District No.

1. Name of Applicant: CARIBOU TROUT RANCH, INC.
Postoffice address: Soda Springs County: Caribou State: Idaho

I. If applicant is a corporation, give:

- (a) Date and place of incorporation: Sept. 6, 1938- Boise, Idaho
- (b) Amount of capital stock: \$75,000
- (c) Amount paid in: \$50,000
- (d) Names and addresses of directors: D. A. Woodall, President, Logan, Utah; Geo. H. Isaac, Vice-President, Pocatello, Idaho; H. W. Woodall, Sec.-Treas., Soda Springs, Idaho.

II. The financial resources of the applicant are:
(b) Treasury stock:
(d) Other resources:

- (a) Cash on hand:
- (c) Bonds to be issued:

2. Quantity of water claimed: 30

cubic feet per second.

3. Source of water supply: Springs, at head of Spring Creek which is a tributary of Bear River

4. Location of point of diversion: Springs 990

feet distant from the N. $\frac{1}{4}$ corner

corner of Section 18, T. 9 S., R. 42 E., B. M., and is the in the NE $\frac{1}{4}$ NW $\frac{1}{4}$

of Section 18, T. 9 S., R. 42 E., B. M., County of Caribou

5. Water is to be used for: Trout rearing ponds

6. If for mining, milling, power or manufacturing purposes, give:

(a) Point of use of water:

feet distant from corner of Section

T., R., B. M., in the

of Section, T., R., B. M.

(b) Amount of power generated:

H. P., under feet head.

(c) Water is to be returned to

at a point

distant from the

corner of Section

T., R., B. M., in the

of Section, T., R., B. M.

7. Estimated cost of works: \$ 5,000.00

8. Kind of works: Dams and ponds- Pipe

9. Height of dam 9

feet; length of dam at top 135

feet; length of dam at bottom 106

feet; material used in dam: Concrete core- Earth

10. Size of headgate: Width 12

feet; height 9

feet.

11. Ditch: Width at bottom

feet; width at water line

feet; depth of water

feet; dimensions of flume:

Diameter of pipe

inches; length of conduit

Average grade per mile

feet.

miles.

12. The time required for the completion of such work is One-half years.

13. The time required for the complete application of the water to the proposed use is One additional years.

14. The land to be irrigated is described in the following tabulation: See remarks.

15. (a) Is reservoir to be used? **Yes** If so, fill in (b) and (c) below.
(b) Name of Reservoir and number of Storage Permit: **Spryng Creek Reservoir, No. R-693**
(c) Date of filing of Application for Storage Permit and Name of Applicant: **August 8, 1940**

BE IT KNOWN THAT The undersigned hereby makes application for permit to appropriate the public waters of the State of Idaho as herein set forth.

Boise, Idaho, September 4, 1940

Application No. 26463

Caribou Trout Ranch, Inc.
C/o H. W. Woodall,
Soda Springs, Idaho

SIR:

Application which has been filed under the above number is herewith returned for correction in the following particulars:

1. Show point of diversion (Par. 4) by course and distance.

This is the application that should be accompanied by tracing and blue print. But we are not sure whether you intended them to go with this application or with Application No. 26464, as they seem to be the same as the plats enclosed with Application No. 26464.

If the tracing and blue print are to go with this application, No. 26463, we call attention to the fact that the application describes six springs in the NE $\frac{1}{4}$ NE $\frac{1}{4}$ of Section 18, while on the tracing the springs are shown in the NE $\frac{1}{4}$ NW $\frac{1}{4}$ of the section.

You are allowed 60 days from date of first return for correction, as stamped in second line on back of application, to file completed application. If received after that date application can be refiled under a new number with later priority, requiring additional fee.

Yours truly,

JAMES SPOFFORD
COMMISSIONER OF RECLAMATION.

DEPARTMENT OF RECLAMATION

NOTICE OF APPLICATION TO APPROPRIATE WATER IN ACCORDANCE WITH THE PROVISIONS
OF CHAPTER 145, 1935 SESSION LAWS.

NOTICE IS HEREBY GIVEN, That on the 3rd day of August, 1940,
THE CARIBOU TROUT RANCH, INC., of Soda Springs, Caribou County, Idaho,
made Application No. 26463 to appropriate Thirty (30) cubic feet per second
of the waters of springs, located at the head of Spring Creek, a tributary
of Bear River, the water to be used for trout rearing ponds.

That these springs are located 990 feet distant from the North quarter
corner of Section 18, Township 9 South, Range 42 East, B. M., and are in the
Northeast quarter of the Northwest quarter (NE $\frac{1}{4}$ NW $\frac{1}{4}$) of Section 18, Township 9
South, Range 42 East, Boise Meridian.

That any protests against the approval of this application must be filed
in the Department of Reclamation within forty (40) days from the date of this
Notice; such protest shall state the name and address of the protestant and shall
clearly set forth his objections to the approval of said application.

Dated this 24th day of October, 1940.

Soda Springs, Idaho.

Gentlemen:

Our records show that yesterday, December 3rd, was the last date set for protest under your Application No. 26463, to appropriate 30 second feet of the waters of certain springs, for trout rearing ponds.

We are, therefore, in position to issue you a permit, but it is necessary that we have an affidavit of publication of the Notice from the Soda Springs Sun.

When we sent this notice for publication, we informed them that they were to send you this affidavit, and if you have not already received it, suggest that you call for it, and send it to us at your earliest convenience.

Very truly yours,

JAMES SPONFORD
Commissioner of Reclamation

Re: Application No. 28463

Mr. H. W. Woodall,
Soda Springs, Idaho.

Dear Mr. Woodall:

We have received no reply to the letter which we addressed you on December 4th, advising you that we would issue you Permit to appropriate 20 second feet of the waters of certain springs, upon receipt of the Affidavit of Publication of the Notice, from the Soda Springs Sun.

We should like to get this matter finished before the end of the year, and no doubt you are yourself anxious to obtain the permit.

May we ask, therefore, that you give this matter your immediate attention, and send the affidavit which is necessary to complete the records in connection with the above numbered application.

Very truly yours,

INSTRUCTIONS
PROOF OF COMPLETION OF WORKS

Boise, Idaho,

Dear Sir:—

I enclose herewith blank form upon which to give notice that you are prepared and desire to submit proof of completion of works under your permit No. 19086.

This form should be filled out and mailed to the Department of Reclamation, at least 60 days before the date upon which proof is to be submitted, which proof MUST be on or before June 30, 1941. Upon receipt of the blank properly filled out, notice for publication will be sent to the paper direct from this office, which notice must be published a period of four weeks prior to the date of proof.

The proof may be submitted at any place convenient to you and two witnesses, where there is a notary public or other officer authorized to administer oaths.

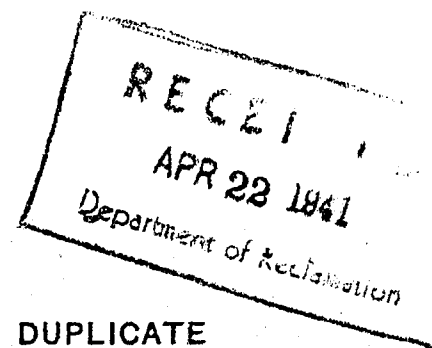

The certificate that shall be issued under this proof does not give you a perpetual right to the use of the water for which application is made, as it only confirms the completion of the works of a capacity to divert and convey to the place of intended use a certain amount of water. The law requires that another proof be submitted when the water has been fully applied to a beneficial use, at which time license is issued for the amount of water actually in use. Information in regard to this last proof will be furnished on request.

Very truly yours,

E. V. BERG.

Commissioner of Reclamation.

Notice for Publication

RECEIVED

APR 22 1941

Department of Reclamation
State of Idaho.

Notice is hereby given that at 3:00 P.M., on the 26th day of June, 1941, at Soda Springs, County of Caribou, before S. E. Matthews, a Notary Public, proof will be submitted of the completion of works for the ~~diversion~~ ^{use} of 30 cubic feet per second of the waters of Springs at head of Spring Creek for Trout Rearing Ponds.

In accordance with the terms and conditions of a certain permit heretofore issued by the Department of Reclamation of the State of Idaho.

1. The name of the person or corporation holding said permit is Caribou Trout Ranch, Inc., of Soda Springs, Idaho.

2. The postoffice address of such person or principal place of business of such corporation is Soda Springs, County of Caribou, State of Idaho.

3. The number of such permit is 19086, and the date set for the completion of such work is June 30th, 1941.

4. Said water is to be used for Trout Rearing Pond purposes.

5. Said works of ~~diversion~~ ^{use} will be fully completed on the date set for such completion, and the amount of water which said works are capable of ~~diversion~~ ^{utilizing at} the place of intended use, in accordance with the plans accompanying the application for such permit, is 30 cubic feet per second.

6. The amount of lands for which said water is available is None acres, particularly described as follows:

PROOF OF COMPLETION OF WORKS
AND
PROOF OF BENEFICIAL USE OF WATER

S. E. MATHEWS
Soda Springs, Idaho

BOISE, IDAHO,

DEAR SIR:

I enclose herewith the following forms to be used in connection with proof of completion of works and beneficial use of water under Permit No. 19086

DEPOSITION OF PERMIT HOLDER.

DEPOSITIONS OF TWO WITNESSES.

In submitting this proof the following instructions should be CAREFULLY followed out, since failure to do so may result in the loss of rights:

1. On June 23, 1941, the date set for proof, the enclosed forms (two for permit holder and two each for two disinterested witnesses) should be filled out and sworn to, at Soda Springs before S. E. Mathews, Notary Public

2. When the depositions have been taken they should be mailed to this office, together with affidavit of publication of notice.

When these have been received, together with report of the examining engineer, if everything is properly executed, you will be further advised as to fees due, etc., before certificate is issued.

Yours truly,

W. C. SWENDSEN E. V. BERG.

Commissioner of Reclamation.

19086

PERMIT NO. 19086

Proof of Completion of Works

DEPOSITION OF HOLDER

Ques. 1. State your name, residence, occupation and postoffice address.

Ans. Caribou Trout Ranch, Inc., of Soda Springs, Idaho, engaged in the fish rearing business: BY H. W. WOODALL, SECRETARY.

Ques. 2. If acting in behalf of a corporation, state its name, principal place of business, your position with reference to same, and your authority for appearing in its behalf.

Ans. Caribou Trout Ranch, Inc., of Soda Springs, Idaho, engaged in the fish rearing business; PROOF BEING MADE BY H. W. WOODALL, ITS SECRETARY by authority of a resolution by its board of directors.

Ques. 3. State number and date of permit, amount of water you are authorized to store ~~in~~, source, and point of diversion. (No diversion)

Ans. Permit No. 19086, Dated 12/31/'40; authorizing storing of 30 cubic feet per second of waters of Spring Creek rising in the NE $\frac{1}{4}$ -NW $\frac{1}{4}$ of Sec. 18, T. 9 S., R. 42 E., B.M., in Caribou County, Idaho.

Ques. 4. State purpose for which water is to be used, and, if for irrigation, state the number of acres and give description of the land you intend to reclaim.

Ans. For ponds for fish rearing purposes.

Ques. 5. State whether or not the water has been ^{impounded in} ~~turned into~~ your works of ^{storage} ~~diversion~~, and, if so, when and to what extent.

Ans. Yes. 50 acre feet have been so stored for more than 2 years immediately last passed.

Ques. 6. State whether or not the works of ^{storage} ~~diversion~~ are fully completed, and whether or not they comply in all respects with the terms of the permit.

Ans. Yes

Ques. 7. If the works of diversion do not comply with all the terms of your permit, state fully those particulars in which there is any variance.

Ans. No diversion.

Ques. 8. Give description of works, state dimensions and capacity of each part, and give cost of same.

Ans. Concrete and dirt dam: Headgate: width 12', height 9': Height of dam 9', length of dam at top 135 feet, length of dam at bottom 106 feet.

Capable of storing 50 acre feet of water per annum.

Cost approximately \$3500.00.

Permit No. 19086

Proof of Application of Water to Beneficial Use

Deposition of Holder

Ques. 1. State your name, residence, occupation and postoffice address.

Ans. Caribou Trout Ranch, Inc., of Soda Springs, Idaho, engaged in the fish rearing business: PROOF BEING MADE BY H. W. WOODALL, ITS SECRETARY.

