### SUMMARY

*Figure 1* illustrates the Upper Snake River Basin regulated by Water District #1 in Idaho. The area of regulation includes Idaho diversions and reservoirs that are tributary to the Snake River upstream from the Snake River's confluence with the Blackfoot River near Blackfoot, Idaho. The area of regulation also includes Idaho surface diversions and reservoir water rights on the Snake River Mainstem downstream to Milner Dam near Twin Falls, Idaho.

The 2019 irrigation year began November 1, 2018 with 2,141,000 acre-feet of active physical reservoir system contents plus the 157,000 acre-feet of storage physically held in the inactive Palisades powerhead space. Reservoir storage rights that received 100% accrual to their water right storage volumes during the 2018 irrigation year were not allowed to begin accruing natural flow to their 2019 water right volumes until the new calendar year began on January 1, 2019. This was a change from the previous water accounting practices used prior to the 2018 irrigation year. Prior to 2018, reservoirs could begin accruing natural flow to their reservoir water right priorities as early as September 15<sup>th</sup> near the end of the previous irrigation year. The reasons for the change in beginning dates for reservoir water right accruals are described in IDWR Docket No. P-WRA-2017-002.

April 1<sup>st</sup> snow accumulations in high-elevation SNOTEL sites maintained by the Natural Resource Conservation Service (NRCS) are usually good indicators of the water supply that will be available in the upcoming irrigation season. An above-average snowpack usually results in an above-average water supply. A below-average snowpack usually results in a below-average water supply. The snowpack and precipitation totals measured by NRCS for most SNOTEL stations in the Snake River Basin above American Falls were above average on April 1, 2019. *Figure 2* shows the snow water content for the Lewis Lake Divide SNOTEL station on April 1<sup>st</sup> during the years 1984 through 2019. Snowpack, precipitation, and streamflow data for all basins in Idaho can be found on the Idaho NRCS Snow Survey webpage https://www.nrcs.usda.gov/wps/portal/nrcs/main/id/snow/.

*Table 1* shows the streamflow forecast issued on April 1, 2019, for the forecasted volume April through September at four different streamflow stations. The 30-year averaged runoff and the actual runoff that occurred during the 2019 irrigation season at each station is also listed in *Table 1*.

## TABLE 1. 2019 April Through September Unregulated Streamflow at Selected Stations in Water District 1

"Unregulated Flow" is the actual discharge adjusted by upstream diversions and changes in reservoir storage, representing the natural flow that would occur at that station with effects of diversions and reservoirs removed. \* Falls River "Actual Unregulated" calculated at USGS 13046995 FALLS RIVER ABV YELLOWSTONE gage.

Water ceased spilling past Milner Dam on June 5, 2019. All reservoirs accrued 100% fill to their water right volumes. However, the reservoir system failed to completely refill after accrued storage from Jackson Lake and Palisades Reservoir was released from those reservoirs for flood-control operations. As a result, the allocated fill to Jackson Lake and Palisades Reservoir spaceholders was reduced downwards from a full 100% allocation to match the reservoir system total contents with the reservoir system total allocated storage.

The total system natural flow peaked at 44,411 cfs on June 13, 2019. All natural flow priorities were being filled leading up to the Day of Allocation on June 26, 2019. Daily priority deliveries at each river gage can be viewed by choosing the HISTORICAL DATA RETRIEVAL tab on the Water District #1 website <u>www.waterdistrict1.com</u> and performing the following steps: Select Upper Snake River System in Step 1; select the nearest river gage (Site Type F) in Step 2; select desired year in Step 3; click SUBMIT in Step 4; and click on the ACCOUNTING button at the top of the displayed data table. *Figure 3* shows a graph of natural flow and total diversions.

TOTAL NATURAL FLOW VS TOTAL DIVERSIONS -2019-

Figure 3. Natural Flow and Total Diversions

There were 1,718,731 acre-feet of storage used by diversions above Milner in addition to 341,015 acre-feet of preliminary storage delivered to the USBR and Idaho Power during the 2019 irrigation year. The preliminary storage delivered below Milner Dam between June 19<sup>th</sup> and July 17<sup>th</sup> consisted of 150,000 acre-feet of USBR flow augmentation rental plus 21,672 acrefeet of USBR uncontracted space rental. Preliminary storage delivered to Idaho Power below Milner Dam between July 17<sup>th</sup> and August 27<sup>th</sup> consisted of 43,376 acre-feet of Idaho Power's preliminary American Falls Reservoir storage allocation plus 70,000 acre-feet of Supplemental Pool rental. Deducting storage usage from the 4,151,726 acre-feet of storage allocated to reservoir space, including other Rental Pool transactions and storage adjustments, yielded spaceholder carryover of 2,311,050 acre-feet on October 31, 2019. There were 167,353 acre-feet of the total 255,885 acre-feet of new reservoir accrual that occurred between the Day of Allocation and October 31, 2019 used to offset the Common Pool rental occurring during the 2019 season. After adding the remaining 88,532 acre-feet of late fill to the 2,311,050 acre-feet results in a net carryover of 2,399,582 acre-feet. Subtracting the 157,000 acre-feet of water physically held in the inactive powerhead space of Palisades Reservoir from the net carryover of 2,399,582 equals the active physical reservoir system contents of 2,242,582 acre-feet on the October 31, 2019 day of water right accounting.

Storage space, fill, evaporation losses, yields, rental pool, storage adjustments and storage carryover values for each reservoir and spaceholder are shown in the 2019 Storage Report that can be retrieved from the Water District #1 webpage <u>www.waterdistrict1.com</u> by choosing the STORAGE ALLOC & CARRYOVER tab and then viewing the 2019 Storage Report file. The historical daily water right accounting and distribution of natural flow and storage to diversions can also be retrieved from this same internet link by viewing the 2019 Water Rights Accounting Report file.

Annual reports of accounting data for individual diversions, reservoirs, or streamflow stations can be retrieved at the <u>www.waterdistrict1.com</u> webpage and by choosing the HISTORICAL DATA RETRIEVAL tab; selecting Upper Snake River system in Step 1; selecting the desired diversion, reservoir, or streamflow station in Step 2; selecting the desired year in Step 3; and submitting your request in Step 4. After the request is submitted, a new page will be displayed showing the history data for the selected diversion (daily cfs), reservoir (daily acrefeet), or streamflow station (daily cfs). Beneath the table of displayed data, there are options to output the data to a document or graph. There is also an option to download the data to a CSV (spreadsheet), JSON, or XML file.

If additional accounting information for the selected diversion, reservoir, or streamflow station is required (such as daily storage diverted by a diversion, daily accrued storage to a reservoir water right, daily natural flow, daily stored flow, or priority date delivered at various streamflow stations) click on the ACCOUNTING button shown alongside the HISTORY button at the top of the displayed data table to display these additional daily accounting results.

### PERSONNEL

The process of accurately distributing water and regulating the use of water according to the various water rights requires the daily collection and compilation of large amounts of data. The process of collecting these data is the primary responsibility of the "river riders." Each day the river riders travel a specific circuit and collect stage data from the various diversion gages. These gage readings are later compared with data produced by continuous stage recorders which produce a record of stage vs. time throughout the day.

The accuracy of the diversion data computed from stage data collected by the river riders is dependent on the work of the "hydrographers." It is the job of the hydrographer to read gages and measure discharge in each canal often enough to assure an accurate relationship between stage and discharge throughout the season. Because the stage-discharge relationship can "shift" during the season, the frequency with which measurements are made varies from canal to canal. Generally, it is found that one discharge measurement per month is adequate to maintain a reasonably accurate rating for most canals.

By statute, the responsibility for controlling and regulating the diversion of water rests with the watermaster. Because of the desire of most canal companies and irrigation districts, provisions have been made to deputize their managers for the purpose of regulating specific diversions. In addition, several other deputies are needed to fulfill the watermaster's regulatory functions. Lyle Swank retired from Water District #1 midway through the 2019 season. The watermaster position was filled for the remainder of the season by Tony Olenichak. The water district personnel employed during the 2019 irrigation year are listed below:

Lyle R. Swank	Watermaster
Tony Olenichak	Program Manager/Watermaster
Travis Soderquist	Associate Engineer
Craig Chandler	Associate Engineer
Amanda Fowler	Staff Hydrologist
Helga King	IT Programmer Analyst Associate
Shelly Bradford	Financial Specialist
Shawn Hall	Deputy Watermaster & Hydrographer, Idaho Falls
Gordon Mills	Deputy Watermaster & Hydrographer, Lower Valley
Trevor Larson	Deputy Watermaster & Hydrographer, Henrys Fork
Mike Harrigfeld	Deputy Watermaster, Willow Creek
Nick Olson	Deputy Watermaster & Hydrographer, Teton Basin
	& Swan Valley
Marilyn Rumsey	Hydrographer, Teton River
Jeanne Olson	River Rider, Heise & Rigby Diversions
Vic Gentle	River Rider, Idaho Falls Diversions
Jeff Baldwin	Hydrographer, Blackfoot Diversions
Wayne Lenz	River Rider, Upper Falls River
Doug Ping	River Rider, Milner

### ANNUAL MEETING

Title 42, Chapter 6 of the <u>Idaho Code</u> provides the legal mechanism by which the use of water can be regulated. The first step in this process is for the director of the Department of Water Resources to create a water district. The director took this action in 1919 to establish Water District 1. Each year it is the responsibility of the water users within the district to meet, as provided by law, to elect a watermaster, set the budget for the ensuing year, and pass such resolutions as are necessary and helpful in assuring an orderly and equitable distribution system. The Water District 1 annual meeting has been held each year on the first Tuesday of March. The results of the actions taken by water users of Water District 1 at their annual meeting are summarized as follows:

The annual meeting of Water District 1 was held on March 4, 2019, in Idaho Falls, Idaho. Lyle Swank was elected the watermaster for the ensuing year.

The following people were elected as members of the Committee of Nine:

Rodney Dalling, Chairman; Darrel Ker, Vice-Chairman; Brent Bowen, Treasure; Alan Kelsch; Luke Hicks; Mike Rasmussen; Jennifer Ellis; Scott Breeding; and DeWitt Marshall.

Alternates: John Lind, Secretary; Dan Shewmaker (for Scott Breeding); Louis Thiel (for Alan Kelsch); Albert Lockwood (for DeWitt Marshall); Dave Chapple (for Darrel Ker); Ty Scott (for Luke Hicks); Sean Maupin (for Rodney Dalling and Mike Rasmussen); Keith Salisbury (for Jennifer Ellis); and Josh Kowitz (for Brent Bowen).

Advisory members: Arnold Woolstenhulme; Harold Mohlman; Randy Brown; Ellis Gooch; Ryan Newman (USBR); Brian Stevens (USBR); Matt Howard (USBR); and Steven Wolff (Wyoming State Engineer).

### **RESOLUTIONS AND BUDGET**

The annual budget for the water district is contained in the resolutions approved by the water users at the annual meeting. Assessments for water usage are sent to water users following the irrigation season based on the amount spent for water delivery for items contained in the budget and proportioned according to the amount of water delivered. Billing after water usage has occurred allows the water district to avoid billing water users prior to the end of the irrigation year that requires an estimate of annual water usage. Billing after diversion records have been finalized saves time, money and avoids confusion. The after-the-fact billing process is much more efficient than the estimated process used by most other water districts.

The Idaho statutes establish a process whereby the distribution costs of a water district are distributed to water users in proportion to their percent of the total water diverted that year. For example, a canal company whose total diversions averaged 10% of the total water used in the district will be assessed approximately 10% of the total expenses of the district. In some instances, the percentage of the expenses a user pays may differ from his percentage of total water diverted because each diversion is subject to a \$75.00 minimum charge. If the percentage for water usage by a user results in a computed share of the annual budget less than \$75.00, the user's water delivery bill will be set to the \$75.00 minimum. The minimum charge for water delivery is contained in the resolutions passed at the annual water district meeting each year.

Assessments billed to water users in 2019 were held to the same \$1,010,000 total billed to users in the previous year. Actual district 2018 expenses totaled \$1,753,202 but \$742,202 were paid from the district's reserve funds. When reserve funds are sufficient, district assessments can be kept steady from year-to-year to allow water users to better anticipate their upcoming annual costs for water delivery from the water district each year. Lower Valley diversions exceeding the minimum assessment of \$75.00 were assessed approximately 10.6 cents per acre-foot diverted. Upper Valley legal fees totaling \$38,999 were added to assessments for diversions above American Falls Reservoir resulting in approximately 11.7 cents per acre-foot assessed to those diversions exceeding the \$75.00 minimum assessment.

The 2019 resolutions and auditor's report are presented in the Appendices A and B.

### WATER RIGHT REGULATION

The primary responsibility of the watermaster is to measure the natural flow and storage water flowing in streams within Water District #1 and then to distribute that water according to water rights and storage assigned to canal and pump diversions. The area regulated by Water District #1 includes diversions from the Snake River and its tributaries upstream from the confluence with the Blackfoot River near Blackfoot, Idaho, in addition to regulating diversions from the Snake River Mainstem to Milner Dam near Twin Falls, Idaho. The process used to distribute water is described in a manual titled *CONCEPTS, PRACTICES, AND PROCEDURES USED TO DISTRIBUTE WATER WITHIN WATER DISTRICT #1* posted on the <u>www.waterdistrict1.com</u> webpage under the WATER ACCOUNTING MANUAL tab.

Water District #1 primarily uses two computer programs to account for distribution of natural flow and storage: 1) the daily water right accounting program; and 2) the storage report program. The output from the daily accounting program shows the daily computation and distribution of natural flow to diversions and reservoirs. When a diversion exceeds the amount of natural flow available to a diversion, the amount diverted in excess of the natural flow is charged as storage water diverted to the diversion. The storage report program summarizes the annual volume of 1) storage allocated to reservoir accounts; 2) storage allocated to individual diversions; 3) storage usage by each diversion; 3) storage adjustments made for rentals and other miscellaneous adjustments; and 4) carryover storage for each diversion and reservoir account. Both the output from the storage report and the daily water right accounting for each year can be retrieved by selecting either the STORAGE ALLOC & CARRYOVER tab or the WATER RIGHT ACCOUNTING tab listed under the historical data/information category shown on the <u>www.waterdistrict1.com</u> webpage.

Listings of water rights assigned to diversions and reservoirs in the 2019 daily water right accounting program are shown in the *Appendices C* and *D*, sorted by diversion and priority dates. Miscellaneous streamflow and diversion records collected during the irrigation year in the Upper Teton Basin and not available from the internet can be found in *Appendix E* of this report.

### **RENTAL POOL**

Each year there are some water users above Milner who have natural flow and storage supplies that are inadequate to meet their water requirements. There also have been agreements made to provide storage water for flow augmentation below Milner Dam outside the water right place of use for the storage rights. The Water District 1 Rental Pool, created under the provision of Section 42-1761 of the <u>Idaho Code</u>, can provide for some or all of these needs dependent on the water supply each year.

Through the provisions of <u>Idaho Code</u> § 42-1765, the Committee of Nine was appointed by the Water Resources Board to act as the local operating committee for the rental pool. The 2019 Rental Pool Committee, appointed by the Chairman of the Committee of Nine, consisted of Chairman Darrel Ker, Rod Dalling, Jennifer Ellis, DeWitt Marshall, and Brent Bowen with advisory members Ryan Newman from the United States Bureau of Reclamation, Watermaster Lyle Swank, and attorneys for the Committee of Nine Jerry Rigby and John Simpson.

There are multiple categories within the rental pool. One of those categories is the Common Pool. Common Pool rentals are supplied from the fill into the reservoir system towards the end of the irrigation season, commonly referred to as late-season fill. Rentals provided by the Common Pool above Milner are typically limited to a maximum of 55,000 acrefeet of total rental.

Flow augmentation rental purchased by the U.S. Bureau of Reclamation for purposes below Milner is also supplied from the Common Pool and late-season fill. The amount supplied for flow augmentation is determined by two factors: 1) the reservoir system contents on November 1<sup>st</sup> of the previous calendar year; and 2) the April 1<sup>st</sup> runoff forecast in the year the flow augmentation rental is to be used. The flow augmentation rental amount ranges from zero to 205,000 acre-feet depending on those two factors. The Committee of Nine also has the ability to increase the amount provided to flow augmentation rental in years when extraordinary circumstances arise.

Another category within the Rental Pool is two-party private leases. When there isn't storage available to rent from the Common Pool or the water user chooses not to utilize the Common Pool supply, a water user may negotiate a rental lease agreement with a reservoir spaceholder to use the spaceholder's storage above Milner. These transactions are defined as private leases.

Assignments of storage is an additional category for rentals above Milner. A participating spaceholder may voluntarily supply any amount of their storage allocation to be made available to the Common Pool supply for rental to purchasers after the Common Pool supply has been exhausted. There weren't any assignments of storage to the 2019 Rental Pool.

Using late-season reservoir fill to supply Common Pool rentals can sometimes impact the following year's storage allocation to spaceholders when the water supply is insufficient to completely fill the reservoir system in the year following the rentals. When this occurs, an impact analysis is performed to determine the quantities of impacts to spaceholder allocations, i.e. the additional increase in storage that would have accrued to the reservoir water rights if the previous year's Common Pool rentals had not occurred. Spaceholders participating in the rental pool process are paid money for any impacts to their storage allocations. Spaceholders not participating in the rental pool process are supplied rental storage (without charge) equal to the amount of impacts to their storage allocations. There weren't any impacts to 2019 storage allocations resulting from late-season fill reductions at the end of the 2018 season.

The rental price for purchases from the Common Pool above Milner in 2019 was \$9.00 per acre-foot, consisting of a \$7.00 rental fee, plus 10% Water Resources Board surcharge (\$0.70), plus administrative fee of \$1.30. The rental price for flow augmentation below Milner was \$20.00 per acre-foot, consisting of \$17.00 rental fee, plus a 10% surcharge (\$1.70) to the Water Resources Board, plus an administrative fee of \$1.30. Administrative fees of \$1.30 per acre-foot and the 10% Water Resource Board fee were also collected for two-party private leases.

The participating spaceholders listed in Table 2 agreed to make 2019 late-season-fill available to the rental supply in exchange for being paid 70% of the fees collected from 2019 rentals. If the reservoirs fail to fill in 2020 as a result of using this late-season-fill, participating spaceholders whose space fails to fill as a result of this rental process will be paid an additional amount for the impacts to their unfilled space from the remaining 30% of rental fees collected. If any water users represented by the Committee of Nine supplying water to irrigation rentals or rentals of water for flow augmentation who are classified as non-participating spaceholders are impacted as a result of the participating spaceholders providing water to the rental pool at the end of the 2019 season, those impacted non-participating spaceholders are provided storage from participating spaceholders equal to the amount of impacts to their unfilled space in 2020.

In 2019, late-season-fill was used to supply 15,987 acre-feet of initial agricultural rentals above Milner, 150,000 acre-feet for flow augmentation, and 1,365 acre-feet to supply excess storage uses computed at the end of the 2019 season. Purchasers of this supply are shown in Table 3. An additional 119,088 acre-feet were supplied through two-party leases for rental storage diverted above Milner (Table 4).

The last category within the Water District #1 rental pool is the Supplemental Pool. The purpose of the Supplemental Pool is to provide a voluntary mechanism for the lease of storage water below Milner for hydropower generation. The Supplemental Pool only occurs in years when there is a plentiful water supply and is authorized by the Committee on Nine. The Supplemental Pool authorized in 2019 supplied 70,000 acre-feet from 15 spaceholders at a total price paid by Idaho Power of \$1,794,800 consisting of \$25.64 paid to the supplier, plus a \$1.80 administrative fee paid to the water district, plus \$2.56 paid to the Idaho Water Resource Board per acre-foot of rental. Spaceholders that supplied the 2019 Supplemental Pool are shown in Table 5.

The majority of the irrigated acres from the Henrys Fork and its tributaries are within the boundaries of the Fremont Madison Irrigation District. Henrys Fork Basin users within the boundaries can purchase Fremont-Madison unallocated storage or groundwater pumped from groundwater exchange wells if they need additional water supplies. In 2019, Fremont Madison Irrigation District rented a total of 16,024 acre-feet distributed to diversions shown as storage purchased in the 2019 Storage Report that can be viewed on the <u>www.waterdistrict1.com</u> webpage and choosing the STORAGE ALLOC & CARRYOVER tab. In addition, excess uses on the Henrys Fork, Falls River, and Teton River totaled 7,075 acre-feet. The total 23,099 acre-feet of rental supplied by Fremont Madison Irrigation District consisted entirely of Fremont-Madison Irrigation District's storage in Island Park and Grassy Lake Reservoirs.

The 2019 Rental Pool Procedures are shown in Appendix F.

### WATER DISTRICT 1 2019 RESOLUTIONS

### 1. ANNUAL MEETING OF WATER DISTRICT

BE IT RESOLVED, That the annual Water District 1 meeting shall be held on the first Tuesday of March of each year unless the director and Committee of Nine should find it necessary to change the meeting date.

BE IT FURTHER RESOLVED, That the water users of Water District 1 waive mailed notice of the annual meeting and direct publication of the meeting notice for two (2) consecutive weeks in at least three newspapers located throughout the water district. Nevertheless, Water District 1 will attempt reasonable notice of the annual meeting.

BE IT FURTHER RESOLVED, that in addition to all requirements of the Idaho Open Meetings Law, the agenda for the annual meeting shall be posted on the website maintained by the Water District, so long as the website is operable, not less than forty-eight (48) hours prior to the annual meeting and all minutes of the annual meeting shall be posted on the website maintained by the Water District within a reasonable time after the annual meeting.

