Dear Sirs:

Please send me two applications for Permit to appropriate the subterranean waters of the State of Idaho. with the instructions pertaining to them.

I would also like some special advice and help.

A neighbor (namely Grove M. Phelps) who borders us on our south line has dug a storage reservoir about six feet south of our fence line. much of his land south and east of this reservoir was very wet. He put drainage tile through this to drain it to his reservoir. on our property about two hundred feet north of fence line we had a good spring which we used for livestock. and about twenty acres of wet pasture. When he dug the reservoir he dried up this spring and also that field, which was too wet to plow now it is so dry it is practically useless. We cannot even utilize it for any kind of pasture because of no water for livestock to drink.

Please inform us what must be done to regain this water. We understand water for household and livestock use holds priority over irrigation water. I do not know, at least to our knowledge he has never filed for a permit for this reservoir. He obtained government aid to build this reservoir, through the A S C program.

We have five other springs about $\frac{1}{2}$ mile north and west of the above described spring. This water percolates through the wet pasture and is used for the watering of livestock. sometimes some of this water has run through our fence and has been used by the neighbors adjoining for irrigation purposes. We want to develop these springs for irrigation purposes as well as for livestock use. We want to develop the heads of the springs and build a reservoir to catch the spring run off and catch the run off from these springs for irrigating. This water does not run in a well defined ditch channel. It has grass growing in the entire channel except about twenty feet ~~just~~ just before it goes into the irrigation ditch on Grove M. Phelps's fence due to back up water when the irrigation ditch is full enough to make it back up there.

He informs us this water belongs to him because he has used the run off for a number of years. The past two years it has not run even to this fence line. According to two lawyers we have talked to he has to give us back water for livestock use in the south

30865

south field. and that we should be able to develop and store the water and utilize it from these other springs as long as we are able to do this before it gets into a well defined ditch channel.

We would like to file on these springs for this purpose , also for a well to be drilled for the same purpose.

Please give us whatever information you can that would help us to accomplish these projects with a minimum of cost to us. Let us know if this information is correct and if this is the proper procedure. Are we entitled to develop and use the water from these springs if we develop them?