Ques. 2. If acting in behalf of corporation, state its name, principal place of business (if a foreign corporation, give name of postoffice of statutory agent), your position with reference to same and your authority for appearing in its behalf Caribou Trout Ranch, Inc., of Soda Springs, Idaho, engaged in the fish rearing business: PROOF BY H. W. WOODALL, ITS SECRETARY, by authority of a resolution by its board of directors.

Ques. 3. State number and date of permit, and date of priority you propose to establish under the permit.

Ans. Permit No. 19086: Dated 12/31/1940: priority August 8, 1940.

Ques. 4. State source of water supply and give exact location of point of ^{rising} diversion.

Ans. Head waters of Spring Creek, rising in NE $\frac{1}{4}$ -NW $\frac{1}{4}$ of Sec. 18, T. 9 S., R. 42 E., B. M., in Caribou County, Idaho. (No diversion)

Ques. 5. Describe your works of ^{storage} diversion, and state amount of water they are capable of storing conveying from point of ^{diversion} to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use.

Ans. (No diversion) Ponds for fish rearing purposes. Concrete & dirt dam. Height of dam 9 feet, length of dam at top 135 feet, length of dam at bottom 106 feet. Headgate: width 12 feet, height 9 feet.

Ques. 6. State for what purpose water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have actually been irrigated with said water.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. For fish rearing purposes in ponds. No diversion; no irrigation.

Ques. 7. If for other than for irrigation purposes; state how applied, amount of horse power generated, etc.

Ans. Stored in ponds for fish rearing purposes; no horse power generated.

H. W. Woodall
1940

19086

Ques. 8. What is the minimum amount of water required for the purpose specified above?
Ans. 30 cubic feet per second.

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.
Ans. ----

Ques. 10. State when, how, in what amount and to what extent the water/^{stored}~~diverted~~ under above mentioned permit has been used.

Ans. Water has been stored in ponds for fish rearing purposes for more than 2 years immediately last passed. (No diversion)

Ques. 11. State when, how, in what amount and to what extent waters other than those diverted under the above mentioned permit have been diverted and applied to beneficial use upon the lands herein described. Give full particulars regarding such other appropriations and rights claimed thereunder.

Ans. No diversion hereunder.

Re: B-593 & 19086

Caribou Trout Ranch, Inc.
c/o H. C. Woodall, Secy.
Soda Springs, Idaho

Gentlemen:

This will acknowledge receipt of the depositions of the holder, depositions of two witnesses, and the affidavits of proof of publication from the Soda Springs Sun, all in connection with Beneficial Use proof under the above numbered permits.

Before final action can be taken in this matter, the law requires that a field examination be made by an engineer from this department. We are unable to say just when this examination will be made, since this department has but one field engineer, who makes examinations all over the state.

However, Mr. Tolman, field engineer for the Department, will try and contact you at the time set for examination, so that you may arrange to show him over the grounds.