### 2. WATERMASTER

BE IT RESOLVED, That the watermaster shall use reasonable technology available to accurately distribute natural flow and storage water supplies pursuant to Chapters 6 and 8, Title 42, <u>Idaho Code</u>, and will use his available resources to assure that no water user or group of water users divert or use water not provided by their legal rights to the water supply; or properly supplied through leases or rentals in accordance with the rental pool procedures; that the watermaster maintain accurate records of water delivered to each water user; and

That the watermaster shall, by using available measured data and the best available estimates where data is unavailable, accurately allocate the estimated expenses of delivering water of the district to each ditch, canal company, irrigation district or other water user as provided by law; and

That the watermaster shall prepare the Annual Watermaster's Report as required by <u>Idaho Code</u> §42-606 and a proposed budget for the succeeding year as required by <u>Idaho Code</u> §42-615; and

That the watermaster shall investigate ways to expand and maintain automation where it can effectively improve management, reduce personnel costs, travel costs, or result in cost or water savings for water users of Water District 1, or assure better and more current data; and That the watermaster of Water District 1 is hereby designated manager of the Rental Pool for the Committee of Nine; and

That the watermaster shall not deliver water to any ditch, canal company or other water user until receipt of the amount due and payable from such user is paid.

### 3. TREASURER

BE IT RESOLVED, That the duly elected treasurer of Water District 1 shall keep a complete, accurate and permanent record of all monies received by and disbursed for and on behalf of the district or the advisory committee. The water district treasurer shall deposit all monies of the district and advisory committee in a depository which complies with the public depository law as contained in Chapter 1, Title 57, <u>Idaho Code</u>; and

That before undertaking the duties of the office, the water district treasurer shall take and subscribe to an oath before an officer authorized by the laws of the state to administer oaths, to faithfully perform the duties of the office, and shall file the oath with the director of the Idaho Department of Water Resources (IDWR); and

That the water district treasurer of Water District 1 shall have the right to collect any charges due and unpaid, by civil action, said action to be brought in any court of competent jurisdiction, in the name of the water district treasurer to whom such charges are payable, and in addition to the amount found due, together with interest and costs, may also recover such sum as the court may adjudge reasonable as attorney fees in said action; and

That the water district treasurer shall only disburse monies from the water district account upon submission of a written voucher approved by the watermaster for expenses incurred for water district purposes related to the delivery of water or by voucher approved by the chairman of the advisory committee for activities pursuant to resolutions adopted by the water users from district funds or funds retained pursuant to Idaho Code §42-613A; and

That the water district treasurer shall prepare a statement of the financial affairs of the district at the end of each fiscal year and shall file the statement with the director of the IDWR; and

That in the discharge of the above duties of the treasurer, he may seek staff assistance as needed.

### 4. ELECTION OF WATERMASTER AND TREASURER

### **BE IT RESOLVED:**

- a. <u>Watermaster</u>. That Lyle Swank be elected watermaster, and be authorized to hire a full-time staff of a deputy, two assistants, a financial assistant, a data specialist, and such other assistants as provided by the adopted budget. The watermaster may hire additional assistants as authorized in <u>Idaho Code</u> §42-609, in an emergency. The watermaster shall serve for a term of one year and upon a determination of necessity therefore, an extension of that term as provided by the director of the Idaho Department of Water Resources (IDWR) for a period of time determined necessary by the director. A certified copy of the minutes containing this resolution and the oath of the watermaster shall be sent to the IDWR.
- b. <u>Treasurer</u>. That the Treasurer shall be a current member or alternate of the Committee of Nine, and shall serve a term of one year, or until a successor is elected or appointed. The treasurer's compensation and expenses shall be set by the Committee of Nine, but not to exceed the sum provided in the 2019 Water District 1 budget. Brent Bowen is hereby elected Water District 1 Treasurer and Alan Kelsch as the assistant treasurer.

### 5. BUDGET

WHEREAS, The water users of Water District 1 meeting in regular annual session find it necessary to confirm the continuation of the following "on-going" resolutions which direct the watermaster and the treasurer of the district in certain aspects of Water District 1 operations;

NOW, THEREFORE, BE IT RESOLVED, That the budget of Water District 1 adopted at the annual meeting shall become the basis for the aggregate amount to be assessed and collected from all water users in the district for the succeeding year. The actual deliveries for the past irrigation season or seasons will be the basis for the allocation of said expenses to the individual water users, canal companies, and irrigation districts. The amount assessed shall constitute a final determination of the amount due for that year, pursuant to <u>Idaho Code</u> § 42-612(5); and

That the treasurer shall establish and maintain a general account and shall cause all monies received to be deposited and shall make all disbursements as necessary to conduct the business of the water district; and

The budget for Water District 1 for the 2019 year beginning November 1, 2018 be as follows:

	2018 BUDGET		10/31/2018 2018 ACTUAL		2019 BUDGET

5 Charges covered by the Upper Valley Water Users

### 6. INTERIM BUDGET

WHEREAS, Water District 1 changed its fiscal year to begin November 1 and end October 31 of each year; and

WHEREAS, The annual meeting of Water District 1 at which the annual budget is adopted is the first Tuesday in March, leaving the water district to operate for just over four months without a budget.

NOW, THEREFORE, BE IT RESOLVED, By Water District 1 meeting in regular annual session, that Water District 1 adopts a continuing budget of 40% of the current annual budget for the district to operate under between November and the annual meeting.

BE IT FURTHER RESOLVED, That the continuing budget approved by Water District 1 may be amended by the Committee of Nine provided it shall reasonably represent the budget resolution the Committee of Nine will propose to the water users at the next annual meeting.

### 7. FILING OF ANNUAL MEETING MINUTES, BUDGET AND RESOLUTIONS

BE IT RESOLVED, That copies of the minutes of the annual meeting, the approved budget, and resolutions 2, 3, 4, 5, 6 and 7 adopted at the annual meeting of the water users of Water District 1 shall be filed with the secretary of said meeting and thereupon he shall immediately prepare and file a certified copy thereof with the director of the Idaho Department of Water Resources and a certified copy with the county auditors of Bonneville, Teton, and Fremont Counties in accordance with Idaho Code §42-612 and §42-617.

### 8. MINIMUM CHARGES FOR WATER DELIVERY

WHEREAS, It is the watermaster's responsibility to assure the proper delivery of both natural flow and storage supplies to all water users; and

WHEREAS, The normal water district cost of delivering water to many water users is greater than their normal assessments would be based upon their total annual use of water.

NOW, THEREFORE, BE IT RESOLVED, That the watermaster of Water District 1 is hereby authorized to assess a \$75.00 minimum charge for every diversion within his jurisdiction when the pro rated charge to the water user is less than the minimum charge.

### 9. SPECIAL ASSESSMENTS-UPPER VALLEY WATER USERS

WHEREAS, The water users located above Blackfoot, excluding irrigation entities which have duly and timely opted out of the upper valley legal services assessments by retaining their own individual counsel, (upper valley) have chosen to collectively retain legal counsel; and

WHEREAS, It is their desire to have the watermaster assess the upper valley water users for these legal services and other appropriate and reasonable expenses associated with representation of the collective interests in the upper valley in proportion to their water use unless an alternative method is adopted.

NOW, THEREFORE, BE IT RESOLVED, that the watermaster hereby be authorized to assess canals located above Blackfoot (excluding irrigation entities which have duly and timely opted out of the upper valley legal services assessments by retaining their own individual counsel) for legal fees and other appropriate expenses associated with representing the collective interest of the upper valley, including a Treasurer if required.

BE IT FURTHER RESOLVED, That such charges may not exceed the amount budgeted during the current year and that the assessments will be made in proportion to their water use or in a manor acceptable to and approved by representatives of the water users of the upper valley.

BE IT FURTHER RESOLVED, That the water district treasurer shall maintain said amounts in a separate account and that payment there from shall ONLY be made when authorized by the Upper Valley budget or the upper valley Committee of Nine members.

### 10. COOPERATIVE PROGRAM

WHEREAS, Water District 1 employee compensation has not been adequate to keep pace with inflation and other increasing costs, especially when compared to the private sector; and

WHEREAS, Engineers, hydrologists and other specialized, technical positions at Water District 1 are important for dealing with the critical water issues facing the district including the administration of the rental pool; and

WHEREAS, Water District 1 needs the ability to attract and keep sufficient new employees for these technical positions due in large part because of the wide difference in salary when compared to the private sector; and

WHEREAS, Water District 1 has previously not been allowed to adjust employee compensation due to the current Memorandum of Understanding which classifies them as "state employees"; and

WHEREAS, Due to a recent change in Idaho law which now allows Water District 1 to compensate its employees over and above the limits they would otherwise receive under the present rates for their particular classifications as state employees.

NOW, THEREFORE, BE IT RESOLVED, That the water users of Water District 1 hereby grants the authority to the Committee of Nine to create a standing Compensation/MOU Sub-Committee of the Committee of Nine to work with the Director of Idaho Department of Water Resources (IDWR), which shall then make recommendations to the Committee of Nine for its consideration to adjust employee compensation for Water District 1 employees taking into account the expertise, specialization and technical training for each employee, compared with salaries offered in the private sector, as limited by the budgeted amount for employee compensation authorized by the water users of Water District 1.

BE IT FURTHER RESOLVED, That except for the modifications described herein, the water users of Water District 1 continue the cooperative program with the IDWR as outlined in the Memorandum of Understanding originally dated March 4, 1979 as amended on March 2, 1993, and as further amended from time to time with approval by the Committee of Nine, signed by the chairman of the Committee of Nine and the director of IDWR, a copy of which is attached hereto as Exhibit A and made a part hereof as if set out at length herein.

BE IT FURTHER RESOLVED, That based upon the above criteria and the recommendations of the Compensation Sub-Committee (MOU Committee), as approved by the Committee of Nine, the water users of Water District 1 hereby authorize the following salaries of Water District 1 employees, which include the salaries and raises currently proposed by IDWR, to be effective and implemented as soon as practical but not later than IDWR implements salary adjustments, upon adoption of this Resolution by the water users:

### 11. WATER DISTRICT PROPERTY

BE IT RESOLVED, That the watermaster is hereby authorized to acquire, hold and dispose of such real and personal property, equipment and facilities in the name of the water district as necessary for the proper distribution of water and shall provide that all such real and personal property shall remain in the custody of the watermaster and the watermaster's successor.

### 12. COMMITTEE OF NINE

BE IT RESOLVED, That the Committee of Nine be designated to be the advisory committee under <u>Idaho Code</u> §42-605 and be continued with nine regular members selected by their respective districts and approved by the water users at the annual meeting of Water District 1. The member representing the Burley and Minidoka Irrigation Districts and the member representing the West side and East side of the Henrys Fork District shall be alternated between the two districts as they agree. Alternates for each committee member may be approved in the same manner as regular committee members at the annual meeting. Advisors to the Committee of Nine may consist of a representative from the United States Bureau of Reclamation, the Teton Basin, the AFRD #2, A & B Irrigation District, the Wyoming State Engineer, or others as approved by the Committee of Nine.

BE IT FURTHER RESOLVED, That the Committee of Nine shall elect from the regular committee members a Chairman, and Vice-Chairman for terms of two (2) years unless the position is vacated. These positions shall rotate, alternating among representatives of the following three (3) areas (each area determining which representatives shall serve as the officer from its area): Those representatives from districts below American Falls Reservoir; those representatives from districts in the Blackfoot and South Fork area; and those representatives from the Idaho Falls and Henrys Fork area. Members elected shall transition through the offices identified (except for the office of Treasurer which would rotate through the districts but not necessarily succeed to the Vice Chairman and Chairman). If at any time a member duly elected becomes unable to serve, his or her position shall be filled by a member identified as a substitute from the identified district.

BE IT FURTHER RESOLVED, That the Committee of Nine shall as needed, organize sub-committees, staffed with regular committee members or their alternates who shall make recommendations to the Committee of Nine. The United States Bureau of Reclamation representative and the Watermaster of Water District 1 shall serve as advisors to the rental pool subcommittee. The Chairman shall chair the Resolutions sub-committee. The Vice-Chairman shall chair the Rental Pool subcommittee. The Treasurer shall chair the Finance sub-committee. The sub-committees shall be staffed at the desires of the Chairman in consultation with the Vice-Chairman with the intent that each area be represented.

BE IT FURTHER RESOLVED, That in addition to all requirements of the Idaho Open Meetings Law, so long as the Water District website is operable, the notices for all regular meetings of the Committee of Nine and its subcommittees shall be posted on the website maintained by the Water District not less than five (5) days before the meeting; unless an emergency exists, the notices for all special meetings of the Committee of Nine and its subcommittees shall be posted on the website maintained by the Water District not less than five (24) hours before the meeting; agendas for all regular meetings of the Committee of Nine and its subcommittees shall be posted on the website maintained by the Water District not less than twenty-four (24) hours before the meeting; agendas for all regular meetings of the Committee of Nine and its subcommittees shall be posted on the website maintained by the Water District not less than twenty-four (24) hours before the meeting; agendas for all regular meetings of the Committee of Nine and its subcommittees shall be posted on the website maintained by the Water District not less than twenty-four (24) hours before the meeting; agendas for all regular meetings of the Committee of Nine and its subcommittees shall be posted on the website maintained by the Water District not

less than forty-eight (48) hours before the meeting; agendas for all special meetings of the Committee of Nine and its subcommittees shall be posted on the website maintained by the Water District not less than twenty-four (24) hours before the meeting; and, all minutes of the regular and special meetings of the Committee of Nine and its subcommittees shall be posted on the website maintained by the Water District within a reasonable time after a meeting.

### 13. CREDENTIALS

WHEREAS, The water users of Water District 1 have historically specified that "no person be elected to membership and service on the Committee of Nine ... unless he be a land owner and a water user...;" and

WHEREAS, A "Person" shall include an individual or a duly authorized person from an "Entity" which is defined as a cooperative; corporation; sole proprietorship; unincorporated association; limited liability company; partnership; trust; estate; and body politic.

NOW, THEREFORE, BE IT RESOLVED, That water users and landowners shall be defined as follows:

- a. A Person who owns an irrigated farm that is comprised of more than twenty (20) irrigated acres that has a valid surface water right deliverable by the Water District 1 Watermaster; and
- b. A Person who currently or in the past receives over 50 percent of his annual income from farming activities;

### 14. AUTHORITY OF COMMITTEE OF NINE

WHEREAS, The members of the Committee of Nine, as the water district's advisory committee, are elected to represent the general interest of the water users, and as such each Committee of Nine district shall be limited to one vote by either its regular Committee of Nine member or its approved alternate.

NOW, THEREFORE, BE IT RESOLVED, That the Committee of Nine is hereby authorized to:

- a. Advise and consult with the watermaster and director on matters related to water resources management and water distribution;
- b. Serve as the standing resolutions committee for all meetings of the water district;
- c. Take those actions necessary to represent and protect the interests of the water users of the water district and to authorize the expenditure of additional funds when necessary;

- d. Employ such legal, engineering, technical and clerical services that may be deemed necessary by the Committee of Nine to fulfill its responsibilities to the water users of the water district;
- e. Make and execute such contracts and agreements as may be deemed necessary or convenient;
- f. Do such other things, as the committee shall deem to be beneficial to the water users of the water district.
- g. To appoint such other persons as advisors to any subcommittee as deemed necessary by the Chairman in consultation with the Vice-Chairman.

BE IT FURTHER RESOLVED, That the Committee of Nine is hereby ratified as the local committee for the rental of stored water under <u>Idaho Code</u> §42-1765.

### 15. APPROVAL OF EXPENSES BY COMMITTEE OF NINE

WHEREAS, The Committee of Nine has been selected by the water users of Water District 1 to represent their collective interests.

NOW, THEREFORE, BE IT RESOLVED, That the Committee of Nine be authorized to modify the budget and approve the expenditure of funds held by the water district for the following purposes:

- a. Unanticipated expenses of the water district;
- b. Necessary improvements to the water district's facilities;
- c. Educational projects designed to increase public awareness in the area of water distribution, water rights and water conservation;
- d. Other public projects designed to assist in the adjudication, conservation or more efficient distribution of water;
- e. Involvement in legislative, legal and agency deliberations on issues identified in the resolutions and such other matters involving water quantity and quality which could affect water users of the water district, including naming the Committee of Nine as a party in legal actions involving the Endangered Species Act, the Clean Water Act, and the negotiation and administration of federal and tribal claims filed in the Snake River Basin Adjudication and settlements, and further, to expend funds as are necessary that may exceed the budgeted amounts for such expenditures and then approved by the Committee of Nine;

- f. To reimburse advisory committee members in accordance with the policy attached hereto as Exhibit B or as approved by the Committee of Nine;
- g. Items authorized in resolution number 13.

### 16. INDEMNIFICATION OF COMMITTEE OF NINE MEMBERS

WHEREAS, The Committee of Nine has been selected by the water users of Water District 1 to represent their collective interests; and

WHEREAS, The Committee of Nine is highly involved in legislative, legal and agency deliberations on water quantity and water quality issues that could affect water users of the water district, including naming the Committee of Nine as a party in legal actions.

NOW, THEREFORE, BE IT RESOLVED, That the water users of Water District 1 authorizes the district to have the power to indemnify any person who was or is a party or is threatened to be made party to any threatened, pending or completed action, suit or proceeding, whether civil, criminal, administrative or investigative (other than an action by or in the right of the district) by reason of the fact that he is or was a member of the Committee of Nine, an alternate, or appointee of the committee, against expenses (including attorneys' fees), judgments, fines and amounts paid in settlement actually and reasonably incurred by him in connection with such action, suit or proceeding if he acted in good faith and in a manner he reasonably believed to be in or not opposed to the best interests of the district, and with respect to any criminal action or proceeding, had no reasonable cause to believe his conduct was unlawful. The termination of any action, suit or proceeding by judgment, order, settlement, conviction, or upon a plea of nolo contendere or its equivalent, shall not, of itself, create a presumption that the person did not act in good faith and in a manner which he reasonably believed to be in or not opposed to the best interests of the district, and, with respect to any criminal action or proceeding, had reasonable cause to believe that his conduct was unlawful.

BE IT FURTHER RESOLVED, That the water users of Water District 1 authorizes the district to have the power to indemnify any person who was or is a party or is threatened to be made a party to any threatened, pending or completed action or suit by or in the right of the district to procure a judgment in its favor by reason of the fact that he is or was a member of the Committee of Nine, a director, officer, employee or agent of the district, or is or was serving at the request of the district as a member of the Committee of Nine, an alternate, or appointee of the committee against expenses (including attorneys' fees) actually and reasonably incurred by him in connection with the defense or settlement of such action or suit if he acted in good faith and in a manner he reasonably believed to be in or not opposed to the best interests of the district and excerpts that no indemnification shall be made in respect of any claim, issue or matter as to which such person shall have been adjudged to be liable for negligence or misconduct in the performance of his duty to the district unless and only to the extent that the court in which such action or suit was brought shall determine upon application that, despite the adjudication of liability but in view of all circumstances of the case, such person is fairly and reasonably entitled to indemnity for such expenses which such court shall deem proper.

BE IT FURTHER RESOLVED, That to the extent that a past or present member of the Committee of Nine, an alternate, or appointee of the committee has been successful on the merits or otherwise in defense of any action, suit or proceeding referred to in subsection (a) or (b) hereof, or in defense of any claim, issue or matter therein, he shall be indemnified against expenses (including attorneys' fees) actually and reasonably incurred by him in connection therewith.

BE IT FURTHER RESOLVED, That the water users of Water District 1 authorize the district to have the power to purchase and maintain insurance on behalf of any person who is or was a member of the Committee of Nine, an alternate, or appointee of the committee against any liability asserted against him and incurred by him in any capacity or arising out of his status as such, whether or not the district would have the power to indemnify him against such liability under the provisions of this section.

BE IT FURTHER RESOLVED, That the indemnification and advancement of expenses provided by, or granted pursuant to, this section shall, unless otherwise provided when authorized or ratified, continue as to a person who has ceased to be a member of the Committee of Nine, an alternate, or appointee of the committee, and shall inure to the benefit of the heirs, and personal representatives of such a person.

#### 17. ATTORNEYS FEES

WHEREAS, The Committee of Nine has been elected and recognized as the advisory committee of Water District 1 since 1919; and

WHEREAS, <u>Idaho Code</u> §42-612 authorizes the water users to budget for costs of the advisory committee in implementing resolutions adopted by the water users of the district; and

WHEREAS, The funding for advisory committee expenses associated with implementing resolutions adopted by the water users for other than the payment of salary and operating expenses of the watermaster and assistants shall come from funds available pursuant to section <u>Idaho Code</u> §42-613A; and

WHEREAS, <u>Idaho Code</u> §42-619(8) provides the treasurer of the water district shall only disburse moneys from the water district account upon submission of a written voucher approved by the watermaster for expenses incurred for purposes related to water delivery or by a voucher approved by the chairman of the advisory committee for activities pursuant to specific resolutions adopted by the water users from district funds; and

WHEREAS, The accounting of the water district would better comply with accounting standards if all legal firms hired by the Committee of Nine complied with certain standard procedures.

