Dear Mr. Pugmire:

Your Claim to a Water Right No. 11-4030 has been forwarded to this office for processing. During this processing I have noted several items which are not complete on the claim as it has now been filed. Enclosed is a copy of the claim that you filed and a blank claim form which can be used to amend the original claim. The following items need to be expanded upon:

1. Two points of diversion are listed, but you state that only one spring is being used. Are there two points of diversion along the channel from the spring, or is the spring located right on the line between the quarter sections you have shown?
2. To develop a water right, it is necessary under Idaho Law to both divert and beneficially use the water. You have indicated a beneficial use, but you have not indicated the method of diverting the water. Item #4 on the claim should be filled out showing how water is physically diverted. Simply allowing livestock to drink from a naturally flowing spring channel is not normally considered to constitute a diversion.
3. The place of use should be listed to the nearest 40-acre subdivision. This could be listed under Item #5a with irrigation crossed out.
4. Any supporting statements must be notarized. Thus, you should have Mr. James Bunderson complete his statement on one of the attached blank affidavit forms and have it notarized.

If you will make the above suggested changes to your claim and have it notarized and return it to us, we will be happy to continue processing it. No additional filing fee is necessary.