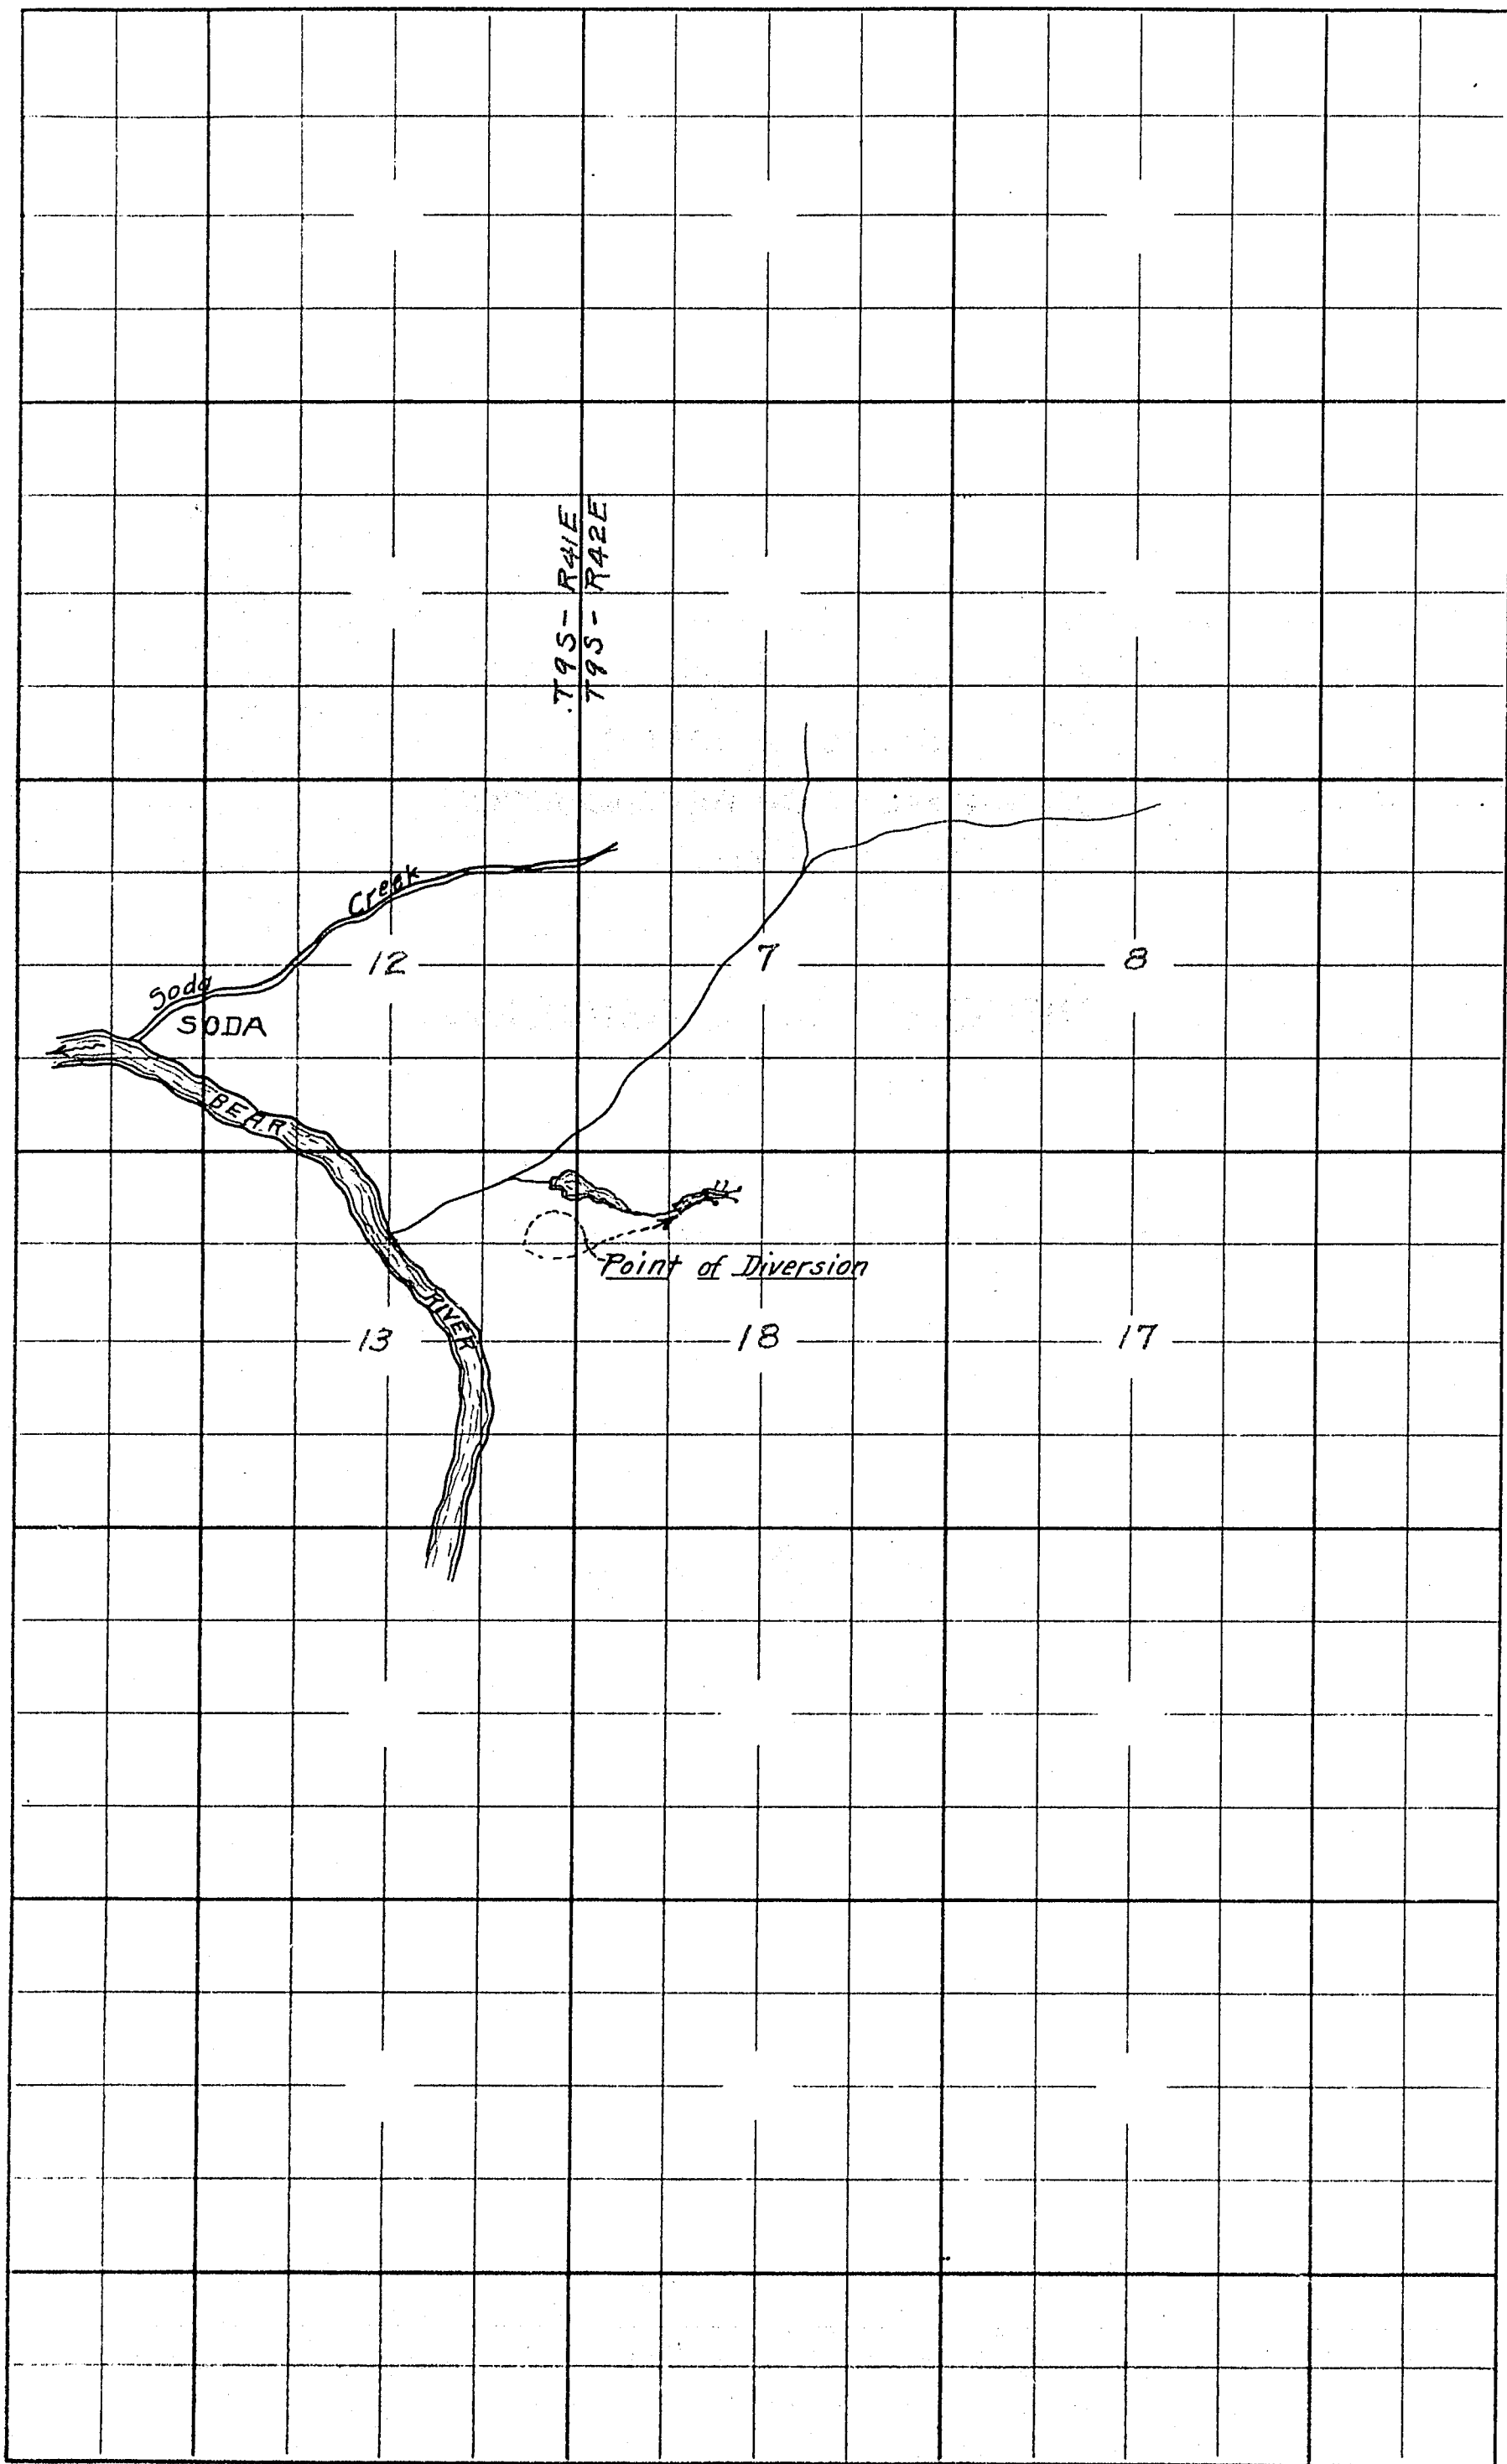

When the engineer's report is filed, you will be notified of the amount due for Beneficial Use proof. Upon receipt of which a license will be issued.

Very truly yours,
E. V. BERG.
Commissioner of Reclamation.

19086

June 14, 1943

Re: 19086

Mr. H. W. Woodhill
c/o Caribou Trout Farm
Soda Springs, Idaho

Dear Mr. Woodhill:

We are in receipt of your letter of June 9th regarding license on Permit No. 19086. The affidavit of publication, which you enclosed, covers only Completion of Works proof for 30 cubic feet per second, and not for Completion of Works and Beneficial Use as on your storage permit #2-491.

Our notice of INSTRUCTIONS under date of April 10, 1941--Form No. 7--was for publication of Completion of Works proof, not for both, or for Beneficial Use proof. The form sent to the publisher and printed was only for Completion of Works. But, due to some error on our part, depositions for both proofs were sent to the Notary Public and both were filled out and signed, and our field engineer inspected for both proofs. Your receipt shows that you were only charged and paid for Completion of Works proof on #19086, but for Completion of Works and Beneficial Use on #2-491. We also made an error when we said that license could be issued on #19086, it cannot be until Beneficial Use is published and proof made.

The statutes require that Beneficial Use proof be published and proof made on the stipulated date, which happens to be June 30, 1943 on #19086. Publication must be for once a week for four consecutive weeks before proof can be made. On April 9, 1942, INSTRUCTIONS for Beneficial Use proof were mailed to you. It is now too late to publish before June 30, but an Extension can be signed, returned, and filed in this office before June 30th so as to permit publication. This Extension can be granted until Dec. 31, 1943 without changing the priority date. Form for this purpose is here, with enclosed.

If you look at your two permits you will find that on #19086 that Completion of Works was due June 30, 1941 and Beneficial Use is not due until June 30, 1942, while on #2-491 both were due on June 28, 1941.

Very truly yours,
E. V. BERO
Commissioner of Reclamation

August 8, 1946

The date of priority which said user is prepared to establish is.....

E. V. BERG

Commissioner of Reclamation.

19086

STATE OF IDAHO
DEPARTMENT OF RECLAMATION
BOISE

DATE July 7, 1942

SODA SPRINGS SUN
SODA SPRINGS, IDAHO.

DEAR SIR:

Enclosed you will find notice for publication once a week for four consecutive weeks prior to AUGUST 15th, the date set for proof, the expense of the publication to be paid by the applicant,
CARIBOU TROUT RANCH INC. OF SODA SPRINGS IDAHO.

to whom you should furnish proof of publication on or prior to the date set for proof.

Please acknowledge receipt of this notice and furnish this office with a copy of the first publication.

Very truly yours,

E. V. BERG

Commissioner of Reclamation.

19086

19086

July 22, 1942

Caribou Trout Ranch Inc.
Soda Springs, Idaho

Dear Sirs;

This will acknowledge receipt of notice in duplicate for publication in connection with proof of beneficial use, and also your authorization to have the notice published in the Soda Springs Sun, Soda Springs, Idaho all in connection with Permit No. 19086.

A copy of the notice has been sent to the newspaper with instructions to publish it once a week for four (4) consecutive weeks, beginning August 15, 1942 at ten (10) A. M. A. M.

About ten days prior to this date depositions, consisting of one for the holder and one for each of two witnesses, will be sent to S. E. Matthews, Notary Public, at Soda Springs, Idaho, so that he will have in ample time for the proof.

On the date designated you should appear at S. E. Matthews's office, with two disinterested witnesses, who are familiar with the terms of the permit, and the works constructed thereunder, for the purpose of executing the depositions.

Very truly yours,

E. V. Berg,
Commissioner of Reclamation

DEPARTMENT OF RECLAMATION BOISE

INSTRUCTIONS

PROOF OF BENEFICIAL USE OF WATER

BOISE, IDAHO,
August 5, 1942.

S. E. Matthews
Soda Springs
Idaho

DEAR SIR:

Re: Permit 19086

I enclose herewith the following forms to be used in connection with proof of beneficial use of water under Permit No. 19086

DEPOSITION OF PERMIT HOLDER,
DEPOSITIONS OF TWO WITNESSES.

In submitting this proof the following instructions should be CAREFULLY followed out, since failure to do so may result in the loss of rights:

1. On August 15, 1942, the date set for proof, the enclosed forms (one for permit holder and one each for two disinterested witnesses) should be filled out and sworn to, at Soda Springs, Idaho before S. E. Matthews, Notary Public

2. When the depositions have been taken they should be mailed to this office, together with affidavit of publication of notice.

When these have been received, together with report of the examining engineer, if everything is properly executed, you will be further advised as to fees due, etc., before certificate is issued.

Yours truly.

E. V. BERG

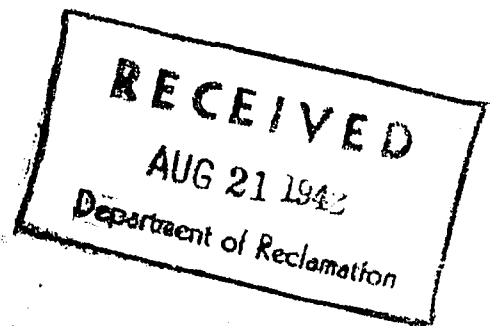

Commissioner of Reclamation.

STATE OF IDAHO
DEPARTMENT OF RECLAMATION
BOISE, IDAHO

Permit No. 19086

Proof of Application of Water to Beneficial Use

Deposition of Holder

Ques. 1. State your name, residence, occupation and postoffice address.

Ans. Caribou Trout Ranch, Inc. Soda Springs, Idaho
By H. H. Hoodall, Secretary

Ques. 2. If acting in behalf of corporation, state its name, principal place of business (if a foreign corporation, give name of postoffice of statutory agent), your position with reference to same, and your authority for appearing in its behalf.

Ans. Caribou Trout Ranch, Inc. Soda Springs, Idaho
H. H. Hoodall, its Secretary by authority of the Board of Directors

Ques. 3. State number and date of permit, and date of priority you propose to establish under the permit.

Ans. #19086 dated approved Dec. 31, 1940; date of Priority Aug. 8, 1940.

Ques. 4. State source of water supply and give exact location of point of diversion.

Ans. Spring Creek -- Fish Rearing Pond, in NE¹/₄ 24¹/₄ Sec 18, Twp 9 S., R. 47 E. B.M., Caribou County, Idaho. (No point of diversion)

Ques. 5. Describe your works of diversion, and state amount of water they are capable of conveying from point of diversion to place of use, and give name of canal or ditch or other works by which water is conducted to such place of use.

Ans. No works of diversion; water impounded by concrete and dirt filled dam, on NE¹/₄ 24¹/₄ Sec. 18, Twp. 9 S., R. 47 E. B.M.; 30 cubic feet per second of the waters of Spring Creek impounded for Fish Rearing Pond purposes.

Ques. 6. State for what purpose water is used and describe place of use. (If for irrigation, name each subdivision in which used, and number of acres in each subdivision that have actually been irrigated with said water.) State whether cultivated or natural meadow land and the nature of all improvements which have been made as a direct result of said use.

Ans. 30 cubic feet per second of the waters of Spring Creek impounded for Fish Rearing Pond purposes and covering approximately ten (10) acres of land in the NE¹/₄ 24¹/₄ of Sec. 18, Twp. 9 S., R. 47 E. B.M., and in the NE¹/₄ 24¹/₄ of Sec. 13, Twp. 9 S., R. 41 E. B.M., in Caribou County, Idaho (No irrigation).

Ques. 7. If for other than for irrigation purposes; state how applied, amount of horse power generated, etc.

Ans. Water is being put to beneficial use for Fish Rearing Pond purposes.

19086

Ques. 8. What is the minimum amount of water required for the purpose specified above?

Ans. 30 cubic feet per second.

Ques. 9. If you are not the person or representative of the corporation to whom above mentioned permit was originally issued, please state how ownership was acquired by present holder.

Ans. _____

Ques. 10. State when, how, in what amount and to what extent the water diverted under above mentioned permit has been used.

Ans. Commenced using 30 cubic feet per second of the waters of Spring Creek for Fish Rearing Pond purposes on or about July 1, 1937 - Date of priority desired to be established: Aug. 8, '40.

Ques. 11. State when, how, in what amount and to what extent waters other than those diverted under the above mentioned permit have been diverted and applied to beneficial use upon the lands herein described. Give full particulars regarding such other appropriations and rights claimed thereunder.

Ans. No other water in addition to the 30 cubic feet per second herein applied for, being used for the Fish Rearing Ponds herein covered.

(Sign) Humoodally
Secretary

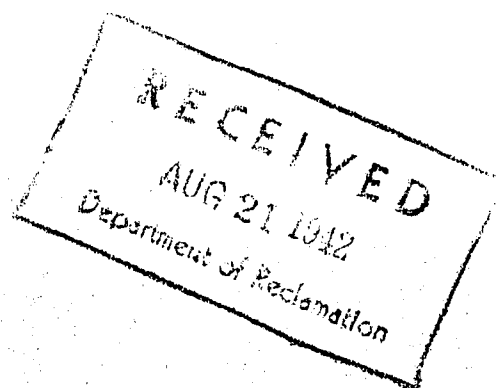

I hereby certify that the foregoing testimony was read to the above subscribed before its signing, that I believe him to be the person he represents himself to be, and that said testimony was subscribed and sworn to before me, at my office in Soda Spring, County of Caribou, State of Idaho, on this 15th day of August, A. D. 19 42.

St. Charles
Notary Public.

My commission expires Aug 2, 1944

Residence: SODA SPRINGS, IDAHO

STATE OF IDAHO
DEPARTMENT OF RECLAMATION
BOISE, IDAHO

PERMIT NO. 19086

Proof of Application of Water to Beneficial Use

Deposition of Witness

The deposition of two witnesses, on this form, taken separately, required in each case.

Ques. 1. State your name, age, residence, occupation and postoffice address.

Ans. Ray Cronney, age 22 years; I am a Fish Culturer

Post office address: Soda Springs, Idaho

Caribou Trout Ranch, Inc.,

Ques. 2. Are you acquainted with and its Secretary, H. W. Woodall, the holder of Permit No. 19,086? How long have you known him and where does he reside?

Ans. Yes. Have known the corporation and its Secretary, H.W. Woodall, for over nine months.