NOW, THEREFORE, BE IT RESOLVED, By the water users of Water District 1, that the following procedures be implemented to govern the relationship between legal firms employed by the Committee of Nine, as follows:

- a. That legal firms may hereafter only be hired by the Committee of Nine at a regular or special meeting on such conditions as the Committee might prescribe in an employment contract; and
- b. That legal firms shall execute an employment contract with the Committee of Nine of Water District 1 which shall list those items (resolutions) that have been previously designated as work for the Committee of Nine by that firm, which contract shall have a fee schedule for said firm's work attached; and
- c. That each firm shall itemize the work accomplished on each resolution assigned to the firm and the time spent thereon during the previous billing period on its monthly statements to the Committee of Nine, and all expenses and costs advanced during the month, including the payment of filing fees and other expenses; and
- d. That each firm will work on a standard hourly rate for services performed by attorneys and paralegals working on any authorized matter according to the hourly rates approved in the employment contracts. Each firm may reevaluate hourly rates as of January 1 each year but shall not increase rates without Committee of Nine approval; and
- e. That for each new issue arising under existing water user resolutions that one or more of the designated firms are asked to become involved in by a Committee of Nine motion and resolution, the Committee of Nine shall, to the extent possible, designate the scope of work and desired result, shall place a limit on the fees and costs charged at the time of issue designation, and shall at the time such limit is reached, review the work accomplished and, if necessary re-authorize work beyond the previously stated limit for fees and costs.

#### 18. CONTINGENCY FUND-WATER RENTALS

WHEREAS, The watermaster from time to time finds that storage has been used in excess of entitlements; and

WHEREAS, These "excess uses" require an allocation of rental pool storage; and

WHEREAS, Discussions and petitions regarding these excess storage uses can be time-consuming and can result in delays in making payments to rental pool participants.

NOW, THEREFORE, BE IT RESOLVED, That the Committee of Nine is authorized to maintain \$400,000 of the funds generated through the administrative fee placed on water rentals for the purpose of assuring rental pool participants can be paid in accordance with the Water District 1 Rental Pool Procedures.

BE IT FURTHER RESOLVED, That all monies collected for excess use rental charges, plus all appropriate interest and penalties, shall be first used to replace monies spent from this account.

#### 19. CONDITIONS TO DELIVERY OF WATER

WHEREAS, It is in the interest of all water users to have the water rights within Water District 1 delivered by priority; and

WHEREAS, The accounting system now used by Water District 1 requires that each diversion have assigned to it a specific list of decreed, licensed, and storage entitlements; and

WHEREAS, Those diversions which have no decreed, licensed or permitted water rights will necessarily be taking storage water any time a diversion takes place.

NOW, THEREFORE, BE IT RESOLVED, That no diversion under a decree, license or permit, shall be allowed unless the list of rights for that diversion are found in the watermaster's records or proper arrangements have been made to procure an adequate water supply prior to the start of the irrigation season.

#### 20. STORAGE DIVERSION REPORTING

WHEREAS, It is the watermaster's responsibility to assure the proper distribution of natural flow to all water users; and

WHEREAS, Diversions in Water District 1 may deliver water for rentals, groundwater conversions, recharge, and for other entities not entitled to receive natural flow while the diversion's water rights are in priority; and

WHEREAS, The watermaster must have an accurate record of the daily volume of storage diverted to lands or purposes that should not be receiving natural flow to ensure that the system's natural flow is distributed accurately to all diversions;

NOW, THEREFORE, BE IT RESOLVED, That any diversion carrying storage water for purposes or lands not entitled to receive the diversion's natural flow while the diversion's natural flow water rights are in priority must report their daily volume of storage diverted to the watermaster to ensure proper natural flow distribution to Water District 1 diversions; and

BE IT FURTHER RESOLVED, That storage water for purposes or lands not entitled to receive a diversion's natural flow will not be assigned to the diversion in the Water District 1 final water right accounting if the daily storage deliveries are not reported for the diversion.

#### 21. RENTAL POOL PROCEDURES OF COMMITTEE OF NINE

BE IT RESOLVED, That the following Water District 1 Rental Pool Procedures be approved by Water District 1 and submitted for approval by the Idaho Water Resource Board as follows:

See the Rental Pool Section.

#### 22. WATER DISTRICT 1 POLICY POSITION

WHEREAS, There are currently many issues that potentially can change water distribution patterns and water supplies in Idaho; and

WHEREAS, Water users are now being asked to fund experts and attorneys in preparation for negotiations and/or litigation; and

WHEREAS, The water users of Water District 1 and their representatives, the Committee of Nine, wish to have a clear representation of the position of Snake River irrigators, and establish the following as the guiding principles in any and all negotiations and litigation:

- a. Administration of water rights that have been or will be adjudicated in the Snake River Basin Adjudication (SRBA) must recognize traditional distribution and water management;
- b. The zero minimum flow at Milner, as established in the state water plan be recognized as the Water District 1's position, and that there can be no call for deliveries of Snake River water below Milner by downstream interests;
- c. Releases of Snake River water past Milner must be consistent with state law and limited to annual arrangements approved by the Committee of Nine and Idaho Water Resource Board;

d. Any changes in upstream water rights that would allow Snake River water to be transferred below Milner shall be by Committee of Nine agreement only or will be vigorously opposed.

NOW, THEREFORE, BE IT RESOLVED, By the water users of Water District 1, that the Committee of Nine is authorized to allocate sufficient funds to protect and defend these principles in negotiations with individuals, entities, the federal government and/or Indian tribes in challenging and defending claims in the SRBA or other necessary litigation concerning water right administration or water management.

## 23. ADMINISTRATION

WHEREAS, Idaho is a priority doctrine state where historically water has been developed and used in the various areas of the state; and

WHEREAS, The state has established administrative units in the form of water districts to distribute available water supplies; and

WHEREAS, Water within these administrative units has been distributed without respect to rights that might have been established by downstream users; and

WHEREAS, Upstream water users have not challenged or objected to the development of downstream water rights under the representation that their rights would not be subject to calls by water rights that exist outside of the state established administrative boundaries.

NOW, THEREFORE, BE IT RESOLVED, By the water users of Water District 1, that the Committee of Nine be authorized to expend the resources necessary to establish in the Snake River Basin Adjudication (SRBA) that past administration represents a vital element of a water right and must be preserved in the adjudication of rights in the SRBA.

#### 24. EVAPORATION LOSSES FROM RESERVOIRS WITHIN WATER DISTRICT 1

WHEREAS, The reservoirs on the mainstem of the Snake River and its tributaries within Water District 1 are used for the storage of water for irrigation and in the distribution and delivery of natural flow and stored water to water users within Water District 1; and

WHEREAS, It is to the benefit of all water users within Water District 1 to establish a standard accounting procedure for handling evaporation losses from reservoirs within Water District 1.

NOW, THEREFORE, BE IT RESOLVED, That the total evaporation losses determined to occur from all reservoirs shall be proportionately allocated among

all allottees or spaceholders receiving water from storage, without regard to the priority for storing water in the respective reservoir or its location.

BE IT FURTHER RESOLVED, That this resolution be recommended to the watermaster of Water District 1 and the director of the Idaho Department of Water Resources for implementation of these accounting procedures.

#### 25. RECHARGE.

WHEREAS, Water levels in the Eastern Snake Plain Aquifer (ESPA), as well as surface water flows, have declined over the past several years due to changes in irrigation delivery operations and practices, drought, and groundwater pumping; and

WHEREAS, These declining water levels and surface water flows may be improved by managed recharge at various locations on the Snake River Plain as determined by the ESPA model and recharge study; and

WHEREAS, Managed recharge is recharge of the ESPA by authorized diversion and use of storage or natural flow water rights in existing irrigation delivery facilities or other designated facilities; and

WHEREAS, At the present time, recharge facilities are available to accommodate recharge to ESPA within Water District 1.

NOW, THEREFORE, BE IT RESOLVED, That the water users of Water District 1 support continued efforts and funding to identify and implement the most effective managed aquifer recharge sites and projects, which would, replenish ground water levels and surface and spring flows.

BE IT FURTHER RESOLVED, That the water users of Water District 1 support recharge and are ready, willing and able to provide facilities to commence recharge upon clearly defined recommendations or proposals from the state of Idaho and Idaho Water Resource Board (IWRB).

BE IT FURTHER RESOLVED, That the water users of Water District 1 support and urge the IWRB to work with the Committee of Nine, canal companies and irrigation districts on management of the recharge component of the ESPA Comprehensive Aquifer Management Plan.

#### 26. IWRB COMPREHENSIVE AQUIFER MANAGEMENT PLAN (CAMP)

WHEREAS, In 2006 the Idaho Legislature passed Senate Concurrent Resolution No. 136 requesting the Idaho Water Resource Board (IWRB) to prepare and submit a CAMP for the Eastern Snake Plain Aquifer (ESPA); and

WHEREAS, The IWRB with the assistance of Idaho Department of Water Resources and a stakeholder advisory committee completed the CAMP and IWRB approved it on January 29, 2009; and

WHEREAS, The stated goal of the CAMP is to "Sustain the economic viability and social and environmental health of the Eastern Snake Plain by adaptively managing a balance between water use and supplies"; and

WHEREAS, The objectives of the CAMP are to: 1) increase predictability for water users by managing for a reliable supply; 2) create alternatives to administrative curtailment; 3) manage overall demand for water within the Eastern Snake Plain; 4) increase recharge to the aquifer; and 5) reduce withdrawals from the aquifer; and

WHEREAS, The CAMP seeks to effect a total long-term water budget change in the ESPA by 600,000 acre-feet over a 20-year period, with a 200-300,000 acre-feet change within the first 10 years; and

WHEREAS, Implementation of the CAMP and its proposed actions is dependent upon adequate funding, including funding from the state of Idaho; and

WHEREAS, Many water users in Water District 1 have an interest in the sustainability of the ESPA to ensure water supplies for their water rights; and

WHEREAS, The governor of the state of Idaho, Legislative leadership of the state of Idaho, and the IWRB remains committed to the CAMP; and

WHEREAS, The Idaho Water Resource Board following the request of the Governor of the State of Idaho is developing a water resource sustainability policy; and

WHEREAS, Now is the time for all members of the CAMP, including the implementation committee members, to continue to work on a long-term funding mechanism and process for prioritizing and selecting projects on the ESPA in the future.

NOW, THEREFORE, BE IT RESOLVED, That the water users of Water District 1 continue to support IWRB's efforts in formulating and implementing the CAMP for the benefit of the ESPA, the development and implementation of the sustainability policy and support further discussions to resolve the funding issues.

BE IT FURTHER RESOLVED, That the water users of Water District 1 support and urge the state of Idaho to fund the state's portion of the CAMP for purposes of its implementation.

BE IT FURTHER RESOLVED, That the water users of Water District 1 support and urge the IWRB to work with the Committee of Nine and water users of Water District 1 on development and implementation of projects.

## 27. CONTINUED SURFACE WATER DELIVERY OPERATIONS

WHEREAS, Ground water levels and surface water flows may decline by changes to surface water delivery operations, including reduced incidental recharge; and

WHEREAS, Preventing further declining water levels and surface water flows may be accomplished by supporting continued surface water delivery operations, including continued incidental recharge from these operations; and

WHEREAS, Water users in Water District 1 may take actions to improve surface water delivery operations, including implementing conservation or efficiency measures.

NOW, THEREFORE, BE IT RESOLVED, That the water users of Water District 1 support continued surface water delivery operations, including incidental recharge from these operations.

BE IT FURTHER RESOLVED, That the water users of Water District 1 recognize a water delivery entity's right to change surface water delivery operations, including implementing conservation or efficiency measures.

#### 28. USBR OPERATION & MAINTENANCE (O&M) ACTIVITIES

WHEREAS, The United States Bureau of Reclamation (USBR) operates and maintains important water supply and hydropower facilities throughout Water District 1; and

WHEREAS, Such facilities are aging and may be in need of major maintenance or restoration activities and, in some cases, the high costs of completing these maintenance projects are compounded by governmental, environmental, or endangered species requirements; and

WHEREAS, The USBR plans, budgets, manages, allocates and passes the costs of project O&M and extraordinary maintenance or restoration activities on to their water user customers without significant involvement from the project beneficiaries.

NOW, THEREFORE, BE IT RESOLVED, That the water users of Water District 1 urge the USBR to:

- a. Work with their contracting spaceholders in formulating O&M budgets and planning for extraordinary maintenance or restoration activities on applicable facilities well in advance of actual expenditures;
- b. Account for and explain to their contracting spaceholders, actual O&M costs incurred for each applicable facility, including budget comparisons

and other detailed cost accounting analysis as requested by the contracting spaceholders;

- c. Work with their contracting spaceholders on planning, budgeting, bidding, and managing extraordinary maintenance and renovation activities on applicable facilities in order to contain costs and maximize benefits;
- d. Work with Congress and the Administration to obtain alternative funding sources to assist their contracting spaceholders in covering the added costs of complying with environmental, species protection laws in maintaining and restoring USBR facilities in the West;
- e. Encourage the USBR to only include those costs associated with the actual delivery of water to agricultural purposes in the O&M budgets which are billed to agricultural water users.

## 29. RIRIE RESERVOIR FLOOD CONTROL RULE CURVES

WHEREAS, The flood control rule curves for Ririe Reservoir were developed prior to the time Ririe storage space was contracted; and

WHEREAS, The storage space in Ririe Reservoir is now contracted to Mitigation, Inc., an entity formed to mitigate the impacts to Upper Snake water users including but not limited to the advancement of water right priority date from 1891 to 1867 pursuant to water right number 01-10223 caused by the 1990 Fort Hall Indian Water Rights Agreement, and contracted space has proven to be unreliable and difficult to fill; and

WHEREAS, Pursuant to the United States Army Corp of Engineers' (USACE) Standing Operating Procedures Reservoir Regulation: Ririe Dam the enacting legislation allows for modification of flood control rule curves as additional information becomes available; and

WHEREAS, The Standard Operating Procedures state the flood control objective of Ririe Dam is "to provide adequate storage space in the reservoir to regulate stream flow downstream insofar as possible to a non-damaging level, and yet still provide a near full reservoir at the end of the flood season for irrigation and other project purposes"; and

WHEREAS, Conditions in the Willow Creek basin have changed since the flood control rule curves were developed, including the establishment of an annual maintenance schedule to keep Willow Creek Canal, Sand Creek Canal and the Willow Creek Floodway channel free of ice during the winter; and

WHEREAS, The current flood control rule curves do not rely upon current or updated hydrologic conditions on Willow Creek; and

WHEREAS, The Standard Operating Procedures require cooperation between the United States Bureau of Reclamation (USBR), USACE, Idaho Department of Water Resources, the Water District 1 Watermaster, water users, fish & game, local interests and others in order to provide maximum benefits for the region; and

WHEREAS, The water users of Water District 1 are dependent upon available water supplies and adjusting the flood control rule curves would increase the reliability of contracted storage supplies in Ririe Reservoir; and

WHEREAS, The USBR and USACE have completed the Study of Proposed Modifications of Flood Control Operations of Ririe Reservoir, which has shown how the re-evaluation of winter flood control operations could retain flood control benefits while also providing valuable storage benefits during some years, under the Alternative B; and

WHEREAS, The USBR has completed a 2014 Environmental Assessment Ririe Winter Storage Study for Ririe Dam and Reservoir, which compares No Action to Alternative 1 with a finding of no adverse natural resource or socioeconomic impact.

WHEREAS, Legislation passed Congress (WIIN Act of 2016) to improve and update the Ririe Reservoir winter Flood Control Rule Curves to improve the water supplies of the water users, and

WHEREAS, Mitigation, Inc. has signed a MOA with the USACE and committed to pay the USACE \$480,000 to conduct a proposal review for Ririe Reservoir.

NOW, THEREFORE, BE IT RESOLVED, That the water users of Water District 1 encourage the USBR and the USACE to change the flood control rule curves based on the hydrologic analysis completed in the USBR 2009 study to better match the current conditions in the Willow Creek basin and to allow for a more dependable contracted storage supply in Water District 1 and providing for full mitigation of the impacts resulting from the 1990 Fort Hall Indian Water Rights Agreement;

BE IT FURTHER RESOLVED, That the water users of Water District 1 supports changing, including reauthorization legislation if necessary, the Ririe Reservoir Project to properly balance Ririe Reservoir water and irrigation supplies with adequate flood control operations.

BE IT FURTHER RESOLVED, That the water users of Water District 1 encourage the Idaho Water Users Association and the Idaho State Legislature to support Water District 1 efforts to change the Ririe Reservoir Flood Control Rule Curves.

#### 30. RESERVOIR & RIVER OPERATIONS

WHEREAS, The Committee of Nine has formed a reservoir and river coordination sub-committee, with the acceptance of the United States Bureau of Reclamation (USBR), to meet with and receive updates on winter releases at Palisades Reservoir; and

WHEREAS, The fill of Palisades Reservoir is critical to the overall operations of the Water District 1's canal companies and irrigation districts; and

WHEREAS, The State of Idaho and Water District 01 recognizes that power production and use of power head is subordinate to irrigation storage rights; and

WHEREAS, Concerns have been raised over the USBR's winter operations at Palisades Reservoir and the effect those operations have on the availability of water for all uses including flow augmentation; and

WHEREAS, The past operations have shown additional involvement and discussion of sub-committee members may provide additional information necessary for successful fill operations in Palisades Reservoir.

NOW, THEREFORE, BE IT RESOLVED, That the water users of Water District 1 urge the USBR to incorporate recommendations from the sub-committee to the fullest extent possible consistent with other governing requirements to ensure a fill of Palisades Reservoir.

# 31. SUPPORT OF OPERATIONS FORUM UNDER– 2009 REAFFIRMATION AGREEMENT OF THE SWAN FALLS SETTLEMENT

WHEREAS, The Upper Snake River Advisory Committee (Operations Forum) was created in 2011 pursuant to the further Swan Falls Settlement Agreements in the SRBA in order to address more efficient river and reservoir operations in Water District 1; and

WHEREAS, The Operations Forum is comprised of representatives from the State and major stakeholders which own storage waters, natural flow waters and power rights at and above Milner Dam in Water District 1; and

WHEREAS, The Operations Forum concept is supported by the water users of Water District 1 provided the water users rights are fully protected; and

WHEREAS, The Operations Forum does not supersede existing water rights of decreed or storage reservoir rights to maximize water supplies in the upper snake river.

NOW, THEREFORE, BE IT RESOLVED, That the water users of Water District 1 support the Operations Forum created pursuant to the 2009 Reaffirmation

Agreement of the Swan Falls Settlement Agreements in the SRBA and authorize designated Water District 1 members to attend and fully participate in the meetings of the Operations forum.

BE IT FURTHER RESOLVED, That the duly designated Water District 1 members to the Operations Forum shall have no authority to bind water users of Water District 1 or the Committee of Nine without the express written authorization of the Committee of Nine or the water users of water users of Water District 1 through resolution.

#### 32. USBR PROPOSED CHANGES TO RECLAMATION MANUAL

WHEREAS, In 2011 the United States Bureau of Reclamation (USBR) began a process to revise and make changes to certain policy's in its Reclamation Manual as set forth in PEC 09, PEC 05, PEC 09-01, and PEC 05-01; and

WHEREAS, USBR asserts that water used for "irrigation" purposes must meet a criteria of commercial agricultural use on over 10 acres; and

WHEREAS, USBR's draft policies and its implementation may adversely affect existing water use under existing contracts between water users in Water District 1 and USBR; and

WHEREAS, USBR'S draft policies may not be in accord with existing state law, concerning land and water use.

NOW, THEREFORE, BE IT RESOLVED, That the water users of Water District 1 oppose any effort by USBR to adopt or implement new policies that would adversely affect the water users' interests, including the use of their storage water rights.

#### 33. STATE OF IDAHO INVASIVE SPECIES PROGRAM

WHEREAS, Invasive species pose a threat to the State of Idaho, its natural resources, and local economies; and

WHEREAS, Invasive aquatic species like Quagga and Zebra mussels, are especially threatening to the State of Idaho's waterways, water users, and its agricultural economy; and

WHEREAS, The Snake River and Columbia River basins are currently free of such invasive aquatic species; and

WHEREAS, Infestations of Quagga and Zebra mussels are well documented in other states throughout the country, notably the lower Colorado River basin; and

WHEREAS, These species were also recently found in waterbodies in the State of Montana, which poses a particular concern to Idaho water users; and

WHEREAS, The Idaho Legislature enacted the "Idaho Invasive Species Act of 2008" to assist in prevention, early detection, rapid response and eradication of invasive species; and

WHEREAS, Maintaining and even enhancing the existing level of preventive and protective measures implemented by the State of Idaho is vital to all Idaho water users; and

WHEREAS, Supporting and coordinating efforts to prevent the spread of invasive species, especially aquatic invasive species, benefits all Idaho water users.

NOW, THEREFORE, BE IT RESOLVED, That the water users of Water District 1 supports the State of Idaho's invasive species program and local initiatives to prevent the infestation of invasive species, especially aquatic invasive species.

BE IT FURTHER RESOLVED, That the water users of Water District 1 supports continued legislative funding of the Idaho State Department of Agriculture's program and prevention strategy, including watercraft inspection, monitoring surveys, and outreach/education to boaters.

BE IT FURTHER RESOLVED, That the water users of Water District 1 support the current inspection and prevention programs, as well as enhancement of such programs to protect Idaho's waterways.

BE IT FURTHER RESOLVED, That the water users of Water District 1 urge and support coordinated efforts between the states and federal agencies to eradicate aquatic invasive species and prevent their spread to the State of Idaho.

