Dear Sirs:

I have at last been able to complete the information on the Application of Samuel C. Reed and I am enclosing Form No. 3 to go with the two maps as required by your office.

Mr. Reed has informed me that the water is percolating water, therefore, considered as subterranean water. There is no one particular point of diversion, as his drainage ditch is collecting the subterranean water all along the ditch.

I hope this corrected application will suffice. If a new filing fee is needed or any further information, please contact me and I shall be glad to oblige.

8. What large stream would the water here appropriated finally reach?

Remarks:

Mr. Samuel C. Reed was present during examination. He claimed larger flow of water earlier in season. Land also has ditch water. This system was installed primarily for drainage and resulted in converting a marsh (about 35 Acres) into productive farm land. The water originates from irrigation seepage. Additional plans to water Sec 4 & 5 are dropped for present & probably will not be revived on account of steep topography.

Re: Permit No. G-22608

Mr. Samuel O. Reed
Soda Springs
Idaho

Dear Mr. Reed:

Our field engineer's report on the inspection of the completion of construction work and application of water to beneficial use under the terms of Permit No. G-22608 shows that the works are capable of conveying 7 miner's inches (.14 c.f.s.) of water for irrigation of 70 acres and that the point of diversion is in the SE $\frac{1}{4}$ NW $\frac{1}{4}$ of Section 9 and the land irrigated in the S $\frac{1}{2}$ NW $\frac{1}{4}$ of Section 9, Township 9 South, Range 41 East, B.M. The record of the permit shows the point of diversion to be in the NW $\frac{1}{4}$ NW $\frac{1}{4}$ of Section 9 and lists the land irrigated in Township 5 South. Therefore, it is necessary to amend the permit and we have enclosed application for amendments for this purpose and ask that you complete and return them.

Upon receipt of the statutory fees totalling \$9.00, we will issue to you the Certificate of Completion of Works (for which the fee is five dollars) and the License and Certificate of Water Right (four dollars) confirming the right with priority of February 20, 1952, to your use of .14 second foot of water from drainage, with the point of diversion in the SE $\frac{1}{4}$ NW $\frac{1}{4}$ of Section 9, for irrigation of 70 acres in the S $\frac{1}{2}$ NW $\frac{1}{4}$ of Section 9, Township 9 South, Range 41 East, B.M.