Ques. 3. Have you read or heard read said Permit No. 19086, and are you familiar with its provisions and conditions?

Ans. Yes.

Ques. 4. State source of water supply, place of diversion, and describe works for conveying water from point of diversion to place of use.

Ans. Spring Creek; (no diversion) concrete and earth dams impound water for Fish Rearing Pond purposes on premises owned by Caribou Trout Ranch, Inc. The water rises on land also owned by the Caribou Trout Ranch, Inc.

Ques. 5. How many second feet of water do you estimate said works will safely conduct to place of use, and how much water have you seen being so conveyed?

Ans. I estimate 30 cubic feet per second of the waters of Spring Creek are impounded for Fish Rearing Pond purposes by concrete and earth dams.

Ques. 6. State for what purpose water is used and at what place. (If for irrigation, give each sub-division in which water has been used and number of acres irrigated in each subdivision.) State whether cultivated or natural meadow land and the nature of all improvement which have been made as a direct result of said use.

Ans. Water is used for Fish Rearing Pond purposes; no irrigation.

19086

Ques. 7. If for power or other purposes than irrigation, state how water has been applied and to what extent

Ans. Water is impounded in ponds for Fish Rearing Pond purposes and is being used for that purpose to the estimated extent of 30 cubic feet per second.

Ques. 8. (If for irrigation) state character of land that has been reclaimed, and give your estimate of the amount of water required for its profitable cultivation.

Ans. Water is not used for irrigation.

Ques. 9. Have you any interest in the works, water or lands above mentioned? If so, in what way and to what extent?

Ans. I have no interest in the works, water or lands mentioned.

Ques. 10. State when, how, in what amount and to what extent you have witnessed the application to beneficial use of water diverted under said permit.

Ans. During the past 9 months I have seen, almost daily, an estimated quantity of 30 cubic feet per second of the waters of Spring Creek impounded for Fish Rearing Pond purposes on the N $\frac{1}{2}$ -NW $\frac{1}{4}$ of Sec. 18, T. 9 S., R. 42 E., B. M., and on the NE $\frac{1}{4}$ -NE $\frac{1}{4}$ of Sec. 13, T. 9 S., R. 41 E., B. M., in Caribou County, Idaho; and I estimate the land covered by said water to consist of approximately 10 acres.

(Signed)

Ray Crony

NOTICE OF PROOF APPLICATION OF WATER TO BENEFICIAL USE

Notice is hereby given that at 10:00 A. M. on the 15th day of August, 1942 at Soda Springs, County of Caribou, State of Idaho, before S. E. Matthews, proof will be submitted of the application to beneficial use of 30 cubic feet per second of the waters of Spring Creek in accordance with the terms and conditions of Permit No. 19086 heretofore issued by the Commissioner of Reclamation of the State of Idaho.

The name and postoffice address of the person or corporation holding said permit are Caribou Trout Ranch Inc. Soda Springs, Idaho.

The use to which said water has been applied is Beneficial Use.

The amount applied to beneficial use is 30 cubic feet per second.

The place where said water is used (if for irrigation, give full and accurate description of the lands irrigated) For Trout rearing ponds.

Located in the NE $\frac{1}{4}$ NW $\frac{1}{4}$ Section 18 Twp.9. S Rge 42 E. B. M.

The name of the canal or ditch or other works by which said water is conducted to such place of use is None. No canal or ditch.

The right to take water from such works is based upon Permit No. 19086

The source of supply from which such water is diverted is Spring Creek a tributary of Bear River.

The date of priority which said user is prepared to establish is August 8, 1940.

E. V. Berg
Commissioner of Reclamation

19086

Re: Permit No. 19086

Caribou Trout Ranch, Inc.
H. W. Woodall, Secretary
Soda Springs, Idaho

Dear Mr. Woodall:

This will acknowledge receipt of the deposition of the holder, depositions of two witness and the affidavit of proof of publication from the Soda Springs Sun, all in connection with beneficial use proof under the above numbered permit.

Before final action can be taken in this matter, the law requires that a field examination be made by an engineer from this Department. We are unable to say just when this examination will be made, since this Department has but one Field Engineer, who makes examinations all over the State.

However, Mr. Tolman, Field Engineer, for the Department, will try and contact you at the time he makes the examination, so that you may arrange to show him over the grounds.