#### 34. CLOUD SEEDING

WHEREAS, The water resources of the Snake River Basin (both surface and ground) are being stressed by drought, population growth, and increasing demands by agriculture, cities, and recreational activities; and

WHEREAS, Cloud seeding is a water management tool that can augment water supplies for all citizens of Idaho; and

WHEREAS, Water District 1, irrigation districts and canal companies and counties financially supported the cloud seeding program of the High Country Resource Conservation and Development Council (RC&D); and

WHEREAS, the Idaho Water Resource Board in partnership with Idaho Power Company has initiated a cloud seeding program in cooperation with High Country RC&D.

NOW, THEREFORE, BE IT RESOLVED, That the water users of Water District 1 strongly encourage and support Idaho Power, the Idaho Water Resource Board and the RC&D Council efforts covering the Snake River Basin area in Water District 1 to develop, operate, maintain, and fund a coordinated, scientifically based cloud seeding program during the winter time for the watershed areas of the Snake River including the Henrys Fork and its tributaries.

BE IT FURTHER RESOLVED, That Water District 1 participate with the RC&D Councils by including a budget item for cloud seeding of at least 1/3 of the cost up to \$35,000 (to be reviewed annually) with the balance of program costs coming from the RC&D Councils.

BE IT FURTHER RESOLVED, That Water District 1 participate with the Idaho Water Resource Board by including an additional budget item for cloud seeding of up to \$200,000 (to be reviewed annually) to support the cloud seeding program operated by Idaho Power in cooperation with the Idaho Water Resource Board with the balance of the program costs coming from the Board or other participants.

BE IT FURTHER RESOLVED, That a copy of this resolution be sent to the High Country, Three Rivers, Mid-Snake, and Wood River RC&D Councils, the Idaho Water Resource Board and Idaho Power Company.

#### 35. WATER MONITORING EXPENSES

WHEREAS, The Idaho Department of Water Resources (IDWR) incurs expenses for monitoring conditions of the Eastern Snake Plain Aquifer (ESPA), updating the ESPA ground water model, updating surface water modeling tools, and updating accounting for water rights; and

WHEREAS, Such tools are essential for water administration for the waters of the state and benefit all residents of the state; and

WHEREAS, Water users recognize that diversions in excess of the water actually consumed occur with most uses, and such excess water becomes the source or a portion of the source of another water right.

NOW, THEREFORE, BE IT RESOLVED, That because the efforts, models and tools of the IDWR are essential to water administration, and beneficial to the entire state of Idaho, the expenses of such efforts should be borne from the general fund of the state.

#### 36. ADDITIONAL STORAGE

WHEREAS, Water is the most precious natural resource of the state of Idaho; and

WHEREAS, Water users of Water District 1 have been experiencing shortages in water availability and deliveries in recent years; and

WHEREAS, Continued, unprecedented drought, population growth and urban development, conjunctive administration, Endangered Species Act requirements and other additional demands are being placed on the already scarce water resources of the state; and

WHEREAS, Idaho stores a small percentage of its annual run-off in comparison with other states; and

WHEREAS, Additional storage would be beneficial for water users of Water District 1 for irrigation, domestic, municipal, commercial, industrial, recreation, flood control, resident fisheries, wildlife and other purposes; and

WHEREAS, New storage reservoirs can take many years to plan, design and construct; and

WHEREAS, The Teton Dam, Minidoka Dam enlargement, Twin Springs Dam, Galloway Dam and Lost Valley Dam have initially been identified by the director of the Idaho Department of Water Resources (IDWR); and

WHEREAS, The U.S. Bureau of Reclamation is presently conducting the Henrys Fork Basin Special Study which is reviewing possible supplemental storage sites.

NOW, THEREFORE, BE IT RESOLVED, That the water users of Water District 1 encourage the IDWR and the Idaho Water Resource Board, in cooperation with other interested Federal and State agencies, local governments, water users and other citizens, to study potential storage projects, identify those that have the most benefit to the state of Idaho, and develop funding strategies to move forward with the planning, design and construction of those projects.

BE IT FURTHER RESOLVED, That the water users of Water District 1 urge the Governor and Legislature of the state of Idaho to allocate state funding and commit additional resources as necessary to assist in carrying out these objectives.

#### 37. IDWR FUNDING

WHEREAS, State funding for the Idaho Department of Water Resources (IDWR) has not been adequate to keep pace with inflation and other increasing costs, especially when compared to other state agencies and the private sector; and

WHEREAS, Engineers, hydrologists and other specialized, technical positions at the IDWR are important for dealing with the critical water issues facing the state of Idaho, including urbanization, conjunctive administration and environmental demands; and

WHEREAS, The IDWR has lost several valuable employees and struggles to attract and keep sufficient new employees for these technical positions due in large part because of the wide difference in salary when compared to other state agencies and the private sector; and

WHEREAS, Unless the IDWR is adequately funded it cannot carry out its mandated responsibilities or shoulder new responsibilities as the water resources of the state become more valuable and scarce.

NOW, THEREFORE, BE IT RESOLVED, That the water users of Water District 1 support adequate funding for the IDWR, in order to bring the agency to parity with other state agencies and the private sector.

#### 38. ENDANGERED SPECIES ACT

WHEREAS, The Federal Endangered Species Act (ESA) is clearly designed to support maintaining endangered or threatened species through artificial propagation; and

WHEREAS, Special interest groups use the ESA to obstruct beneficial water resource projects; and

WHEREAS, The appropriate federal agencies do not adequately or appropriately administer the ESA; and

WHEREAS, Recovery plans for threatened and endangered species is a federal obligation but can be delegated to or developed in cooperation with states.

NOW, THEREFORE, BE IT RESOLVED, That the water users of Water District 1 support revision and amendment of the ESA of 1973 to:

- a. Require simultaneous recovery plans with listing decisions;
- b. Require that the agency specify only reasonable and prudent alternatives contained in approved recovery plans if alternatives are needed to avoid jeopardy;
- c. Require the agency to include economic considerations as well as scientific data in a determination of the value of listing a species for either threatened or endangered status;
- d. Provide that cooperative agreements between federal, state and local agencies, and water supply entities shall be deemed a substitute for listing for habitat conservation or recovery plans;
- e. Preclude the Secretary of Interior from designating by regulation waters to which the United States exercises sovereignty as critical habitat that would impact non-federal waters or entities;
- f. No provision or program of the ESA shall be construed or applied to authorize a taking or deprivation of any state created interest in water or water right.

#### 39. ESA PETITIONS / PROGRAMS

WHEREAS, Certain species and plants have been listed or petitioned for listing under the ESA that could affect water use in Water District 1, including but not limited to stocks of Snake River salmon and steelhead, Yellowstone cutthroat trout, Western Yellow-billed cuckoo, and various snails; and WHEREAS, Such federal listings and associated programs including critical habitat designations, hatchery policies, and studies could threaten water diversion, storage, and use operations in the Upper Snake River Basin; and

WHEREAS, The consequences of such federal actions and listings could be devastating to Water District 1 water users and the agricultural economy of the State of Idaho.

NOW, THEREFORE, BE IT RESOLVED, That the water users of Water District 1 oppose ESA listings, petitions to list, programs, and litigation that could negatively impact water use and operations in the Upper Snake River Basin;

BE IT FURTHER RESOLVED, That the water users of Water District 1 support petitions to delist plant and animal species, including various Snake River snails, and oppose litigation that would seek to overturn any de-listing rules issued by the U.S. Fish Wildlife Service or NOAA Fisheries;

BE IT FURTHER RESOLVED, That the water users of Water District 1 coordinate with the State of Idaho Office of Species Conservation and continue to monitor and participate in any federal or state processes concerning listed plants and species that could affect water diversion, storage, and use in the Upper Snake River Basin.

#### 40. FCRPS 2014 BIOLOGICAL OPINION LITIGATION (NWF v. NMFS)

WHEREAS, In 2014 National Oceanic and Atmospheric Administration Marine Fisheries Service (NOAA Fisheries) released a final biological opinion (BiOp) on the Federal Columbia River Power System (FCRPS) regarding Snake River and Columbia River anadromous fish; and

WHEREAS, Litigation followed and in May 2016 the court struck down the BiOp and ordered the federal agencies to study the possible removal or one or more dams on the lower Snake and Columbia Rivers; and

WHEREAS, The court previously issued decisions for injunctive relief, ordering the USACE to continue to "spill" water at various FCRPS dams throughout the summers of 2006-2014, but denied any requests for additional flow augmentation from the Upper Columbia River Basin, recognizing that the "best available science" does not support the claim that flow augmentation is beneficial for listed salmon and steelhead; and

WHEREAS, The court ordered spill to be increased at the lower Snake and Columbia River dams to the maximum level on a 24/7 basis in 2018 which may adversely affect salmon and steelhead; and

WHEREAS, The court ordered the existing BiOp remain in place until 2018 and that the National Environmental Protection Act (NEPA) review process for the

FCRPS be completed in 2021, which was recently amended by Executive Order to be completed in 2020; and

WHEREAS, Complying with the spill order is estimated to cost \$40 million a year, resulting in increased rates to power customers, including those in Idaho; and

WHEREAS, Removing the lower Snake River dams would could cost nearly \$400 million a year and negatively impact the regional economy and environment; and

WHEREAS, Dam improvements have resulted in improved fish returns and a 25year sustained increase in salmon populations; and

WHEREAS, The water users of Water District 1 do not agree that United States Bureau of Reclamation's (USBR) Upper Snake River Basin Projects are operated as part of the FCRPS; and

NOW, THEREFORE, BE IT RESOLVED, That the water users of Water District 1 oppose the plaintiffs' actions in the *NWF v. NMFS* litigation, including any attempt to combine the separate ESA consultations for the FCRPS and the USBR's Upper Snake River Basin Projects.

BE IT FURTHER RESOLVED, That the water users of Water District 1 oppose any further efforts by NOAA Fisheries or the plaintiffs to impose any further requirements that might directly or indirectly affect water storage or use in the Upper Snake River Basin, including any attempts to require additional flow augmentation contrary to the terms of the Nez Perce Snake River Water Rights Settlement.

BE IT FURTHER RESOLVED, That the water users of Water District 1 advise the State of Idaho during the ongoing NEPA process and litigation to ensure their interests are adequately protected.

BE IT FURTHER RESOLVED, That the water users of Water District 1 oppose any requests for injunctive or other relief that would result in flow augmentation from the Upper Snake River Basin or additional "spill" at various FCRPS dams, recognizing the increased costs to BPA detrimentally affect the water users of Water District 1 as well.

BE IT FURTHER RESOLVED, That the water users of Water District 1 monitor and participate in the NEPA process as necessary to ensure their interests are adequately protected.

#### 41. UPPER SNAKE BIOLOGICAL OPINION LITIGATION

WHEREAS, Various environmental groups filed a lawsuit against National Oceanic and Atmospheric Administration Marine Fisheries Service (NOAA Fisheries) and United States Bureau of Reclamation (USBR) in federal district court in Oregon, *American Rivers v. NOAA Fisheries*, alleging that the biological opinion for the USBR's Upper Snake River Basin Projects for 2005-2035 violates the Administrative Procedures Act and the Endangered Species Act (ESA); and

WHEREAS, The plaintiffs have alleged that the operation of USBR's Upper Snake River Projects adversely affects migrating salmon and steelhead through alteration of the hydrograph of the Snake and Columbia Rivers, and by USBR's management actions at the Projects, including water storage and delivery to spaceholders, power generation, flood control, administration of uncontracted space, and releases of water for flow augmentation; and

WHEREAS, The plaintiffs seek an order from the court that would strike down the current biological opinion covering USBR's operations in the Upper Snake River Basin, as well as other injunctive and declarative relief; and

WHEREAS, The plaintiffs' claims for relief threaten the viability of the Nez Perce Water Rights Settlement Agreement that was approved by Congress, the President, the state of Idaho, and the Nez Perce Tribe in 2005; and

WHEREAS, The plaintiffs also sought an order from the court to include USBR's Upper Snake River Projects in NOAA Fisheries' Federal Columbia River Power System (FCRPS) biological opinion; and

WHEREAS, The court refused to order NOAA Fisheries to conduct a single Section 7 consultation for the FCRPS and Upper Snake USBR Projects, however, the court determined the Upper Snake Projects' biological opinion violated the ESA; and

WHEREAS, NOAA Fisheries issued a new biological opinion in May 2008; and

WHEREAS, The plaintiffs may seek injunctive relief against USBR to prevent water delivery to spaceholders within Water District 1 and instead have water sent down the Snake River for listed anadromous fish in 2018 and future years; and

WHEREAS, The plaintiffs' claims threaten the social and economic base of Water District 1 as well as that of other water districts with USBR projects throughout the state of Idaho.

NOW, THEREFORE, BE IT RESOLVED, That the water users of Water District 1 oppose the plaintiffs' claims against NOAA Fisheries and USBR in *American Rivers v NOAA Fisheries*, as well any future requests for relief including any injunctive relief that would prevent USBR from storing and delivering water to its

spaceholders in the Upper Snake River Basin, including any attempts to require additional flow augmentation contrary to the terms of the Nez Perce Snake River Water Rights Settlement.

BE IT FURTHER RESOLVED, That the water users of Water District 1 oppose the plaintiffs' continued attempts to have USBR's Upper Snake River Projects included in the FCRPS biological opinion.

BE IT FURTHER RESOLVED, That the water users of Water District 1 coordinate with the State of Idaho and continue to monitor the progress of the case and any future ordered remands by the court.

## 42. CLEAN WATER ACT

WHEREAS, The United States Congress is presently considering reauthorization of the Clean Water Act (CWA); and

WHEREAS, Such reauthorization may significantly impact the water users in Water District 1.

NOW, THEREFORE, BE IT RESOLVED, That the water users of Water District 1 urge Congress and the administration to incorporate the following principles in any activities regarding the CWA:

- a. That neither the United States Army Corps of Engineers (USACE) nor Environmental Protection Agency (EPA) nor any other federal agency or officer shall utilize any provision or program under the CWA to allocate or reallocate water quantity under water rights acquired pursuant to state law as part of any program that seeks to require specified levels of assimilative capacity, dilution water or instream flows;
- b. No provision or program of the CWA shall be construed or applied to authorize a taking of any interest in water created pursuant to state law;
- c. That section 404 protections and allowances for water dependant activities should be expanded, particularly with regard to permitting for facilities, which are related to the exercise of state created water rights. Section 404 should continue to include the de minimus exception to the "discharge of dredged material" and the exemption of "incidental fallback";
- d. The USACE should adopt simplified procedures for issuing general and nationwide permits and for transferring 404 permit authority to states. Certain categories of water such as headwaters, isolated waters, and certain intrastate waters should be excluded from permit requirements;

- e. The USACE or EPA may not prohibit or in any way restrict or condition water diversions, depletions, or the consumptive use of water or water rights, which are authorized or decreed under state law;
- f. Section 404 and wetland jurisdiction should be limited so that it does not apply to water surfaces and water related vegetation areas created artificially incidental to irrigation, hydropower and water supply projects. Any new rules or regulations or amendment of existing rules or regulations that are promulgated by EPA or the USACE regarding their authority over "waters of the United States," should expressly acknowledge the term "navigable" as directed by the United States Supreme Court in *Solid Waste Agency of Northern Cook County v. Corp.* and *Rapanos v. United States*;
- g. Reasonable best management practices should be incorporated in the law as the programs to be pursued for non-point sources;
- Maintain the provisions of the CWA that exempt irrigation delivery or conveyance systems and return flows from point source regulation. Existing non-point sources shall remain as non-point sources under any program adopted under the CWA. Entities owning such irrigation delivery or conveyance facilities shall be permitted to control or regulate the quality of such return flows and to develop cooperative programs with water users;
- i. That any proposed total maximum daily loads regulation should be subject to public review and comment as provided for by state law before implementation;
- j. Water contained in canals, laterals, pipes, and drain ditches, seep tiles, and other irrigation and water delivery facilities should not be considered "waters of the United States" by EPA, the USACE, Idaho Department of Environmental Quality and other federal and state agencies and the agencies should clarify that a 404 permit is not required for the discharge of dredge or fill material into irrigation ditches, canals, laterals and drains that are constructed and used for irrigation or drainage purposes;
- k. That neither the USACE nor EPA nor any other federal agency or officer shall utilize any provision or program under the CWA to require National Pollutant Discharge Elimination System (NPDES) permits for inter- or intra-basin water transfers and that the agencies adopt regulations exempting such water transfers from NPDES permits.
- 1. That EPA should clarify that application of pesticides and aquatic herbicides directly to "waters of the United States" consistent with the FIFRA label to control pests that are present in or present over such waters, including aquatic weeds, is not subject to permit requirements under the CWA or state law.

#### 43. WATER QUALITY STANDARDS / TMDLS / ANTIDEGRADATION RULES / IPDES PROGRAM – UPPER SNAKE RIVER BASIN

WHEREAS, The Clean Water Act provides for the state of Idaho, through the Idaho Department of Environmental Quality, and the Shoshone-Bannock Tribes, to formulate water quality standards for various water bodies, and for impaired waters, total maximum daily loads (TMDLs) and implementation plans; and

WHEREAS, The adoption of water quality standards, TMDLs, and antidegradation rules, including litigation over the same, may impact water distribution and storage operations in Water District 1; and

WHEREAS, the State of Idaho, through the Department of Environmental Quality (DEQ) is presently taking steps to obtain primacy from EPA over the issuance and monitoring of pollutant discharge elimination system permits

NOW, THEREFORE, BE IT RESOLVED, That the water users of Water District 1 seek to continue the water distribution and storage operations that they have relied upon for their livelihoods, while at the same time working with state and tribal agencies to help address water quality issues in the Upper Snake River Basin.

BE IT FURTHER RESOLVED, That the water users of Water District 1 oppose any state, federal, or tribal water quality regulations, plans, policies, or permits that would negatively impact water distribution and storage operations in Water District 1, including impacts to the water users' water rights and spaceholder contracts.

BE IT FURTHER RESOVLED, That the water users of Water District 1 oppose any litigation by third parties that would seek to change any water quality regulations or plans, policies, permits, including antidegradation rules, that would negatively impact the water users' water rights and spaceholder contracts.

# 44. HYDROELECTRIC PROJECT RELICENSING (Hells Canyon Complex and other facilities)

WHEREAS, The Idaho Power Company and other utilities that supply electricity to water users in Water District 1 are currently in the process of relicensing various hydroelectric projects, including the Hells Canyon Complex; and

WHEREAS, Water users in Water District 1 rely upon a firm supply of power from the Idaho Power Company and other utilities; and

WHEREAS, The Hells Canyon Complex supplies approximately 70% of the hydroelectric power generated by the Idaho Power Company; and

WHEREAS, The State of Oregon previously asserted that it has authority to require passage or reintroduction of salmon and steelhead above the Hells Canyon

Complex as part of any Section 401 certification under the Clean Water Act necessary for relicensing; and

WHEREAS, The State of Idaho opposes reintroduction and certain issues related to the State of Oregon's position may result in litigation; and

WHEREAS, The State of Idaho, the State of Oregon, and Idaho Power Company recently reached a settlement for each state's Section 401 certification that does not require passage, introduction, or reintroduction of listed salmon and steelhead above the Hells Canyon Complex in Idaho

NOW, THEREFORE, BE IT RESOLVED, That the water users in Water District 1 are opposed to passage, introduction or reintroduction of salmon, steelhead, and other nonresident species above the Hells Canyon Complex of hydroelectric dams on terms other that those provided for in the recent settlement.

BE IT FURTHER RESOLVED, That the water users of Water District 1 urge the Federal Energy Regulatory Commission (FERC), the state of Idaho and the Idaho Power Company to oppose passage, introduction or reintroduction of the species above the Hells Canyon Complex, or any study of dam removal at Hells Canyon or other locations within the state of Idaho that is inconsistent with the terms of the recent settlement.

BE IT FURTHER RESOLVED, That the water users of Water District 1 oppose the State of Oregon's position to require introduction of salmon and steelhead, or implementation of minimum flows as part of any water quality certification or any other state authorization.

BE IT FURTHER RESOLVED, That the water users of Water District 1 support the recent settlement concerning Section 401 certification and urge the FERC to relicense the Hells Canyon Complex so long as the water rights for said complex are subordinated to all upstream beneficial uses.

#### 45. FAMILY FARM ALLIANCE

WHEREAS, The Family Farm Alliance is a national grass roots organization dedicated to supporting agriculture and water users both in Idaho and across the nation; and

WHEREAS, The Family Farm Alliance participates in lobbying Congress and raising awareness as to important agricultural issues, including water supply and water projects in Idaho.

NOW, THEREFORE, BE IT RESOLVED, That the water users of Water District 1 include a budget item to support participation in the Family Farm Alliance and

support the Committee of Nine appointment of a person to represent the interests of Water District 1 to the Family Farm Alliance.

#### 46. LEGISLATIVE INTERNSHIP

WHEREAS, The Idaho Water Users Association (IWUA) sponsors a legislative intern; and

WHEREAS, Water District 1 has helped support and sponsor a legislative intern through cooperation with IWUA in the past.

NOW, THEREFORE, BE IT RESOLVED, That the water users of Water District 1 support IWUA's legislative internship program by including a budget item to help sponsor a legislative intern.

#### 47. WATER SAFETY

WHEREAS, Water District 1 has previously provided support for the state Otto Otter Program and other water safety education programs; and

WHEREAS, The Idaho Water Users Association (IWUA) has a water safety program including financial support for media awareness in Idaho; and

WHEREAS, Water Safety is an ongoing concern.

NOW, THEREFORE, BE IT RESOLVED, That the water users of Water District 1 support water safety and education throughout Idaho.

