WATERMASTER'S REPORT

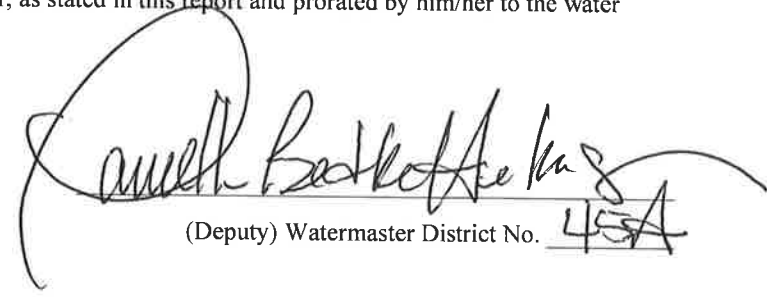

From April, 20 20 To October, 20 20

Water District No. 45A
Name of Watermaster Danielle Bedke Helms
Mailing Address 210 S 50 E Oakley ID 83346

AFFIDAVIT OF WATERMASTER

STATE OF IDAHO
COUNTY OF Cassia } ss.

Danielle Bedke Helms, being first duly sworn, deposes and says that he/she is Watermaster of Water District 45A, having been lawfully appointed by _____, Director, Idaho Department of Water Resources, and that the volumes of water, as stated in this report and prorated by him/her to the water right holders of the district are correct.

(Deputy) Watermaster District No. 45A

Subscribed and sworn to before me, this _____ day of _____, 20 _____

(SEAL)

Notary Public
My Commission expires _____

Boise, Idaho _____, 20 _____

I HEREBY CERTIFY, that _____ was lawfully appointed by me as Watermaster of Water District No. _____, and that the information contained in this report, as herein sworn to, is, to the best of my knowledge and belief, correct.

Director, Department of Water Resources

By _____

2/3

Robert Bedke called me this morning to report that no water has been flowing down Mill Creek. He was breaking ice for the cattle and when he broke thru it was gravel. He said he went clear up to where Spring Feeder is and all the boards going down the Spring Feeder were pulled and there was a large board across Mill Creek. He put the boards back in the feeder and tried to pry the large board off but it was snowed and froze.

3/17

K. Wells helped me pull out the 4th Mill Weir in the creek to be fixed. It just needs a new board on the bottom to keep the tin straight. We also will need to sand the sides of the other boards so it slides right back into place. Measures at 4'
This will be a measuring point for Cranney's 4th Mill.

3/12

Seth L. poured concrete up on Summit Creek to place new weir for measuring the creek instead of me guessing.

4/1

Spring Cr 4- 32 .13: looks super nice. Cleaned out the creek beds and all the trashy shit. Poured new concrete to keep water from running around weir.

Mill Cr 8-78 .15

Rocks and shit have filled in the creek in front of this weir. Needs cleaned out.

Summit 3 - 65 .25

Nice new looking weir. Just put in this spring.

Warm Springs 3 - 45 .20

4/10

Summit Cr 3- 79 .29

Warm Springs 3- 45 .20

Spring Cr 4- 43 .16

Mill Cr 8- 290 .36

Pink Weir 6- 126 .25 Need to remeasure this weir.

4th Mill Weir 4- 139 .35

4/19

Summit Crk 3 (.27) - 71

Warm Springs 3 (.20) - 45

Spring Cr 4 (.15) - 39

Mill Cr 7 (.25) - 147

Pink Weir 6 (22) - 104 Need to remeasure this weir!

4th Mill 4 (22) - 69

New weir by Hawkers pond not set in the creek right. Water is not running over the weir but around the sides and underneath. Talked to Seth L @ it and were gonna try to slide some 1x4 along the edges to see if we can get it to seal properly. Otherwise my suggestion is to send it back to SFW to have them fix correctly.

Seth L shimmeyed boards on each side and filled in the cracks on the side and bottoms with sod and mud pack. Water is running over the weir now as planned. Took before and after pics.

Craig S called to see if I could send water down the Spring Feeder from Mill Cr to help with Spring Creek. After doing the breakdown of total " of water each creek gets I can only send 17" that direction. I told Craig that I would measure later in the week when it warms up more and see if that's a possibility. And that I would let him know.

Summit - $15\% \times 71 = 45.3$

Spring - $26\% \times 39 = 79$

Mill & Warm Springs - $147/45 = 192$

$58\% \times 192 = 175.16$

4/21

As of further notice Spring Creek and Mill Creek will be on turns until further notice! Sent text out to all water users.

On 4/20 I pulled I board at the Spring Creek Feeder off of Mill Creek to push more water down Spring Creek for irrigation. The 1st weir off of the feeder needs cleaned out: cattails and overgrowth make it difficult to measure or for water to flow. Sent out pic and text stating that we will need a backhoe to clean this up. A shovel won't do!

Lots of water loss from 3rd Mill (pink weir) to 4th Mill. Cement is broke to the West of J. Bedke's headgate and concrete is broke on North side of weir, water runs under freely. Weir does not sit flat on concrete. Lots of water running underneath as well. I cannot get an accurate measurement. When water drops this will need to be fixed properly. If were not going to pour new cement we need to fix w/ bentonite!

Pink Weir .28 (6) 149

3rd Mill - Not able to measure. Cement is broke in creek bed and water flows under weir and over but it's an estimate. Measure for Jared at Pink Weir. Talked w/J. Bedke & Paul M. (Board members) regarding fixing this weir. J. Bedke put sod in and around the bottom and North end of the weir to help seal up the leaks. It seems to be holding right now but it's only temporary until we can fix it the right way.

J. Bedke 43% ON @ 7AM

5/26 to 5/28 >65 estimation since it going down the ditch and not over the weir.

Water Season is officially over. All headgates should be shut to send water down for stock water. Mill Creek and Spring Creek are not running much. There isn't enough water to push past the pink weir which is 2nd & 3rd Mill. I opened headgate into the J. Marchant/B. Bedke for stock water.