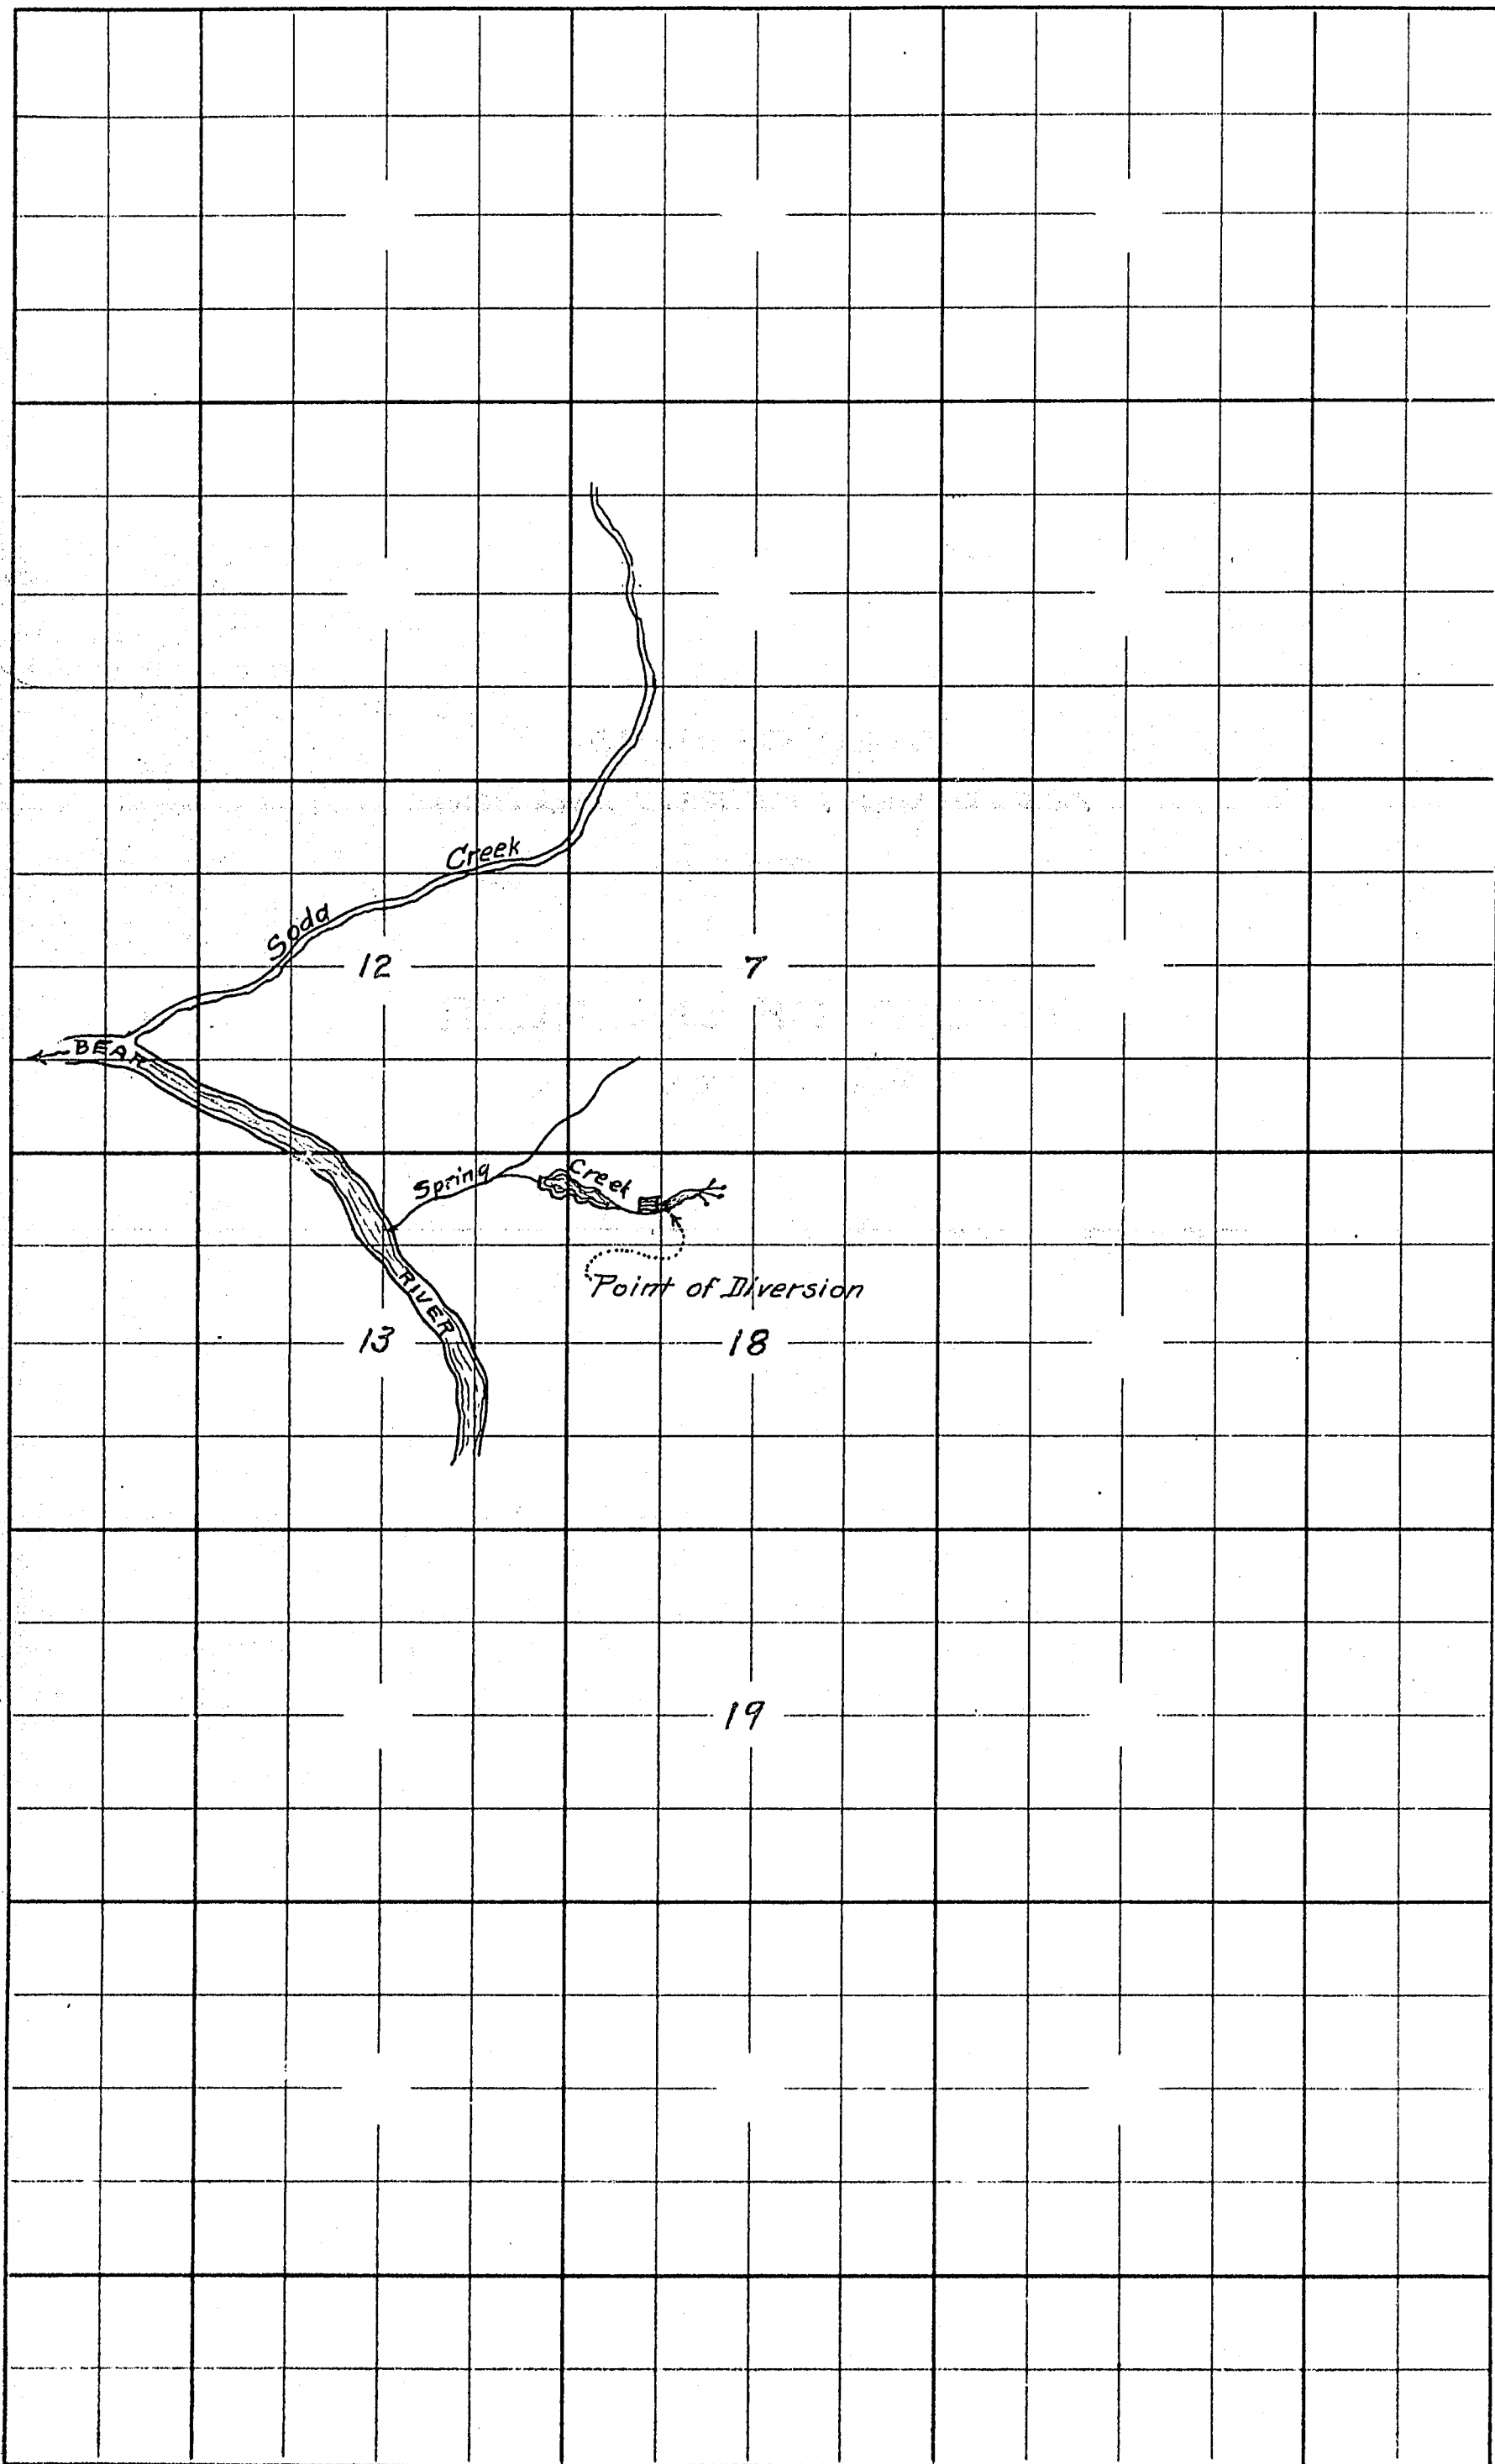

Very truly yours,

E. V. BERG
Commissioner of Reclamation

Re: Permit No. 19086

Mr. H. W. Woodall, Secretary
Caribou Trout Ranch, Inc.
Soda Springs, Idaho

Dear Mr. Woodall:

We acknowledge receipt of your reply to our letter of February 16th, and thank you for calling attention to what appears to have been an error in connection with the proofs on the above numbered permit.

Office letter of March 3, 1942, to which you allude, refers to Beneficial Use proof on this permit, and the statutory fee in connection therewith, in order for a License to issue. Subsequent correspondence, however, shows that this was an error, and the necessary notice of intention to make beneficial use proof had not been made at that time, but only completion of works proof. We refer to office letter addressed to you on June 4th, which was returned to this office in your letter of June 9th; also office letter of June 12th, which was returned with the forms for making beneficial use proof- both of which letters are returned to you herewith, for your files.

The beneficial use proof was subsequently made on August 15th, and acknowledged by office letter of August 27th, in which you were advised that the matter had been referred to our Field Engineer for report.

If you will refer to Receipt No. 18226 you will see that while this covers both completion of works and beneficial use proof fees on Permit No. R-693, it only covers one fee on Permit No. 19086, which in error was the fee of \$5.00 for beneficial use proof, instead of \$11.00 for completion of works proof.

There is, therefore, due this Department the completion of works fee, amounting to \$11.00, instead of the \$5.00 beneficial use fee. This is at the statutory rate of \$5.00 for the first 10 second feet, and 30 cents additional for each additional second foot.

We shall appreciate receiving your check in this amount, upon receipt of which we shall issue the License, the Certificate of Completion of Works having already been sent you.

Regretting the error, we are,

Very truly yours,

JAMES SPOFFORD
State Reclamation Engineer

Caribou Trout Ranch, Inc.

Collis Caldwell
Attorney at Law
Spalding Blvd.
Pocatello, Idaho

Dear Mr. Caldwell:

In response to your telephone call of May 25th we find that records in this office shows:

Caribou Trout Ranch, Inc/ was granted License #19086 for 30.0 cubic feet per second of water from springs at the head of Spring Creek. Point Of Diversion is 990 feet from the N 1/4 corner of Sec. 18, T. 9 S., R. 42 E. B. M., and is in the NE1/4NW1/4 said Section, Township and Range

The priority date is August 8, 1940, and license date is May 21, 1943.

The use of the water is for Trout Rearing Ponds.

Very truly yours,

CARL E. TAPPAN
State Reclamation Engineer

By:

H. PETRI
Head of Section
State Water Rights & Records

HP:ew

19086

Our letter March 3, 1942, asking for B U fee of \$5.00 for License

Our letter April 22, 1942- following this up- and also referring to License

Form Notice April 9- of B U proof due (both proofs having been made, but only C W included in notice as published)

April 29- Notice from Woodall, on our letter of April 22 (above) enclosing check for \$15.00

(The additional \$10.00 includes \$10.00 called for in another letter from us of March 3rd, for both proofs on their Permit No. R-693)

Our letter June 4, enclosing Certificate of Completion of Permit 19086; and Certificate of Completion and License on R-693-

The last paragraph in this letter encloses Receipt No. 18226 "for \$5.00 C W fee on Permit No. 19086" and \$5.00 for C. W. and B. U. on R-693

Their letter to us June 9, 1942- enclosing Affidavit Publication C.W. 19086, and referring to our letter of March 3rd, in which we state that License will be issued- but which has not been received.

Our letter June 12, calling attention to fact that it only covers C. W., and that B. U. proof has not been published.

Later we received notice of such publication, which was sent to the Soda Springs Sun- which we acknowledged on July 22, 1942-