## 48. BLACKFOOT RIVER EQUITABLE ADJUSTMENT SETTLEMENT AGREEMENT

WHEREAS, The 1990 Fort Hall Indian Water Rights Agreement was signed by and between the Shoshone-Bannock Tribes, the United States, the State of Idaho, and the Committee of Nine (Parties); and

WHEREAS, The Blackfoot River Equitable Adjustment Settlement Agreement (Agreement) was approved by the Committee of Nine and was signed by and between the Parties and sets forth the terms and conditions of the equitable adjustment provided for in paragraph x.d of water right no. 27-11375; and

WHEREAS, The Agreement is an addendum to the Partial Final Consent Decree Determining the Rights of the Shoshone-Bannock Tribes to the Use of Water in the Upper Snake River Basin dated August 2, 1995; and

WHEREAS, The Agreement calls for a Blackfoot River Water Management Plan (WMP), which has been developed and signed by the Parties to the Agreement; and

WHEREAS, The Director of the Department of Water Resources issued a *Final* Order Regarding Instructions to the Watermasters for Water District Nos. 1 and 27 (ORDER), ordering the Watermasters of Water District Nos. 1 and 27 to administer and distribute water in their respective water districts in accordance with the provisions of the WMP, effective as of the 2014 irrigation season.

NOW, THEREFORE, BE IT RESOLVED, That the water users of Water District 1 hereby recognize the approval of the Agreement and WMP.

### 49. BANNOCK CREEK EQUITABLE ADJUSTMENT

WHEREAS, The 1990 Fort Hall Indian Water Rights Agreement (Agreement) was signed by and between the Shoshone-Bannock Tribes (Tribes), the United States, the State of Idaho (State), the Idaho Water Resource Board (Board), and the Committee of Nine; (Parties) and

WHEREAS, Article 7.2 of the Agreement granted the Tribes a Winters Doctrine entitlement of groundwater rights within the Reservation; and

WHEREAS, The Agreement set forth the terms and conditions of the equitable adjustment provided for in paragraph x.c of water right no. 29-12052; and

WHEREAS, The equitable adjustment in paragraph x.c of water right no. 29-12052 is part of the Partial Final Consent Decree Determining the Rights of the Tribes to the Use of Water in the Upper Snake River Basin dated August 2, 1995; and

WHEREAS, The IDAPA 37 TITLE 03 CHAPTER 11 Rules for Conjunctive Management of Surface and Ground Water Resources was enacted by the State and are applicable to Bannock Creek Basin; and

WHEREAS, The Committee of Nine has authorized the Tribal Rights Subcommittee to facilitate a resolution amongst the parties.

NOW, THEREFORE, BE IT RESOLVED, That the water users of Water District 1 with the State, Board, and ground water users within the State of Idaho to negotiate a settlement of the Bannock Creek Equitable Adjustment.

## 50. OPPOSITION TO CONDEMNATION OF IRRIGATION AND DRAINAGE FACILITIES AND WATER RIGHTS

WHEREAS, Canal companies, irrigation districts, and other similar organizations located within Water District 1 have provided essential, reliable and affordable delivery and drainage of irrigation water throughout history; and

WHEREAS, Cities and irrigation entities within Water District 1 have a long, proud tradition of solving complex water resource problems in a cooperative fashion for the benefit of their respective residents and water users; and

WHEREAS, Certain recent disputes have arisen between irrigation entities and municipalities in other areas of the state, prompting litigation and other problems relating to this issue; and

WHEREAS, The governmental power of eminent domain may only be exercised when taking property through condemnation is necessary for public uses, and should not be abused; and

WHEREAS, Eminent domain litigation to condemn all of the property rights and facilities of irrigation entities is an abuse of the governmental power of taking property for public uses.

NOW, THEREFORE, BE IT RESOLVED, That the water users of Water District 1 authorize the Committee of Nine to take necessary steps, and encourage and support affiliated organizations and related associations to take necessary steps, to stop and prevent the abuse of governmental power, -- at the federal, state and local levels of government -- in taking existing irrigation and drainage facilities, water rights and storage water from irrigation entities in Water District 1 and the state of Idaho through the use of eminent domain.

#### 51. NEW CONSUMPTIVE WATER USES

WHEREAS, the Eastern Snake Plain Aquifer (ESPA) has experienced declines in certain areas of the aquifer; and

WHEREAS, the decline in aquifer storage and levels has also affected spring flows and reach gains in certain reaches of the Snake River in Water District 1; and

WHEREAS, surface water users within Water District 1 have experienced water shortage conditions in various years due to reduced natural flows and storage availability; and

WHEREAS, surface water and ground water users are taking actions to rehabilitate the aquifer, including through settlement agreements and mitigation plans; and

WHEREAS, increased consumptive uses of water in and adjacent to Water District 1 including those for irrigation that increase the total number of acres authorized for irrigation from storage have the potential to further stress the water supplies of Water District 1 water users.

NOW THEREFORE BE IT RESOLVED, That the water users of Water District 1

require the Committee of Nine to develop necessary policies and rental pool procedures to address new consumptive water uses including those for irrigation that increase the total number of acres authorized for irrigation from storage that could reduce the water supply.

#### 52. COLUMBIA RIVER TREATY

WHEREAS, The Columbia River Treaty (enacted in 1964) is an international agreement between Canada and the United States of America for the cooperative development and operation of the water resources of the Columbia River Basin for the benefit of flood control and power; and

WHEREAS, The Treaty has no end date but either party may terminate most of the provisions as early as September 2024 with a minimum ten years' written notice, which would be 2014; and

WHEREAS, Current assured flood control operating procedures will end in 2024, independent of the Treaty termination decision; and

WHEREAS, Certain issues related to flood control, ecosystem function, or changes to Columbia River and its tributaries river operations could detrimentally affect water users in Idaho, including within Water District 1.

NOW, THEREFORE, BE IT RESOLVED, That the water users of Water District 1 oppose any efforts related to the Columbia River Treaty process that would impose additional operating or flood control conditions on the Upper Snake River Basin or violate the spirit and intent of the 2004 Snake River Water Rights Settlement Agreement.

BE IT FURTHER RESOLVED, That the water users of Water District 1 participate through the Committee of Nine and its advisors in the Columbia River Treaty process to protect their water right interests in the Upper Snake River Basin.

GOVERNMENT AUDITING STANDARDS

#### **INDEPENDENT AUDITOR'S REPORT**

Committee of Nine Water District 1 Idaho Falls, Idaho

#### **Report on the Financial Statements**

We have audited the accompanying financial statements of the business-type activities and each major fund of Water District 1, (the District) as of and for the year ended October 31, 2019, and the related notes to the financial statements, which collectively comprise the District's basic financial statements as listed in the table of contents.

## Management's Responsibility for the Financial Statements

Management is responsible for the preparation and fair presentation of these financial statements in accordance with accounting principles generally accepted in the United States; this includes the design, implementation, and maintenance of internal control relevant to the preparation and fair presentation of financial statements that are free from material misstatement, whether due to fraud or error.

#### Auditor's Responsibility

Our responsibility is to express opinions on these financial statements based on our audit. We conducted our audit in accordance with auditing standards generally accepted in the United States and the standards applicable to financial audits contained in *Government Auditing Standards*, issued by the Comptroller General of the United States. Those standards require that we plan and perform the audit to obtain reasonable assurance about whether the financial statements are free of material misstatement.

An audit involves performing procedures to obtain audit evidence about the amounts and disclosures in the financial statements. The procedures selected depend on the auditor's judgment, including the assessment of the risk of material misstatement of the financial statements, whether due to fraud or error. In making those risk assessments, the auditor considers internal control relevant to the entity's preparation and fair presentation of the financial statements in order to design audit procedures that are appropriate in the circumstances, but not for the purpose of expressing an opinion on the effectiveness of the entity's internal control. Accordingly, we express no such opinion. An audit also includes evaluating the appropriateness of accounting policies used and the reasonableness of significant accounting estimates made by management, as well as evaluating the overall presentation of the financial statements.

We believe that the audit evidence we have obtained is sufficient and appropriate to provide a basis for our audit opinions.

#### **Opinions**

In our opinion, the financial statements referred to above present fairly, in all material respects, the respective financial position of the business-type activities and each major fund of Water District 1, as of October 31, 2019, and the respective changes in financial position of its operations and cash flows thereof and for the year then ended in accordance with accounting principles generally accepted in the United States.

#### **Other Matters**

#### Required Supplementary Information

Accounting principles generally accepted in the United States require supplementary information, such as the required supplementary information related to pensions be presented to supplement the basic financial statements. Such information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operational, economic, or historical context. We have applied certain limited procedures to the required supplementary information related to pensions in accordance with auditing standards generally accepted in the United States, which consisted of inquiries of management about the methods of preparing the information and comparing the information for consistency with management's responses to our inquiries, the basic financial statements, and other knowledge we obtained during our audit of the basic financial statements. We do not express an opinion or provide any assurance on the information because the limited procedures do not provide us with sufficient evidence to express an opinion or provide any assurance.

Management has omitted the management's discussion and analysis that accounting principles generally accepted in the United States require to be presented to supplement the basic financial statements. Such missing information, although not a part of the basic financial statements, is required by the Governmental Accounting Standards Board, who considers it to be an essential part of financial reporting for placing the basic financial statements in an appropriate operation, economic, or historical context. Our opinion on the basic financial statements is not affected by this missing information.

#### Other Information

Our audit was conducted for the purpose of forming opinions on the financial statements that collectively comprise the District's basic financial statements. The schedule of revenues, expenditures, and changes in net position-budget to actual for the operating fund is presented for purposes of additional analysis and is not a required part of the financial statements. The schedule of revenues, expenditures, and changes in net position-budget to actual for the operating fund is the responsibility of management and was derived from and relates directly to the underlying accounting and other records used to prepare the basic financial statements. Such information has been subjected to the auditing procedures applied in the audit of the basic financial statements and certain additional procedures, including comparing and reconciling such information directly to the underlying accounting and other records used to prepare the basic financial statements attements themselves, and other additional procedures in accordance with auditing standards generally accepted in the United States. In our opinion, the schedule of revenues, expenditures, and changes in net position-budget to actual for the operating fund is fairly stated, in all material respects, in relation to the basic financial statements as a whole.

## Other Reporting Required by Government Auditing Standards

In accordance with *Government Auditing Standards*, we have also issued our report dated February 21, 2020, on our consideration of the District's internal control over financial reporting and our tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, and other matters. The purpose of that report is to describe the scope of our testing of the internal control over financial reporting and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the District's internal control over financial reporting or on compliance. That report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the District's internal control over financial reporting and compliance.

#### NOTE A SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES

The following is a summary of significant accounting policies followed in the preparation of these financial statements.

1. <u>General</u>. Water Districts were established in 1903 by the Idaho legislature with the duty of directing and controlling the distributions of water within each district assigned to the State Reclamation Engineer (later changed to the Idaho Department of Water Resources). The Upper Snake River drainage was designated as District 1. The Idaho Code was amended in 1986 to clarify the status of the districts in that each shall be "considered an instrumentality of the State of Idaho".

In 1919, a group of nine water users from District 1 met with the State Reclamation Engineer to request the creation of a permanent Watermaster system. This group became known as the Committee of Nine and represented the collective interests of the various members of the District. The primary purpose of the Committee was to assure that proper distributions of available water supplies were made.

Beginning in 1979, the Committee of Nine could assist in the marketing of stored water from Water Banks as authorized by the Water Resource Board. Water Banks are a system which allows owners of water a means of "renting" amounts surplus to their needs to others without violating various requirements of Idaho Code.

The Watermaster is elected by the members of Water District 1 at their annual meeting. Water District 1 is governed by the Director of the Idaho Department of Water Resources (IDWR) who approves the Watermaster. During the annual meeting members adopt various resolutions governing the activities of the District and the Water District 1 Rental Pool and elect the local advisory committee members known as the Committee of Nine. The Committee of Nine is appointed by the Idaho Water Resource Board to operate the Water District 1 Rental Pool and to advise the Watermaster on the general operations of the District.

Water District 1 is responsible to the Director of the Department of Water Resources and water right holders of the District to make proper distribution of available water supplies within the District as appropriated.

In evaluating how to define the Water District for financial reporting purposes, management has considered all potential component units. The decision to include a potential component unit in the reporting entity was made by applying the criteria set forth in generally accepted accounting principles. The basic, but not the only, criterion for including a potential component unit within the reporting entity is the governing body's ability to exercise oversight responsibility. The most significant manifestation of this ability is financial interdependency. Other manifestations of the ability to exercise oversight responsibility include, but are not limited to, the selection of governing authority, the designation of management, and the ability to significantly influence operations and accountability for fiscal matters. The other criterion used to evaluate component units for inclusion or exclusion from the reporting entity is the existence of special financing relationships, regardless of whether the Water District is able to exercise oversight responsibilities.

2. <u>Government-wide Financial Statements.</u> The government-wide financial statements, which are the Statement of Net Position and the Statement of Activities, report information on all of the nonfiduciary activities of the primary government and its component unit. Water District 1 reports only business-type activities, which rely to a significant extent on fees and charges for support and has no governmental or fiduciary activities.

The Statement of Net Position presents the financial condition of the business-type activities for the District at year-end. The statement of activities presents a comparison between direct expenses and program revenues for each program or function of the District's business-type activities. The Statement of Activities demonstrates the degree to which the direct expense of a given function or segment is offset by program revenues. Direct expenses are those that are clearly identifiable with a specific function or segment.

# NOTE A SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

Program revenues include 1) charges to customers or applicants who purchase, use, or directly benefit from goods, services, or privileges provided by a given function or segment and 2) grants and contributions that are restricted to meeting the operational or capital requirements of a particular function or segment. Other items not properly included among program revenues are reported instead as general revenues.

3. <u>Fund Financial Statements</u>. Separate financial statements are provided for the different funds maintained by the District. Individual "major" funds are reported as separate columns in the fund financial statements. Proprietary funds are accounted for using the economic resources measurement focus and the accrual basis of accounting. The accounting objectives are determinations of net income, financial position, and cash flow. All assets and liabilities are included on the Statement of Net Position. The District has presented the following major proprietary funds.

<u>Water District Operating Fund</u> – This fund is used to account for the general operations of the Water District. It includes fees assessed to water users and expenses related to oversight, control and maintenance of the Water District resources. All costs are financed through charges to water users either directly or through fees received from the Rental Pool.

<u>Rental Pool Fund</u> – The Rental Pool Fund is used to account for operations of the annual water rental services, included leases, and supplemental rental. All costs are financed through charges to rental and lease customers.

4. <u>Measurement Focus / Basis of Accounting, and Financial Statement Presentation</u>. The government-wide financial statements and the proprietary funds are reported using the economic resources measurement focus and the accrual basis of accounting. Revenues are recorded when earned and expenses are recorded when a liability is incurred, regardless of the timing of related cash flows. Grants and similar items are recognized as revenue as soon as all eligibility requirements imposed by the provider have been met.

Proprietary funds distinguish operating revenues and expenses from nonoperating items. Operating revenues and expenses generally result from providing services and producing and delivering goods in connection with a proprietary fund's principal ongoing operations. The principal operating revenues of the proprietary funds are charges to customers for sales and services. Operating expenses for enterprise funds include the cost of sales and services, administrative expenses, and depreciation on capital assets. All revenues and expenses not meeting this definition are reported as nonoperating revenues and expenses.

- 5. <u>Budgets</u>. The District adopts a budget for the Operating Fund at the annual meeting. The budget is prepared on a basis generally consistent with generally accepted accounting principles, except that expenses for capital acquisitions are budgeted. The reported operating expense amounts exclude actual capital acquisitions since they are capitalized and depreciated.
- 6. <u>Cash and Cash Equivalents</u>. Cash and cash equivalents are identified as cash and short-term, highly liquid investments. Cash and cash equivalents for the District include cash in checking and savings accounts, and investments in the Idaho State Treasurer's Pool on the statement of net position and statement of cash flows.
- 7. <u>Fair Value Measurements.</u> The District categorizes its fair value measurements within the fair value hierarchy established by generally accepted accounting principles. The hierarchy is based on the valuation inputs used to measure the fair value of the assets. Level 1 inputs are quoted prices in active markets for identical assets; Level 2 inputs are significant other observable inputs; Level 3 inputs are significant unobservable inputs. The District has no investments or other assets subject to fair value measurements.

#### NOTE A SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

- 8. <u>Inventory</u>. Inventories are valued at cost. The purchase method is used to account for inventories. Under the purchase method, inventories are reported as an asset at year end.
- 9. <u>Capital Assets</u>. Capital assets, which include property and equipment, are recorded at cost. Depreciation is provided using the straight-line method over the estimated useful life of the asset, which is five to ten years for assets of the District. Depreciation of fixed assets is charged as an expense against operations. Capital assets are reported net of accumulated depreciation on the statement of net position. When an asset is disposed of, cost and related accumulated depreciation are removed from the Districts financial statements, and any gain and loss arising from the asset's disposal is credited or charged to operations. Capital assets are defined by the District as assets with an initial, individual cost of more than \$1,000 and an initial useful life of one year or greater. The cost of normal maintenance and repairs that do not add to the value of the asset or materiality extend the asset's life are not capitalized.

Equipment assets are depreciated using the straight-line depreciation method over the following estimated useful lives:

Assets	Years
Equipment	5 - 15

- 10. <u>Accumulated Unpaid Vacation, Sick Pay, and Other Employee Benefit Amounts.</u> Accumulated unpaid vacation, sick pay, and other employee benefits for employees covered by IDWR contract has been paid directly to IDWR with the associated fringe benefit cost. The associated liability, if any, is not considered material to the financial statements.
- 11. <u>Use of Estimates</u>. The preparation of financial statements in conformity with generally accepted accounting principles requires management to make estimates and assumptions that affect the reported amounts of assets and liabilities and disclosure of contingent assets and liabilities at the date of the financial statements and the reported amounts of revenue and expenses during the reporting period. Actual results could differ from those estimates.
- 12. <u>Policy for Use of Restricted and Unrestricted Resources.</u> The District's policy is to first apply unrestricted resources when an expense is incurred for purposes for which both restricted and unrestricted net position are available.
- 13. <u>Pensions.</u> For purposes of measuring the net pension liability and pension expense, information about the fiduciary net position of the Public Employee Retirement System of Idaho Base Plan (Base Plan) and additions to/deductions from Base Plan's fiduciary net position have been determined on the same basis as they are reported by the Base Plan. For this purpose, benefit payments (including refunds of employee contributions) are recognized when due and payable in accordance with the benefit terms. Investments are reported at fair value.
- 14. <u>Deferred Outflows / Inflows of Resources.</u> In addition to assets, the Statement of Financial Position will sometimes report a separate section for deferred outflows of resources. This separate financial statement element, deferred outflows of resources, represents a consumption of net position that applies to a future period(s) and so will not be recognized as an outflow of resources (expense/expenditure) until then. The District has one item that qualifies for reporting in this category and it occurs on the statement of net position. The District reports deferred outflows of resources related to pensions for its proportionate shares of collective deferred outflows of resources related to pensions and District contributions to pension plans subsequent to the measurement date of the collective net pension liability (asset).

#### NOTE A SUMMARY OF SIGNIFICANT ACCOUNTING POLICIES, continued

In addition to liabilities, the statement of financial position will sometimes report a separate section for deferred inflows of resources. This separate financial statement element, deferred inflows of resources, represents an acquisition of net position that applies to a future period(s) and so will not be recognized as an inflow of resources (revenue) until that time. The District reports deferred inflows of resources for its proportionate share of the collective deferred inflows of resources related to pensions in the statement of net position.

15. <u>Net Position Flow Assumption</u>. Sometimes the District will fund outlays for a particular purpose from both restricted (e.g., restricted bond or grant proceeds) and unrestricted resources. In order to calculate the amounts to report as restricted net position and unrestricted net position in the government-wide financial statements, a flow assumption must be made about the order in which the resources are considered to be applied. It is the government's policy to consider restricted net position to have been depleted before unrestricted net position is applied.

#### NOTE B DEPOSITS AND INVESTMENTS

Deposits: Custodial credit risk, in the case of deposits, is the risk that in the event of a bank failure, the District's deposits may not be returned to it. The District has no deposit policy for custodial credit risk due to being uninsured and uncollateralized. As of October 31, 2019, \$428,260 of the District's deposits were exposed to custodial credit risk because they were uninsured and uncollateralized. The District's bank balance was \$678,260.

Investments: Custodial credit risk, in the case of investments, is the risk that in the event of the failure of the counterparty, the District will not be able to recover the value of its investments or collateral securities that are in the possession of an outside party.

At year end, the District held the following investments with the Idaho State Local Government Investment Pool. The Idaho State LGIP is included as cash due to being short term:

-		Net Asset	Weighted
Investment type	Cost	Value	Average Maturity
Idaho State Local Government Investment Pool	7,189,064	7,189,064	127 days
Idaho State Diversified Bond Fund	4,332,772	4,449,143	3.42 years
Total	11,521,836	11,638,207	2

The Idaho State Investment Pool and Diversified Bond Fund investments are unrated external investment pools sponsored by the Idaho State Treasurer's Office. They are classified as "Investments in an External Investment Pool" and are exempt from custodial credit risk and concentration of credit risk reporting. Interest rate risk is summarized as follows: asset-backed securities are reported using weighted average life to more accurately reflect the projected term of the security, considering interest rates and repayment factors.

The elected Idaho State Treasurer, following Idaho Code, Section 67-2328, is authorized to sponsor an investment pool in which the District voluntarily participates. The Pool is not registered with the Securities and Exchange Commission or any other regulatory body – oversight is with the State Treasurer, and Idaho Code defines allowable investments. All investments are entirely insured or collateralized with securities held by the Pool or by its agent in the Pool's name.