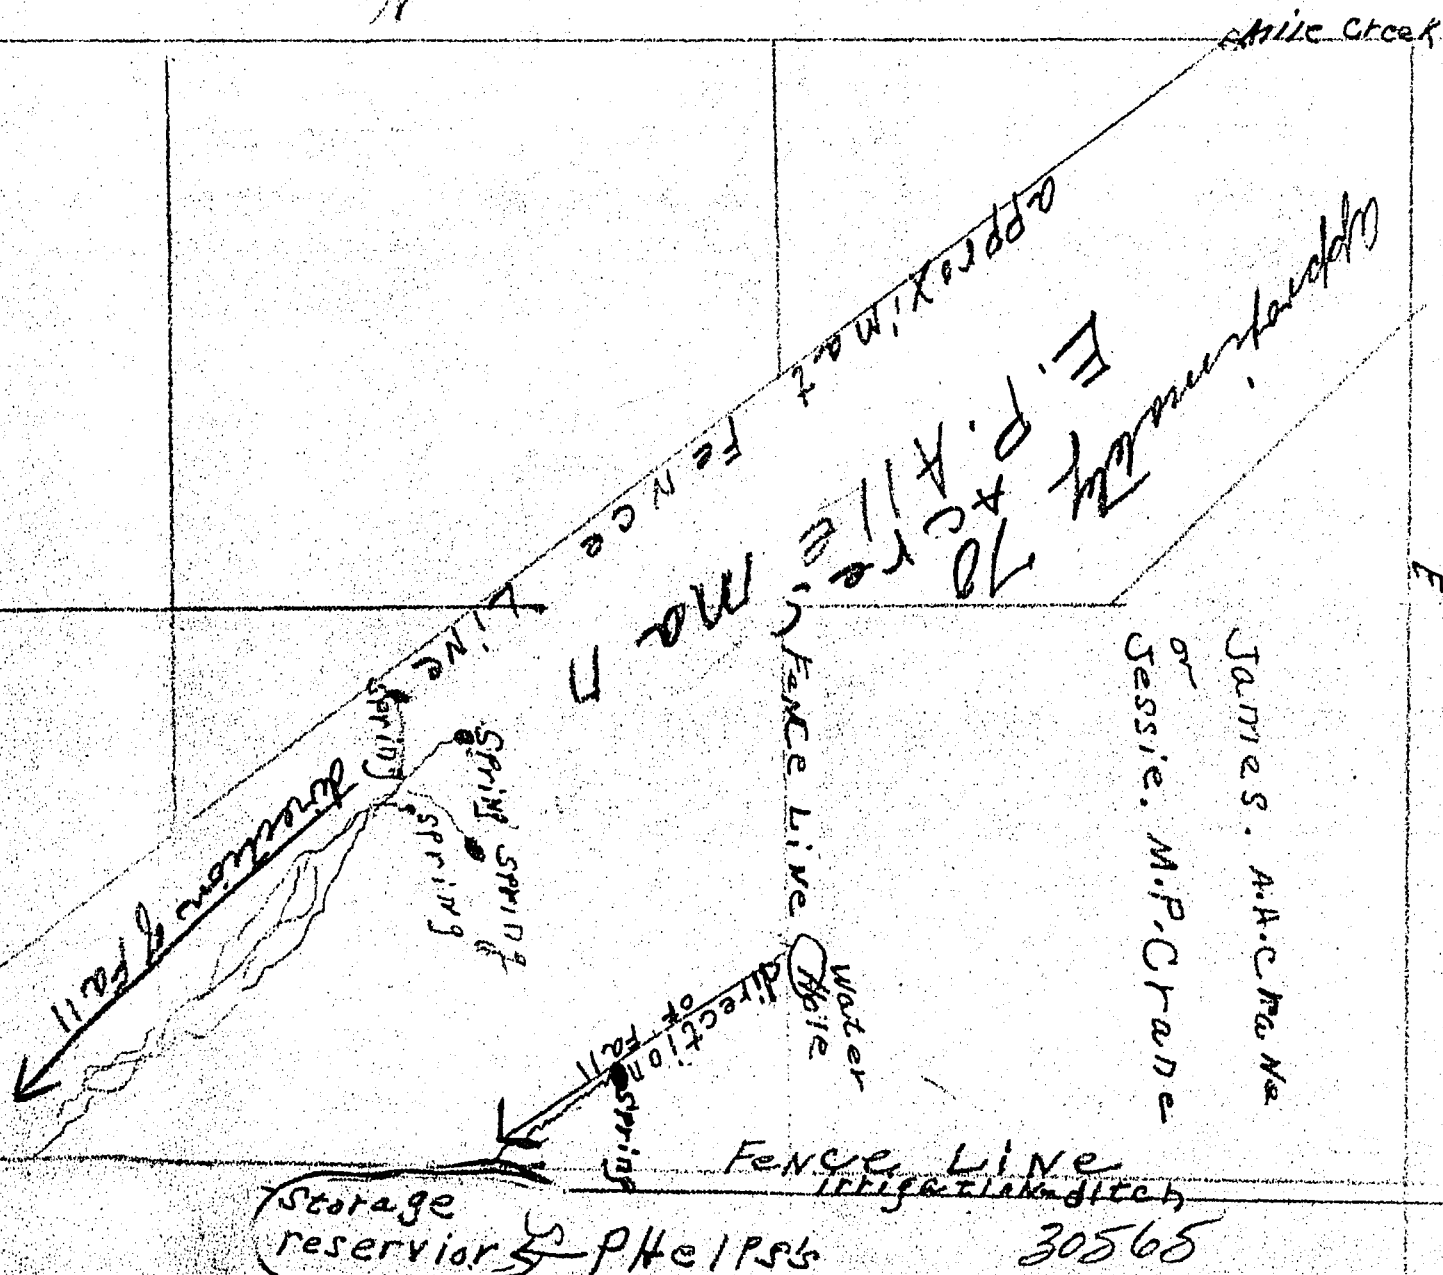

Sincerely

Edgar P. Alleman

RE: Application for Permit

Edgar P. Allenman
Bennington, Idaho

Dear Mr. Allenman:

Your letter of March 12 asks some very legal questions which can only be answered in general.

The State Statutes provide that any one can divert any unappropriated water. When your neighbor dug his reservoir, he apparently dried your spring and thereby took water which you had been using.

The neighbor has been using water running on to his land from your other springs which he is entitled to do as it had escaped from your control. I would not attempt to say how much right he has to that water.

Generally speaking, any water developed by draining wet ground belongs to the person who dug the drain and several District Courts have issued decrees for such water which was declared to be independent of the stream flow.

If you drill or dig a well at or near your group of springs you will probably dry the springs, especially if you pump the water from the well.

Your attorney should be able to give you much better advice than we can as we do not know the conditions on the ground.

We enclose two application forms, one for surface water and one for subterranean water.

Very truly yours,

Re: Permit No. 30565

Date:
May 1, 1967

Edgar Peter Alleman
Bennington, Idaho
83219

Dear Mr. Alleman:

Under the terms of your Permit No. 30565 you are required to make proofs of completion of works and application of water to beneficial use on or before **July 12, 1967**

Before this proof can be made, the statutory requirement is that a notice of your intention of proof be published once a week for four consecutive weeks in a newspaper in the county.

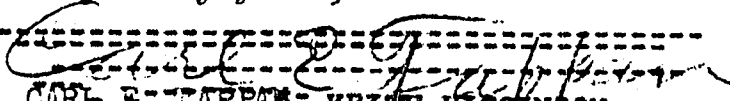

We enclose Form 36-A in duplicate, which is to be filled in and returned to this department at least forty (40) days before the above mentioned date and/or before the time you intend to make proof (this may be at any place that is convenient for you and your two witnesses), the quantity of water, for what purpose it is used, the point or points of diversion and the location of use, or lands which are irrigated - - by legal description. Descriptions should be taken from your Permit, including any amendments thereto, as recorded in this department. If changes have been made and no amendments are on record, we advise that you request a form for this purpose before your notice is published, or you may have to readvertise and complete another set of proof forms.