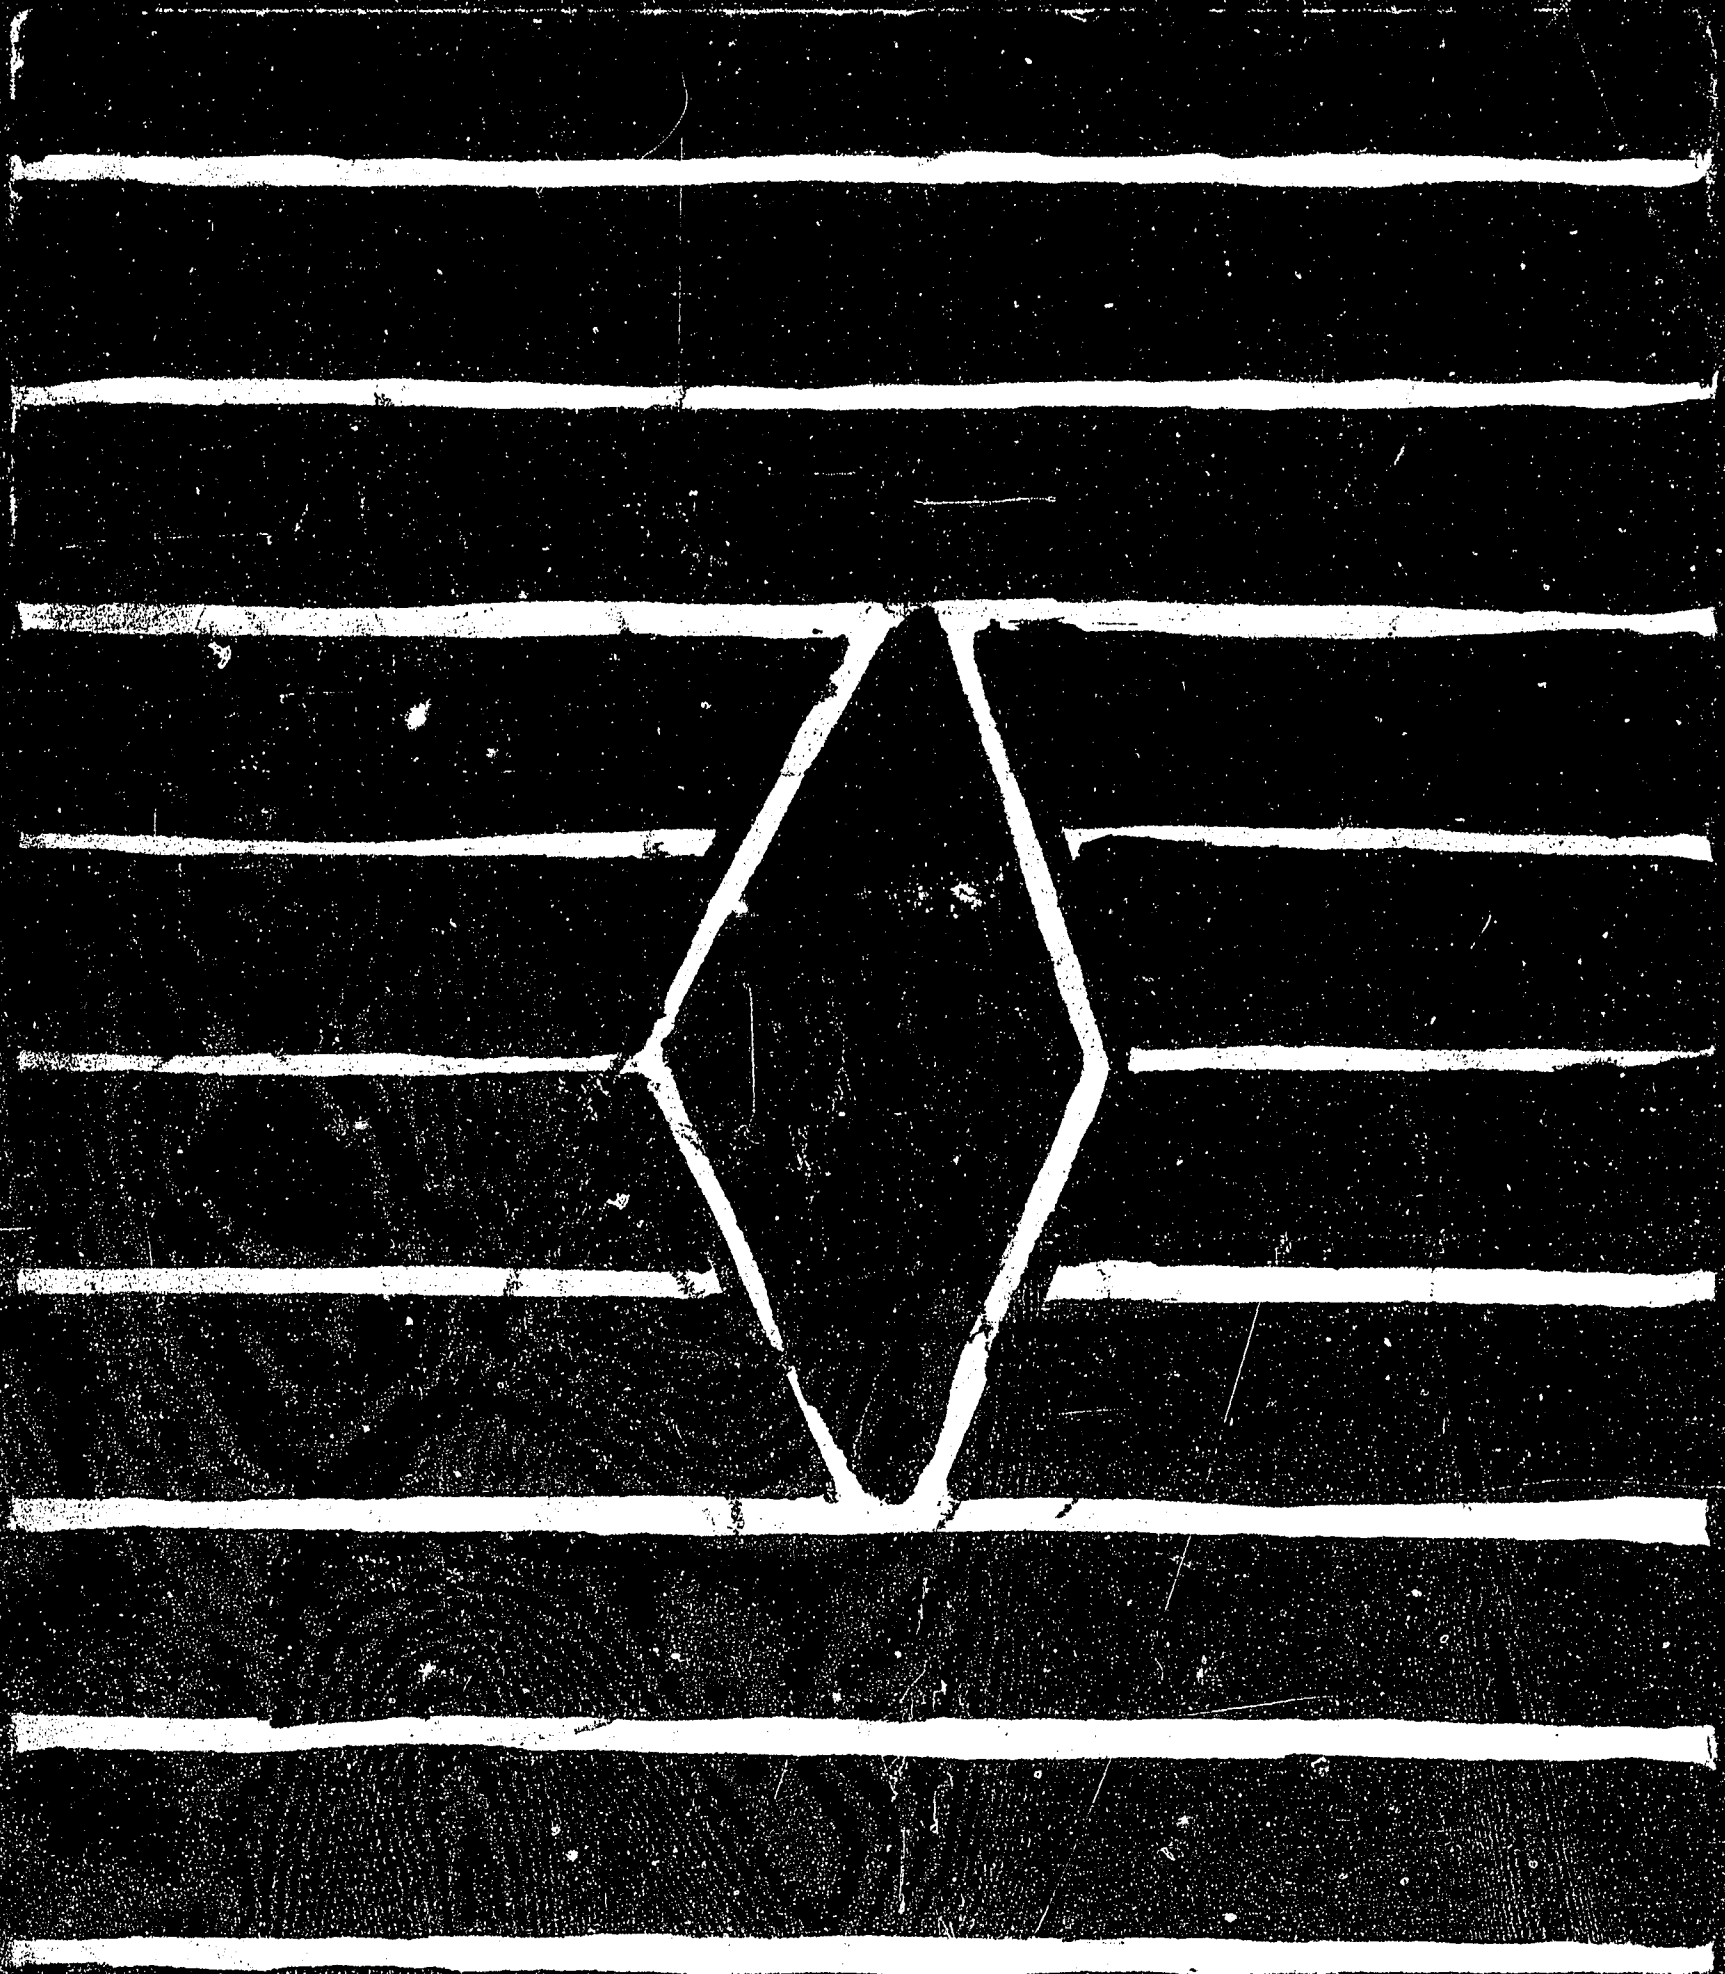

Afterwards the proofs and affidavit of publication were received, and acknowledged by us on August 27th, in which we state that it had been referred to Field Engineer

Mr. Tolman's report was handed in on February 16th, and we wrote them for the \$5.00 fee for B.U.-

To which they replied that this was paid and included in our Receipt No. 18226.

(As a matter of fact this receipt shows B U on 19086, \$5.00- and \$5.00 on each proof on R-693-, although Maud Lile's letter of June 12th, states that this covers C W proof on 19086)

19086

June 12, 1942

Re: 19086

Mr. H. W. Woodall
c/o Caribou Trout Farm
Soda Springs, Idaho

Dear Mr. Woodall:

We are in receipt of your letter of June 9th regarding License on Permit No. 19086. The affidavit of publication, which you enclosed, covers only Completion of Works proof for 30 cubic feet per second, and not for Completion of Works and Beneficial Use as on your storage permit #R-693.

Our notice of INSTRUCTIONS under date of April 10, 1941-- Form No. 7--was for publication of Completion of Works proof, not for both, or for Beneficial Use proof. The form sent to the publisher and printed was only for Completion of Works. But, due to some error on our part, depositions for both proofs were sent to the Notary Public and both were filled out and signed, and our field engineer inspected for both proofs. Your receipt shows that you were only charged and paid for Completion of Works proof on #19086, but for Completion of Works and Beneficial Use on R-693. We also made an error when we said that License could be issued on #19086, it cannot be until Beneficial Use is published and proof made.

The statutes require that Beneficial Use Proof be published and proof made on the stipulated date, which happens to be June 30, 1942 on #19086. Publication must be for once a week for four consecutive weeks before proof can be made. On April 9, 1942, INSTRUCTIONS for Beneficial Use proof were mailed to you. It is now too late to publish before June 30, but an Extension can be signed, returned, and filed in this office before June 30th so as to permit publication. This Extension can be granted until Dec. 31, 1945 without changing the priority date. Form for this purpose is herewith enclosed.

If you look at your two permits you will find that on #19086 that Completion of Works was due June 30, 1941 and Beneficial Use is not due until June 30, 1942, while on #R-693 both were due on June 28, 1941.

Very truly yours,
E. V. BERG
Commissioner of Reclamation

public waters of the State of Idaho, dated August 8, 1940; that Permit No. 19086
was issued under said application; that Certificate of Completion of works, with a carrying capacity of
30 second feet, was issued thereunder on June 2, 1942, showing that said works
were completed on the 23th day of June, 1941; and that on the 15th
day of August, 1942,

CARIBOU TROUT RANCH, INC.

of Soda Springs, State of Idaho, made proof to the satisfaction of the
Commissioner of Reclamation of Idaho, of the right to use the waters of springs at head of Spring Creek,
a tributary of Bear River, for the purpose of trout rearing ponds
under Use Permit No. 19086 of the Commissioner of Reclamation
and that said right to the use of said waters has been perfected in accordance with the laws of Idaho, and is
hereby confirmed by the State Reclamation Engineer
hereby confirmed by the Commissioner of Reclamation of Idaho and entered of record in Volume 7
of Licenses, at page 4171, on the 21st day of May, 1943;

The right hereby confirmed dates from August 8, 1940;

The Point of Diversion is located 990 feet distant from North corner Sec. 18, T. 9 S., R. 42 E.
in the NE 1/4 NW 1/4, Sec. 18, T. 9 S., R. 42 E., B. M. Caribou County

That the amount of water to which such right is entitled and hereby confirmed, for the purposes aforesaid,
is limited to an amount actually needed and beneficially used for said purposes, and shall not exceed 30
cubic feet per second.

Description and location of use:

Twp.	Range	Sec.	Forty-acre Tract	No. Acres Described in Permit	No. Acres Actually Irrigated

The right to the use of the water aforesaid hereby confirmed is restricted to the lands or place of use
herein described, as provided by the laws of Idaho.