Credit Risk: The District's policy is to comply with Idaho State statutes which authorize the District to invest in obligations of the United States, obligations of the State or any taxing district in the State, obligations issued by the Farm Credit System, obligation of public corporations of the State of Idaho, repurchase agreements, tax anticipation notes of the State or taxing district in the State, time deposits, savings deposits, revenue bonds of institutions of higher education, and the State Treasurer's Pool and Diversified Bond Fund.

#### NOTE C RESTRICTED CASH AND INVESTMENTS

Restricted cash and investments in the Rental Pool Fund of \$7,646,374 are held for the payment of Rental Pool suppliers and administrative costs, pursuant to the Rental Pool Procedures.

#### NOTE D ASSESSMENTS RECEIVABLE

Assessments are billed at the end of the water year in the spring. Assessments receivable are reported net of the following allowance for uncollectible accounts:

	Total		Net Assessments
	Receivable	Allowance	Receivable
Water District 1	278,487	0	278,487

#### NOTE E CAPITAL ASSETS

A summary of changes in capital assets is as follows:

	Balance			Balance
	10/31/2018	Additions	Deletions	10/31/2019
Business-type activities				
Furniture and equipment	261,638	10,578	(26,127)	246,089
Accumulated depreciation	(200,473)	(10,554)	26,127	(184,900)
Net book value	61,165	24	0	61,189

#### NOTE F LONG-TERM LIABILITIES

The District had no long-term liabilities as of October 31, 2019.

#### NOTE G FUNDS HELD BY IDWR

The Department of Water Resources provides the District with office space, administrative support, and personnel. The District pays the Department for these services monthly in advance based on an estimate of the costs and balance of prior advance payments, as per the most recent memorandum dated March 4, 1993, between the District and the Department of Water Resources. The balance of funds held by the Department represents funds to be applied in future periods.

## NOTE H RENTALS RECEIVABLE, SUPPLIERS PAYABLE, AND IMPACT FUND

All water deliveries of the District are accounted for as being either a fulfillment of a water right or as a rental of stored water. Rentals receivable represents water delivered to users in excess of their water rights, which has not been paid for by users at year end. Suppliers payable represents the amount due to suppliers for stored water that has been rented during the year. Impact Fund represents the amount of the water rentals received by the rental pool rules to be held by the Rental Pool Fund to compensate spaceholders impacted by water rental.

#### NOTE I LEASE OBLIGATIONS

As of October 31, 2019, the District was obligated to John Hart and the City of Idaho Falls for rental of building space for lots 310, 360, and 366 D Street, which is categorized as an operating lease. This lease is for and in behalf of the USGS who has an annual contract for streamgaging services with the District. The rental fees noted below are used to reduce amounts owed by the District to USGS.

Future minimum rental payments:

		City of	
Fiscal Year Ended October 31,	Hart Lease	Idaho Falls	Total
2020	6,000	17,952	23,952
2021		4,488	4,488
Total	6,000	22,440	28,440

Total rental expense under the Streamgaging USGS for the year ended October 31, 2019, was \$36,000 for Hart, and \$17,865 for the City of Idaho Falls.

#### NOTE J INTERFUND RECEIVABLES AND PAYABLES

Interfund receivables and payables as of October 31, 2019, were as follows:

	Receivable	Payable
Operating Fund	15,689	
Rental Pool Fund		15,689
	15,689	15,689

#### NOTE K LITIGATION, CONTINGENT LIABILITIES, AND COMMITMENTS

The District, through legal counsel, monitors administrative and legal proceedings in which the National Marine Fisheries Service (NMFS), the U.S. Bureau of Reclamation (USBR), and other interests seek Idaho water for flow augmentation for threatened and endangered salmon, steelhead, and other endangered species, listed pursuant to the Federal Endangered Species Act (ESA). Actions by these entities could have an impact on the District. The District is being represented by legal counsel regarding its interests in the Snake River Basin Adjudication and other legal and regulatory forums. These include implementation of the terms of the 1990 Fort Hall Water Rights Agreement and Nez Perce Water Rights Agreement that was reached in 2005, litigation over NOAA Fisheries' 2008 biological option for the Federal Columbia River Power System, the re-licensing of Idaho Power Company's Hells Canyon Complex, and other endangered species and water quality issues.

The District has agreed to settle a disputed impact to the Fort Hall Tribes by supplying storage water of up to 10,000 acre-feet per year up to the disputed amount thru the rental pool procedures in upcoming years. The total amount supplied will be up to 25,276 acre-feet of storage water.

The District is not aware of any pending or threatened litigation against the District that would result in a loss contingency as of the date of the auditor's report.

In 2009, the District entered into an agreement with the Bureau of Reclamation wherein the District paid approximately \$22,000 annually to the Bureau for hydromet data services. The agreement was for a 10-year term starting in 2009 and renegotiated in 2019. During 2019, the Bureau of Reclamation and the District began renegotiation based on changes to the scope of services to be provided. These negotiations had not been finalized as of the date of this report.

Notes to Financial Statements October 31, 2019

#### NOTE L RISK MANAGEMENT / INSURANCE COVERAGE

The District is subject to various risks of loss related to tort claims; theft, damage to and destruction of assets; errors and omissions; injuries to employees; and natural disasters. The District has purchased workman's compensation insurance through the State Insurance Fund. The Treasurer is bonded for errors and omissions. As an instrumentality of the State of Idaho, other risks of loss are covered by the State's liability insurance policy.

#### NOTE M PENSION PLAN

#### Plan Description

The District contributes to the Base Plan which is a cost sharing multiple-employer defined benefit pension plan administered by Public Employee Retirement System of Idaho (PERSI or System) that covers substantially all employees of the State of Idaho, its agencies and various participating political subdivisions. The cost to administer the plan is financed through the contributions and investment earnings of the plan. PERSI issues a publicly available financial report that includes financial statements and the required supplementary information for PERSI. That report may be obtained on the PERSI website at <u>www.persi.idaho.gov</u>.

Responsibility for administration of the Base Plan is assigned to the Board comprised of five members appointed by the Governor and confirmed by the Idaho Senate. State law requires that two members of the Board be active Base Plan members with at least ten years of service and three members who are Idaho citizens not members of the Base Plan except by reason of having served on the Board.

#### Pension Benefits

The Base Plan provides retirement, disability, death, and survivor benefits of eligible members or beneficiaries. Benefits are based on members' years of service, age, and highest average salary. Members become fully vested in their retirement benefits with five years of credited service (5 months for elected or appointed officials).

Members are eligible for retirement benefits upon attainment of the ages specified for their employment classification. The annual service retirement allowance for each month of credited service is 2.0% (2.3% for police/firefighters) of the average monthly salary for the highest consecutive 42 months.

The benefit payments for the Base Plan are calculated using a benefit formula adopted by the Idaho Legislature. The Base Plan is required to provide a 1% minimum cost of living increase per year provided the Consumer Price Index increases 1% or more. The PERSI Board has the authority to provide higher cost of living increases to a maximum of the Consumer Price Index movement or 6%, whichever is less; however, any amount above the 1% minimum is subject to review by the Idaho Legislature.

#### Member and Employer Contributions

Member and employer contributions paid to the Base Plan are set by statute and are established as a percent of covered compensation. Contribution rates are determined by the PERSI Board within limitations, as defined by state law. The Board may make periodic changes to employer and employee contribution rates (expressed as percentages of annual covered payroll) that are adequate to accumulate sufficient assets to pay benefits when due.

The contribution rates for employees are set by statute at 60% of the employer rate for general employees and 72% for police and firefighters. As of June 30, 2019, it was 6.79% for general employees and 8.36% for police and firefighters. The employer contribution rate is set by the Retirement Board and was 11.32% for general employees and 11.66% for police and firefighters. Beginning July 1, 2019, these rates were increased to 11.94% for general employees and 12.28% for police and fire fighters. The District's contributions were \$5,686 for the year ended October 31, 2019.

#### Notes to Financial Statements October 31, 2019

#### NOTE M PENSION PLAN

Pension Liabilities, Pension Expense (Revenue), and Deferred Outflows of Resources and Deferred Inflows of Resources Related to Pensions

At October 31, 2019, the District reported a liability for its proportionate share of the net pension liability. The net pension liability was measured as of June 30, 2019, and the total pension liability used to calculate the net pension liability was determined by an actuarial valuation as of that date. The District's proportion of the net pension liability was based on the District's share of contributions in the Base Plan pension plan relative to the total contributions of all participating PERSI Base Plan employers. At June 30, 2019, the District's proportion was .0015737 percent.

For the year ended October 31, 2019, the District recognized pension expense of \$1,299. At October 31, 2019, the District reported deferred outflows of resources and deferred inflows of resources related to pensions from the following sources:

	Deferred	Deferred
	Outflows of	Inflows of
	Resources	Resources
Differences between expected and actual experience	1,669	2,117
Changes in assumptions or other inputs	999	,
Net difference between projected and actual earnings on		
pension plan investments		6,120
District contributions subsequent to the measurement date	4,497	
Total	7,165	8,237

\$4,497 reported as deferred outflows of resources related to pensions resulting from employer contributions subsequent to the measurement date will be recognized as a reduction of the net pension liability in the year ending October 31, 2020.

The average of the expected remaining service lives of all employees that are provided with pensions through the System (active and inactive employees) determined at July 1, 2018, the beginning of the measurement period ended June 30, 2019, is 4.8 years and 4.8 years for the measurement period ended June 30, 2019.

Other amounts reported as deferred outflows of resources and deferred inflows of resources related to pensions will be recognized in pension expense (revenue) as follows:

Year ended October 31:	
2020	(647)
2021	(2,771)
2022	(1,350)
2023	(801)

#### Actuarial Assumptions

Valuations are based on actuarial assumptions, the benefit formulas, and employee groups. Level percentages of payroll normal costs are determined using the Entry Age Normal Cost Method. Under the Entry Age Normal Cost Method, the actuarial present value of the projected benefits of each individual included in the actuarial valuation is allocated as a level percentage of each year's earnings of the individual between entry age and assumed exit age. The Base Plan amortizes any unfunded actuarial accrued liability based on a level percentage of payroll. The maximum amortization period for the Base Plan permitted under Section 59-1322, Idaho Code, is 25 years.

#### NOTE M PENSION PLAN, continued

The total pension liability in the June 30, 2019, actuarial valuation was determined using the following actuarial assumptions, applied to all periods included in the measurement:

Inflation	3.00%
Salary increases	3.75%
Salary inflation	3.75%
Investment rate of return	7.05%, net of investment expenses
Cost-of-living adjustments	1%

Mortality rates were based on the RP - 2000 combined table for healthy males or females as appropriate with the following offsets:

- Set back 3 years for teachers
- No offset for male fire and police
- Forward one year for female fire and police
- Set back one year for all general employees and all beneficiaries

An experience study was performed for the period July 1, 2013, through June 30, 2017, which reviewed all economic and demographic assumptions other than mortality. The Total Pension Liability as of June 30, 2019, is based on the results of an actuarial valuation date of July 1, 2019.

The long-term expected rate of return on pension plan investments was determined using the building bock approach and a forward-looking model in which best estimate rates or expected future real rates of return (expected returns, net of pension plan investment expense and inflation) are developed for each major asset class. These ranges are combined to produce the long-term expected rate of return by weighing the expected future real rates of return by the target asset allocation percentage and by adding expected inflation.

Even though history provides a valuable perspective for setting the investment return assumption, the System relies primarily on an approach which builds upon the latest capital market assumptions. Specifically, the System uses consultants, investment managers and trustees to develop capital market assumptions in analyzing the System's asset allocation. The assumptions and the System's formal policy for asset allocation are shown below. The formal asset allocation policy is somewhat more conservative than the current allocation of System's assets.

The best-estimate range for the long-term expected rate of return is determined by adding expected inflation to expected long-term real returns and reflecting expected volatility and correlation. The capital market assumptions are as of January 1, 2017.

Asset Class	Expected Return*	Expected Risk	Strategic Normal	Strategic Ranges
Equities			70%	66%-77%
Broad Domestic Equity	9.15%	19.00%	55%	50%-65%
International	9.25%	20.20%	15%	10%-20%
Fixed Income	3.05%	3.75%	30%	23%-33%
Cash	2.25%	.9%	0%	0%-5%
	Expected	Expected	Expected	Expected
Total Fund	Return*	Inflation	Real Return	Risk
Actuary	7.00%	3.25%	3.75%	N/A
Portfolio	6.58%	2.25%	4.33%	12.67%

\*Expected arithmetic return net of fees and expenses

#### Notes to Financial Statements October 31, 2019

#### NOTE M PENSION PLAN, continued

Actuarial Assumptions	
Assumed Inflation - Mean	3.25%
Assumed Inflation – Standard Deviation	2.00%
Portfolio Arithmetic Mean Return	8.42%
Portfolio Long-Term Expected Geometric Rate of Return	7.50%
Assumed Investment Expenses	0.40%
Long-Term Expected Geometric Rate of return, Net of Investment Expenses	7.05%

#### Discount Rate

The discount rate used to measure the total pension liability was 7.05%. The projection of cash flows used to determine the discount rate assumed that contributions from plan members will be made at the current contribution rate. Based on these assumptions, the pension plans' net position was projected to be available to make all projected future benefit payments of current plan members. Therefore, the long-term expected rate of return on pension plan investments was applied to all period of projected benefit payments to determine the total pension liability. The long-term expected rate of return was determined net of pension plan investment expense but without reduction for pension plan administrative expense.

# Sensitivity of the Employer's proportionate share of the net pension liability to changes in the discount rate.

The following presents the Employer's proportionate share of the net pension liability calculated using the discount rate of 7.05 percent, as well as what the Employer's proportionate share of the net pension liability would be if it were calculated using a discount rate that is 1-percentage-point lower (6.05 percent) or 1-percentage-point higher (8.05 percent) than the current rate:

		Current	
	1% Decrease (6.05%)	Discount Rate (7.05%)	1% Increase (8.05%)
Employer's proportionate share of the net pension liability (asset)	54,256	17,963	(12,050)

#### Pension plan fiduciary net position

Detailed information about the pension plan's fiduciary net position is available in the separately issued PERSI financial report.

PERSI issues a publicly available financial report that includes financial statements and the required supplementary information for PERSI. That report may be obtained on the PERSI website at www.persi.idaho.gov.

#### Payables to the pension plan

At October 31, 2019, the District reported \$1,890 of payables to the defined benefit pension plan for legally required employer contributions and \$1,134 for employee contributions which had been withheld from employee wages but not yet remitted to PERSI.

# NOTE N UNRESTRICTED NET POSITION – COMMITTEE DESIGNATIONS

The Committee has designated \$400,000 in the Water District Operating Fund for rental pool payment disputes which are deemed the responsibility of the District.

#### NOTE O SUBSEQUENT EVENTS

Subsequent events have been evaluated through February 21, 2020, which was the date the financial statements were available to be issued. There were no subsequent type events, identified by management of the District, that are required to be disclosed.

#### INDEPENDENT AUDITOR'S REPORT ON INTERNAL CONTROL OVER FINANCIAL REPORTING AND ON COMPLIANCE AND OTHER MATTERS BASED ON AN AUDIT OF FINANCIAL STATEMENTS PERFORMED IN ACCORDANCE WITH GOVERNMENT AUDITING STANDARDS

Committee of Nine Water District 1 Idaho Falls, Idaho

We have audited, in accordance with the auditing standards generally accepted in the United States and the standards applicable to the financial audits contain in the *Government Auditing Standards*, issued by the Comptroller General of the United States, the financial statements of the business-type activities and the discretely presented component unit, and each major fund of Water District 1 as of and for the year ended October 31, 2019, and the related notes to the financial statements, which collectively comprise Water District 1's basic financial statements, and have issued our report thereon dated February 21, 2020.

#### **Internal Control over Financial Reporting**

In planning and performing our audit, we considered Water District 1's internal control over financial reporting (internal control) to determine the audit procedures that are appropriate in the circumstances for the purpose of expressing our opinions on the financial statements, but not for the purpose of expressing an opinion on the effectiveness of Water District 1's internal control. Accordingly, we do not express an opinion on the effectiveness of Water District 1's internal control.

A *deficiency in internal control* exists when the design or operation of a control does not allow management or employees, in the normal course of performing their assigned functions, to prevent, or detect and correct misstatements on a timely basis. A *material weakness* is a deficiency, or combination of deficiencies, in internal control, such that there is a reasonable possibility that a material misstatement of the entity's financial statements will not be prevented or detected and corrected on a timely basis. A *significant deficiency* is a deficiency, or a combination of deficiencies, in internal control that is less severe than a material weakness, yet important enough to merit attention by those charged with governance.

Our consideration of the internal control was for the limited purpose described in the first paragraph of this section and was not designed to identify all deficiencies in internal control that might be material weaknesses or significant deficiencies. Given these limitations, during our audit we did not identify any deficiencies in internal control that we consider to be material weaknesses. However, material weaknesses may exist that have not been identified.

#### **Compliance and Other Matters**

As part of obtaining reasonable assurance about whether Water District 1's financial statements are free of material misstatement, we performed tests of its compliance with certain provisions of laws, regulations, contracts and grant agreements, noncompliance with which could have a direct and material effect on the determination of financial statement amounts. However, providing an opinion on compliance with those provisions was not an objective of our audit and, accordingly, we do not express such an opinion. The results of our tests disclosed no instances of noncompliance that are required to be reported under *Government Auditing Standards*.

#### **Purpose of this Report**

The purpose of this report is solely to describe the scope of our testing of internal control and compliance and the results of that testing, and not to provide an opinion on the effectiveness of the Water District 1's internal control or on compliance. This report is an integral part of an audit performed in accordance with *Government Auditing Standards* in considering the entity's internal control and compliance. Accordingly, this communication is not suitable for any other purpose.

APPENDIX F 2019 WATER DISTRICT #1 RENTAL POOL PROCEDURES

# WATER DISTRICT #1 RENTAL POOL APPLICATION TO **RENT** WATER FROM THE COMMON POOL SUPPLY

(applicant) hereby requests to rent(acre-feet
of storage from the Water District #1 Rental Pool with the enclosed rental fees of \$ for the
irrigation season 20 The acceptance and approval of this rental request by the Water District #1
Watermaster is subject to the adopted Water District #1 Rental Pool Procedures pursuant to Idaho Cod
Section 42-1765.
Description of Point of Diversion:
Name of River or Stream from which rental is diverted:
Canal or Pump Name & location:
Place of Use description:
Water Right Appurtenant to Lands:
Applicant Signature and Address:
Print Name:
Signature:
Address:
If applicant is not a spaceholder and is applying to rent 100 ac-ft or less, pursuant to Rule 5.2.104, the applicant must submit written consent from the operator of the point of diversion listed on the application.
Operator Name and Title:
Operator Consent Signature:
NOTICE: Applicants that are not spaceholders will be billed for an additional impact fee in the year following the approval of this application if the rental causes impacts to spaceholders in excess of the rental fees paid with this application, pursuant to Rule 5.5.107.
<pre>====================================</pre>
Date Application Accepted by Watermaster: Application Approved by Watermaster: YES No
Watermaster Signature:

- RULE 1.0 LEGAL AUTHORITY
- RULE 2.0 DEFINITIONS
- RULE 3.0 PURPOSES
- RULE 4.0 MANAGEMENT
  - 4.1 Manager
    - 4.2 Rental Pool Subcommittee
    - 4.3 Applications
    - 4.4 Rental Pool Account
    - 4.5 Infrastructure Fund

#### RULE 5.0 COMMON POOL

- 5.1 Scope
- 5.2 Participant Contributions
- 5.3 Assignments
- 5.4 Priorities for Renting Storage
- 5.5 Rental Prices
- 5.6 Limitations

#### RULE 6.0 PRIVATE LEASES

- 6.1 General
- 6.2 Purposes
- 6.3 Payment to Lessor
- 6.4 Fees & Surcharges
- 6.5 Non-Applicability to Common Pool
- 6.6 Recharge
- 6.7 Idaho Water Resource Board (IWRB) Storage
- 6.8 Lease of Storage from Bureau Uncontracted Space
- 6.9 Lease of Storage from Bureau Powerhead Space

#### RULE 7.0 IMPACTS

- 7.1 Determination
- 7.2 Milner Spill
- 7.3 Impacts to Participants due to Rentals from the Common Pool (excluding Assignments)
- 7.4 Impacts to Non-Participants due to Rentals from the Common Pool (excluding Assignments)
- 7.5 Impacts to Spaceholders due to all other leases.