Also enclosed is Form 11, which is the authorization for us to have the notice published in the designated county newspaper, at your expense. This is to be returned with Forms 36-A

At the time we send the notice to the newspaper we will send you the forms for the depositions of holder and two disinterested witnesses. It is important that the depositions be executed at the time, on the date set, and at the place named, before the Notary Public as advertised in the publication notice.

The amount of water allowed in a license cannot be more than is actually produced and measured and put to beneficial use, and cannot be more than the statutory amount allowable per acre of land actually found by the field inspection to have been irrigated at the time of proof.

Re: Permit 30565

Edgar Peter Alleman
Box 240
Bennington, Idaho

Dear Mr. Alleman:

Returned herewith are the depositions of holder and witness and affidavit of permit for the above referenced permit. These depositions are being returned as unacceptable.

Please be advised, the Attorney General of the State of Idaho has ruled that a permit must be advertised correctly for four consecutive weeks in order that the proof of application of water to beneficial use be acceptable. Whereas, the notice of publications forms 36A and 11 were submitted to this office on May 5, 1967, showing Warren G. Wright as notary public to whom protestants could appear to submit protest on the above referenced permit and before whom you were required to appear to complete the notarized depositions. As Mr. Wright was one of the witnesses for the depositions and not the notary public, you will be required to readvertise your permit for four consecutive weeks and submit new depositions on permit 30565.

We are enclosing a completed notice of publication form 36 and form 11 which you are requested to sign and return promptly to this department so that we may proceed in readvertising this permit at your expense.

Please contact us if you have any questions on the matter.

Very truly yours,

Donald W. McEldowney

Gentlemen:

Re: Permit 30565

Referring to above captioned permit under date of June 13, 1967
by way of explanation -

At the time these depositions were first processed - Mr. Wright was a Notary Public - however, since that time his Commission had expired and he did not renew same - thus the difference in Notarys. Gertrude McCart is Mr. Wright's Secretary, having been commissioned a Notary in his stead, and she notarized these papers. In view of the above explanation, could the original depositions be processed or must we start at the beginning, and advertise again, etc. Thank you kindly for advising.

WATER RIGHT LICENSE

License of Water Right No. 30565/11-2129 Priority July 3, 1962 Amount 0.3 cfs

THIS IS TO CERTIFY, that EDGAR PETER ALLEMAN
of Bennington, Idaho, has complied with the terms and conditions of Permit
No. 30565/11-2129 issued pursuant to Application for Permit dated July 3, 1962,
and has submitted proof to the Department of Water Resources on June 9, 1967,
that he has applied water to a beneficial use; an examination by the Department indicates that the works have a
capacity for the diversion of 0.3 cfs of water from springs & seepage,
tributary to _____, and that the permit holder has applied to a beneficial use and
established a right to use water as follows:

Beneficial Use	Period of Use	Rate of Diversion	Annual Volume
<u>Stockwater</u> from <u>Jan. 1</u> to <u>Dec. 31</u> at <u>0.3</u> cfs and			<u>2.0 acre feet</u>
<u>Irrigation</u> from <u>April 15</u> to <u>Oct. 15</u> at <u>0.3</u> cfs and			<u>87.0 acre feet or</u>
			<u>3.0 af per acre</u>

(both dates inclusive)

Subject, however, to the condition that no more than 0.3 cfs of water be diverted at any one time, and
that the amount of water so diverted and to which such right is entitled and confirmed is for the purpose
aforementioned and is limited to the amount which can actually be beneficially used and shall not exceed
89.0 acre feet per year, said waters to be diverted within the NE $\frac{1}{4}$ NE $\frac{1}{4}$ of Sec. 17,

Attention: B. Keith Higgins, Director

Dear Sirs,

I am writing in regards
to permit no. 11-3129

In June or early July of 1974
One of the water examiners was
here.

We at that time were in the
the process of installing a sprinkler
irrigation system on part of our
land.

In as much as my husband
had recently passed away and I
have undergone open heart surgery
we were not operation under
this permit at that time.

And when the system being
worked on in 1974 is completed
there would be only 40 acres
for which water would be available.
Leaving 29 acres which I still
need this permit to accommodate.

I was informed by your
examiner that he felt enough
labor, accomplishment and
supplies had been done to
warrant the permit to be
finalized. That I should receive
the same in about two weeks.

As to date I haven't heard
anything concerning this. Will
you please inform me as to
why I have not received same.

I am very desirous of obtaining
this permit; insuring water usage
as I am able to utilize it.

I have pump, sprinkler pipe
and rebarbed to use in dams
constructed for storage.

Please advise me about
this matter so I may be
better able to make plans for
the future.

I am not willing to relinquish
rights to this water which
rises on my property.

Thank you very much.

May I have a prompt reply.

Sincerely,

(Mrs) Edgar Guter Allenman