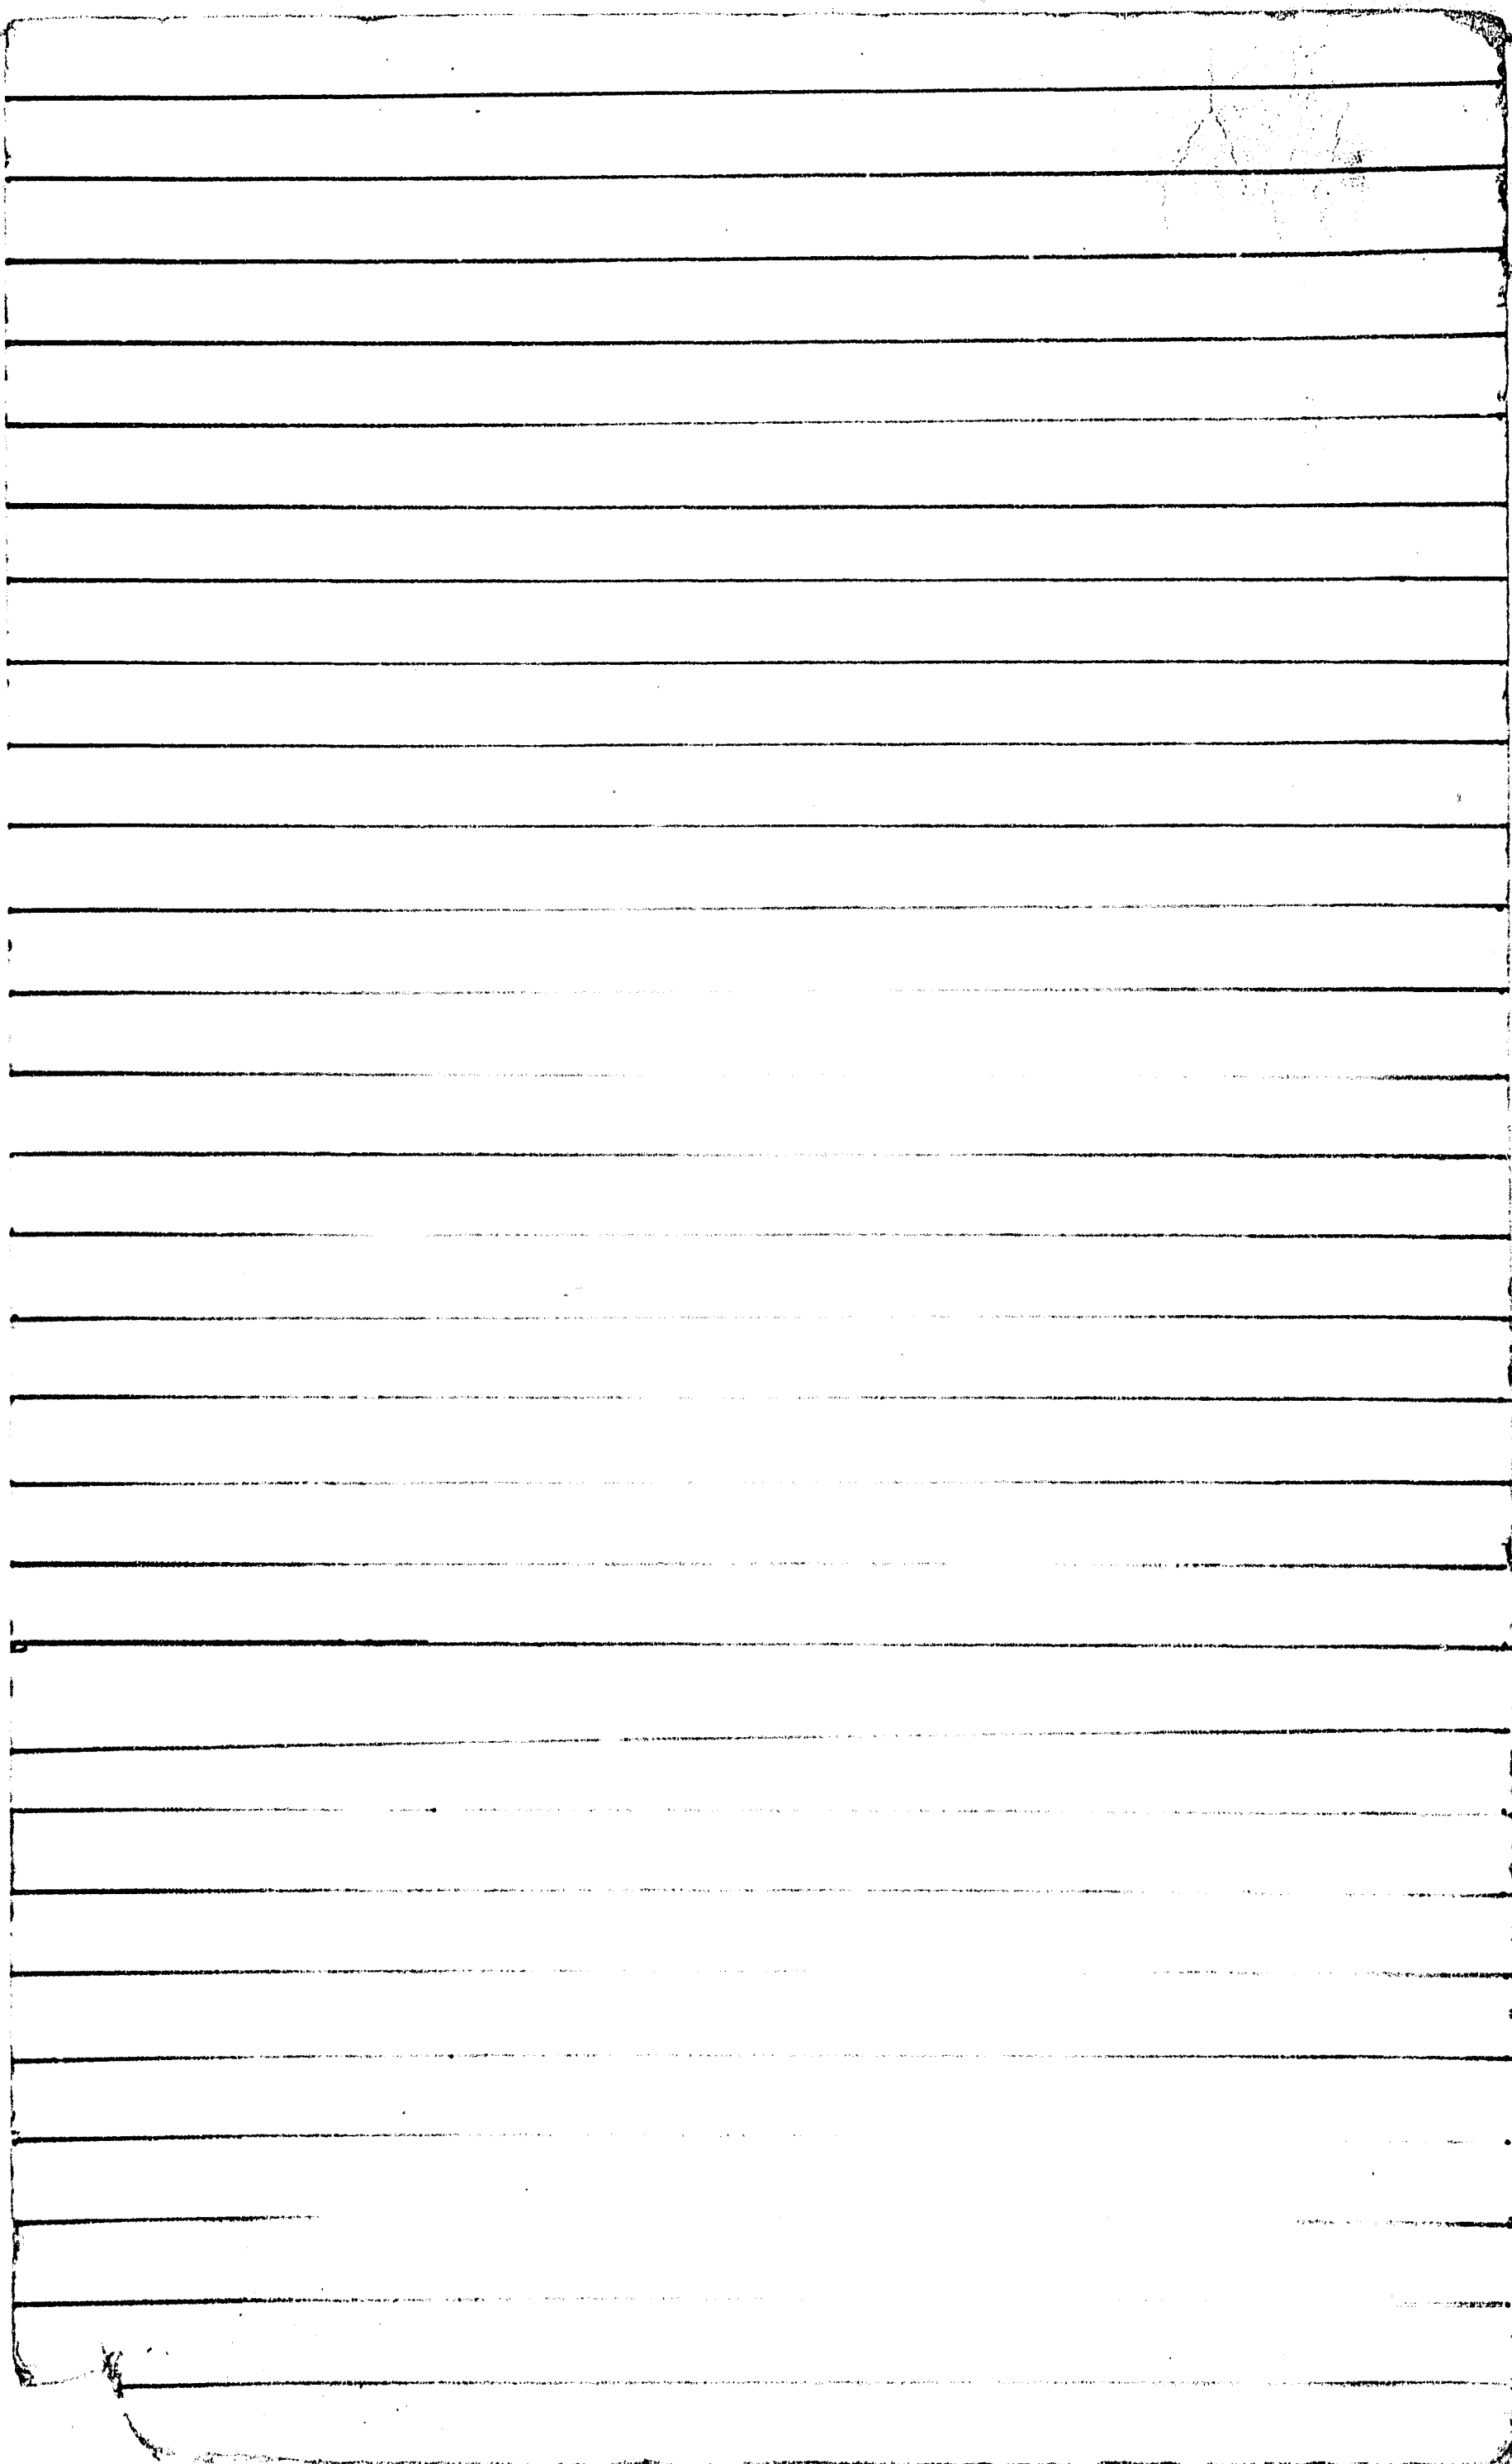

WITNESS the seal and signature of the State Reclamation Engineer
Commissioner of Reclamation, affixed at Boise, Idaho,
this 21st day of May, 1943

Re: Water License # 19086 - Caribou Trout Ranch Inc./Clear Springs Foods, Inc.

Dear Tim:

As we discussed during our recent phone conversation I am enclosing copies of the following documents with respect to your letter dated February 6 to Terry Huddleston:

- copy of license #19086 in the name of Caribou Trout Ranch, Inc.
- copy of assignment dated January 11, 1985 from Caribou Trout Ranch, Inc. to Clear Springs Trout Company
- copy of amendment to Articles of Incorporation changing name of Clear Springs Trout Company to Clear Springs Foods, Inc.

Tim, I understand from our conversation and my recollection at the time we purchased the property that a formal mechanism may not exist to effect the assignment on IDWR records. However, I am providing this information so you can update IWDR within parameters available to you to reflect the current ownership of the license.

Please feel free to contact me should you have any questions concerning this matter.
Thank you.

Sincerely,

Keith E. Quigley

Pursuant to the provisions of Idaho Code 30-1-59, etc., the undersigned corporation adopts the following Articles of Amendment to its Articles of Incorporation:

FIRST: The name of the corporation is Clear Springs Trout Company.

SECOND: The following amendments of the Articles of Incorporation were adopted by the shareholders of the corporation on September 30, 1991, in the manner prescribed by Idaho Code Section 30-1-59 etc.

1. That ARTICLE I of the Articles of Incorporation of Clear Springs Trout Company be amended to read as follows:

The name of the corporation is and shall be Clear Springs Foods, Inc.

2. That ARTICLE IV(i) of the Articles of Incorporation of Clear Springs Trout Company be amended to read as follows:

(i) The preferential rights and restrictions granted to the corporation and the remaining shareholders shall not apply or pertain where an existing shareholder desires to sell, convey, give or otherwise transfer any or all of his shares to such stockholder's spouse, former spouse, issue or child, or other lineal descendent, or any trust or other institutional recipient established and created for the direct maintenance or benefit of such shareholder, shareholder's spouse, former spouse, issue or child, or lineal descendent. In the event a shareholder shall desire to sell, convey, give or otherwise transfer any or all of his shares as herein provided, such stockholder shall, upon request of the secretary or other duly authorized officer of the corporation present such proof or evidence as the corporation may deem necessary to demonstrate and provide the existence of the relationship described above.

THIRD: The number of shares of the corporation outstanding at the time of such adoption was 1,671,758; and the number of shares entitled to vote thereon was the same.

FOURTH: The corporation only has one type or class of stock. All stockholders were eligible to vote.

FIFTH: At a special meeting of the stockholders held on September 30, 1991, at the corporate headquarters at Buhl, Idaho, after due and legal notice was given, the number of shares voted for such amendment was 1,349,277; and the number of shares voted against such amendment was 3,400. The amendments were therefore duly passed.

KARL J. DREHER
DIRECTOR

Re: Review of 1995 Water Measurement Reports; 1996 Water
Measurement Forms

Dear Mr. Huddleston:

Thank you for promptly returning the 1995 water measurement report forms. The Department appreciates your cooperation and diligent effort. The reports submitted by Clear Springs Foods were very thorough and among the best reports which we have received. However, the reports did contain the following problems or deficiencies:

- report processing fees were not included with the reports.

A report processing fee of \$20.00 per diversion is required under Idaho Code 42-701. I have recommended that Clear Springs Foods should remit a total of \$120 to cover reporting of the following diversions or facilities: 1) Clear Lake Farm, 2) Snake River Farm 1 & 2, including visitor center, 3) Box Canyon, 4) Crystal Springs main springs diversions, 5) Crystal Springs diversions 2 - 4, and Clear Springs/Kanaka Creek processing plant spring diversion. Fees may be remitted to the Idaho Department of Water Resources (attention: Tim LuKe) at the above referenced address.