#### RULE 8.0 SUPPLEMENTAL POOL

- 8.1 Purpose
- 8.2 Annual Authorization Required
- 8.3 Quantity and Price Determinations
- 8.4 Application to Lease Storage from the Supplemental Pool
- 8.5 Supplemental Pool Supply
- 8.6 Notice of Contract Approval and Payment to Lessors

- 8.7 Mitigation of Impacts
- 8.8 November 1 Carryover Unaffected

## RULE 9.0 STORAGE ALLOCATED TO PALISADES WATER USERS

- 9.1 Background and Purpose
- 9.2 Delivery of PWUI Storage Water
- 9.3 Private Lease of PWUI Storage Water
- 9.4 Applicability of Rule 5.6 to PWUI Storage
- 9.5 Allocation of Impacts to PWUI
- 9.6 Information Provided to District
- 9.7 Assignment of PWUI Shares to Canal Headings

#### 2019 WATER DISTRICT 1 RENTAL POOL PROCEDURES

#### **RULE 1.0 LEGAL AUTHORITY**

- 1.1 These procedures have been adopted by the Water District 1 Committee of Nine pursuant to Idaho Code § 42-1765.
- 1.2 These procedures shall not be interpreted to limit the authority of the Idaho Department of Water Resources, the Idaho Water Resource Board, or the Watermaster of Water District 1 in discharging their duties as prescribed by statute or rule.
- 1.3 These procedures shall be interpreted consistent with Idaho Code, rules promulgated by the Idaho Water Resource Board, relevant provisions of spaceholder contracts with the United States, and the Mediator's Term Sheet of the 2004 Snake River Water Rights Agreement.
- 1.4 The operation of the rental pool shall in no way recognize any obligation to maintain flows below Milner or to assure minimum stream flows at the United States Geological Survey (USGS) gaging station on the Snake River near Murphy.
- 1.5 These procedures shall not be interpreted in any manner that is inconsistent with or would adversely impact or effect the rights of the Shoshone-Bannock Tribes as set out in the Fort Hall Agreement, the Blackfoot River Equitable Adjustment Settlement Agreement, and the 2015 Settlement Agreement between the Tribes and the Committee of Nine.

#### **RULE 2.0 DEFINITIONS**

- 2.1 **Accounting Year:** the Water District 1 accounting year that begins on November 1 and ends on October 31.
- 2.2 **Acre-foot:** a volume of water sufficient to cover one acre of land one foot deep and is equal to 43,560 cubic feet.
- 2.3 **Administrative Fee:** a fee of one dollar and thirty cents (\$1.30) per acre-foot assessed on the total quantity of storage set forth in any rental or lease application, disbursed to the District at the end of the irrigation season.
- 2.4 **Allocation:** the amount of stored water, including carryover, that has accrued to a spaceholder's storage space on the date of allocation that is available for the spaceholder's use in the same accounting year.
- 2.5 **Applicant:** a person who files with the Watermaster an application, accompanied by the required fees, to rent or lease storage through the rental pool.
- 2.6 **Assignment:** storage provided by an assignor from the current year's storage allocation for rental through the common pool pursuant to Rule 5.3.
- 2.7 **Assignor:** a participant who assigns storage to the common pool pursuant to Rule 5.3 and subject to Rule 7.5.

- 2.8 **Board:** the Idaho Water Resource Board (IWRB).
- 2.9 **Board Surcharge:** a surcharge equal to ten percent (10%) of the rental price or lease price assessed on the total quantity of storage set forth in any rental or lease application, disbursed to the Board at the end of the irrigation season.
- 2.10 **Bureau:** the United States Bureau of Reclamation (USBR).
- 2.11 **Committee:** the Committee of Nine, which is the advisory committee selected by the members of Water District 1 at their annual meeting and appointed as the local committee by the Board pursuant to Idaho Code § 42-1765.
- 2.12 **Common Pool:** storage made available to the Committee through participant contributions and/or assignments for subsequent rental pursuant to Rule 5.
- 2.13 **Date of Allocation:** the date determined each year by the Watermaster on which the maximum accrual to reservoir spaceholders occurs.
- 2.14 **Date of Publication:** the date on which the Watermaster publishes on the District website the storage allocation for the current accounting year.
- 2.15 **Department:** the Idaho Department of Water Resources (IDWR).
- 2.16 **District:** The District is comprised of the Snake River and tributaries with Basins 01, 21, 22, 23, and 25 points of diversion.
- 2.17 **Impact Fee:** a fee added to the rental price for non-spaceholder rentals pursuant to Rule 5.5.107.
- 2.18 **Impact Fund:** a fund maintained by the Watermaster for the mitigation of computed impacts to participants pursuant to Rule 7.3.
- 2.19 **Infrastructure Fee:** a fee of five dollars (\$5.00) per acre-foot assessed on all storage rented through the common pool for purposes below Milner, excluding flow augmentation, disbursed to the Infrastructure Fund at the end of the irrigation season.
- 2.20 **Infrastructure Fund:** a fund maintained by the Watermaster for the purposes outlined in Rule 4.5.
- 2.21 **Lease:** a written agreement entered into between a lessor and lessee to lease storage through the rental pool pursuant to Rule 6.
- 2.22 **Lease Price:** a price per acre-foot negotiated between a lessor and lessee as set forth in a lease agreement.
- 2.23 **Lessee:** a person who leases storage from a participant under a lease.
- 2.24 **Lessor:** a participant who leases storage to a person under a lease pursuant to Rule 6 and subject to Rule 7.6.

- 2.25 **Milner:** Milner Dam on the Snake River.
- 2.26 **Milner Spill:** water in excess to the amount that can be captured in the reservoir system flowing past Milner dam that is not storage being delivered under Idaho Power's American Falls storage water right or other storage that is otherwise authorized pursuant to these rules.
- 2.27 **Net Price:** the average price per acre-foot of all rentals from the common pool, including flow augmentation, but excluding rentals of assigned storage.
- 2.28 **Net Proceeds:** the net price times the number of acre-feet rented from the common pool, excluding rentals of assigned storage.
- 2.29 **Participant:** a spaceholder who contributes storage to the common pool pursuant to Rule 5.2.
- 2.30 **Participant Contributions:** storage made available to the common pool by participants, with computed impacts accounted from next year's reservoir fill, which forms the supply for large rentals, small rentals, and flow augmentation, subject to the limitations in Rule 5.2.
- 2.31 **Person:** an individual, corporation, partnership, irrigation district, canal company, political subdivision, or governmental agency.
- 2.32 **Rent:** the rental of storage from the common pool.
- 2.33 **Rental Pool:** the processes established by these procedures for the rental and/or lease of storage, mitigation of computed impacts to spaceholders, and disposition of revenues.
- 2.34 **Rental Pool Subcommittee:** a subcommittee composed of the Watermaster (advisor), a designated representative from the Bureau (advisor), and three or more members or alternates of the Committee who have been appointed by the chairman of the Committee.
- 2.35 **Rental Price:** the price per acre-foot of storage rented from the common pool, as set forth in Rule 5.5, excluding the administrative fee, the Board surcharge, and the infrastructure fee.
- 2.36 **Renter:** a person who rents storage from the common pool.
- 2.37 **Reservoir System:** refers to American Falls, Grassy Lake, Henrys Lake, Island Park, Jackson Lake, Lake Walcott, Milner Pool, Palisades, and Ririe.
- 2.38 **Space:** the active capacity of a reservoir measured in acre-feet.
- 2.39 **Spaceholder:** the holder of the contractual right to the water stored in the space of a storage facility within the Reservoir System.
- 2.40 **Storage:** the portion of the available space that contains stored water.
- 2.41 **Watermaster:** the watermaster of Water District 1.

2.42 **Water Supply Forecast:** the forecasted unregulated runoff for April 1 to September 30 at the Heise USGS gaging station, referred to in Table 1.

#### RULE 3.0 PURPOSES

- 3.1 The primary purpose of the rental pool is to provide supplemental irrigation water to spaceholders for the irrigation of District land with an existing primary irrigation water right and to maintain a rental pool with sufficient incentives such that spaceholders supply, on a voluntary basis, an adequate quantity of storage for rental or lease pursuant to procedures established by the Committee. These procedures are intended to assure that participants have priority over non-participants and non-spaceholders in renting storage through the rental pool and the use of the storage occurs within the District.
- 3.2 To maintain adequate controls, priorities, and safeguards to insure that existing water rights are not injured and that a spaceholder's allocation is not impacted without his or her consent. To compensate an impacted spaceholder to the extent the impact can be determined by the procedures developed by the District.
- 3.3 To generate revenue to offset the costs of the District to operate the rental pool and to fund projects that fall within the parameters of Rule 4.5.
- 3.4 To provide storage water at no cost under Rule 5.5 for the benefit of the Tribes consistent with the terms of the Blackfoot River Equitable Adjustment Settlement Agreement and the 2015 Settlement Agreement. Discussions are ongoing to identify the party responsible for mitigating impacts to the Tribes. Nothing in these Procedures should be construed as an admission of liability by Water District 1 or the Committee of Nine.
- 3.5 To the extent available and to insure that the water is available to stabilize the ESPA and water supplies within the District, and to address new demands for water from the District storage supply from both inside and outside the District, the following shall apply: Subject to annual review and commencing in 2019, a moratorium on all leases and rentals that deliver water to new lands, new uses, diversions, or new water rights which have not historically had water delivered from Water District 1 prior to January 1, 2019 inside or outside the District shall be in place, excluding small rentals under rule 5.2.104 within the District's point of diversions. The Committee Resolution 51 subcommittee shall commence discussions in 2019 to address the issues associated with this moratorium and attempt a permanent resolution.

#### RULE 4.0 MANAGEMENT

- 4.1 **Manager.** The Watermaster shall serve as the manager of the rental pool and shall take all reasonable actions necessary to administer the rental pool consistent with these procedures, which include, but are not limited to:
  - (a) Determining impacts pursuant to Rule 7;
  - (b) Calculating payments to participating spaceholders as prescribed by Rules 5.2 and 7.3;
  - (c) Accepting storage into the common pool and executing rental agreements on behalf of the Committee;
  - (d) Disbursing and investing rental pool monies with the advice and consent of the Rental Pool Subcommittee; and
  - (e) Taking such additional actions as may be directed by the Committee.
- 4.2 **Rental Pool Subcommittee.** The Rental Pool Subcommittee shall exercise the following general responsibilities:
  - (a) Review these procedures and, as appropriate, make recommendations to the Committee for needed changes;
  - (b) Review reports from the Watermaster regarding rental applications, storage assignments to the common pool, and leases of storage through private leases;
  - (c) Advise the Committee regarding rental pool activities;
  - (d) Develop recommendations for annual common pool storage supplies and rental rates;
  - (e) Assist the Watermaster in resolving disputes that may arise from the diversion of excess storage; and
  - (f) Assume such additional responsibilities as may be assigned by the Committee.

#### 4.3 **Applications**

- 4.3.101 Applications to rent or lease storage through the rental pool shall be made upon forms approved by the Watermaster and shall include:
  - (a) The amount of storage sought to be rented or leased;
  - (b) The purpose(s) for which the storage will be put to beneficial use;
  - (c) The lease price (for private leases); and
  - (d) To the extent practicable at the time of filing the application, the point of diversion identified by legal description and common name; and a description of the place of use.
- 4.3.102 *Application Acceptance*. Applications are not deemed accepted until received by the Watermaster together with the appropriate fees required under Rules 5.5 (rentals) or 6.4 (leases).
- 4.3.103 *Application Approval.* An application accepted under Rule 4.3.102 shall be approved after the Watermaster has determined that the application is in compliance with these procedures and sufficient storage will be available from the common pool and/or lessor to provide the quantity requested in the application. Upon approval of the application, the Watermaster shall send notice to the renter/lessor/lessee and entity owning the point-of-diversion designated in the application of such approval and allocation of storage; provided, however, no allocation of storage shall be made until the applicant designates the point of diversion and place of use of the rented and/or leased storage in the application or pursuant to Rule 4.3.106.

- 4.3.104 *Timeframe for having Rental Application Accepted to Preserve Rental Priority.* Applications to rent storage will not be accepted until April 5 of the year in which the storage will be used. Applications must be accepted by the Watermaster within 15 days following the date of publication to preserve the applicant's priority under Rule 5.4.101.
- 4.3.105 *Deadline for Accepting Applications to Rent or Lease Storage*. All applications to rent or lease storage must be accepted by the Watermaster pursuant to Rule 4.3.102 on or before December 1 in order for the storage identified in such applications to be accounted for as having been diverted prior to October 31 of the same year. Applications accepted after December 1 will be accounted for from storage supplies in the following calendar year, unless an exception is granted by the Rental Pool Subcommittee.
- 4.3.106 *Deadline to Designate Point of Diversion and Place of Use.* If the point of diversion and/or place of use of the rented and/or leased storage was not previously designated in the application, the renter and/or lessee must make such designation in writing to the Watermaster on or before December 1 of the same year, unless an extension is granted by the Rental Pool Subcommittee. Failure to comply with this provision shall cause any unused storage to automatically revert back to the common pool and/or lessor, respectively.
- 4.3.107 Deadline to Use Rental or Lease Storage. Approved applications pursuant to Rule 4.3 or water leased through a private lease, must be used and diverted on or before December 1 of the same year.

#### 4.4 **Rental Pool Account**

- 4.4.101 All monies submitted by applicants shall be deposited in an interest-bearing account known as the "Rental Pool Account" and maintained by the Watermaster on behalf of the Committee. Monies in the Rental Pool Account will be disbursed to participants, the District, the Board, the Impact Fund, and the Infrastructure Fund in the proportions set forth in these Rules. Accrued interest to the Rental Pool Account shall be used to maintain the Impact Fund. Rental Pool Funds shall be considered public funds for investment purposes and subject to the Public Depository Law, Chapter 1, Title 57, Idaho Code.
- 4.4.102 Monies deposited in the Rental Pool Account are non-refundable to the extent the rental and/or lease application is approved pursuant to Rule 4.3.103, regardless of whether the storage is used.

#### 4.5 **Infrastructure Fund**

4.5.101 Monies in the Infrastructure Fund may only be used to fund District costs of projects relating to improvements to the District's distribution, monitoring, and gaging facilities, and other District projects designed to assist in the adjudication, which includes the cost of Blackfoot River Equitable Adjustment Settlement Water, if any is required, conservation, or efficient distribution of water.

- 4.5.102 Disbursements from the Infrastructure Fund are subject to two-thirds (2/3) Committee approval.
- 4.5.103 If monies in the Infrastructure Fund accrue to one million dollars (\$1,000,000.00), the infrastructure fee shall be waived and the same amount (five dollars (\$5.00)) added to the rental price in Rule 5.5.105.
- 4.5.104 Monies in the Infrastructure Fund may be carried over from year to year.

#### **RULE 5.0 COMMON POOL**

5.1 **Scope.** The common pool consists of storage made available to the Committee through participant contributions and assignments. Participants make all of their storage available to the common pool pursuant to the terms of Rule 5.2, with computed impacts accounted from next year's reservoir fill. Assignors provide storage to the common pool, pursuant to Rule 5.3, by assigning a portion of their current year's storage allocation. Rentals from the common pool are subject to the priorities and prices established under this Rule.

#### 5.2 **Participant Contributions**

- 5.2.101 Participants. Any spaceholder may, upon submitting written notice to the Watermaster prior to March 15, 2019, elect to contribute storage to the common pool. Any spaceholder making such election shall be deemed a "participant" for the current year and every year thereafter until the spaceholder provides written notice to the Watermaster prior to March 15, 2019 rescinding its participation. Upon election to participate, a spaceholder is eligible for all the benefits of a participant set forth in these procedures, excluding monetary payment for rentals or computed impacts associated with rentals from the prior year. If after March 15, 2019, less than seventy-five percent (75%) of the contracted storage space is committed to the common pool by participants, the Committee shall revise the rental pool procedures as necessary prior to April 1.
- 5.2.102 *Non-Participants*. Spaceholders who are not participants shall not be entitled to supply storage to, or rent storage from, the common pool, or supply or lease storage through a private lease. Notwithstanding this restriction, the Bureau may rent water from the common pool for flow augmentation pursuant to Rule 5.2.105.
- 5.2.103 *Large Rentals.* The common pool will make available from participant contributions 50,000 acre-feet of storage for rentals, plus any assigned storage, subject to the priorities and limitations set forth in Rule 5.
- 5.2.104 *Small Rentals.* The common pool will make available from participant contributions 5,000 acre-feet for rentals of 100 acre-feet or less per point of diversion, subject to the priorities and limitations set forth in Rule 5. Rentals from the small pool shall only be considered for approval following submittal of written consent from the operator of the delivery system. The Committee may approve on a case-by-case basis the additional rental of storage under this provision to exceed the 100 acre-feet limitation. The 100 acre-feet limitation per point of diversion does not apply if the rental is supplied pursuant to Rule 5.2.103.

#### 5.2.105 *Flow Augmentation*

- (a) *Table 1.* The amount of storage, from participant contributions to the common pool, available for rental for flow augmentation shall be determined by Table 1.
- (b) Extraordinary Circumstances. A greater amount of storage may be made available by the Committee, if it determines on or before July 1 that extraordinary circumstances justify a change in the amount of storage made available for flow augmentation. The Bureau and Committee will also consider on years when Milner spill occurs, the preservation of Uncontracted and Powerhead storage for use in subsequent years.
- 5.2.106 *Shoshone-Bannock Tribes*. The Tribes shall be treated as non-participants unless written notice is provided under 5.2.101.
  - (a) *Blackfoot River Equitable Adjustment Settlement Agreement Water*. Storage water not to exceed 20,000 acre-feet shall be made available in accordance with the terms of the Blackfoot River Equitable Adjustment Settlement Agreement. The source and funding of the storage water shall be determined by the Committee at its June meeting. Administrative fees shall be paid by Water District 1.
  - (b) 2015 Settlement Agreement. Storage water not to exceed 10,000 acre-feet (except with the approval of the Committee of Nine) shall be made available in accordance with the terms of the 2015 Settlement Agreement from the current year's Common Pool prior to providing any rental under the priorities of Rule 5.4.101. Administrative fees shall be paid by Water District 1. Discussions are ongoing to identify the party responsible for mitigating impacts to the Tribes. Nothing in these Procedures should be construed as an admission of liability by Water District 1 or the Committee of Nine.
- 5.2.107 *Additional Quantities.* In the event rental requests from participants impacted from the prior year's rentals exceed 50,000 acre-feet and insufficient storage has been assigned to the common pool to meet such additional requests, the maximum amount of storage that will be available through the common pool will be equivalent to the amount necessary to meet the demand of those shown to have been impacted from the prior year's rentals.
- 5.2.108 *Participant Payments*. Monies collected through the rental of the participant contribution portion of the common pool, including flow augmentation, shall be disbursed as follows:
  (a) seventy percent (70%) of the Net Proceeds disbursed to participants; and

(b) thirty percent (30%) of the Net Proceeds disbursed to participants, and

5.2.109 *Participant Payment Formula*. Participants will receive payment for storage rented from the participant contribution portion of the common pool pursuant to the following payment formulas:

1 <sup>st</sup> Installment	= (R x SP/TSP) / 2
2 <sup>nd</sup> Installment	= (R x ST/TST) / 2

- R=70% of net proceedsSP=Space of participantsST=Storage of participants based on the preliminary storage allocation for
- the following year
- TSP = Total participating space in system
- TST = Total participating storage in system based on the preliminary storage allocation for the following year

If a specific reservoir's allocation has been reduced as a result of flood-control operations, the ST and TST values in the above formula for those reservoir spaceholders will reflect the values that otherwise would have occurred without any reductions for flood-control.

5.2.110 *Timing of Payments.* Payments to participants will be made in two installments. The first installment will be paid to participants immediately following the irrigation season in which the proceeds were collected. The second installment will be paid to participants within two weeks of the date of publication for the following irrigation season.

#### 5.3 Assignments

- 5.3.101 Assignors. Any participant may assign storage to the common pool. An assignment of storage shall be made in writing on forms approved by the Watermaster.
- 5.3.102 *Purposes*. Storage assigned to the common pool may be rented only for purposes above Milner.
- 5.3.103 *Limitations.* Storage assigned to the common pool may be rented only after the participant contributions to the common pool have been rented. A participant may not assign storage and rent storage in the same accounting year unless an exception is granted by the Rental Pool Subcommittee.
- 5.3.104 *Assignor Payment.* The assignor shall receive one-hundred percent (100%) of the rental price per acre-foot of the assigned storage that is rented.
- 5.3.105 *Distribution of Assigned Storage.* Assignments can only be made between April 5 and 15 days after the date of publication in the year in which the storage is to be rented. Assignments shall initially be distributed on a pro-rata basis, with each pro-rata share based on the amount of storage assigned or 10% of the assignor's storage space, whichever is less. If, after this initial distribution, additional rental requests exist, the remaining assigned storage shall be distributed on a pro-rata basis.

#### 5.4 **Priorities for Renting Storage**

- 5.4.101 *Priorities.* Storage rented from the common pool shall be pursuant to the following priorities:
  - (a) *First Priority*. Rentals by participants whose storage is determined to have been impacted by the prior year's rental from the common pool not to exceed the amount of the computed impact.
  - (b) *Second Priority*. Rentals by participants for agricultural purposes up to the amount of their unfilled space.
  - (c) *Third Priority*. Rentals by participants for any purposes above Milner in excess of their unfilled space. Applications for such rentals will be reviewed by the Committee and may be approved on a case-by-case basis.
  - (d) *Fourth Priority*. Rentals by non-spaceholders for any purposes within the District.
- 5.4.102 *Priority for Late Applications*. Applications received after the deadline set forth in Rule 4.3.104 will be deemed last in priority and will be filled in the order they are received, only after all timely applications have been filled.
- 5.4.103 *Distribution Within Priority Classes.* If rental supplies are not sufficient to satisfy all of the timely applications within a priority class (those received within 15 days of the date of publication), the available rental supplies will be distributed to the applicants within that priority class on a pro-rata basis.
- 5.4.104 *Priority for Small Rentals.* Small rentals made pursuant to Rule 5.2.104 are not subject to the priorities set forth in Rule 5.4.101 and will be approved in the same order in which the rental applications are received by the Watermaster, so long as the total amount of all such applications does not exceed 5,000 acre-feet.
- 5.4.105 *Priority for Flow Augmentation*. Rentals for flow augmentation are not subject to the priorities set forth in Rule 5.4.101 and shall be determined pursuant to Rule 5.2.105.

