Gary Spackman  
322 Front Street  
Boise, ID 83720

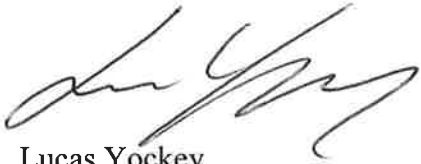

RECEIVED  
FEB 04 2021  
Department of Water Resources  
Eastern Region

Dear Mr. Spackman:

The following pages contain the annual report of the distribution of water for the Big Lost River, from November 1, 2019 to October 31, 2020.

The authority to distribute water using water rights in the basin # 34 directors report was provided by the memorandum decision and order granting the Department of Water Resources motion for interim administration with limitation, or decrees issued by the SRBA court.

Sincerely,

Lucas Yockey  
Watermaster  
District # 34- Big Lost River

Water District 34

P.O. Box 53

Mackay Idaho 83251

## **2020 Annual Report Summary**

On the morning of May 1, 2020 the reservoir content was 42,070 acre feet which is 97% of capacity. Natural inflow was 166 cfs with 129 cfs of water going past the Mackay Dam. The seepage coming through the dam was 521 inches which was credited as part of the dam outflow.

Water delivery calls all the way down to the Arco diversion were available at the beginning of the irrigation season at the river headings. The Big Lost River Irrigation District did not use any storage water for a flush due to a live river already at the Arco diversion at the start of the season. All priorities were on to start the beginning of the season due to the high inflow and low demand for decree.

The Howell gage above the reservoir exceeded 750 cfs for three consecutive days which connected the river on May 30, 2020 making all river rights administered together. On June 11, 2020 the Howell gauge had dropped below 450 cfs for three consecutive days which disconnected the river making the reaches above and below the reservoir administered separately for the rest of the irrigation season.

The last day of surface water irrigation season was on October 15, 2020. On October 16, 2020 the day after the last surface water irrigation rights were delivered the volume in the dam was 6175 acre feet which was 14% of capacity. Total Surface water delivered was 55,748 cfs and total ground water pumped was 44,157 cfs. The total recharge for the year was 620 cfs.

Lucas Yockey

Mackay, ID 83251**

Clarification of Flow Data  
For  
Gauging Stations

Reported flows are in the attached tables for gauging stations below the Moore Diversion and Arco-Munsey Diversion Canal.

The USGS tables titled station number 13120500 Big Lost River at Howell Ranch, 2B Gage and Station number 13132500 Big Lost River NR Arco include data and are the final data prepared by the USGS for it's gauging stations located north of the Mackay Reservoir, below Mackay Reservoir and four miles Southeast of Arco, Respectively.

Flow reported for the gauging station USGS #133050000 on Big Lost river bridge at Leslie, Located on Houston Road is still being Metered by Idaho Power.