Some of your individual hatchery managers have asked questions concerning calibration of measuring devices and the Department's water measurement guidelines. Questions were raised specifically about calibration of the Snake River Farm and Box Canyon in-line meters.

Based on review of the reported measurements, it appears that the Snake River Farm and Box Canyon meters are providing acceptable measurements. However, IDWR has found that meters sometimes contain significant error even when factory calibrated and installed properly. A number of field situations can cause error, including poor velocity profile, air entrainment or water surges in the pipe. IDWR therefore recommends that all in-line pipe meters be field calibrated if possible. I am willing to assist Clear Springs Foods in calibrating its meters using an IDWR meter which is a non-intrusive pipe meter. I do not believe there would be any problem using the IDWR meter at Box Canyon. Accessing the

pipelines at Snake River Farm may be more difficult, but not impossible. IDWR spot field calibrations will be a free service and can save Clear Springs time and money.

One of the managers also asked if open channel measuring devices (fixed weir) need to be re-rated periodically. Ideally, all measuring devices should be field calibrated upon installation and then checked periodically. Under current IDWR guidelines, standard open channel measuring devices do not require calibration. Non-standard measuring devices and rated sections require periodic calibrations or several calibration measurements per year to determine accuracy and/or develop and maintain rating tables. I have assisted various water users during the past year with calibration and rating of individual measuring device structures. Much of my efforts have been limited to spot measurements to verify that certain non-standard devices are providing measurements within IDWR's +/- 10 percent acceptable range of accuracy. I would be happy to assist Clear Springs with field calibrating any of its' weirs. I believe I have considered the main weirs at Clear Lake Farm as standard suppressed weirs. I would be interested though in making a current meter measurement of the weir flow and comparing it to the weir measurements.

I have noted that you also submitted measurement data for the Soda Springs Brood station. I appreciate your willingness to provide this information even though there are no reporting requirements for this area. I would like to retain this data and file it with the applicable water right files. However, I am having trouble finding the applicable water rights for your diversion. I did not find any water rights under the name of Clear Springs Foods. I probably could find the rights if I knew the source of water, but your information did not show water source.

Enclosed are new report forms for calendar year 1996. These reports must be completed during 1996 and returned to the Department on or before January 15, 1997. Please note the 1996 reporting period is from January 1 through December 31. If your diversion is for non-irrigation uses or is a year-round diversion, then you must immediately begin recording diversions, including any diversions between January 1 and the time which you receive this report. If your diversion operates for only part of the year, please record measurements for that period.

You may contact me directly at 327-7864 if you have questions about measurement and reporting. Thanks again for your cooperation.

Sincerely,

Tim Luke

r weirs in August, 1988.
l of the facility. The weirs
tgomery, Consulting
ce they were installed.

There are some flows (approximately 11 %) that do not flow through the hatchery, but rather flow around it and under it. These flows are however recorded at the weir. We established this 11% figure by comparing the weir measurements to hatchery displacement. What we did was to lower the level of the water in the concrete raceways and then allowed it to fill back up. Since we know the actual volume of the ponds, we were able to calculate the flow in the hatchery, and then compared this to the weir measurements.

The other confounding point is the water diverted to the Dunn farm, upstream of the weir. We use a Micrometer brand in line flow meter in the diversion pipe that supplies the water to the Dunn farm. This meter is placed in the pipe in the spring and removed in the fall each year. To date this meter has not been calibrated since we purchased it new in 1986, however the actual use has been rather minimal, with around 45 days use per year.

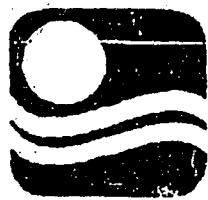

The following enclosures are provided for reference:

1. Facility map.
2. Weir measurement manual extracts.
3. 5 page packet of water flow charts and graphs.

The charts and graphs probably need some clarification. Page 1 of 5 is a chart with flows calculated from weir measurements. There are several readings through the summer months that are noted due to irrigation withdraws. This chart is probably all that is needed but it does not show actual spring flows rather just what is leaving the property.

Page 2 of 5 is the graph depicting the flows illustrated in page 1.

Page 3 of 5 is a chart showing the irrigation water leaving the property, as generated by the in line flowmeter. And the resulting flow from the spring if this water were added back to the weir readings.

Department of Water Resources

The Soda Springs Brood Station installed two 3 foot rectangular weirs in August, 1988. The weirs were constructed in two existing effluent channels at the end of the facility. The weirs were constructed to conform to dimensions provided by James M. Montgomery, Consulting Engineers, Inc.. We have taken weir measurements at least weekly since they were installed.

There are some flows (approximately 11 %) that do not flow through the hatchery, but rather flow around it and under it. These flows are however recorded at the weir. We established this 11% figure by comparing the weir measurements to hatchery displacement. What we did was to lower the level of the water in the concrete raceways and then allowed it to fill back up. Since we know the actual volume of the ponds, we were able to calculate the flow in the hatchery, and then compared this to the weir measurements.

The other confounding point is the water diverted to the Dunn farm, upstream of the weir. We use a Micrometer brand in line flow meter in the diversion pipe that supplies the water to the Dunn farm. This meter is placed in the pipe in the spring and removed in the fall each year. To date this meter has not been calibrated since we purchased it new in 1986, however the actual use has been rather minimal, with around 45 days use per year.

The following enclosures are provided for reference:

1. Facility map.
2. Weir measurement manual extracts.
3. 5 page packet of water flow charts and graphs.

The charts and graphs probably need some clarification. Page 1 of 5 is a chart with flows calculated from weir measurements. There are several readings through the summer months that are noted due to irrigation withdraws. This chart is probably all that is needed but it does not show actual spring flows rather just what is leaving the property.

Page 2 of 5 is the graph depicting the flows illustrated in page 1.

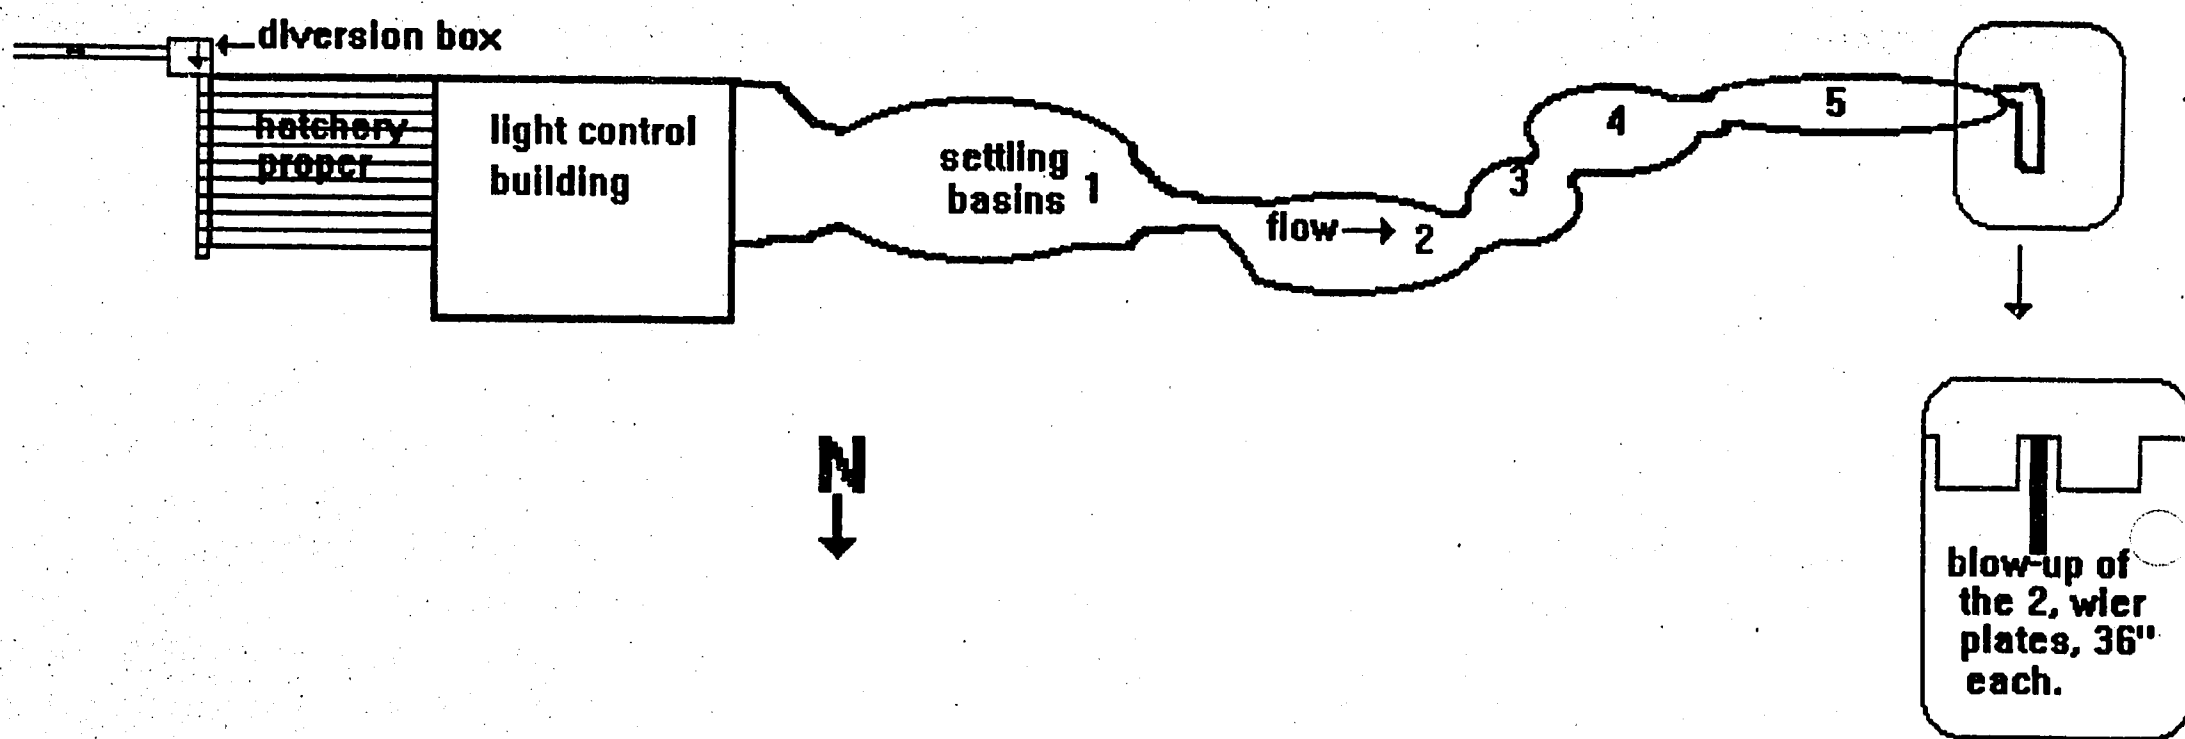

Page 3 of 5 is a chart showing the irrigation water leaving the property, as generated by the in line flowmeter. And the resulting flow from the spring if this water were added back to the weir readings.

Page 4 of 5 is the adjusted spring flow (adding both the weir measurement and the irrigation measurement).

Page 5 of 5 is the graph depicting total spring flows.

I hope that this has painted a clear enough picture of both spring flows at this facility, and our monitoring efforts. If I can be of further help I can be reached at (208) 547-2310.

RE: Update ownership information - Right no. 11-2098

Clear Springs Foods, Inc. of Buhl recently submitted water measurement reports for its diversions in Basin 36. Included with this data was the attached water measurement data for Clear Springs Foods' brood station diversion near Soda Springs. Although they were not required to submit a report for this diversion, the management did so because they wanted to be complete and make sure that all requirements were met.

I had trouble matching the correct water right for their diversion because the diversion is in Basin 11 where there is no current adjudication or means to update ownership of rights. The measurement report did not indicate the source of water thus making it more difficult to determine the correct water right.

I informed Clear Springs that we could file the measurement data with their water right file if only I knew what water right they owned. They have since sent me information about the right and asked if we could somehow update our records to show them as present owner. It appears that the correct water right number is 11-2098.

Could you please review the Clear Springs request of February 14, 1996, and add Clear Springs Foods as the present owner in our computer data base? Thanks.