#### 5.5 **Rental Prices**

- 5.5.101 *Tier 1*: If the storage system fills, the rental price for purposes above Milner shall be \$7.00 per acre-foot.
- 5.5.102 *Tier 2:* If the storage system does not fill but storage is provided for flow augmentation pursuant to Rule 5.2.105(a), the rental price for purposes above Milner shall be \$17.00 per acre-foot.
- 5.5.103 *Tier 3:* If the storage system does not fill and no flow augmentation water is provided pursuant to Rule 5.2.105(a), the rental price for purposes above Milner shall be \$25.00 per acre-foot.

- 5.5.104 *Determination of Tier1, 2 or 3 Rental Price*: Unless the storage system has filled, the Watermaster shall designate on or before April 5 either Tier 2 or Tier 3 as the rental price for above-Milner rentals. If at any time during the same accounting year, the storage system should subsequently fill, the Watermaster shall designate Tier 1 as the rental price for above-Milner rentals and refund any excess rental fees within 30 days after the date of publication.
- 5.5.105 *Tier 4:* The rental price for storage rented for flow augmentation shall be \$17.00 per acre-foot.
- 5.5.106 *Tier 5:* The rental price for storage rented for purposes below Milner, excluding flow augmentation, shall be negotiated between the applicant and the rental pool sub-committee.
- 5.5.107 *Fees & Surcharges.* There shall be added to the rental price for all rentals the administrative fee and Board surcharge. There shall also be added to the rental price for rentals pursuant to fourth priority Rule 5.4.101(d) and rentals to non-spaceholders pursuant to Rule 5.2.104 an impact fee to mitigate the computed impacts under Rule 7 from such rentals, payable as follows: The exact amount which is to be set and paid when the full impacts of such rentals, based upon the following year's Common Pool rental price, are determined under said Rule 7, including all additional fees and surcharges. Payment shall then be due and payable on or before 60 days from the day of allocation. There shall also be added to the rental price for rentals below Milner, excluding flow augmentation, the infrastructure fee. Failure of a non-spaceholder to timely pay the fees identified above, shall result in the non-spaceholder's ineligibility to rent water in the future. Such failure to pay shall also subject the non-spaceholder to such legal actions as allowed under state law in the collection of fees.
- 5.5.108 *Storage System Fill.* For purposes of Rule 5.5 only, the storage system is considered full when all storage rights are filled in Jackson Lake, Palisades (except for powerhead), American Falls, and Island Park.
- 5.6 Limitations. A participant cannot rent water from the Common Pool if the participant is replacing storage space or water which has been evacuated due to an assignment to or private lease through the Water District 1 Rental Pool, unless an exception is granted by the Committee.

## RULE 6.0PRIVATE LEASES

- 6.1 **General**. All leases must be transacted through the rental pool. Only participants may lease storage to a Lessee subject to the provisions of these rules.
- 6.2 **Purposes.** Storage may be leased through the rental pool only for beneficial use purposes above Milner. A participant may not lease storage to a lessee and rent storage from the common pool in the same accounting year unless an exception is granted by the Rental Pool Subcommittee.
- 6.3 **Payment to Lessor.** The lessor shall receive one-hundred percent (100%) of the lease price.

- 6.4 **Fees & Surcharges.** There shall be added to the lease price the administrative fee and the Board surcharge.
- 6.5 **Non-Applicability to Common Pool.** Storage leased pursuant to this rule does not count against the participant contribution volumes set forth in Rule 5.2.
- 6.6 **Recharge**. All storage used for the purpose of recharge must be transacted through the rental pool. Unless storage is rented pursuant to Rule 5.0, storage used for recharge, whether diverted by the storage spaceholder or another person, will be treated as a lease of storage.
- 6.7 **Idaho Water Resource Board (IWRB) Storage.** Notwithstanding the limitations set forth in Rules 6.1 and 6.2, the IWRB may lease its existing storage (up to 5,000 acre-feet) to Idaho Power and have it released past Milner for the purpose of mitigating minimum flows at Murphy. The administrative fee must be paid by the IWRB for any storage used for such purpose.
- 6.8 **Lease of Storage from Bureau Uncontracted Space.** Notwithstanding the limitations set forth in Rules 6.1 and 6.2, the Bureau may lease storage from its uncontracted space for flow augmentation as identified in Appendix III of the Mediator's Term Sheet of the 2004 Snake River Water Rights Agreement.
- 6.9 **Lease of Storage from Bureau Powerhead Space.** Notwithstanding the limitations set forth in Rules 6.1 and 6.2, the Bureau may lease storage from its powerhead space for flow augmentation as identified in III.C.7 of the Mediator's Term Sheet of the 2004 Snake River Water Rights Agreement.

## RULE 7.0 IMPACTS

- 7.1 **Determination.** In any year in which the storage rights in the reservoir system do not fill, the Watermaster will determine the actual computed impacts to spaceholders, if any, associated with the prior year's rentals and leases. In making this determination, the Watermaster will use a procedure which identifies the following:
  - (a) What each computed reservoir fill would have been had the previous year's rentals and leases not taken place;
  - (b) The storage space from which rented or leased storage was actually supplied for the previous year's rental or lease; and
  - (c) The amount of storage each spaceholder's current allocation was reduced by the previous year's rental or lease activities.
- 7.2 **Milner Spill**. There are no computed impacts resulting from the previous and current year's rentals or leases used prior to Milner spill ceasing when the use of those rentals or leases result in reducing the spill from the reservoir system prior to the current year's Date of Allocation, as determined by the Watermaster.

# 7.3 Impacts to Participants due to Rentals from the Common Pool (excluding assignments)

7.3.101 *Payments to Impacted Participants Using Impact Fees.* Participants whose storage allocation has a computed impact from the prior year's rental of storage from the common pool, excluding assignments, shall first receive payment from impact fees collected pursuant to Rule 5.5.107 from the previous year's fourth priority rentals. The amount of impact fees disbursed to impacted participants will be proportional to the total common pool rental, including flow augmentation rentals that occurred during the prior year:

Impact Fee Payment = (Isp \* RP) \* (Fp/Cp)

Isp = Participants computed impacted space in current year

RP = Rental Price in current year

Fp = Fourth priority rentals in prior year

Cp = Total common pool rentals (including flow augmentation) in prior year

Payment to spaceholders for the impacts by non-spaceholders pursuant to 7.3.101 shall be paid from the balance remaining in the impact fund after payments are made pursuant to 7.3.102, which shall then be reimbursed pursuant to Rule 5.5.107.

7.3.102 *Remaining Impact Payment.* Participants whose storage allocation has a computed impact from the prior year's rental of storage from the common pool, excluding assignments, will also receive payment from the Impact Fund (in addition to the Impact Fee Payment pursuant to Rule 7.3.101) equal to the lesser value of the two following formulas:

Remaining Impact Payment = [(Isp\*RP) - Impact Fee Payment] or  $[\frac{1}{2} IF*(Isp/Ispt) - Impact Fee Payment]$ 

- Isp = Participant's computed impacted space in acre-feet
- RP = Rental Price
- IF = Impact Fund
- Ispt = Total of all Participants' computed impacted space in acre-feet
- 7.3.103 *Timing of Payment*. Impact payments, which will be based on preliminary data, will be made to participants on or before July 15.
- 7.4 **Impacts to Non-Participants due to Rentals from the Common Pool (excluding assignments).** If the prior year's rental of storage from the common pool caused computed impacts to non-participants as determined by the Watermaster, the current year's Common Pool shall be reduced to supply such impacts to non-participants (at no cost to non-participants) prior to providing any rental under the priorities of Rule 5.4.101.

- 7.5 **Impacts to Spaceholders due to all other leases.** If the lease of storage pursuant to leases under Rules 5.3, 6, 8, and 9.3 caused computed impacts, as determined by the Watermaster, the lessor's storage allocation shall be reduced by an amount equal to such computed impacts, not to exceed the quantity of storage leased by the Lessor, and reallocated to mitigate computed impacts to affected spaceholders. Refill of lessor's storage space shall occur in the following priorities:
  - (a) Assigned storage under Rule 5.6, private leases above Milner, and IWRB storage used for mitigating minimum flows at Murphy under Rule 6.7. This reallocation will only occur in the year following the lease of storage.
  - (b) Bureau uncontracted storage under Rule 6.8 until the lessor's affected space fills.
  - (c) Subject to review by the Committee in 2019, Supplemental Pool leases under Rule 8.0 shall be computed the same as was in 2018 as outlined in Rule 8.7
  - (d) Bureau Powerhead storage under Rule 6.9 shall be the last space to refill after all other space in reservoirs in Water District 1 until the lessor's affected space fills as identified in III.C.7.c. of the Mediator's Term Sheet of the 2004 Snake River Water Rights Agreement.

## **RULE 8.0. SUPPLEMENTAL POOL**

8.1 **Purpose.** To provide a voluntary mechanism for the lease of storage water below Milner for hydropower generation within the state of Idaho when storage water supplies, as a result of hydrologic, climate and other conditions, are sufficient to satisfy above Milner uses and Water District 01 commitments for flow augmentation. A supplemental pool shall be created in order to mitigate for computed impacts associated with leases below Milner, consistent with the Idaho Water Resource Board's policy to establish an effective water marketing system consistent with state law and assuring the protection of existing water rights while accommodating the purchase, lease or conveyance of water for use at Idaho Power's hydroelectric facilities, including below Milner Dam.

- 8.2 **Annual Authorization** In order to provide the opportunity to lease water to generate funding of aging infrastructure projects without impacting individual spaceholder fill, storage may be leased through the Supplemental Pool for the purposes described herein. However, no storage may be leased through the supplemental pool until the Committee on or after April 1 of each year authorizes use of the pool and the Committee is satisfied that the goals and terms of the Mediator's Term Sheet of the 2004 Snake River Water Rights Agreement are met to provide sufficient flow augmentation supplies for the year or that storage to be released past Milner will count toward flow augmentation.
  - (a) Mitigation Inc. shall have the right to lease the first 10,000 ac-ft of supplemental pool water under Rule 8.0, as approved annually by the Committee at the first Committee of Nine meeting in April. Mitigation Inc. shall provide to the Committee a report summarizing the expenditure of revenue from the annual lease(s) by December 31, 2023. If the Committee determines that the preference granted Mitigation Inc. is no longer justified, the Committee may terminate said preference. The preference granted Mitigation Inc. pursuant to this Rule shall sunset on December 31, 2029. The 10,000 ac-ft preference shall only be applied once per year.
  - (b) Additional leases of storage in excess of 10,000 ac-ft may be authorized annually by the Committee pursuant to Rule 8.0. If Mitigation Inc. supplies 10,000 ac-ft to the supplemental pool pursuant to 8.2(a), Mitigation Inc. shall be permitted to supply a prorata share of any additional amount made available to the supplemental pool exceeding the initial 10,000 ac-ft. If Mitigation Inc. does not supply 10,000 ac-ft pursuant to 8.2(a), Mitigation Inc. shall be permitted to supply a prorata share of its storage to the supplemental pool along with other spaceholders supplying storage to the supplemental pool.

## 8.3 **Quantity and Price Determinations.**

- 8.3.101 *Quantity Determination*. The maximum quantity of storage authorized to be leased through the supplemental pool shall be determined annually by the Committee taking into account the advice and recommendation of the Rental Pool Subcommittee, together with current and forecasted hydrological conditions and estimated demand on the rental pool for above Milner uses.
- 8.3.102 *Price Determination.* The Committee shall authorize the leasing of water, including price pursuant to Rule 8 after taking into account spaceholder needs and current market conditions for power generation. There shall be added to the lease price the board surcharge and not to exceed a \$1.80 per acre-foot administrative fee associated with the development and implementation of the supplemental pool, assessed on the total quantity of storage set forth in any lease application approved or conditionally approved under Rule 8.4.
- 8.3.103 Subsequent Quantity and Price Determinations. If within the same accounting year, the Committee subsequently determines based on the criteria set forth in Rule 8.3.101 that additional opportunities exist for utilizing the use of water within Idaho through the supplemental pool consistent with Rule 8.1.it shall designate such additional maximum quantity authorized to be leased through the supplemental pool and identify a separate lease price for such additional quantity pursuant to Rule 8.3.102.

#### 8.4 Application to Lease Storage from the Supplemental Pool.

- 8.4.101 Applications to lease storage from the supplemental pool for hydropower purposes shall be made upon forms approved by the Watermaster and shall include:
  - (a) The amount of storage sought to be leased;
  - (b) The lease price with associated fees as identified by the Committee under Rule 8.3.102;
  - (c) The point of diversion identified by legal description and common name; and
  - (d) A description of the place of use.
- 8.4.102 *Application Acceptance*. Applications are not deemed accepted until received by the Watermaster together with the appropriate fees required under Rule 8.3.102.
- 8.4.103 *Application Approval.* An application accepted under Rule 8.4.102 shall be approved after the Watermaster has determined that the application is in compliance with these procedures and sufficient storage will be available from the supplemental pool to provide the quantity requested in the application; provided, however, if the date of publication has not yet occurred, approval of the application shall be conditioned on the ability of spaceholders who have contracted to lease storage through the supplemental pool to have a sufficient storage allocation during the accounting year to satisfy their contracts approved under Rule 8.5.104. Upon approval or conditional approval of the extent of the total quantity of storage approved or conditionally approved in supplemental pool lease contract(s) under Rule 8.5.104. The Watermaster shall provide notice of such approval.
- 8.4.104 *Deadline for Accepting Applications*. All applications to lease storage from the supplemental pool must be accepted by the Watermaster pursuant to Rule 8.4.102 not later than October 31 in order for the storage identified in such applications to be accounted for as having been diverted as of October 31 of the same year. Applications accepted after October 31 will be accounted for from storage supplies in the following calendar year, unless an exception is granted by the Rental Pool Subcommittee.

#### 8.5 **Supplemental Pool Supply.**

- 8.5.101 Notice to Spaceholders of Opportunity to Lease Storage through the Supplemental *Pool.* The Watermaster shall provide notice of the supplemental pool on the Water District 1 website, which shall include the following information:
  - (a) The maximum quantity of storage authorized to be leased through the supplemental pool;
  - (b) The lease process, including price and deadlines as authorized by the Committee;
  - (c) Instructions for spaceholders interested in leasing storage through the supplemental pool, including instructions for executing a standardized supplemental pool lease contract; and
  - (d) The deadline, as set by the Committee, for the Watermaster to receive supplemental pool lease contracts from spaceholders interested in leasing storage through the supplemental pool.

- 8.5.102 *Supplemental Pool Lease Contracts.* Spaceholders interested in leasing storage through the supplemental pool shall execute a standardized supplemental pool lease contract, which shall be provided by the Watermaster and include provisions for the following:
  - (a) Limit eligibility to lease storage through the supplemental pool only to spaceholders who qualify as participants under Rule 2.27;
  - (b) The quantity sought to be leased by the spaceholder may be any amount, except that the total amount of storage leased pursuant to Rule 8 may not exceed either the maximum quantity set by the Committee under Rule 8.3.101 or 10% of the spaceholder's total reservoir system space, unless an exception is approved by the Rental Pool Subcommittee;
  - (c) The quantity actually leased by the spaceholder may be reduced depending upon the number of spaceholders who elect to lease storage through the supplemental pool as provided in Rule 8.5.103;
  - (d) That, in the event the spaceholder elects to sign a standard pool lease contract before the date of publication, the spaceholder assumes the risk that its storage allocation may be less than the spaceholder anticipated; and
  - (e) Notice to the spaceholder that if the spaceholder's lease through the supplemental pool causes computed impacts, the mitigation required under Rule 8.7 will result in an amount of the spaceholder's space, not to exceed the quantity of storage leased by the spaceholder, being assigned a junior priority which may not fill for multiple consecutive years, an accounting commonly referred to as "last to fill."
- 8.5.103 *Distribution of Storage to the Supplemental Pool.* If, following the deadline for receipt of executed supplemental pool lease contracts, the Watermaster determines that the total quantity of storage sought to be leased through the supplemental pool exceeds the quantity limitation established under Rule 8.3, then the Watermaster shall reduce the quantity of each supplemental pool lease contract to a pro rata share based on the amount of storage sought to be leased by each spaceholder. The Watermaster shall amend the supplemental pool lease contract(s) to reflect any reduced quantity required by this provision.
- 8.5.104 *Lease Contract Approval.* Following receipt of a supplemental pool lease contract, the Watermaster shall determine whether the contract is in compliance with these procedures, and, if so, shall approve the same; provided, however, if the date of publication has not yet occurred, approval of the contract shall be conditioned on the spaceholder having a sufficient storage allocation during the accounting year to satisfy the contract.
- 8.6 **Notice of Contract Approval and Payment to Lessors**. The lessors shall receive onehundred percent (100%) of the lease price apportioned according to the quantity of storage each lessor leased through the supplemental pool. The Watermaster shall notify spaceholder(s) who submitted supplemental pool lease contracts of the approved amount and distribute the funds to the lessors within 30 days following approval or conditional approval of an application under Rule 8.4.103.

- 8.7 **Mitigation of Impacts.** If a lease of storage through the supplemental pool caused computed impacts, as determined by the Watermaster, the lessor's storage allocation shall be reduced by an amount equal to such computed impacts, not to exceed the quantity of storage leased by the lessor, and reallocated to mitigate computed impacts to affected spaceholders until the lessor's affected space fills under a priority junior to that required to fill Palisades powerhead space.
- 8.8 **November 1 Carryover Unaffected.** For purposes of determining the amount of storage available for flow augmentation under Rule 5.2.105(a), storage leased through the supplemental pool shall not affect the November 1 carryover quantity on Table 1.

# RULE 9.0 STORAGE ALLOCATED TO PALISADES WATER USERS, INC. (PWUI)

- 9.1 Background and Purpose. PWUI is an entity originally organized at the specific request of the Bureau to group, under one entity, all individual water users who applied for an allocation of Palisades Reservoir storage because Reclamation's policy at that time was that it would not enter into repayment contracts with individual water users. PWUI does not own natural flow water rights, has no designated service area, and does not own a water delivery system. Instead, PWUI shareholders call for delivery of water allocated to their shares through their own delivery systems or the systems of other irrigation entities and have historically been able to change the location of PWUI storage deliveries upon simple notification to the District. The shares do not describe specific property where storage allocated to such shares are used. One share of PWUI stock is equivalent to one acre-foot of PWUI space in Palisades Reservoir, and allocations of water to PWUI shareholders are made upon that basis. The provisions of Rule 9.0 are included herein to clarify, between PWUI and the District, how to properly categorize the delivery of PWUI storage to various points of delivery.
- 9.2 **Delivery of PWUI Storage Water**. Storage allocated to PWUI shares shall not be considered a private lease under Rule 7.6 in the following circumstances:
  - 9.2.101 The delivery of storage to an irrigation delivery system where the PWUI shareholder has an ownership interest or leasehold interest in property capable of receiving delivery of water through such system.
  - 9.2.102 The delivery of storage allocated to a PWUI shareholder which is assigned to another PWUI shareholder for an amount up to the assignee's unfilled PWUI allocation for the Accounting Year.
  - 9.2.103 The delivery of storage allocated to PWUI's treasury stock provided to a PWUI shareholder.
- 9.3 **Private Leases of PWUI Storage Water**. Storage allocated to PWUI shares shall be considered a private lease under Rule 7.6 and subject to impacts under Rule 7.6 in the following circumstances:
  - 9.3.101 The delivery of storage allocated to PWUI's treasury stock provided to a non-PWUI shareholder for any purpose.
  - 9.3.102 The delivery of storage allocated to a PWUI shareholder which is assigned to another PWUI shareholder for an amount more than the assignee's unfilled PWUI allocation for the Accounting Year.
  - 9.3.103 The delivery of storage allocated to a PWUI shareholder provided to a non-PWUI shareholder for any purpose.
  - 9.3.104 The delivery of storage to a PWUI shareholder which is used for recharge.

#### 9.4 **Applicability of Rule 5.6 To PWUI Storage**.

- 9.4.101 Rule 5.6 shall apply to private leases of PWUI storage described in Rule 9.3.101.
- 9.4.102 Subject to Rule 9.4.103, the Committee hereby grants PWUI an exception from the provisions of Rule 5.6 such that PWUI shall not be prohibited from leasing water from the Common Pool because of private leases by PWUI shareholders under Rules 9.3.102 through 9.3.104.
- 9.4.103 Water leased from the Common Pool by PWUI under Rule 9.4.102 shall not be allocated to or used by PWUI shareholders who engage in private leases described under Rules 9.3.102 through 9.3.104.
- 9.5 **Allocation of Impacts to PWUI**. The allocation of impacts described in Rule 7.6 of these procedures for private leases described under Rule 9.3 shall be made to PWUI as the spaceholder. PWUI shall thereafter internally allocate the impacts to the individual PWUI shareholders who participate in private leases described under Rules 9.3.102 through 9.3.104.
- 9.6 **Information Provided to District**. PWUI shall provide sufficient information to the District to allow the District to verify PWUI's characterization of the assignment of PWUI storage under Rule 9.0.
- 9.7 **Assignment of PWUI Shares to Canal Headings**. PWUI shareholders shall assign its shares to the canal heading where such PWUI shareholder is most likely to request delivery of storage. Water District 1 shall only account for the delivery of PWUI storage when (1) notified by the PWUI shareholder that such shareholder is taking delivery of storage through a canal; or (2) the manager of a canal reports the delivery of PWUI storage to Water District 1.
