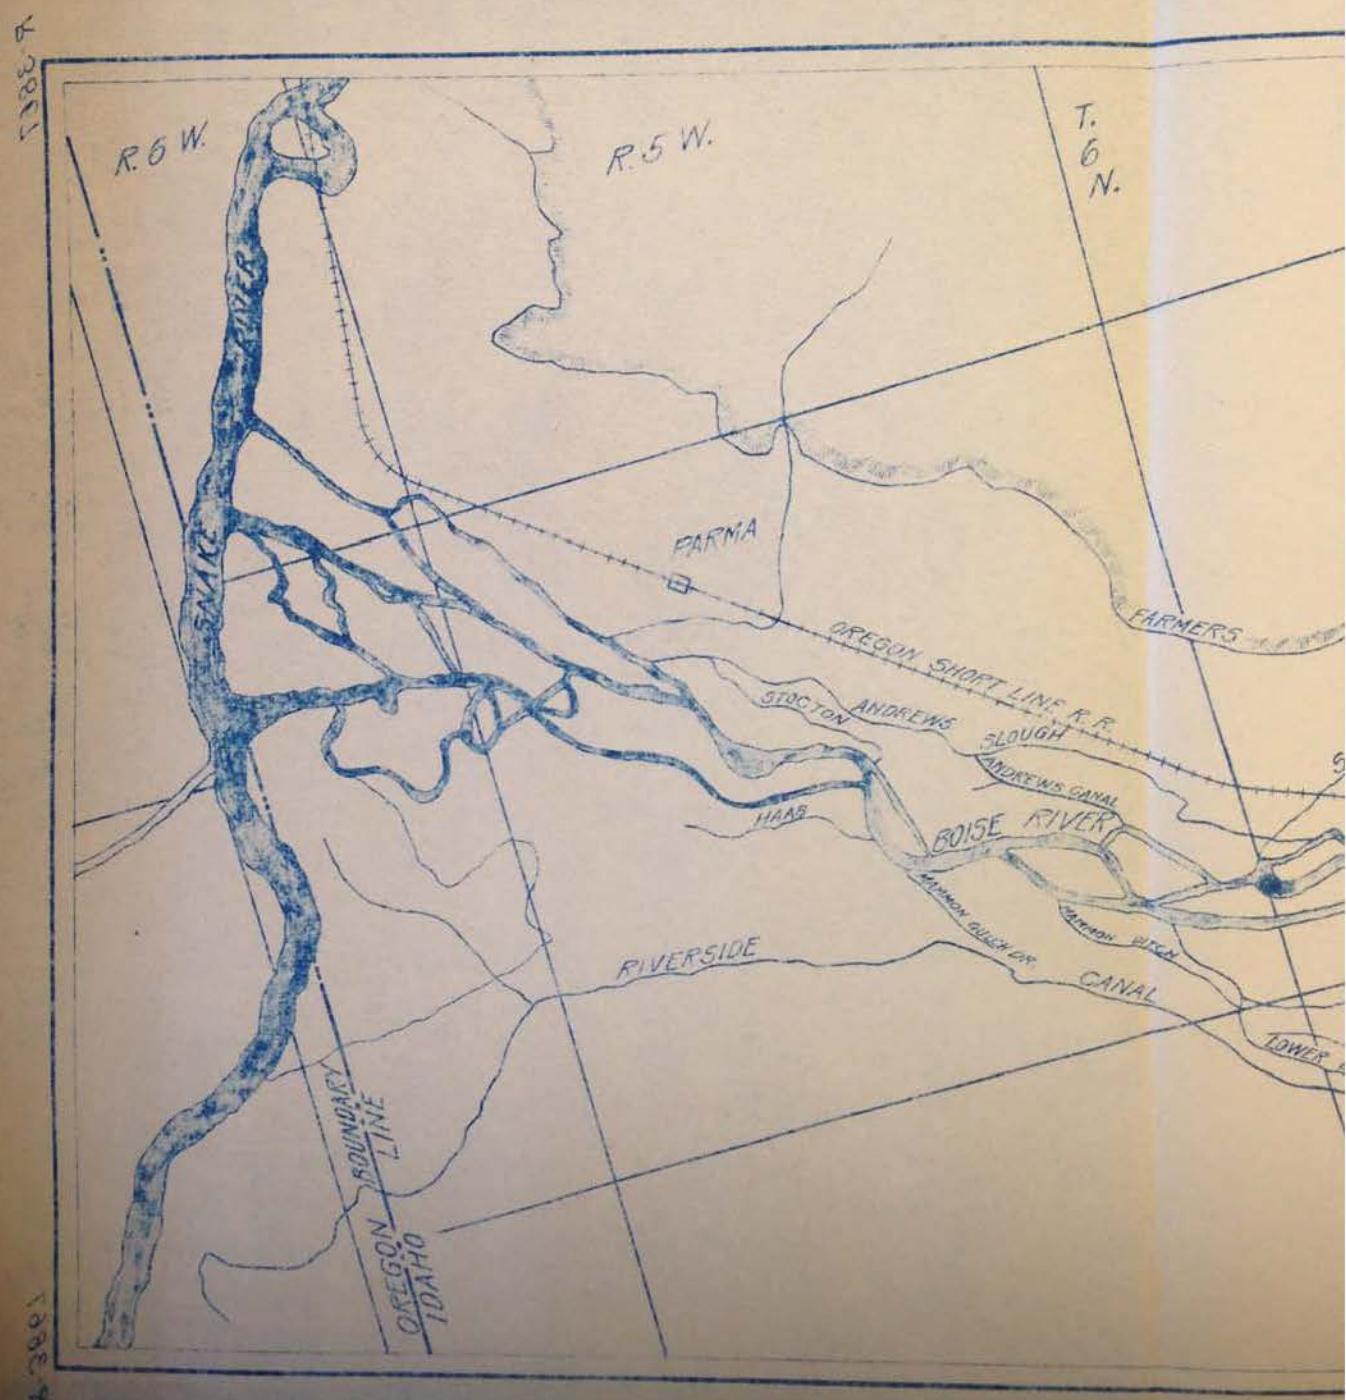

16. That mining operations within the bed of the Boise River and its tributaries should not be permitted.

	1,286 "	Island High Line.....	<u>1,000</u>
		TOTAL	325,310 "

DRAINAGE WATER (not diverted from Boise River)

Black Canyon Irrigation Dist.....	6,500 acres		
Caldwell Irrigation District.....	850 "		
Moreland & Vail (Dixie Drain).....	<u>640</u>		
		7,990	"
		333,300	"

GRAND TOTAL

This acreage is based, in some instances, upon actual surveys and in other cases upon the acreage as determined at the time of the Stewart Decree and is the best information available at the present time. (February 14, 1941)

Ridenbaugh represents old lands within the Nampa and Meridian Irrigation District that are watered by the old Ridenbaugh water rights in the Stewart Decree. The balance of the Nampa and Meridian Irrigation District lands are included under the Board of Control. (Some of the acreages were revised April 10, 1944)
